"The Florist's Trap"

MOREHEAD

**The Remedy for
Your Condensation
Troubles.**

**A Guaranteed
Investment With
Guaranteed Results.**

STEAM TRAPS

RETURN.

NON-RETURN.

VACUUM.

YOU. Mr. Florist, can save fuel—cut down labor—and grow better flowers by installing a Morehead Return Steam Trap.

In the first place, there is only a few degrees difference between the steam going into your heating system and the water of condensation coming from the returns. It is very foolish, therefore, to cool this water down to a low temperature to pump back to the boilers when, by the use of the Morehead Steam Trap, the same water of condensation can be returned directly to the boilers at a very much less expense than by any other method and without losing any of the heat contained in the condensation.

In the first place, to make steam from water, fuel is required to bring this water to the boiling point under the required steam pressure.

For every ten degrees added to the water by any other means, there is a saving of 1% on fuel.

You can readily see that the cooling of the condensation from 250 degrees down to 212 or less, to accommodate your pump means a considerable loss of heat, fuel and money.

MOREHEAD Return Steam Trap will put this water back into your boiler at a still higher temperature than 250 degrees, and on 90% less steam required by a pump for returning the same quantity of water.

You then have a combined return trap and boiler feed outfit that will prove out to be one of the best investments you ever made.

Write for "Trap Book" and Trial Offer Proposition.

MOREHEAD MFG. COMPANY,

Dept. "N," DETROIT, MICH.

HEATING PLANTS

Standard Steam and Hot Water Heating Plants

WONDERFUL VALUES. We can positively save you from 30 to 75 per cent on Heating Equipment of all kinds. Our plants are of the most modern type, and only the highest grade material enters into their construction. We guarantee them to be exactly as represented, and highly satisfactory in every way. You run no risks. Send us a sketch or diagram of your building and let us make you an estimate.

Do Not Wait Until Cold Weather to Install Your Plant. Start Now

Send for our Special Heating Catalog, filled with valuable information; tells you every angle and phase of the "Heating Question," and how you can make one dollar do the work of two by installing the plant yourself. Ask for Booklet No. 47.

300,000 feet of Standard Pipe, all sizes, will be cut to any length.

BUILDING MATERIALS AND SUPPLIES

Send for our new 500-page Catalog No. 47. Free upon request.

BOOKS FOR FLORISTS

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send prices quoted and we send the books.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.

STEAM HEATING FOR BUILDERS (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. \$2.50.

CHRYSANTHEMUM MANUAL (Smith).—By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.

HEDGES, WINDBREAKS, ETC. (Powell).—A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.

DWARF FRUIT TREES (F. A. Waugh).—Their propagation, pruning and general management, adapted to the United States and Canada. It has 45 illustrations and 123 pages. 50 cents.

HEATING AND VENTILATING BUILDINGS. (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. \$4.00.

CELERY CULTURE (Vaughan).—The important subject of celery culture is thoroughly covered in this illustrated pamphlet of 59 pages. The florist raising young plants of celery and those who grow the plants to maturity will alike find it valuable. 50 cents.

CABBAGES, CAULIFLOWER AND ALLIED VEGETABLES (Allen).—The requirements of the important vegetables of the cabbage tribe are given here very fully. The book also contains interesting chapters on seed raising, insects, pests and fungus diseases common to these plants. 50 cents.

THE CULTURE OF WATER LILIES AND AQUATIC PLANTS (Henderson).—Growers of hardy and tender water lilies and other aquatics will find this an excellent guide in cultural and descriptive matters. The lists of varieties have been very carefully prepared. Handsomely illustrated. 50 cents.

EVERYBODY'S PAINT BOOK (Gardner).—The author has given in this book easily understood instructions for painting anything from a board fence to a fine room and so well is it illustrated that almost every tool a painter needs is shown and described. The perusal of this book will save much money to those who have a bent for this kind of work. It contains 180 pages. \$1.

THE ALLIED TRADES

Illinois Miners Gaining.

Chicago.—The prediction contained in this column last week that coal operators in the Illinois field were losing ground in their controversy with the miners' union officials, and that individual operators would break away piecemeal from the governing body, is come true.

Several of the mining concerns, being hard pressed to cover their obligations in the matter of coal contracts, and not caring to undergo further financial losses by keeping their mines inactive, have signed the demands of the Illinois miners, as promulgated by the Peoria convention. The following coal firms signed the agreement: Marion County Coal Co., Centralia; West Virginia Coal Mining Co., Marion; Girard Coal Mining Co., Girard; Girard Collieries Co., Virden; Galatia Coal Co., Galatia; Tice Coal Co., Tice, and the Acme Coal Co., Streator. Two companies in the preceding list are members of the Illinois Coal Operators' association.

President Walker of the United Mine Workers' Union of Illinois is quoted as saying that the strike will be ended in a short time. On the other hand, the Illinois coal operators say they are determined to fight this matter to the last ditch. W. P. Rend, one of the heaviest operators, at a recent meeting, suggested a possible means of ending the trouble by requesting President Taft to step into the fight and lend his aid toward ending the conflict. Former President Roosevelt was appealed to, too, but Mr. Roosevelt is occupied in other directions at this time and could not see his way clear to entering into this trouble. From a document emanating from the officials of the Illinois coal operators, we quote the succeeding: "There still remains 136 association operators that have not signed with the miners, employing approximately 51,529 men and representing an annual tonnage of 35,000,000, or over two-thirds of the entire tonnage of the state. The operators who continue to resist the demands of the strikers average a yearly production of 265,000 tons. There never has been so few defections in any previous strike of long duration. Our position is strongly supported by both the railroads and the larger manufacturers consuming Illinois coal, and no pressure has been brought to bear upon the operators by any such interests to terminate the fight against the strikers."

HARRISBURG-FRANKLIN COAL CO.

Fisher Building, CHICAGO.

The Better Grades Only of

INDIANA AND ILLINOIS COALS

Preparation and Quality as They Should Be.

We Make a Specialty of Supplying the Florist Trade

Miners and shippers of the following grade of coal:

**Sunshine,
Indiana Brazil Block,
Pocahontas,**

**West Virginia Splint,
Youghiogheny and
Southern Illinois.**

Write us for names of satisfied customers, both as to quality and service, who have used our coal for the past five to ten years.

Write for our prices before placing your contract.

Phone Harrison 4108.

R. C. Whitsett Coal & Mining Co.,

**355 Dearborn Street,
CHICAGO.**

An official prepared a list of 21 of the larger coal companies of the state whose officials pledged themselves by signing indemnifying bonds to remain firm against the demands of the miners. These concerns produce a total of 17,500,000 tons of coal annually, and include the O'Gara Coal Co., the Madison Coal Corporation, the Spring Valley Coal Co., Peabody Coal Co., Big Muddy Coal and Iron Co., and the Coal Valley Mining Co.

Important Change of Officials.

Through the resignation of W. J. Cook from his official connections with the Berwind Fuel Co., Berwind-White Coal Mining Co. and the F. G. Hartwell Co., some changes of considerable moment took effect September 1. The positions of secretary and treasurer left open through Mr. Cook's resignation fell to Victor R. White, the efficient official of the Berwind-White Coal Mining Co. Mr. Cook's resignation also necessitated a number of changes in the F. G. H. Hartwell Co. E. J. McQuid, who has been with the company many years, becomes manager.; Lee A. Spindle, treasurer, and Wm. E. Proctor, Jr., secretary.

Want Joint Rates.

Washington, D. C.—Refusal of the Pennsylvania railroad and the New York, New Haven & Hartford railroad to establish through routes and join the rates on coal shipped from the Allegheny field in Pennsylvania to New York and New England points, via Jersey City, is made the burden of a complaint filed with the interstate commerce commission by the Bader Coal Co. of Boston, Mass. It is requested that the defendant lines be required to establish through routes and joint rates on Allegheny coal to all New York and New England points.

Greenhouse Building.

Eugene, Ore.—Misses Ida and Harriet Patterson, one conservatory 40x130 feet.

Batavia, N. Y.—L. C. Stroh & Son, two greenhouses, one 25x100 feet and the other 25x133.

Watervliet, N. Y.—J. G. Zimmerman, rebuilding greenhouse.

Allentown, Pa.—Ernest Ashley, two greenhouses, 21x125 feet.

Caldwell, O.—Reisling Bros., three houses, 20x75 feet.

Baltimore Notes.

Now that the next convention of the S. A. F. is to be held in this city everybody is interested. Aside from local influence, we can say that Baltimore has the large heart and open hand that welcomes all strangers and visitors who are respectable. Being just on the line between what was formerly the north and the south, Baltimore possesses that fine sense of southern hospitality, with enough of the Yankee caution to preserve an even balance. However, there is no longer any north or south, we are all one people, therefore, the convention of 1911 at Baltimore, so far as we can see at this writing, will be a record-breaker and you may be sure that the orioles will handsomely do their part. Business is rather quiet, though not more so than in former years at this season. Some of the dealers say that, all things considered, it has held up wonderfully well. The weather has been hot and dry and many good customers of the retail stores have gone on vacations. Even among the dealers, many of the heads of firms are reported absent.

It is pleasing to visit a man who has lived well and accomplished something. Such a one is the veteran florist, John Cook. He says he is 75 years old but, if he had not already established a reputation for truthfulness, nobody would believe him, for he does not look it. After a sojourn in Florida and Cuba he now looks hale and strong and is taking a great interest in his seedling roses, a number of which look very promising. It will be recalled that Mr. Cook was the originator of My Maryland and other good roses and we trust that he may long be spared to continue his good work. He has a fine home and well kept range in the suburbs. His store on North Charles street is managed by his capable daughters.

John J. Perry, manager of the Florists' Exchange, is very well satisfied with the condition of business for this season of the year. The Florists' Exchange, as a wholesale market, is one of the established institutions of Baltimore and, while Mr. Perry does not talk about it, we have learned from other sources that he is largely responsible for its success. He was at the Rochester convention and is well pleased that the next convention will be held in this city.

Mrs. Fannie R. Hill, with Samuel Feast & Sons, though not yet looking old, is entitled to be called a veteraness—let us say—in the florist business. She has been with this firm 30 years. When she was just a little tot, B. P. Critchell, of Cincinnati, taught her the florist business and she has staid with it ever since.

Edwin Seidewitz has gone on a vacation to Atlantic City. He said he might go on to New York and see his old friend, Frank Traendly. In the meantime his interests in the store are being well attended to by E. Wilton Pierce, formerly of Providence, R. I.

The Gardeners' and Florists' Club will hold their annual picnic at Bayshore Park on September 1, and a cordial invitation is extended to all florists to attend, as a good time is assured.

THOMPSONVILLE, CONN.—The cut flower establishment of D. Wm. Brainard, formerly located on Peace street, was transferred sometime ago to the site of the Brainard Floral & Nursery Co. on Springfield street. This consolidation of two departments of the business is beneficial in a great many respects.

Flowers in Japan.

To the Japanese, a flower means the whole plant, leaf, stem, stalk and roots, and in arranging flowers every part of the plant is considered of equal importance. The blossom is the chief element in the color effect, but the form of the completed arrangement is considered of equal importance with the color, and this depends on the shape and outline of the leaves and branches and the proper placing, which is regulated by pebbles and sand and bent strips of lead. A spray of foliage, according to the Japanese rule, must separate every two flowers of different

Albany, N. Y.

Among those from this city and vicinity who attended the annual convention of the S. A. F. were: Frederick Goldring, president of the Florists' Club; E. P. Tracey, Fred A. Danker and W. W. Hannell and wife.

William F. Roche, aged 25 years, manager for Fred A. Danker, 40-42 Maiden Lane, was drowned in Kinderhook Lake on the afternoon of August 23 by the upsetting of his canoe. He had gone to the lake the day before to spend two weeks' vacation and about 2 o'clock went out in his canoe. Some friends from the shore heard his cry for help and arrived on the scene in time to see him go down for the last time. Mr. Roche came from Providence, R. I., to enter the employ of Mr. Danker about three years ago. The body was recovered the following afternoon in 25 feet of water by grappling. It was taken in charge by members of Albany Lodge, No. 49, B. P. O. E., of which Roche was a member, and held to await the arrival of his two brothers, one from Providence and the other from New York. Services were held on Friday evening in Rockefeller's undertaking rooms, Rensselaer, prior to sending the body to Providence for burial. The officers of Albany Lodge, No. 49, B. P. O. E., conducted the last sad rites. As a mark of respect to Mr. Roche the Albany Florists' Club decided to postpone its clambake, scheduled for August 28, for at least one week.

R. D.

Atlanta, Ga.

The hot and dry weather of the first three weeks of August was broken on Friday, August 19, with a good rain. Outside plants and shrubbery were in a bad shape when no water could be had. Business is at a standstill now, giving store help a chance to rest. Cut flowers are coming in slow and good stock is hard to be had.

THE BUSINESS.

The condition of the cutflower market here as compared with last week shows very little change either in funeral work, counter trade or the conditions of stock coming to this market. The market is not overloaded with the higher grade of blooms of the different kinds, but it is oversupplied with the poorer specimens of asters and gladioli. Although there are some fine specimens of both of the latter flowers coming in and bring profitable prices. The quality of roses of all kinds have improved somewhat of late and good stock of My Maryland, Killarney, Kaiserin, Richmonds and Pres. Carnots are to be had in quantities. The prices have an upward tendency for the firsts. Brides and bridesmaid are beginning to come in, but are small and in very little demand. American Beauties of the new crop are shown in limited quantities and are small and short stem. Carnations are slightly more plentiful; these are from the new stock in field or greenhouses and sell well at good prices. There is a very good demand for sweet pea of a good quality but there is none of this quality coming in and what is to be had is very poor. There is also a good demand for Bachelor buttons, but the supply is very small now. Cosmos, both pink and white, are coming in and selling well at good prices. Tuberoses are very plentiful and very little demand for them. Tritomas and hardy hydrangeas are very much used in window decoration of the flower stores, but there is not much demand for them. The golden glow chrysanthemum is seen in limited quantities and is soon bought up. The demand for lily of the valley is light and the same may be said of gardenias and orchids. There is plenty of this stock in the market to supply all demands.

Green goods are plentiful and, as is usual at all times, are used where there is call for cut flowers. There is a great influx of all kinds of garden flowers and a very light demand for them. The weather for the week up to Friday morning was very disagreeable dog-day weather, with a high temperature, plenty of humidity, and no rain. The temperature took a decided change Friday morning to fair and cooler.

The storekeepers about here are anticipating a busy time next week as the convention of the Deeper Water Ways of the Atlantic Coast is to be held here and great numbers of celebrated men are coming to attend this affair. And it is expected great quantities of decorative plants and cut flowers will be used. Laurel and evergreen roping to the extent of 100,000 yards have been used so far in decorating buildings and streets.

NOTES.

The Field Naturalist Society of the city of Central Falls will hold its annual flower show next Monday and Tuesday. The details in connection with the show are almost complete and several additional classes will be in the competition. The principal matter of interest is the competition among the members for the Isaac B. Lawton silver cup, which is given annually to the member having the best and most artistic flower bed in his lawn or garden. In addition to this trophy there are the Halworth, Driver, Miller, Willoughby and Pollock prizes, each of which will prove a strong incentive for those who enter the competition for floral displays. Entries close Saturday afternoon.

The demand for cut flowers of a first class quality at the city of Newport never was better than it has been for the past three weeks. Gardenias are in great demand for society events.

Uses of Portland Cement.

A paper read by Edward D. Boyer of the Atlas Portland Cement Co., New York, before the convention of the Society of American Florists, August 16-19, 1910.

The uses of Portland cement concrete have become so general as to have become almost universal and the knowledge of its value has been so thoroughly disseminated that a paper on the subject today is very apt to be filled with repetitions and contain very little new, or of interest to the listener. I had hoped today to present to you lantern slides of our valued collection of photographs of greenhouse construction, as I believe I could more successfully entertain you in this manner than any other, but in this I was disappointed, and I, therefore, beg your indulgence while for a few minutes I endeavor to give you the reasons why concrete in greenhouse construction is so eminently superior to that of any other material.

Concrete has won its position as the building material of the future entirely on its merit. Whether in monolith, in reinforced, in stucco or any of its varied forms it is entirely fireproof, absolutely vermin and frost proof, never requires repairs and saves fuel, as it retains heat and keeps out cold. To my mind its value as a material for the construction of little and useful things is mostly from the fact that it is plastic and easily worked, lending itself to practically any design.

Concrete is a mixture of cement, sand and gravel or crushed stone in varied proportions, depending only upon the strength desired, and when mixed with water and placed to remain undisturbed, hardens into permanent stone. Good concrete does not alone depend on the cement—it is also necessary to have good sand and gravel, and by good sand and gravel I mean material free from clay, loam or vegetable matter; in other words should be perfectly clean and as a safeguard I consider it always well to wash these aggregates. Sand alone with cement makes good concrete providing the sand is a graded one, that is, from fine to coarse, and where the work is not thick, like in bench or table construction, I should consider the cement and sand mixture the best, as with the fine aggregate you are less liable to have voids in the finished work. For this class of work and for floors of greenhouses where the latter need not be over three inches in thickness, a one to three mixture will prove generally satisfactory. In foundation work or in the moulding of hot bed frames a regular concrete can be used, composed of one part of Portland cement, two and one-half parts of sand and five parts of screened gravel or crushed stone. Cinders from hard coal ash can be also used in the place of gravel or stone, but the cinders should be thoroughly washed and as free as possible from particles of unburned coal. All concrete for form work should be placed wet and spaded or puddled into place.

It is very difficult in a paper of this character to specialize as every one of you have different problems, particularly of design, confronting you or in contemplation, and I, therefore, feel that I can only cover the subject in a general way and outline the general rules for the use of concrete in construction such as you are engaged.

In greenhouse construction concrete is particularly adaptable, especially in the interior where the constant use of water tends to the very rapid decay of wood, and in consequence where wood is used as for instance in the tables or benches that contain moist earth it is short-lived and in constant need of repair. Concrete when once placed never needs repair. Water instead of damaging, improves it, and the unsightliness of rotten side-boards is en-

seven inches thick to the height required. Eight-inch square posts reinforced with four one-half-inch bars in each corner, placed at ten feet intervals will support the ridge pole.

The concrete greenhouse pictured in the same book referred to at Westwood, N. J., and of which I have a

photograph here, are of this construction and as you will note have no wood to decay or burn in their entire construction. The concrete in this instance is not particularly pleasing from the fact that care was not exercised in spading the wet concrete against the outside of the forms and by not remedying this with a mortar plaster after the forms had been removed.

The tables can be made in one member by casting in one continuous piece of concrete, or they can be constructed in parts. There is no particular advantage of one over the other, although the former is probably the cheaper. When cast in one piece two and one-half inches is the proper thickness and various concrete can be used for the purpose, and taking cost into consideration, the mixture would depend on the available aggregates.

As previously stated, my preference for this work would be one part cement, three graded sand mixture; but one part cement, two sand and four cinders if properly reinforced with wire fabric or one-quarter-inch rods about six inches apart, would serve the purpose, although more difficult for the unskilled to place and not as dense as the cement and sand mixture. The tables should always have holes or slots at the bottom to facilitate the drainage of the water. In the cases where separately molded slabs are used the cracks between the slabs will supply sufficient drainage.

Greenhouse trays for supplying the necessary amount of moisture required are most satisfactory if constructed of concrete, as they also will not rot or shrink when they become dry, and need no attention but to keep filled. They can also be easily made an attractive and decorative feature of the greenhouse. These trays can be made like the slabs for the tables, only that they should be brushed on the inner surface with a layer of pure cement mixed to a consistency of cream, immediately after the forms are removed.

Concrete cold frames or hot bed frames are also the most desirable, again because they will not rot like wood, and be absolutely permanent. These walls need not be over four inches thick with three-inch division walls for the window rests and can be composed of the same concrete mixture as for outside walls. All these foundations should be carried below the frost line.

Concrete lends itself to decorative purposes very admirably, and concrete veranda boxes for flowers and vases are very frequently seen now, not only on stone or cement houses, but also on frame. They too need not be renewed every year or two, but will last forever. In conclusion I wish to reiterate that concrete for the particular work in which the majority of you are interested is the ideal material and when you once familiarize yourself with its use you will adopt it in all your construction work.

MARBLEHEAD, MASS.—A splendid exhibition of dahlias from the Rawson Dahlia Farm was on exhibition at Shepard's pharmacy and attracted much attention. There was a centerpiece made of three parts, each round, and forming a triangle having the letters "R. D. F." in three varieties of red dahlias on a golden glow background and surmounted by two little American and Spanish flags. Among the many handsome flowers, including Old Glory and Queen Wilhelmina, were found six varieties named after the competing yachts in the Spanish-American races. The Cima, a large, bright, lemon shade, and the Harpoon, a mixture of magenta and white, while the Beaver is a large double cream white, and for the Spanish yachts the Chonta is a large white, the Papoose a large crimson and for

The "Meyer Green Silkline"

The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods, and the Mastin Whitewash Nozzle for Bordeaux mixture, Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

Garman's Antipest

INSECTICIDE AND FUNGICIDE

For the Garden, Orchard and Greenhouse

Non-poisonous and harmless to vegetation.

Kills Green Fly, Aphides, Bark Lice, Thrips Mealy Bug, Red Spider, Scale, Wire Worms, Ants and Slugs.

This is the grower's Friend. Handy to use, cheap and effective, mixes readily in water. Destroys all insect pests and keeps down filth. Circulars on application. \$1.50 per gallon. Also in quarts, half gallons and in bulk.

HALF HOUR CHAPTERS FOR PLANT GROWERS

Cinerarias and Calceolarias.

The treatment of young cinerarias and calceolarias is practically the same as regards the atmospheric conditions, both liking a cool, airy and moist house or frame and shade from bright sunlight. But the cinerarias are stronger growing than the calceolarias and easier to manage in the earlier stages, being less liable to damp off at the stem. Both are peculiarly attractive to slugs and small snails and if these pests are in a house or frame they find these plants by instinct and in a single night will do untold mischief. This necessitates the man in charge going round at night regularly with a lantern and destroying all he can find. Tops of cabbage or lettuce leaves or cut potatoes should also be laid around and examined daily. Considerable care is needed in watering the young stock and, if the atmosphere is kept moist, it is far easier to overwater than not. Light spraying overhead daily is of great assistance, and a little soot and lime should be sprinkled around the frame or bench on which they are grown.

Chinese Primulas.

Many people still prefer the old *Primula Chinensis* in its modern forms to the *obconica* varieties, and there can be no doubt that it makes a finer looking plant, though it cannot compare with *P. obconica* as a genuinely useful market plant. The old idea of a pyramidal plant will be spoilt if the advancing center spike of bloom is taken out, but a far finer specimen from a market grower's point of view will be produced. It is early yet to speak of this, but it will not be long before the spikes appear in the earliest potted plants, and in order to get all the growth possible into them the spike should be pinched out before it begins to lengthen. Soon after this the plants will be ready to go into their flowering pots, using a compost of good light loam, sand and well dried cow manure. A liberal admixture of leaf mould is an excellent addition if it is at hand. Plants

that are to be sold in small pots or used for decoration should not, of course, have the center spike removed, as this one makes a far better and more symmetrical specimen than the succeeding spikes. These plants will not be so forward as the others and many growers will be potting them into 2-inch now. The same treatment is suitable for all, a light, well ventilated house or frame, with shade from bright sunlight and ample water. In potting see that the crowns are not buried on the one hand or left so high that they swing about. The soil should come just high enough to support the plants without any other assistance.

Sowing Cyclamen Seed.

From the middle of August to the middle of September is generally recognized as the proper time for sowing cyclamen seed. Seed sown much earlier than this results in plants that flower prematurely and irregularly, while later sown plants are not usually on time for Thanksgiving the following year. At least 15 months should be allowed to produce the large, healthy specimens that are needed by present day market plant growers and every week of the time has to be made the most of if the best results are to be attained. For many years we have taken the trouble to dibber the seeds of cyclamen in singly at about an inch apart in the flats or seed pans and we have no intention of departing from this custom. It allows of the plants being left in the seed bed until one or two of the character leaves and a number of roots have been produced and such plants can be potted more easily and will not check like plants that are crowded in the seed bed and have to be shifted when only in the seed leaf. In sowing the seed use a dibber with a shoulder on it about one quarter of an inch from the blunt point, as this will insure their being all at the right depth. Place the flats in a temperature of about 60° at night and water moderately, covering the surface with paper or moss until the seeds begin to germinate.

Bedding Geraniums.

The abnormally dry weather during the first growing months for the stock plants of geraniums has resulted in their being smaller than usual at this time, but the recent rains have started them growing and if there are no signs of frost for a few more weeks they will rapidly make up the leeway they have lost and there will be plenty of stock. We usually root a great percentage of the stock outside in August, but will have to depend upon inside rooted cuttings this year. The stock should be in better condition than usual owing to the continued sunshine ripening the growth well and growers will have an excellent chance this year to take their cuttings just at the right time before they get too soft and green. There is a correct condition of the geranium wood, well known to experienced growers, but difficult to describe, when it roots easily, freely and with certainty, hardly a cutting missing out of thousands. A degree or two harder or softer and they will not root nearly so well, while there will be more loss even with the best of care. Although the statement may perhaps meet with opposition we are convinced that more geranium cuttings are lost through being kept too dry in the earliest stages than too wet. The cutting dries out, the cells lose their power of taking up moisture, consequently the cutting damps off, though the primary cause is too little water. Cuttings in the right condition can hardly be overwatered for the first week or two and, if in the open, they should be exposed to the full sun. Under glass little shading is needed, of course, but it is easy to overdo it and the more light and air allowed as soon as roots are formed the better. When cuttings are very green and the weather is dull, it is safest to rub off the little bract-like processes on the stems before inserting, as these often decay and start the cuttings damping off. When the root is firm and the weather good it is not worth while.

Benched Boston Ferns.

Where young stock was planted out early in the benches and was to be removed to make room for winter stock, the plants should now be potted and will make fine stock for early sales. It pays to put careful men at this work and allow the proper time for carrying it out. Only lift as many as can be attended to in an hour or so and have them laid carefully in flats to be taken to the potting bench, keeping as much soil as possible on the roots. They should be selected according to size and given pots that they will fill or furnish easily. Too small pots will starve the growth, while if placed in pots too large they never look well. For the first couple of weeks after potting keep the plants rather close and in a moist atmosphere, gradually inuring them to the usual temperature and atmosphere of a well ventilated house.

NEW YORK, N. Y.—The International Floral Association was incorporated here to do a general horticultural and floral business, capital stock, \$50,000; incorporators: P. Armitage, J. M. Betts and A. H. Montegriffo, Jr., all of New York city.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

With the Chicago Retailers.

Summer dullness prevails in the Chicago retail stores, so many of the usual patrons being either out of town or not entertaining to any extent. But with it all there is more business doing than usual at this season and every one is satisfied with the amount of the turnover. Many are taking advantage of the dull time to clean and repaint the stores in readiness for the fall business which promises to be good. Conventions of various kinds have made a remarkably good sum-

very good here and altogether Mr. Mangel reports an exceptional summer business. H. C. Rowe also has a run in good funeral work and carries this out in his own excellent style.

Calling on the Bohannon Floral Co. we found Mr. Bohannon had not returned from his vacation, but everybody around the store seemed busy. A. Lange was making an excellent display of all the popular, seasonable stock and his help are returning from their vacations. T. McAllister reports a very pleasant time in Pittsburg and Uniontown, Pa., Cleveland, and other cities. Miss Olson, the bookkeeper, here, daughter of Mons Olson of the Poehlmann Co.'s force, has gone for

BASKET OF EASTER LILIES AND WHITE HYACINTHS.

By Andrew McAdams Chicago.

mer's business generally and all are looking forward with perfect confidence.

John Mangel, of Monroe and Wabash avenue, certainly deserves the greatest credit for keeping his windows in first-class condition and he always draws the crowd. Last week he had a magnificent wreath of the choicest water lilies and hydrangea paniculata, the great billowy masses of hydrangea forming an ideal setting for the water lilies which were certainly superb. A large crowd was attracted daily both to this and the elegant stock displayed in the other windows. The wreath was surrounded with choice crotons, elegant stock well colored. Funeral work has been

a western trip, taking in Pasadena, Los Angeles and other California points. Funeral work has been very good here of late.

Ganger & Gormley, while admitting that trade is dull just at present, say they have had the finest summer's business of their career, beginning well with June weddings and keeping up right along. Lubliner & Trinz were showing good stock of asters, gladioli and other choice flowers and said business was keeping up well. At the Fleischman Floral Co.'s store on Jackson boulevard, cleaning up was in progress but so thoroughly were the decorations in this store carried out that but little in the way of renovating is ever required, washing off be-

ing about all that is necessary. Mr. Rubel states that the trade in orchids is constantly increasing here and at present, at least, he is not able to obtain all they can sell locally. But the eastern stock shipped in is not nearly as satisfactory as the local flowers.

A Suggestion for the Table.

No way of decorating a dinner table if oval or circular can be prettier than ornamenting it with a handsome arch, which is, moreover, by no means difficult to arrange effectively. The size of the arch itself must, as a matter of fact, be proportionate to

tistically. The fine large water lily with the cactuses and leaves of the lily for the edge make an odd setting for the space below the center of the arch. At either end bank small miniature ferns—a few fronds of maiden hair fern could be used to give it a touch of daintiness. A pink water lily is placed in a tube of water arranged in wet moss and tied with a pink ribbon made of a chiffon shower for each guest.

The arch made of passion flower vines with a low, flat, oblong basket beneath is effective for sadness. Red geraniums can be used effectively as

of the arch. Small tendrils can be extended from the center of the arch and dainty touches here and there of asparagus making a very handsome setting.

A. E. KLUNDER.

Lilies for the Home Garden.

Concluding portion of a paper read before the Massachusetts Horticultural Society by E. S. Miller, Wading River, N. Y., March 12, 1910.

Many lilies cannot stand our hot dry summers, coming from cool, moist ravines or mountain sides, borders of streams, or other places where the drainage is natural and perfect. To succeed with such, we must imitate nature. Aesop told the gardener of his master, Xanthus, that: "The earth is step-mother to those plants which are incorporated into her soil, but mother to those which are her own free production." This may be the reason why our own native species are capable of withstanding the severity of our winters, while those from foreign countries are not.

The late Peter Hanson of Brooklyn, for whom our beautiful Hansonl was named, was one of the most successful growers in this country, growing from 1870 to 1885 all the varieties known at that time. He planted them in properly constructed rock-works where they had moisture and shade for the bulbs, thus imitating their native habitats. I visited him one summer morning at 6 o'clock, his only leisure time, and saw his success with many varieties which baffled the skill of others.

The late Peter Barr, when visiting this country, insisted that we should cover our lilies with lath shades. This is good for varieties which cannot stand our dry, hot days of summer, but there is no need to do it with *speciosum*, *tigrinum*, *elegans*, *Bateman-niae*, and *auratum*, in field culture, as we have grown them successfully without artificial shading, with the two-horse cultivator thoroughly and often stirring the soil, supplying and conserving the moisture where needed. The amateur has to accomplish this by other means as did Hanson and others by mulching and shading. I have found excelsior an excellent mulch, using it thinly on seed beds, and thicker on older stock; it is neat and clean; weeds can be easily removed or it can be taken off while the weeds are pulled and the soil stirred and then replaced. Coarse manure, peat, cocoa fibre, leaves, etc. may be used. A common practice among amateur cultivators is to plant lilies in shrubberies, with good results. Care should be exercised in selecting a good location for the lily bed to have it well drained, for no lilies can thrive in ground that is water soaked. Even those growing in swamps or on the margins of brooks are found growing in the surface soil, above the water or often in the sphagnum where the medium is aerated. Lilies in their native habitats grow in a variety of soils. It doesn't matter so much what the soil is, so long as there is the requisite amount of moisture and plant food during the growing season, and perfect drainage at all times. This is a very important matter and if not attended to, failure is inevitable.

Our Long Island soil is naturally drained, but where this is not the case care should be taken to plant where water will not settle or where the bulbs

A BRIDAL BOUQUET OF LILIES.

the size of the table on which it is to be placed, and the size having been determined, next comes the material of which the arch is to consist. This should be strong wire, stiff enough to keep its form without bending, and each end should be inserted in a piece of iron or lead in the form of a large flat weight which forms the stand. These supports should each be placed in a circular zinc pan and packed with wet green moss. The zinc pans should be painted green.

The next to be considered are the creepers with which the wire arch is to be covered. Of this class of plants there is such a variety that it would be impossible to enumerate all that are suitable for the purpose. Place two pink cactuses and water lilies in a low, flat dish, arranging them ar-

a border for the oblong basket to give it a touch of brightness—even the yellow pansy can be used attractively—that is the small variety bunched would be attractive. Scarlet cactus blooms and trusses of *stephanotis* should be placed alternately with a touch of *Spiraea Japonica* and ledges around the edge; resting on the table should be fronds of maiden hair fern. Scarlet begonias and maiden hair can be used effectively in this arrangement with a touch of lily of the valley if a trumpet shape vase is to be used in connection with the lower flat arrangement.

This idea can be greatly elaborated on; take for instance orchids—the cattleya—using the small white orchid for the arch and banking the growing orchids at the base of each side

may be kept comparatively dry when at rest. If water settles about the bulbs it will either rot them, or when freezing will disintegrate them. This may be obviated by planting on side hills or in raised beds. Hanson's system overcame all difficulties along this line. Any soil that will grow good crops of other flowers or vegetables will grow good lilies, if plenty of fertilizing material is used. Much difference of opinion exists on this point. Some advise stable, some cow-manure; others neither, using peat or leaf mould alone; and some advise commercial fertilizers. We use a compost of vegetable matter and animal manures, making up the pile in winter, and using it the following fall, turning it well in the meantime. It is thoroughly rotted and would nearly all pass through a sieve of one-inch mesh. We find we can use this on all lilies, even seedlings and sets, plowed in for the large bulbs and forked in for the beds of sets and seedlings. We use it also for top dressing and mulching in summer. I think the commercial fertilizers containing the various elements of plant food are beneficial if thoroughly incorporated in the soil.

Much depends on the time and manner of planting. The best time to plant lilies is when the tops have ripened and the leaves have fallen, and a greater measure of success results if they can be planted as soon as dug, before the bulbs or their roots get dry. But this is impossible with bulbs not at hand. In the case of Japan bulbs, their season is such that they cannot ripen the bulbs and get them to us before December, when the ground is frozen. Then they have to be kept until spring, or if they are expected, the bed can be prepared and covered with a heavy mulch to keep out the frost, when on the arrival of the bulbs they can be put in on a mild day. Few bulbs are kept over winter in as good condition as they were in the fall, except in cold storage. The amateur and dealer who must keep them on hand often do not have a proper place to keep them and they come out in the spring in too weak a state, to survive more than one season. In the case of lilies from India and the Philippines it is still worse. Of importations of *L. Philippinense* arriving in July, not over 10 per cent grew and those in a crippled condition, and none survived to grow the following year. Some years ago it was stated that 70 per cent of *L. auratum* failed in England and 90 per cent in America in customers' hands the first season; but since the Japanese have allowed the bulbs to come to maturity before digging, there has been much less loss.

Lilies are often planted too near the surface in our dry climate. All lilies emit roots from the stems above the bulbs for the support of the stems, and to assist the bulb in nourishing the stem, leaves, and flowers. Now, the more vigorous those roots are the finer the growth and bloom will be. The depth should be at least three inches for the small bulbs like *tenuifolium*, *concolor*, *coridon*, and our eastern native lilies. The larger bulbs should be planted deeper, six to eight inches for tigers, auratums, *speciosums*, etc.; while *Henryi*, *Humboldtii*, *Washingtonianum*, and others

having large bulbs, from eight to 12 inches. *Washingtonianum* is found growing from 12 to 20 inches deep in its native habitat.

We now come to the subject proper of our talk, "Lilies for the Home Garden." We would find every variety of the family beautiful if we could grow them, for, quoting from the "Garden's Story," Peter Henderson says: "The lily has no poor relations, and in a general collection of species all that can be imagined desirable and perfect in floral forms will be realized. Indeed, it is beautiful in all its varied forms; and when we consider that except one or two species it is a flower with no insect pests, the lily may well be regarded as one of the greatest treasures of the hardy flower garden." The following species and varieties can be recommended, most of which are too

Branching Lily.

well known to need any description:

L. candidum.—The Madonna or annunciation lily. The white lily has always been a favorite. It has been the theme of the poets, the model of the painters, and the symbol of purity.

L. Chalcedonicum.—The scarlet martagon or Turk's cap, said by many writers to be the "lily of the field."

L. martagon, *album*, and *Dalmaticum* are attractive and beautiful when well grown. These three species are of easy culture and thrive if left undisturbed; they have been in cultivation over three centuries.

L. excelsum (*testaceum*), a cross between *candidum* and *Chalcedonicum*, is worthy of a place in every garden. It inherits all the good qualities of both parents.

L. Auratum. The hill lily and varieties are grand members of the family and well repay any care bestowed upon

them. These, with the *speciosums*, delight in peat. The type is well known and appreciated. Conspicuous among the varieties are: *Rubro-vittatum*, *Virginalis*, *Wittei*, and *Platyphyllum*. One of the finest of the auratum varieties, *Parkmani*, raised by Francis Parkman of Boston, is almost lost to cultivation in this country. Hardly less grand and beautiful are the various forms of *speciosum*: *Rubrum* or *Roseum*, and *Album* are the common varieties, but equally easy of culture are the finer ones: *Melpomene*, *Magnificum*, *Krackeri*, and *Opal*. Many of the type of elegans, which now includes *Thunbergianum*, are of the easiest culture, thriving in any soil and under difficulties which would be death to some lilies. The sturdiest are *Robusta*, *Leonard Joerg*, *Bicolor*, *Atroroseum*, *Aurora* and *Midnight*, *Alice Wilson* (lemon colored, broad-petaled, one of the handsomest of the group), *Wilsoni* (the tallest and latest to bloom, apricot tinted with purple spots). The most beautiful of all is *Prince of Orange* (a spotted form of a soft, pleasing buff tint, very dwarf) and *Peter Barr*, a new and beautiful orange spotted form.

The lily most frequently seen in old gardens is the tiger lily. It will grow and thrive under any amount of neglect; in fact, it is naturalized along roadsides in many places on Long Island. In addition to the type, the variety *splendens*, with taller stems and larger flowers, and the form with double flowers are showy and worthy a place in our gardens. The coral lily of Siberia, *L. tenuifolium*, is a graceful and showy lily, blooming from the middle to the last of June. It grows from one to two feet high, with six to eight flowers, about two inches across, coral red in color. *Lilium Batemanniae* is a sturdy grower, with upright cup-shaped flowers, pure apricot color. A white lily with upright flowers is unknown.

In 1889 Dr. Henry sent from China to Kew Gardens, a new lily which flowered that summer and was named *Lilium Henryi*. It is similar to the *speciosums* and is popularly known as the yellow *speciosum*. Although it has been cultivated for 20 years, it is yet rare and high in price. It is very hardy, thriving where *speciosums* and *tigrinus* grow. Strong bulbs throw up stems four to six feet high, with a wealth of green foliage and a pyramidal corymb of six to ten orange-yellow flowers.

Lilium Wallacei has a beautiful vermilion orange colored cup-shaped flower, spotted with maroon-colored, raised dots. A late bloomer, very healthy and of easy culture. The true type of *Lilium longiflorum* is very satisfactory in the garden. The forcing variety, *Harrisi*, is not so amenable to outside culture. *Lilium Davuricum* is a little known lily, often confounded with *umbellatum*, from which it is distinct. It resembles *Philadelphicum* more than *umbellatum*. A good grower, with six to eight erect scarlet flowers with black spots, blooming in July.

Lilium Hansonii is one of the harbingers of spring, starting into growth the first warm days. It is of easy culture and very attractive. Of our many native lilies, but few will thrive well under ordinary treatment. The following

LILIES AT POEHLMANN BROS. CO.'S, MORTON GROVE, ILL., TEN DAYS BEFORE EASTER.

succeed best: The superbum or meadow Turk's cap is a grand plant when established and well fed. It grows from four to six feet tall and bears from six to 25 flowers. The graceful meadow lily, *Lilium Canadense*, and varieties *Flavum*, pure yellow, and *Rubrum*, dark red, grow and flower well in cultivation. The panther lily, *Lilium pardalinum*, a native of California, yields readily to cultivation and is very showy when established. Many other beautiful lilies will repay the cultivator for the trouble bestowed, but the foregoing list will afford a succession of bloom and well represents the lily family in the home garden.

Curious Lily Freak.

Wm. J. Halliday, the well-known florist of North Charles street, Baltimore, had a curious exception to the usual growth of lilies in a lot of *Formosums* forced for Easter in his greenhouses on the Old Liberty road, near Walbrook. The lilies were received in August from the H. F. Michell Co., of Philadelphia, and were planted at once. They were of 6-8 size, and the general crop was satisfactory, but the specimen in question, as it grew in stature, branched, a very unusual, if not unknown thing with lilies, and gave 12 perfect flowers. The true lily is an endogen and does not branch, at least so far as the concurring experience of those who are familiar with such plants goes. The accompanying illustration shows the plant in full bloom and the branching stalks are plainly discernible.

[Although very unusual we have known at least one other instance of *Lilium longiflorum* producing a branched stem. Ed. A. F.]

THE VIOLET.

Work Among the Violets.

The dry, hot weather of July and early August gave the single violets in the field a most dejected appearance, for not only were the plants checked in growth and small for the season, but red spider had been getting in its work and the yellowing leaves and general dried-up appearance were anything but promising. But the cool nights and the rains have altered all this considerably and the plants have a far better appearance now. By planting time there is every probability that they will be quite up to the average and the prospect for flowers is good owing to the crowns being so well developed. In a season like the present, when the plants have not any great amount of growth, we believe that earlier planting than usual will be an advantage and those growers who like to see a little frost before planting heavy foliage plants need not be anxious about them this time.

The double varieties that have been kept under glass right along, shaded and kept as cool as possible, are looking strong and well and the opening of the flowering season should show fine stock. The violet is naturally a shade-loving plant and the somewhat tender foliage of Marie Louise and

similar kinds will not stand the bright sunlight that California and the singles generally will. But light they must have and a grower who shades his houses too heavily does so at the expense of flowers and will probably have to be content with a fine crop of foliage. Not only has the grower to shade to prevent injury to the foliage, but also to keep the temperature as low as possible without putting on full air or causing draughts. The shading, ventilating and damping of a violet house at this time of year have not to be considered separately. The skilled and careful grower, while knowing full well that all the air at command would not be too much for his plants, is well aware that if he put it on he would suck out all the atmospheric moisture. While his plants may be needing water in plenty he knows that if he overwaters his beds the air may become stagnant and cloudy the next day and draw up the foliage and make the flowers of poor color.

It is absolutely useless for any one to try and give advice that is suited to all occasions. The grower is on the spot, knows the root condition of his plants, knows what the soil is capable of and how much of it there is in the border. None of these things are known to the stranger who is giving advice and so the grower who expects to get good results from following exactly directions laid down in books or papers is liable to fall down when

it comes to getting good stock. Consider the soil, watch the weather and do everything in moderation is the best advice we can give the violet grower now. Because a light watering gave the plants an improved appearance, do not think that a heavy one will be better. It may so moisten the beds that they will not dry out for a week or more and then we

plants in greater quantity in the future than they have in the past.

Several of Wilhelm Pfitzer's novelties were submitted for the inspection of the floral committee with the result that three awards of merit were secured, one each for Europa, Grafin Degenfeld and Karl Luz. The first named, Europa, is a charming novelty with practically pure white blossoms,

ously against the white background of the broad and substantial petals. American growers would do well to stock Europa if they can possibly get it.

Karl Luz is just the counterpart of Europa. It has large substantial blooms of a deep and brilliant crimson, daintily shaded with nagenta in the throat and obscurely freckled. A very distinct variety well worth attention.

Grafin Degenfeld is a beautiful soft creamy yellow, the three lower petals, however, being conspicuously decorated with triangular blotches of brilliant scarlet, becoming still deeper in the throat and flecked with orange yellow.

Although the above were the only varieties certificated on this occasion there were several other fine things in Wilhelm Pfitzer's group of gladioli. Amongst them special attention might be made of Negerfurst (or Black Prince), with deep velvety crimson flowers, darker at the margins. It is a very strong grower and produces long spikes of bloom. Mephisto was also conspicuous with its bright copperized flowers shaded with crimson lake. Frau Senger-Bettagne is a snow-white form, having the lower petals striped with carmine. The individual flowers are broadly bell-shaped and remind one very much of an Amaryllis or rather a Hippeastrum to be more accurate in naming. It is one of the gandavensis progeny, as is also Julius Neumann, with brilliant red blossoms edged with white—a fine and noble form. Sarah Vautier is very distinct and stands out from all others with its deep velvety blue or purple flowers, shaded with amaranth—quite a conspicuous variety.

Besides the many named varieties there were many fine seedlings shown under numbers. One, No. 5456, is a beautiful primrose yellow and very vigorous in growth. It ought to turn out a grand thing in the future. No.

HOUSE OF LILIES GROWN BY HARRY I. FAUST, MERION, PA.

may look for yellow leaves and poor colored flowers. A little soot and lime is a splendid thing around the violet house, sweetening the air and supplying some food as well as being very distasteful to insects. But here again use it in moderation—a little is good while a heavy dose may prove fatal to many plants. Always keep the surface soil cultivated to allow the air to reach the roots and to prevent the too rapid loss of moisture by evaporation. Keep a constant war on snails and other enemies and do not be afraid to enter the houses after dark with a lantern.

Some New Gladioli.

At a recent meeting of the Royal Horticultural society in London, the public was astonished to see a magnificent display of hybrid gladioli from Germany. The exhibitor, Wilhelm Pfitzer, of 74 Militar Strasse, Stuttgart, simply took the place by storm. The collection was remarkable not only for the size of the individual blossoms, but also for the vigor and freedom of the upright spikes. The variation in color was also remarkable, and nearly all shades except blue were to be seen. English gladioli growers are content to stick to a few colors. Not so Wilhelm Pfitzer. He has mixed the gandavensis, branchleyensis nanceianus and Lemoinei hybrids up so beautifully that it has now become almost impossible to distinguish "t'other from which" in the progeny. Botanists will simply tear their hair (if any) in despair if gardeners are going to continue to cross hybridize

beautifully regular and bell-shaped and seated closely on the stem—being open at the same time. Deep down in the tube at the very base there is the faintest and smallest streak of crimson purple—all that is left of a colored ancestor. The lilac or lavender colored antlers stand out conspicu-

A CLUSTER OF LILIES AND VIOLETS.

Shower Effect.

EASTER LILIES AT THE DONALDSON GREENHOUSES, MINNEAPOLIS, MINN.

2068 is another yellow variety with pale primrose and sulphur-colored flowers, blotched with purple at the base. No. 0,109 is creamy yellow, the lower petals being conspicuously striped with crimson. No. 2269 is light canary yellow and No. 5302 is a variety with rather small flowers, but excellent in form and washed with purple at the base outside. No. 5527 was one of the best forms with bright cerise or rose-colored flowers, the three lower petals being banded transversely with white and No. 5646 is a deep velvety carmine with deeper colored veins.

There were several other choice seedlings, but those noted above stood out as being a long way the best. W.

Common Sense Carnation Support.

C. C. Pollworth Co., Milwaukee, Wis., has placed its new Common Sense carnation support No. 2 on the market. It is a one-ring support with two legs made of No. 13 galvanized wire with patented spring lock, the feature of the support is that it can be opened up on either side after it is in the bench without being removed.

SABATHA, KANS.—C. H. Marshall has all his carnations benched and they are doing well. Mr. Marshall will add a new 75-foot house this fall.

THE CARNATION.

Notes in Season.

The cooler nights of September act as a sort of tonic to the carnations, and those planted a month or more will be, or should be, growing away freely.

Lack of rain for two months during the summer gave the insects a good chance to become established on the plants while the latter were in the field, and this means that the grower has quite a fight before him in order to dislodge the red spiders and thrips, both of which flourish in the field during warm and dry weather.

This is the time to get rid of these pests, while the plants may be syringed freely and vigorously, for later on in the season the syringing will have to be suspended for a time.

Of course this syringing should be done early in the day, for we do not like to have the plants dripping with moisture over night, this condition favoring the spread of spot, rust and various other fungoid troubles.

To curb the insects, the forcible use of clear water does very much, but this is seldom enough to rid the plants of thrips, this being an insect that requires much to discourage it, and one

or other of the nicotine solutions is probably the surest remedy, this being applied with a spray pump, usually in the afternoon, and preferably on a dull day, as the ventilation may then be reduced somewhat at the time of spraying, in order to retain the vapor of the nicotine for a longer period. New remedies appear from year to year, and in the eyes of the manufacturer and also the salesman, each seems to have the qualities of a specific, but it is safer not to plunge too deeply in untried waters, and therefore some of the older preparations, such as Nicofume, for example, still seem to find a ready market.

Ivory soap solution, and also common salt have both been used as remedies for red spiders, and both doubtless have value when used with judgment and in the proper proportions.

A small quantity of Aphine used experimentally by the writer did not give marked results in killing red spiders, but possibly a stronger solution would have proved more effective, the proportion tested being one to 20 of water.

Where spot develops among carnations, and this is usually found where too close and moist an atmosphere is maintained, a dusting with air-slaked lime, or a mixture of lime and sulphur seems to be beneficial, especially when this treatment is accompanied

with free ventilation and rather less moisture.

A spraying with Bordeaux mixture is given after the plants are established in the benches, with a view to checking fungoid troubles, the formula best adapted for this spray being 4-6-50, which signifies four pounds of bluestone, six pounds of lime, and 50 gallons of water. But some varieties are more tender in foliage than others, and even a Bordeaux mixture of this intensity will occasionally burn some of the young leaves, especially when applied on a bright and warm day, the foliage being more susceptible under those conditions.

Plenty of fresh air will be required both day and night to insure a sturdy growth, and careful examinations of the soil in the beds should be made from day to day, in order to water intelligently, for while the soil should never become sodden, still it should be moist right through to the bottom of the bench to encourage the roots to spread.

Staking and tying being completed, it will be needful to go through the plants frequently to keep the young shoots within bounds, else they are likely to get caught in the wires or strings and become crooked.

Topping also needs frequent attention, the first growths being too short in stem to be of much value for the market, and besides this a good bushy plant will be needed to give a regular cut of long-stemmed flowers during the winter months.

It is the autumn growth that counts, for plants move slowly during the short and frequently dark days of winter.

W. H. TAPLIN.

Carnations in Lancaster County, Pa.

There will be no diminishment in the quantity of carnations planted the coming winter, neither will there be much of an increase. With copious rains all through the planting season and up to the middle of June the plants have had a good start; a drought of about four weeks hardened them into prime condition and the good soaking rains of the past week ought to make as good plants for housing as this section has had for some years. Outside of a few Winsor and Lawson that are being grown indoors, there has been no planting done to date; most of the growers are busy changing soil and will be ready to house their stock from August 1-15.

Practically all of the growers in Lancaster county act as their own foreman and to the inquiry as to whether or not they were going to Rochester the unanimous answer was: "Why August is the worst month of the 12 for us to leave our place of business." Some few who have been keeping an eye open to expenses have come to the conclusion that while a carnation house is a small gold mine, it costs almost as much to get the gold out as it is worth in the open market. The majority count up their returns for the season with no expense account to strike a balance and they think they have made considerable money even if their bank account is at a very low ebb at this time.

Stem rot is not the bugaboo in our limestone soil that it is in some sections but some of our larger growers who have been in business long enough to know better will persist in piling the

soil into the hearts of their plants when they cultivate them and then wonder why they have stem rot. There is one trouble here that is puzzling us all, the writer included, and that is a stunted growth that affects Beacon in a marked degree and the Enchantress family and White Perfection in limited numbers. Cuttings taken from good vigorous plants will root well and make apparently good plants in the pots (a few showing signs of the disease in this stage) but after they are planted out either in the houses or in the field they get a stunted growth and gradually die or make such miserable plants that they are of no value. The loss on Beacon for this summer will reach about 80 per cent; of the other varieties the loss will probably average five per cent. Affected plants have been sent to the Department of Agriculture at Washington and to several other places but no one seems to be able to diagnose the disease and the reply was the stereotyped one: "When in doubt we recommend that the plants be sprayed with Bordeaux mixture." This recommendation has been

tried but with no good results; has any other section suffered with this trouble?

ALBERT M. HERR.

Spacing Carnations.

ED. AMERICAN FLORIST:—

What spacing should carnations have on the bench? J. F. T.

Ten inches apart each way is the usual space we allow for our carnation plants. But the space between the plants across the bench is governed somewhat according to the width of the bench. For instance, with a 5-foot bench we plant six rows, allowing for three inches from each side board; this gives the plants about nine inches of space. White Perfection, which has a close, upright habit, could get along with a little less space and the Enchantress varieties could be given a little more if the width of the benches will allow. The space apart of each plant also depends upon what support is used, but 10 inches between the plants will answer for any of the wire ring supports now on the market.

C. W. JOHNSON.

JAPANESE LONGIFLORUM MULTIFLORUM LILY.

As Grown by Samuel Pearce, Chicago.

Dreer's New Plant at Riverton, N. J.

H. A. Dreer, Inc., are about to begin the erection of an entire separate greenhouse plant at Riverton, N. J., on a location some distance from their present greenhouses; the plant being designed to eventually cover a very large area. The plant will be built in blocks; the first block to be erected this season. This first block will be built with a service building in the center; the service building being 34 feet wide and 203 feet long. On each side of the service building will be one leanto 203 feet long and from each leanto will be built a range of ten greenhouses, each 21'9" wide and 203 feet long, making a total of twenty greenhouses and two lean-tos. A cross passageway will be run through the whole block of greenhouses from side to side; this passageway being three feet wide and there being 100 feet of greenhouse on each side of the passageway. The service building will be of iron frame construction and practically fireproof and the roof will be built with a clear span so that the interior will be free of posts. Ten of the greenhouses will be open under the gutters and will not be provided with benches. These ten greenhouses will be run at a low temperature. The other ten greenhouses will be divided by glass partitions under the gutters and will have three benches in each house. These houses will be run at a temperature of 60 to 65 degrees. For the heating plant a fireproof iron frame and concrete boiler house will be erected. There will be four 75 h. p. boilers for heating; these boilers being of the ordinary tubular power type. There is also to be one boiler for steam power. The boilers will burn a low grade of coal and to enable this to be done, a system of forced draft is to be installed. The heating will be by hot water using 2" pipes for the radiating surface; the boilers will be set on the level and the water will be circulated through the houses with centrifugal pumps. The pumping plant will be in duplicate so that in case of damage to one plant, the other will be ready for operation.

This is probably the largest piece of construction work undertaken this season and we believe it is the largest greenhouse building contract which has been let out complete by any commercial florist in this country. The cost of the buildings and equipment will be about \$70,000. The contract for the complete work has been awarded to King Construction Company, North Tonawanda, N. Y.

The Naming of Fern Varieties.

The question of how to name mere forms of ferns has always been a perplexing one. By "mere forms" we do not now refer to wild specimens which may or may not have a permanent character, but rather to those plants bred up by dealers and amateurs for some striking or bizarre abnormality, such as crested or forking fronds. In America it has been customary to name these plants exactly as if they were legitimate species and in recent years we have had more *nephrolepis* "species" added to our lists than the wide world ever contained. In selecting the name by which each form is

to be known, we have exhibited equally bad taste, naming the plants for the discoverer or for the place in which they were found. European fern students apparently have a better way and seem to be evolving some system in their naming as the subjoined notes from the British Fern Gazette would indicate. If these names can be made to designate definite appearances they will certainly be extremely useful in bringing a given form to mind.

"Much confusion exists in the naming of the simpler crested forms as regards the extent of tasselled division and its character. Broadly speaking, it falls into two sections: flat fan-like division and bunch division. The flat cresting may be roughly graded thus: simply forking, furcatum or furcans when confined to two or three divisions; digitatum or fingered up to five or six; polydactum up to 10; multifurcatum up to a score; all these di-

The Late Lyman B. Craw.

visions terminating in points and not dividing again and all spreading out in the same plane—fan-fashion. If the primary divisions fork again we get true cristate or crested forms and still adhering to the flat expansion, we may term them cristatulum, cristatum or, in the case of divided ferns, percrisatum if the pinnules as well as the frond tip and pinnae are crested. When the flat mode of expansion is replaced by a sort of radiating division producing tufts or bunches they become corymbiferous—corymbiferum—and when these are large and heavy the grandiceps form is attained provided the terminal bunch of the frond is so characterized. An extreme form of this producing dense ball-like crests may be termed globosum. All these terms apply to fronds whose midribs are not otherwise divided than at the tips, but when these split lower down into branches this character is indicated by ramosum, ramosissimum, ramulosissimum or, in extreme cases, conglomeratum. This ramose character is indicated in compound varieties, i. e., in which other characters occur in conjunction with it, either by the prefix ramo or the addition of the names of the more developed grades mentioned above, thus ramo-digitatum or muricatum ramulosissimum."—Fern Bulletin.

OBITUARY.

Lyman Burnham Craw.

Lyman B. Craw, well known member of the firm of Lord & Burnham, New York, died at his home at Irvington-on-Hudson, September 1. Mr. Craw was operated upon some months ago for complicated stomach troubles and his many friends were hopeful that his splendid grit would pull him through. But this was not to be, as two weeks previous he took to bed and passed peacefully away, with the family at the bedside.

Mr. Craw was very popular with the trade throughout the country and was considered one of the best informed men on greenhouse construction matters. Until ill health intervened, he regularly attended the annual conventions of the Society of American Florists and for many years he was an active member of the New York Florists' Club, beloved by all who knew him.

Funeral services were held at the family residence September 3, the numerous floral offerings including a handsome standing wreath from the New York Florists' Club.

Mr. Craw was 40 years of age and identified with the Lord & Burnham Co. for the past 20 years. Mrs. Craw and one child survive.

William Benjamin Whittier.

William Benjamin Whittier, proprietor of the Framingham Nurseries, South Framingham, Mass., died August 27, after but a week's illness with pleuro-pneumonia, aged 51 years. Mr. Whittier was a native of Nova Scotia, and founded the business which he had conducted the past ten years. He leaves a wife and three children, also three brothers and three sisters,—one brother, John Whittier, living at the nurseries. The local paper commented on him as follows:—"The high character and sterling worth of Mr. Whittier brought together a large number of business men from near and far. His employees—some fifty or sixty of them—all stood around deeply affected. All bore testimony to the affection and high esteem in which they held him. They declared that a better or more considerate employer could not be found. He was a model husband and father, a staunch friend, whose word was his bond, and a helpful neighbor who never said nay when it was in his power to render assistance. He stood before the community as one whose life of kindness and probity and business ability could well be copied." He was a member of the Bunker Hill Lodge, I. O. O. F., and the Encampment. The interment was in Edgell Grove cemetery at Framingham Center. W. T. H.

John W. Young.

John W. Young of Fall River, Mass., died rather unexpectedly August 28. The deceased was an expert landscape gardener and for many years employed a large gang of men caring for lawns and gardens in the residential section of the city of Fall River. He was widely known and respected. He leaves three daughters. G. A. J.

Peter Casey.

Peter Casey, a landscape gardener, died at his home at Pawtucket, R. I., August 29. The deceased was a member of the Catholic Knights of America, and for two years a member of the city council. G. A. J.

ST. ALBANS, VT.—Geo. Cooke has succeeded to business of Henry Bryant.

WE are in receipt of flowers of gladiolus Miss Sill, from M. Crawford, Cuyahoga Falls, O. The spike is of medium size and the large, well disposed flowers are of an attractive pink shade.

Personal.

Prof. F. A. Waugh of Amherst has returned from Europe.

Diseased Carnations.

ED. AMERICAN FLORIST:—

Will you kindly tell me what to do for my carnations; they seem to be infested with a rust disease which came on them in the field. We have been and are now experiencing the

worst drought in my recollection. I thought perhaps the dry weather was the cause, and as soon as I could control conditions they would outgrow it, but they have now been set in the greenhouse about two weeks and seem to be worse instead of better. I enclose a sample cutting and any information you will give me will be greatly appreciated.

C. A. H.

The carnation growth forwarded arrived in such a dry and withered condition it was impossible to determine the cause of the trouble. They certainly seem to be afflicted with some disease. Give the plants plenty of air and syringe only on pleasant days and in the morning, never having the foliage wet at night. The recent removal of the plants would check their growth and cause the plants to look as if the disease was making rapid progress. If the disease continues, kindly forward in a few growths afflicted enclosed in wet moss and covered with wax paper that they may reach us in good condition and we will endeavor to enlighten you in your trouble.

Boston Fern Cutworms.

ED. AMERICAN FLORIST:—

I doubt not from his brief description that the caterpillar feeding on Boston ferns at night is the newly discovered Southern Fern Cutworm (*Calloptistria floridensis*), a green larva having characteristic cutworm habits.

I had excellent results in one greenhouse by spraying with a decoction of fresh pyrethrum (2½ ounces steeped for one hour in five gallons of water) in the evening, applying liberally. Light traps should be continuously used to catch the night flying moths. For this purpose lanterns are suspended in tubs containing an inch or two of water over which is a thin film of kerosene oil. The lanterns are suspended in the tubs so that about one-half is above the rim, and should of course be lighted at night.

At present this species has been found in only three greenhouses in Illinois (excepting the probable infestation you mention) and it has proven a veritable pest where found.

JOHN J. DAVIS.

General Trade Conditions.

Bradstreet's of September 3 gives the following summary of present conditions:

"Trade reports vary with sections reporting, and characterization is made difficult by the cross currents visible in financial, commercial, and industrial lines. Taken as a whole a fair trade is doing and collections tend to improve, but high or unsettled prices and irregular crop conditions are bars to the fullest activity usually witnessed at this season of the year.

"There were more failures in August than in any preceding month since March. The total, 934, was 8 per cent larger than in July this year or than in August last year, though 7 per cent smaller than in August, 1908. Liabilities aggregated \$11,933,579, an increase of 42 per cent over August last year, but 53 per cent below August, 1908. New York City has 23 per cent more failures than in August a year ago."

Dun's Review of September 3, says: "Though there has been no pronounced change in business conditions and while a quiet conservatism still prevails, yet the movement in most departments of trade and industry is indicative of increased confidence and wider activity as the fall season draws near."

Coming Exhibitions.

(Secretaries are requested to supply any omissions from this list and to correct any dates that may have been altered since the last advices.)

Ansonia, Conn., September 17, 1910.—Annual dahlia exhibition, Intertown Dahlia Association, Assembly room, City Hall.

Boston, Mass., September 23-25, 1910.—Autumn exhibition of the Massachusetts Horticultural Society at Horticultural Hall, Boston. Address Wm. P. Rich, Horticultural Hall, Boston.

Baltimore, Md., December 1-2, 1910.—Fall exhibition, Maryland Horticultural Society, Fifth Regiment Armory. Address C. P. Close, College Park, Md.

Chicago, November 7-12, 1910.—Annual fall exhibition, Horticultural Society of Chicago, First Regiment Armory, Michigan avenue and Sixteenth street. Address J. H. Burdett, 1620 W. 104th Place, Chicago.

Hartford, Conn., September 22-23, 1910.—Dahlia exhibition, Connecticut Horticultural Society, Unity Hall. Address Geo. W. Smith, Melrose, Conn.

Hartford, Conn., November 3-4, 1910.—Chrysanthemum exhibition, Connecticut Horticultural Society, Putnam Phalanx Hall. Address Geo. W. Smith, Melrose, Conn.

Indianapolis, Ind., November 8-12, 1910.—Fall show, State Florists' Association of Indiana, Tomlinson Hall. Address A. F. J. Baur, Thirty-eighth street and Senate avenue, Indianapolis, Ind.

Long Branch, N. J., November 9-10, 1910.—Second annual chrysanthemum exhibition, Elberon Horticultural Society. Address R. Carey, Long Branch, N. J.

Milwaukee, Wis., November 7-14, 1910.—Flower show, Milwaukee Florists' Clubs, in the Auditorium.

Minneapolis, Minn., November 16-20, 1910.—Flower show, Minnesota State Florists' Association, National Guard Armory, Kenwood Parkway. Address Jerry P. Jorgenson, 3501 Portland avenue south, Minneapolis, Minn.

Morristown, N. J., November 2-4, 1910.—Annual exhibition, Chrysanthemum Society of America, in conjunction with the Morris County Gardeners' and Florists' Society. Address Edward Reagan, Box 334, Morristown, N. J.

Morristown, N. J., November 2-4, 1910.—Fifteenth annual flower show, Morris County Gardeners' and Florists' Society. Address Edward Reagan, Box 334, Morristown, N. J.

New Bedford, Mass., September 15-17, 1910.—Annual fall exhibition of the New Bedford Horticultural Society, Odd Fellows hall. Address E. E. Pierce, New Bedford, Mass.

New Haven, Conn., November 1-3, 1910.—Annual exhibition of the New Haven County Horticultural Society, Music hall, 115 Court street. Address Frederick H. Wirtz, 86 Nicoll street, New Haven, Conn.

New York, September 20-22, 1910.—Seventy-ninth fair of the American Institute, Berkeley Lyceum building, 19 and 21 West Forty-fourth street. Address W. A. Egelson, American Institute, New York.

New York, November 9-11, 1910.—Annual exhibition of chrysanthemums, American Institute, 19 and 21 West Forty-fourth street.

Pasadena, Calif., November 3-5, 1910.—Fall flower show. Pasadena Gardeners' Association, Maryland hotel. Address Angus McLeod, 1632 Alleen avenue, Pasadena, Calif.

St. Louis, Mo., November 8-12, 1910.—Fourth fall floral exhibition. St. Louis Horticultural Society, Coliseum, Jefferson and Washington avenues. Address Otto G. Koenig, 6473 Florissant avenue, St. Louis, Mo.

Worcester, Mass., November 10, 1910.—Chrysanthemum exhibition. Worcester County Horticultural Society, Horticultural Hall, 18 Front street. Address Adin A. Hixon, Horticultural Hall, Worcester, Mass.

Meetings Next Week.

Baltimore, Md., September 12, 8 p. m.—Gardeners' and Florists' Club of Baltimore. Florists' Exchange hall, St. Paul and Franklin streets.

Chicago, September 14.—Gardeners' and Florists' Union, No. 10615, 10 and 12 Clark street.

Cleveland, O., September 12, 7:30 p. m.—Cleveland Florists' Club, Progress hall, 2610 Detroit avenue.

La Crosse, Wis., September 13.—La Crosse Gardeners' and Florists' Society, Hotel Stoddard.

Lake Geneva, Wis., September 17, 8 p. m.—Lake Geneva Gardeners' and Foremen's Association. News building.

Madison, N. J., September 14, 8 p. m.—Morris County Gardeners' and Florists' Society, Masonic hall.

New London, Conn., September 14.—New London County Horticultural Society, Elks' hall.

New Orleans, La., September 11, 2 p. m.—Gardeners' Mutual Protective Association, 118 Exchange alley.

New Orleans, La., September 15, 8 p. m.—New Orleans Horticultural Society, Kolb's hall, 127 St. Charles avenue.

New York, September 12, 7:30 p. m.—New York Florists' Club, Grand Opera House building.

New York, September 14, 4:30 p. m.—Horticultural Society of New York, American Institute rooms.

Pasadena, Calif., September 16, 8 p. m.—Pasadena Gardeners' Association, Board of Trade rooms, West Colorado street.

Rochester, N. Y., September 12, 8 p. m.—Commercial Florists' Association of Rochester, 416 Cutler building.

Scranton, Pa., September 16, 7:30 p. m.—Scranton Florists' Club, Guernsey building.

Springfield, O., September 12.—Springfield Florists' Club, office of the Good & Reese Co.

Toledo, O., September 14.—Toledo Florists' Club.

Winnipeg, Man., September 14.—Winnipeg Florists' Association.

Poehlmann's Orchids

LARGEST STOCK IN THE WEST

And All the Time Getting Bigger

Beauties, Valley, Roses

American Beauty and other Roses have been so long and so well grown at our greenhouses that there is little need of our calling attention to the excellence of our stock. **We lead for quality and quantity.** White Killarney, Richmond, Killarney, My Maryland and Perle are coming in great quantities and the quality is the Poehlmann Quality and head and shoulders above everything else on the market.

Easter Lilies and Valley all the Year. Our arrangements for a perfect supply of these popular flowers all the year round have long been perfected and we can always take care of your orders.

Chrysanthemums. Our plants never looked better. We shall have a grand supply in all varieties. **Carnations.** Our field stock is perfect and never looked more promising. We shall be in crop early in September. **Green Goods of every description. Everything Home Grown.**

Poehlmann Bros. Co.

Office and Salesroom,
33-35-37 RANDOLPH ST.
CHICAGO.

Long Distance Phone, Randolph 35

Chicago.

The beginning of the month practically closed the summer season and nearly all are back to work after their summer vacations, and the wholesale houses have resumed normal business hours. While the warm weather of last week rather reduced the quantity of business yet all the dealers both wholesale and retail report an exceptionally good summer trade and the outlook for the fall is very promising. The present week opened very auspiciously, many of the wholesalers, who intended to close early Monday (Labor Day) received so many shipping orders that they were obliged to remain open during the afternoon. A large number of weddings this week was productive of exceptionally good trade in some lines, the dealers in southern smilax and boxwood sprays receiving some very good orders.

American Beauties are being received in much larger quantities and of better quality, and are moving more freely. Chrysanthemums are showing great improvement but the demand for this flower at this season is very light. The recent heavy rains have seriously damaged the outdoor stock and asters especially show the effect of the storms.

FLORISTS' CLUB MEETING.

The regular meeting of the Florists' Club was held September 1. President Asmus in the chair. There was a very good attendance and President Asmus, who has just returned from the east, was warmly greeted as president-elect of the Society of American Florists. Routine business was transacted and the principal subjects of discussion were the recent convention and the coming National Flower Show to be held at Boston, Mass., March 27 to April 1, 1911. Vaughan's Seed Store exhibited some spikes on the new Gladiolus Mas-

todon, which we understand is one of Dr. Van Fleet's hybrids with Princeps blood, a very large spike with magnificent dark scarlet flowers. Walter Scott of La Grange exhibited flowering stems of a very desirable hydrangea which he discovered as a wildling two or three years ago in the neighborhood of his establishment. Vice-President Philpott was sponsor for a heavy list of new names submitted for membership. Chairman Yarnall of the bowling committee announced that the season of 1910-11 would be inaugurated without delay.

NOTES.

Leopold Koropp, 4509 Evanston avenue, has the contract for decorating the Hotel La Salle. He also does the decorating at the Grand Pacific, Vogel-sang's, the Union, Hofbrau, Rienzi, and other resorts. John Farmer, Mr. Koropp's right hand man, is spending his vacation in Wisconsin.

George Perdikas' store, corner of Dearborn street and Jackson boulevard is being remodeled. New fixtures will be added and the interior and exterior painted. George realized a neat income from his three stores this summer, part of which is being spent for improvements.

Bassett & Washburn are cutting very heavily in choice white and pink carnations, and also shipping in a few asters and chrysanthemums. They are also offering a good quality of American Beauty roses.

Argeson & Papatony are enjoying a brisk business at their stores in the Masonic Temple and the Briggs House. Both stores have fine window displays and are well kept up. T. Argeson looks after the buying.

Zeck & Mann report shipping trade very good. Carnations are arriving in larger quantities. Harrissi lilies continue to arrive and sell readily. The

first boxwood of the season arrived September 1.

M. Crawford, Cuyahoga Falls, O., passed through the city this week en-route to Lake Mills, Wis., where he will be engaged harvesting gladiolus bulbs until October.

A. L. Randall is busy filling wild smilax orders. Asters are coming in a little better condition. American Beauty roses are being received in larger quantities.

Frank Ayres of Chas. W. McKellar's, is enjoying his vacation among the lakes in Canada, spending the spare moments in fishing.

Hoerber Bros. are receiving a very good quality of White Killarney and American Beauty roses. Asters are finding ready sale.

E. B. Washburn on September 5 won the prize for the lowest net score at the Hinsdale Golf Club meet. 100 other players took part.

The Geo. Wittbold Co.'s North Clark street store is offered for sale, the firm's business concentrating at Buckingham place.

J. A. Budlong is showing a fine quality of carnations grown from young stock, which are finding a ready market.

At Wieter Bros., the stock is coming in very plentifully, some fine American Beauty roses were noticed here.

Kennicott Bros. are receiving a good stock of outdoor carnations, also large quantities of gladiolus.

J. Didier, 6972 N. Clark street, reports that outside of funeral work business is very quiet.

A. Lommel, formerly of the Lakeside Floral Co., of Chassell, Mich., was a visitor the past week.

Chas. W. McKellar is receiving a large quantity of Hill's Branching aster from the east.

O. P. Bassett and wife arrived home September 1 from their trip to Europe.

**BUY DIRECT OF THE GROWER
AND GET FRESH STOCK.**

Greenhouses:
Hinsdale, Illinois

J. B. Deamud is receiving a good quality of asters and gladiolus, Francis King showing up remarkably well. Chrysanthemums are arriving in good shape and the best Golden Glow on the market were seen here. This is also the headquarters for wild smilax.

Miss Lillian Bloom, for the past four years an employe in the Bassett & Washburn office force, was married September 7 to Mr. William Fenniger, the well known florist of Toledo, O. The happy couple, after a short bridal trip, will start housekeeping at Toledo.

Business has improved considerably at Vaughan & Sperry's, the first of the month starting in strong. Lillies are coming in nicely and selling readily. Gladiolus are arriving in good condition and carnations are coming in in larger quantities.

A large quantity of everything was to be seen at E. C. Amling's, the stock is of good quality, with Killarney roses at their best. Business here has been very good and from the present outlook the fall season will be very busy.

Miss Nelda Wolff, bookkeeper at J. A. Budlong's, returned August 29 from her vacation in Wisconsin. Henry Weiss came back on the same day from a two weeks' outing at Tomahawk lake, Wisconsin.

American Beauty roses continue to arrive as usual at Peter Reinberg's, a fine quality of Richmond roses grown from young stock is shown here.

H. L. Keun filled a Liverpool cable order for the Wells funeral this week. Mrs. J. U. Keun is visiting relatives at Muskegon, Mich.

The elevator entrance to the Flower Growers' Market was changed from Wabash avenue to Randolph street September 6.

The Chicago Rose Co., is receiving roses of a very good quality. A large shipment of silk netting was received this week.

Weiland & Risch report business improving. They are cutting a good crop of carnations. Shipping trade has been very good.

Albert A. Sawyer, Oak Park, will have a record of 60,000 fancy asters this season and will grow 50,000 pansy plants.

Luke Collins planted 40 sash of pansies last week. Several boxes of glass were destroyed by the recent storm.

Poehlmann Bros. are handling a large quantity of roses, their American Beauties are of extra fine color.

Martin Peterson, 2552 W. Division street, returned September 1 from a fishing trip at Twin Lake, Wis.

We noticed some extra fine Pink Killarney roses grown from young stock, at John Krutchen's.

Business has been good at E. H. Hunt's. This firm is offering some fancy asters this week.

C. M. Dickinson of E. H. Hunt's returned September 2 from an outing at Pelican Lake, Wis.

J. A. Mendel, West Eighteenth street, is a democratic candidate for county commissioner.

American Beauty roses are arriving in much larger quantities at Geo. Reinberg's.

Ed. Misiewicz and son Sigmund spent September 4 and 5 in Milwaukee.

Kyle & Foerster are disposing of some good American Beauty roses.

J. F. Klimmer is somewhat better this week.

Visitors: Julius Roehrs and son, Rutherford, N. J.; Mrs. C. C. Pollworth, Milwaukee, Wis.; A. Dettman, Milwaukee, Wis.; Mrs. M. C. Sadewater, Rockford, Ill.; H. H. Kuhlmann and wife, Houston, Tex.; S. Wachenheim, Vicksburg, Miss.; Chas. Johnson, Chillicothe, O.; E. E. Stewart, River Junction, Mich.

About the Thistle.

In Tartary there is a species of thistle which grows so large that the Tartars build their huts in the shade of it. As autumn approaches the stem decays and the blossom dries into a large feather ball, which is driven over the plains by the wind.

The coat of arms of the National Bank of Scotland, granted in 1826, bears a figure of St. Andrews, the patron saint of Scotland, carrying his cross before him, surrounded by a border of thistles.

There has been some controversy as to which variety of the plant was originally selected as the emblem of Scotland, but the common cotton thistle, with its purple flower, is now generally accepted as the Scotch thistle. The thistle family is a very large one and widely diversified. In France, Germany and Spain there grows a variety known as the Carline thistle. It is very large and the country folk hang it outside their cottage doors as a barometer. Before a rain the flower invariably closes and when the storm is nearly over it gradually opens.

The thistle of Scotland is said to be the oldest national flower on record, and tradition traces its adoption to the reign of Alexander III and the battle of Largs.—General Press.

Luxemburger Bruderbund Schobermesse.

The annual Schobermesse of the Luxemburger Bruderbund was held at Karthaus Grove, Chicago, September 4-5, and drew a large attendance of the growers, florists and gardeners of the north shore. The exhibit of flowers, fruits and vegetables was large and was viewed by thousands. The vast throng was entertained with songs

American Beauties in Full Crop

We are the biggest Rose growers in the world. But size is not everything, and in addition we aim to have the **FINEST STOCK**, the best of its kind. During **HOT WEATHER FLOWERS** require great care in handling, and our facilities at the greenhouses are second to none for properly **COOLING OFF** the stock before it is shipped to the store. From here it is sent direct to customers by the quickest and cheapest routes. **CAN YOU BEAT IT?**

Peter Reinberg, 35 Randolph St.,
CHICAGO.

of the Vaderland, dancing and other amusements.

John C. Moninger Co. exhibited a greenhouse showing the new method for hinging ventilators. All hinges are attached directly to the sash bar in place of the header. This makes it possible to use only a small strip to stop the glass and this new header is placed high up under the bottom rail of the sash so that all drip under the sash runs outside on the roof instead of dropping on the plants. The new lock splice, a great improvement over the old top splice, was also shown.

The judges of the flower exhibit, L. Becker, J. Didier and H. Weber awarded the prizes as follows:

Adam Zender: Three firsts and two seconds on Jardine, White Killarney, Pink Killarney, Kaiserin and My Maryland roses.

Wietor Bros.: Six firsts and eight seconds on American Beauties, Kaiserin, White Killarney, Uncle John, Maid, Bride, Jardine and Richmond roses.

Fisher Bros.: First on lilies and gladioli.

Vaughan's Seed Store: First on perennials and shrubbery.

Geo. Witthold Co.: General first on palms and decorative plants.

Fisher Bros.: First on ferns, second on palms and decorative plants.

Henry Seitz: Second on ferns.

The display of fruits and vegetables was large and attracted a great deal of attention.

Milwaukee.

Stock is selling readily and business is very good, especially shipping, which keeps the market cleaned up mostly all of the time. Roses enough to fill all orders, of very fine grade. Lots of gladioli and bringing good prices. Carnations are still very scarce. American Beauties are of fine quality, mostly medium grade. Valley and lilies shorted up last week and brought good prices.

THE PICNIC.

The picnic arranged by the Florists' Club took place last Sunday. It was a success although only a small crowd turned out as the weather looked very threatening and cold, which accounted for such a small attendance. Some of the last ones to leave were unfortunate

enough to get drenched by the heavy rain, which made it very unpleasant. Outside of this everybody enjoyed themselves as there were enough games and races to keep the crowd going. The following were successful in the games and received the prizes donated by members of the club:

Nail driving contest for men:
First prize, Gus Rusch.
Second prize, Wm. Zimmerman.

Nail driving contest for ladies:
First prize, Miss Gertrude Sommers.
Second prize, Miss Ella Voelzke.

Sack race for men:
First prize, C. Gorg.
Second prize, A. R. Thurson.

Sack race for boys:
First prize, Frank Clear.
Second prize, Rudolph Haasch.

Men's race:
First prize, Peter Nohos.
Second prize, Fred H. Holton.

Young men's race:
First prize, B. Seeley.
Second prize, C. Gorg.

NOTES.

John C. Rost is adding a new house to his place. He is a retailer and has been in the business for many years and is numbered among the oldest florists in the city.

Jim Spencer, with Currie Bros. Co. for the last twenty years, lately with the Nebraska Seed Co., has joined the ranks of Vaughan's Seed Store.

Mr. and Mrs. F. Davis returned from a five weeks' trip through Yellowstone Park, Colorado Springs and other points of interest.

C. Dallwig reports that he is receiving quite a number of orders for bulbs which are to be delivered in the near future.

Ernest Praefke has a nice lot of Cyclamen and Primula Obconica which look very promising for coming season.

The Flora Bon are putting up quite attractive window displays which is a very good advertisement for them.

Hunkel's Seed Store received the first shipment of Dutch bulbs and is getting busy filling orders.

Mrs. Seamen, of the Currie Bros. Co., resumed duties after two weeks' recreation.

Roy Currie went to the lake Sunday to close up the summer home for this season.

Mueller & Schroeder Co. is cutting a few good carnations of their new stock.

The Sherrer Co. reports business very satisfactory considering the time of the year.

Visitors: George Thompson, Northrup, King & Co., Minneapolis; A. Craig, Philadelphia; E. Haentze, Fond du Lac; M. Reukauf, Bayersdorfer Co., Philadelphia; Robt. Miller, Racine; Aug. Poehlmann, Morton Grove, Ill.; Mr. Johnson, A. L. Randall Co., Chicago; E. J. Deal, London, Eng.; E. A. Ollinger, Chicago, Ill. G. R.

SUMMIT, N. J.—Frank Hemenway, the 17-year-old son of Charles D. Hemenway, was arrested recently on a charge of stealing flowers and presenting them to a young woman. The flowers were stolen from a greenhouse owned by James Leslie, of 541 Morris avenue. The boy was held for the grand jury.

St. Louis.

SIGNS OF AUTUMN.

The cooler weather did not last long and we have experienced some very warm days. School started September 6, summer gardens are closing, theaters are opening up, so with the return of society, which will continue through September, we can expect the season will start up shortly. The wholesale houses are completing their alterations, affording better facilities than ever before for the handling of large consignments will be seen in all four houses. Bernings' 12x12 icebox will certainly give him ample room to handle increased business. At Smith's the increased floor space will take care of the large consignments of local growers and nowhere will they be able to make a better display than on the ground floor. The offices, with wire workrooms above, are fitted up to easily handle any amount of business. At Angermueller's and Kuehn's they are fully prepared for increased fall and winter trade. Flowers of all kinds are plentiful. Tuberoses are a glut. American Beauty roses have been quite plentiful and the keeping quality is not good owing to extreme hot weather.

Some very fine Golden Glow chrysanthemums are in the market but are not selling.

Some very fine asters were seen at the wholesale houses the past week.

NOTES.

Kalisch Bros.' store and greenhouses on Delmar and Taylor avenues have been painted and overhauled. They are raising orchids and expect considerable increase in the demand for these flowers this fall and winter.

George Hartman, who has been rebuilding one of his houses, was caught by the heavy rain Sunday. The glass was not on and he had planted a bench of Asparagus Sprengeri, which was damaged by the rain.

September 4 being the first Sunday of the month, the Shaw Garden was open to the public. The attendance owing to the rainy weather was of course small, 2,300 being the registered number.

Alex. P. Geranios, manager at the Metropolitan Floral Co., is now open

and is making some very beautiful and artistic window displays. He expects to make these displays a feature.

Preparations for the flower show are going on. It is expected that a very large increase of exhibits will be shown owing to the liberal prize list.

Andrew Meyer, city forester left Saturday for the Pacific coast. W. Jordan and Julius Koenig will have charge in his absence.

Chas. Schoenle and George Angermueller returned from their fishing trip. Forty-five pounds of assorted fish were brought back.

G. G. Edwards is cutting some fairly good white carnations. He expects a fine crop as soon as cooler weather arrives.

Next Thursday at Weber's Nursery the Florists' Club will meet. The installation of officers will then take place.

Ostertag Bros. had the decorating at the Cambridge Court opening. The 50 tables each had a centerpiece of asters.

Paul Schneider is now cutting dahlias. The dry weather has made them late and not half the supply of a year ago.

G. E. Ahner has started cutting from his carnation houses. Violets are planted and looking well.

Werner Bros. find their rose supply curtailed to a large extent, due to the warm weather.

F. C. Weber and wife have returned from the east. They were on their wedding tour.

Alex. Waldbart and sons returned from the convention, speaking highly of Rochester.

Ed. Kelley and wife of the Kelley Floral Co. returned Sunday from Chicago.

F. W. Pape has left for a week's vacation out the river.

Philip J. Goebel is cutting some fancy white dahlias. F. W.

BARABOO, WIS.—Wm. Toole & Sons have received material for a new greenhouse, which will be ready for business sometime during coming winter.

BEAUTIES, ORCHIDS and VALLEY

Our **Beauties** are arriving in excellent order and we have plenty for everybody in all lengths. Our growers are just coming in cut with the best grade of **Orchids** (*Cattleya labiata*), **Valley**, **Asters**, **Gladioli**, and **Easter Lilies** in full supply and for quality there is nothing to beat them on this market. The **Roses** are improving right along and cannot be beaten in this or any other market. We want a trial order and are convinced we shall hold your trade.

Washington.

The members of the different branches of the trade are looking forward to a busy season, but no heavy business is expected while Beverly, Mass., is the summer capital. In anticipation of busy months to come, practically all the retailers have re-decorated or given some improving touches to the interiors of their stores and now only await the return of the regular residents and the influx of the army of statesmen and social celebrities. There is here as in other cities the usual amount of funeral work, most of which goes to the stores located in the business section and to the Center Market dealers. For this early in the season, some very good stock is seen, notably American Beauty and Killarney roses, but as previously intimated, the demand is light aside from funeral orders.

There is beginning to be a considerable movement in palms and ferns and very fine specimens of the latter are found in local greenhouses.

NOTES.

Wm. C. Clark, the well known grower located on the Bladensburg road, has a splendid stock of double poinsettias coming on, many of which are in pots and which he is now selling, and many in beds for Christmas cutting. All are propagated from root cuttings. Mr. Clark has been very successful in propagating from root cuttings and the double poinsettias can be multiplied much faster in this way. For flowering in pots and pans, the double variety is a much superior display to singles and we look for them to become popular. Mr. Clark has also a large stock of *Nephrolepis Smithii*, the Washington Lace Fern, a sport of *Whitmanii*. It was grown at the U. S. Botanical Gardens and named for the honored W. R. Smith, and we predict that it will be an enduring memento to his activity and interest in horticultural matters. It is dwarf and compact in habit, graceful and beautiful. For jardiniere and table work it is unexcelled. It seems to be just the kind of a fern that the trade now needs as we are pretty well supplied with the larger varieties.

The "Old Mill" in Gude Bros. Co. store window is an original and interesting piece of work. It recalls the poem of the deserted mill where ghostly figures appeared in the night and worked till dawn. This one, however, is not ghostly but a miniature mill run

by real water where the mill hands move regularly about. There is a pond and the usual display of fine aquatics. Gold fish and turtles also disport themselves.

A recent visit to the Brightwood range of J. R. Freeman, where James Quinn is now foreman, showed a very fine stock of roses and carnations coming on. We have seen no better carnations at this season. During the summer the district authorities ran a sewer under the rose range which caused great delay and inconvenience in planting.

R. Bowdler is one of the old growers of this city in point of service, though he does not look old. In addition to chrysanthemums and a general variety of indoor stock, his grounds at present show many fine features in flowering shrubbery, notable being a beautiful display of clematis.

Another fine window is in Geo. C. Shaffer's store, a miniature lake in the shelter of a finely constructed rookery. The lake is filled with lilies and lotus and finely bordered with various ferns. A large school of gold fish is another of its attractions.

F. H. Kramer at his Anacostia range has a fine stock of roses, carnations and chrysanthemums coming on. Another noteworthy feature of this place is the great stock of ferns, many of the Boston variety being very large and graceful.

Henry Pfister and wife, who are in Europe, will return early in October.

W. W. Kimmel and family have returned from a stay at Colonial Beach, Va. His new store is being well fitted up and a conservatory will be erected in the rear.

D. Blackistone, who with his wife attended the Rochester convention, was well pleased. He is now devoting his energies to his store, which, as usual, is neat and attractive.

Geo. H. Cooke and wife took a trip through Canada before attending the convention. As Mr. Cooke brought back two cups from the bowling he is naturally well pleased.

Jacob Minder, of Cottage Hill, in addition to chrysanthemums, has a large stock of small ferns suitable for dishes and is preparing to force a lot of bulbs.

A number of very attractive window decorations may now be seen in the retail stores of this city.

Chas. Meehan of S. S. Pennock-Meehan Co., was a visitor last week.

J. H. Small and wife are expected home from Europe about September 15.

Adolph Minder is engaged in much the same lines of growing.

WASHINGTON BOWLERS BANQUET.

The victorious Washington bowlers were given quite an ovation at the Royal Alleys, New York avenue, on the night of August 31. While the individual members of the team, consisting of Captain Ernst, Geo. C. Shaffer, Geo. H. Cooke, Robt. McLennon and Samuel Simmonds, were enjoying themselves down stairs, some of the other members of the club who were unable to attend the Rochester convention were busy preparing a surprise for the winners of the champion cups. A room on the third floor was handsomely decorated and an abundant supply of eatables and bottled beverages provided. After everything was in readiness the champions were brought up and introduced as the guests of honor at the feast. While all were busy with the viands Geo. H. Cooke sprung a surprise when, as if by magic, the Wm. F. Kastings cup was filled to the brim with that sparkling and well known vintage, dear to good livers. In brief, the loving cup passed around and it was finally agreed that it takes the florists to do things right.

During the past week three of the cups were on exhibition in the window of Geo. C. Shaffer's store. They were the Wm. F. Kastings cup, the H. Bayersdorfer & Co. cup and the cup presented by the Whildin Pottery Co.

Geo. H. Cooke exhibited at his store the two cups he won for individual work.

European Horticulture.

FROM THE FRENCH TRADE PAPERS.

The study of transportation of perishable products, carried on in France since 1905, is to be continued by a committee presided over by Senator Viger and consisting of three senators, 10 deputies, prefects of the Seine and of police, president of the municipal council of Paris, directors of six great railway companies, two directors from the Department of Agriculture, presidents of syndicates of shippers, president of the syndicate of commission dealers, presidents of the principal agricultural societies, and others. Some such united action will eventually become a necessity with us.

The touring club of France has set aside a fund of \$600 this year for prizes to be competed for by station-masters on various much frequented lines, to be awarded for: (1), floral and shrub decoration of the station and grounds; (2), their general appearance. Five prizes of \$20 each; 25 prizes of \$10, 25 "Touring-Club" chronographs, value \$10 each. A total of \$16,000 in prizes is expected to be distributed in the next four years.

The Royal Horticultural Society of England is projecting an international horticultural exposition in London in 1912, the last one having taken place in 1866, and having been a remarkable success.

Among the new aconitums, Wilsoni easily holds the first place for hardiness, beauty, size of bloom and sturdiness of growth. Its magnificent blue makes it most desirable for August and September blooming. Aconitum Vilmorinianum grows 12 feet high, is hardy, bearing rather slenderly branching stalks of violet flowers varying in shade and about an inch in length.

The International Congress of Horticulture, held at the opening of the Brussels exposition, was a great success and attended by over 600 members. An extensive programme was given, covering subjects as various as plant diseases, etherization, cold storage, fertilization of fruit trees, horticultural instruction, germination of orchids, forcing of plants, landscape architecture, etc. An interesting question was the reform of exposition programmes, also the part of the press in popularizing horticulture.

Gladiolus Edward VII.—An elegant gladiolus, said to be a cross between Ardens and Crimson Queen. It belongs to the early-flowering group, and adds needful color to it. The flowers

are larger than those of most early varieties, and they open well. The color is deep rich orange-red, with a large whitish central area, shaded with purple on each of the three lower segments. It received an award of merit from the Royal Horticultural Society on July 5, being shown by Frank Lilley, Guernsey.

Rambler Rose Flame.—A beautiful new rose of the rambler or multiflora type. It is said to grow about nine feet high. The flowers are of a rich and bright shade of rosy pink with light center; they are semi-double, and produced in large and effective clusters. It received an award of merit from the Royal Horticultural Society on July 19, being shown by Charles Turner, of Slough.

The Association of Free Spaces and Public Gardens, affiliated with the National Horticultural Society of France, announces for discussion: (1) "Labeling of Plants in Public Gardens;" (2) "Playgrounds." Both subjects are of vital interest in our own country and

THE LEO NIESSEN CO.,

1209 Arch St., Philadelphia, Pa.

Philadelphia.

RAIN DAMAGES OUTDOOR STOCK.

There is no change worthy of note in the condition of the cut flower market. Some very good greenhouse stock, for the season, in the line of roses has been arriving. The outdoor stock has, to some extent, been damaged by heavy rains. The weather continues warm with great humidity and the best buyers still linger at the seaside and mountain resorts. September 5th, Labor Day, brought no extra business to the florists; in fact, if there was any change it was a falling off and a number of the stores closed in the afternoon.

FLORISTS' CLUB MEETING.

The regular monthly meeting of the Florists' Club of Philadelphia was held on Tuesday evening, September 6, President Heacock occupying the chair. Secretary Rust having recovered from his recent lameness was able to be present and assume his official station. The committee on essays reported upon the work which the committee had accomplished during the year, which certainly showed commendable results. J. Otto Thilow spoke of the convention of the S. A. F. and O. H. held at Rochester, which in his opinion was the best that the society had ever held. He warmly commended Pres. Pierson and Sec'y Dorner for their untiring efforts, and results obtained, and was enthusiastic in his praise of the hospitality, and courtesy of the craft of Rochester, and the energy and zeal exerted to make the visitors feel at home and enjoy themselves. Interesting remarks were also made upon this theme by John Westcott, Leo. Niessen and D. F. O'Connor, which were favorably received. The secretary reported the death of George Redford and A. J. Hamilton, both members of the club. The nomination of officers for the ensuing year. The incumbents of the several positions, Joseph Heacock, president; Alfred Burton, vice-president; David Rust, secretary, and George Craig, treasurer, were all re-nominated.

NOTES.

A. R. Jones of the S. S. Pennock-Meehan Co., has just returned from a month's sojourn in Canada. He visited the leading cities, Montreal, Toronto and Quebec, and took a side trip of several hundred miles up the Saguenay river and was delighted with the scenery along its banks. Later he visited Halifax and Digby, Nova Scotia, and was well pleased with what he saw of the country of the Bluenoses.

D. T. Connor, local representative of the Lord & Burnham Co., has just closed a contract with R. Vincent Jr. & Sons Co., of White Marsh, Md., for two houses, each 250x35 feet. A number of other contracts have recently been secured in this vicinity by Mr. Connor.

At Crawford's Flower Shop, 5210 Market street, great improvements are being made in the way of decorating and refitting. There is already a nice conservatory attached to the store and it ranks well with any in the city.

The Robert Craig Co. is doing a heavy business in shipping plants. Their crotons are now the star attrac-

tion and are going out fast. Robert Craig, Jr., is taking a short vacation at Atlantic City.

S. F. Lilly, the wholesaler who recently removed to No. 5 Mole street, is well pleased with his new location. Incidentally, he is handling good stock, for the season, of Killarney and My Maryland roses.

Schenk's at 629 North 17th street, is now handling a lot of very fine ferns, but is equally well supplied with cut flowers and can make up a design on very short notice.

The Primrose Flower Shop, 828 North Broad street, is a retail store that is well worthy of a visit from anybody who appreciates tasteful work.

Mr. Charles Fox is another of the North Broad street florists who has an established reputation and gives customers their money's worth.

Ehret's Floral Arcadia, 702 North Broad street, justly deserves the name as it is a veritable arcadia, and customers go away smiling.

Edward Reid is now handling fine rose stock, in fact, it is hard to find anything but good stock, at any time, in Mr. Reid's store.

Robert Kift is thoroughly redecorating his store so as to have everything in readiness for the busy season.

Samuel R. Ailken, 1722 Columbia avenue, is showing fine design work.

Pittsburg.

PROSPECTS BETTER.

The opening of September sees the homecoming of many flower buyers that forsake the posies during the summer months. The wedding dates indicate that the coming season will be an important one to the florists. Looking over last week, business could have been better in spots. Asters are

Boston.

The first telegram your new correspondent received read at this end—"Go ahead with the Boston work." We are sure no one at headquarters has any such opinion of the Boston flower interests. This is aviation week here. September came in with a fine rain. This is a splendid aster year. Almost no disease. Loads of the finest branching white and other colors await the buyer.

NOTES.

September 3 was the date of the seventh annual stall sale of the Co-Operative Flower Market, 2 Park street. Elijah Cartwright is president and John McFarland secretary. There was a large attendance. Wm. Tailby acted as auctioneer. There were 126 stalls to be sold. The annual rental is \$25 and the lowest bid allowed was \$20. Wm. Elliott, of Boston, got the first choice for \$125, which was the highest premium offered at the sale. About ninety stalls were sold. A point that raised loud protest was that the by-laws allowed anyone who had paid a premium of over \$50 to retain his old stall. A number took advantage of this privilege. A regular caterer was on hand to serve coffee and sandwiches to the crowd.

Welch's were handling some fine 36-40-inch American Beauties, \$4; \$25 per

Weary Willie: "Sure, mum! I peddled violets two years on Broadway."—Chicago Journal.

New York.

PROSPECTS IMPROVING.

Business for the past week has been just what is to be expected in this the dullest month of the year. Plenty of fairly good outdoor stock is arriving, but there is little demand for it. Some fine dahlias are now coming in, but there is very little call for them. Orchids are now quite scarce and the purchasers of them equally so. Both wholesalers and retailers are winding up their vacations now and the finishing touches are being added to store improvements, the odor of fresh paint being noticeable everywhere.

NOTES.

A rather ludicrous opening announcement was pasted on the show window of a store about to open. It read as follows: "Notice a first class florist will open here on Sept 15" (underneath this in heavily outlined letters) "Strictly high class" in type which was an indiscriminate jumble of small and capital letters together.

F. G. Miller, 2703 Broadway, opens for the season September 6. Mr. Miller has just returned from a visit to his old home in Chicago and says there is no place like the Windy City, notwithstanding the fact that while there last week he had his pockets picked twice in four days. What does he mean?

H. F. Darrow speaks very favorably of the azalea novelties seen in his visit to Europe, especially of the three new varieties which were exhibited at the February meeting of the Boston Gardeners' and Florists' Club by Haerens Bros., of Somergem, Belgium.

Geo. Hildenbrand, former manager for John Young, who started in business for himself January 1 in the retail line at 3423 Broadway, is doing a fine business for this time of year and reports some large funeral orders of late.

R. Savage, 2331 Broadway, reports a very good summer business this year and that the present indications are that he will break all previous records for the coming season.

John R. Hartmann's Rosary, 2654 Broadway, had a big funeral order last week for President Harrison's, of the Iron Steamboat Co., funeral.

Robert E. Berry, formerly with the park department, has been engaged by the Elizabeth Nursery Co. in an executive capacity.

Karadonts Bros. will open a store at 2176 Broadway in the new Wellsmore apartment hotel about September 10.

Peter L. Bogart, 970 6th avenue, reports the largest funeral order of this summer last week at West End, N. J.

Chas. Haberman is visiting his birthplace. Wm. Ford does not expect to open his new store much before October 1, place at Frankfurt-on-Main, Germany, and will return about October 1.

August Millang is spending a week on the Long Island coast.

Alex. J. Guttman is going out of the wholesale business.

Baltimore.

DISAGREEABLE WEATHER CONDITIONS.

Hot and sticky is the description here of the weather, so usual to early September, the mercury running up to 90° and the humidity being at the saturation point. There have been some showers, just enough to preserve the reputation of the weather bureau from absolute disregard of truth but not sufficient to do any good to humanity or the growing crop. It is most curious how rain has fallen in spots, a few localities getting all the downpour, whilst others within a mile or two do not get any. One day last week the gauge in the city showed in less than two hours a precipitation of 1.57 inches; at your correspondent's

location in the suburbs it was not over .10 of an inch. The record rainfall of August in the city was for August 1.33 inch, which is just one-third of the normal for that month; but in the greater part of the contiguous territory it was hardly enough to show on the gauges. Springs and water courses are lower than within the memory of living men; the reservoirs of the city supply are becoming exhausted, and if the gates are not opened soon the drought will be a calamity to the city.

Business, naturally, keeps dull, there being little demand for other work than funerals. The city population is just beginning to return to their homes, and it is hoped the customary revival will soon be felt. Stock generally is not of first-class quality, outdoor flowers showing the effects of the dry soil and parching winds.

NOTES.

The four potato races for men, women, girls and boys were all animated, the winners, who received trophies, were Ward Perry and Robert L. Graham first and second in the first race; Mesdames Bauer and Boone in the second; Misses Kress and Graham in

the third, and Willie Bauer and Dock Wagner in the fourth. The 75-yard dash for men was won by Ward Perry. In the 75-yard dash for girls, Miss Glass got the prize. In the 75-yard dash for boys, Dock Wagner was victorious. In the 75-yard dash for ladies, Mrs. Boone was triumphant.

The Gardeners' Club had its customary annual outing on the 1st day of September, at Bay Shore, a very convenient and agreeable resort on the Chesapeake, about two hundred persons, members, their wives, sweethearts, etc., participating.

In bowling there were many events, and the victors are too numerous to mention in this space, the ladies as well as the men getting numerous prizes in the events set apart for them. There was quite a rain shower in the afternoon which interfered somewhat with the program of proceedings—putting an end to the ball game.

There was bathing, fishing, crabbing and other aquatic sports, and the day was one of pleasure and recreation to all present.

Putting balls in basket.—1st, Mrs. W. G. Lehr; same for men, Wm. Ekas. Guessing number of flowers in sealed box, Wm. Kumlenn. S. B.

Albany, N. Y.

Considerable progress upon the preparations for the second annual flower show on November 10, 11 and 12 in the state armory is being made by the Albany Florists' Club and the special committee appointed to act in the matter. At the September meeting of the club a report was read from the committee showing the progress made thus far. The premium list is practically completed and shows twelve cups donated for prizes. Two of the number are from out of town: Stumpp & Walter Co., New York, and Henry F. Michell Co., Philadelphia. It is proposed to encourage a number of exhibitors to come to Albany and some of the best prizes will be awarded in classes likely to attract their interest. The club will put up a cup for the best decorated florist's booth—a prize offered for the first time. The premium list will be placed in the hands of the printer as soon as possible. The name of Alfred E. Whittle was substituted upon the judges' committee for that of A. D. Wemple, resigned. Fred Glockner, A. Simon, Louis Schafer, and Eli Burke were added to the decorating committee and Thomas F. Tracey upon the program committee.

President Goldring at the club meeting appointed Frank M. Briare, Fred A. Danker, and E. P. Tracey a committee to draw up suitable resolutions upon the death of William C. Roche, one of the members who was drowned in Kinderhook lake during his vacation.

An interesting discussion on the wilting of rooted poinsettias was begun by Charles Sanders, who brought a sample of a plant affected. No solution was offered beyond an article in a recent number of an English periodical which Mr. Sanders promised to look up. Some of the members believed that the wilting was due to a fungus attacking the roots. In a discussion upon asters which followed Walter Mott, a new member, gave the results of his recent visit to the fields of H. B. Williams, Baldwinsville, who raises seed for the

Its merits have been conclusively proven through Public Demonstrations.

trade on a large scale. Mr. Mott said that the asters he saw there were perhaps the finest in his experience of over 30 years. He related some interesting facts about the raising of asters at Baldwinsville, among others that one and one-half acres of asters yield 100 pounds of seed.

NOTES.

Byron C. Holmes, Western avenue, is building two houses for chrysanthemums, 25 feet by 116 feet, and 18 feet by 116 feet, to be completed October 1.

R., D.

Montreal.

Trade is good and is promising better for next week. The Eucharistic congress, which will be held here during next week is sure to make a big demand on flowers of all kinds. Already the newspapers talk of that the whole route of the procession will be strewn with flowers. The Catholic churches will all be elaborately decorated. Already contracts have been signed for decorations as high as \$500 with some of the florists. Flowers will be scarce. Flowering plants are already in big demand for decorating private conservatories and for adornment of window sills.

We are in the midst of exhibitions just now. Lachine was the first one on the list. The show, held in the town hall, was the best one yet. Aid. Chas. Smith, the secretary-treasurer of the Horticultural Society, had a large entry in all classes. The principal prize winners were Thos. Pewtress, gardener to H. A. Allen, Pointe Claire; C. A. Smith, J. F. Church, R. Massie, J. Bartlett and F. S. Watson. St. Lam-

bert's exhibition also proved to be a good success; the entries in the garden competition were larger than before, which shows a lively interest. The Montreal Horticultural Society will hold its show next week; the gardens have all been judged and the trophies awarded but it's the show where most interest is taken in, especially by the private gardeners.

A number of visitors from the United States have been in Montreal after the convention. Geo. Asmus, president-elect of the Society of American Florists, remained a few days in Montreal. Mr. and Mrs. Peterson of Cincinnati passed through. Mr. E. Fancourt of S. S. Pennock-Meehan Co. of Philadelphia called on the trade.

National Florists' Board of Trade, 56 Pine St.
NEW YORK**Hail at Cedar Rapids, Ia.**

The most severe hailstorm ever known in that section visited Cedar Rapids, Ia., August 20, the hailstones measuring from 1½ to 2½ inches in diameter, and being of irregular form, inflicted serious damage.

The accompanying illustration of part of the greenhouse plant of I. N. Kramer & Son, Cedar Rapids, Ia., plainly show the loss suffered at this establishment. The north side of the houses, which is the point of view in the illustration, received the most damage but a large number of lights were broken on the south side, as can be seen in the smaller house. The glass was broken into small splinters, looking as though it had passed through a mill, and all the lights that were left in the houses were cracked or broken. The loss to this firm was one hundred and sixty-five boxes of glass.

The stock of all kinds was badly injured. Palms, rubbers, rows and carnations suffered severely. The outdoor stock was literally cut to pieces. Dahlia stalks one or more inches in diameter broken off and the vegetables ruined.

The damage to farm crops was large and many of the buildings including churches and schoolhouses bore the marks of the storm.

Cleveland.**STOCK PLENTIFUL.**

The week has been productive of some very heavy rains, which should improve the outside stock which has suffered from the dry weather. Asters are much more plentiful and are of better quality. Virginia Heather is proving a good seller in small quantities, and dahlias, though short stemmed are in good demand. During the summer months the only demand

The Seed Trade.

American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L.H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

S. B. DICKS of Cooper, Taber & Co., London, Eng., visited the California seed growing sections last week.

MONTREAL, QUE.—Hall & Robinson are building a new bulb shed to hold from 150,000 to 200,000 bulbs—the amount annually forced.

ONE of the European trade representatives now in this country says this is the fourth year of beet shortage and that bare lofts await the new crop.

CHICAGO.—Prices on the board of trade September 7 for grass seed were noted as follows. Timothy, \$7.50 to \$8.50 per 100 pounds. White clover from 20 cents to 25 cents.

SAN JOSE, CALIF.—Chas. P. Braslan says the harvesting of seed crops is nearing completion. Carrot and beet are not up to expectations, but all other crops are good. Mr. Braslan is visiting the bean section this week.

BOSTON, MASS.—Wm. Meggat, pioneer seed merchant of Wethersfield, Conn., now retired, visited S. Market street last week.—Jos. Breck & Sons report having heavy sale of fall seeds. Dutch bulbs are coming in.—Schlegel & Fottler Co., stated their French bulbs were in and shipped. W. T. H.

HOLLISTER, CALIF.—A. J. Pieters, of the Pieters-Wheeler Seed Co., left August 27 for Ann Arbor, Mich., where he will fill the chair of botany in the University of Michigan. Mr. Pieters has been connected with the seed growing industry for several years and is thoroughly versed in all its branches. Mr. Pieters has given up the greater part of his interest in the business.

VISITED CHICAGO: James J. Comot, representing Carter, Dunnett & Beale, London, Eng., making his twenty-eighth annual trip; Geo. H. Dicks, representing Cooper, Taber & Co., London, Eng.; W. Brotherton, representing the Jerome B. Rice Seed Co., Cambridge, N. Y.; C. R. Root of the Barteldes Seed Co., Denver, Colo.; J. S. Michael of the Sioux City Seed and Nursery Co., Sioux City, Ia.

PEAS in the western irrigated sections have not done well.

THERE is some anxiety as to the effect of recent rains on Michigan beans.

THE small quantity of onion sets still unharvested in the Chicago district is probably injured somewhat by recent heavy rains.

American Seed Trade Association.

STANDING COMMITTEES FOR 1910-11.

Delegates to National Board of Trade.—Albert McCullough, Chas. H. Breck. Delegates to National Council of Horticulture.—C. E. Kendel, J. H. Ford.

Representatives on Joint Committees with Nurserymen and Florists.—C. F. Wood, Chairman, W. H. Greenell, Leonard H. Vaughan.

French Hyacinth Bulbs.

Writing from Toulon, under date of July 3, Consular Agent Francis M. Mansfield says of the present crop of hyacinths in southern France:

The first stocks of "season's" bulbs are now on the markets of Ollioules and Hyeres, and within 10 days the traffic will have reached its height. Roman hyacinths of the standard quality and dimensions at first sold for 80 francs (franc=19.3 cents) per 1,000, but the price has mounted progressively to 85, 90, 95, and even 100 francs.

At the actual moment the bulk of the crop in sight has already been bought up by the exporters and middlemen. Unestimated stocks are still in the hands of the small peasant growers, some perhaps are still in the ground, and these smaller stocks (in the ag-

gregate doubtless some millions) will hardly materialize upon the markets of Hyeres and Ollioules before another 10 days or fortnight.

With these further prospective stocks to be taken into consideration certain large dealers (shippers or exporters) have not yet laid in their supplies, counting on a fall in price. If this fall does not actually take place (due to the hidden stock being smaller than commonly supposed) prices are bound to increase in United States markets, above all for bulbs of the larger dimensions (15 centimeters and over). It has been the lack of these large sizes in past years that has made the shortage of the value of the crop and of purchases by United States buyers.

The quality of the crop of 1910 is seemingly excellent throughout the district, that from around Hyeres being perhaps superior on the whole to that which the writer has personally seen at Ollioules, i. e., grown at Ollioules or about there; the crop from all the surrounding region is largely shipped by Ollioules exporters.

The first shipment of 1910 bulbs went forward on July 1. In 1909 the new crop also had its first shipment on July 1, the last going forward on September 6. The total value of the bulb shipments of 1909 to the United States, as per invoices certified at this consular agency, was \$119,047.

[One French exporting jobber writes under date of August 1 that the price of White Roman hyacinths having declined he has sold 100,000 to America at 78 francs. We have heard of price declines from no other source.—ED. A. F.]

Imports.

During the week ending August 27, imports were received at New York as follows:

Vaughan's Seed Store, 219 cases bulbs.

P. Henderson & Co., 202 cases bulbs. J. M. Thorburn & Co., 118 cases bulbs.

H. F. Darrow, 87 pkgs. bulbs and plants, 22 cases five pkgs. seeds.

Stumpp & Walter Co., 63 cases bulbs.

W. E. Marshall & Co., 43 cases bulbs.

F. R. Pierson & Co., 38 cases bulbs.

C. C. Abel & Co., 31 cases bulbs.

Weeber & Don, 10 cases bulbs.

H. Nungesser & Co., 600 bls. clover seed.

T. W. Wood & Sons, 400 bls. seed.

To others, 695 cases, 263 baskets bulbs, 803 bags, 300 bls., 95 cases seed, 500 bls. clover seed, 235 bags grass seed, 100 bags poppy seed, 11 cases plants.

During the week ending September 3 imports were received at New York as follows:

Vaughan's Seed Store, 453 cases, 21 pkgs. bulbs.

W. Hagemann & Co., 215 cases bulbs.

C. C. Abel & Co., 90 cases bulbs.

Schulz & Ruckgaber, 71 cases bulbs.

Stumpp & Walter, 62 cases bulbs.

Weeber & Don, 60 cases bulbs.

F. R. Pierson & Co., 59 cases bulbs.

A. T. Boddington, 57 cases bulbs.

H. F. Darrow, 50 cases bulbs.

P. Henderson & Co., 48 cases bulbs, five cases seed.

W. E. Marshall & Co., 48 cases bulbs.

Wakem & McLaughlin, 46 cases bulbs.

R. M. Ward & Co., 37 cases bulbs.

W. H. Siebrecht, 36 cases bulbs.

H. E. Fiske Seed Co., 31 cases bulbs.

H. H. Berger & Co., 30 cases bulbs.

J. Fee, 31 cases bulbs.

W. S. Pino, 30 cases bulbs.

T. J. Grey & Co., 26 cases bulbs.

Mann Bros., 24 cases bulbs.

R. & J. Farquhar Co., 23 pkgs. bulbs.

C. O'Brien, 11 cases bulbs.

Henry & Lee, 10 cases bulbs.

C. F. Meyer, nine cases bulbs.

Wm. Elliott & Son, seven cases bulbs.

S. Pearce, six cases bulbs.

AUBURN, R. I.—J. V. Mason has been experimenting with strawberries for some years to get a fall crop. He picked a number of boxes of good size berries of fine shape and flavor recently. Mr. Mason intends to continue the cultivation of strawberries for fall or late summer and expects by another season to pick a large crop. G. A. J.

Lettuce Notes.

Lettuce growers generally start their first plants about September 1, some a few weeks earlier. This year there is good reason for an early start as the extreme dry weather in most sections of the country will insure an earlier market as outside competition will be small. There is nothing of greater importance than good plants at the right time. Most growers avoid outdoor grown plants, some refuse them entirely. Yet there is no reason why good plants can not be produced outdoors in early fall. The reason why they are generally unsatisfactory is lack of water and hardening by frosts. We sow in August and September into cold frames, which we cover with cheese cloth. The plants come up very readily and do well under this cloth until hard freezes come on. The cloth protects them from extremes of heat, from some pests and prevents drying out. Most operators sow too thickly, which is a great mistake. Thin plants never produce a heavy crop. We never cover the seed, but often mark with a marker spaced two inches and sow broadcast over these shallowed marks, which gives them ample hold if kept well sprinkled until up. MARKETMAN.

Providence Notes.

E. G. Brook and wife have returned from their visit to Vineyard Haven, Mass., where they have been staying during the month of August. Mr. Brook is managing proprietor of the firm of T. J. Johnston & Co., and reports business very good.

Frank Schellinger had an unusually fine lot of fancy melons in one of his largest greenhouses at Riverside the past summer.

Alex. Macrea has just patented a mixer for spraying and other solutions to be used in greenhouse and nursery business.

Theo. R. Peterson, proprietor of the Hogg Greenhouses, has made extensive repairs and improvements on his range.

The Newport County Agricultural fair will begin September 20 at Portsmouth and continue for four days.

The twelfth annual ball will be held by the Newport Horticultural Society September 20.

F. Macrea & Sons are cutting a good supply of Easter lilies on which they specialize.

William Hay has completed another large house for roses at his place at Oaklawn.

William Gray is now gardener for Mrs. W. B. Leeds at Rough Point, Newport.

J. H. Cushing has gone on an extended trip through the southern states.

Timothy O'Connor and wife have just returned from an extended automobile trip.

Matthew Macnair reports business very good for the past month.

Fred Hoffman has returned to his residence at Pawtucket. J. BRINTON.

Omaha.

GOOD SUMMER BUSINESS.

August, usually the duller month of the year, has this year been the best we have ever experienced, all the florists report an increase in business of from 20 to 40 per cent. On account of the hot weather and dry season stock has been very scarce, and suffered badly. *Giadiolus* were good, but *asters* were a failure and all used in this section, as well as all good roses, were procured in Chicago. Stock now is of better quality and becoming more plentiful, some nice carnations now being received. *Hydrangeas* have sold well and at good prices, and the growers should grow these plants more extensively.

NOTES.

The Florists' Club held their annual picnic at Courtland Beach, August 25. Entertainments of various kinds were here found to amuse the members and their families. We counted eighty-four happy faces when seated at the Pavilion Restaurant, and, after the dinner, the Omaha Rod and Gun Club had their Venetian night at the Lake, and it was certainly a treat for all. In the bowling contests, H. Meyer of Council Bluffs, Ia., and Chas. Green of Fremont, Neb., were awarded the first prize.

Ex-President Roosevelt spent a day and a night in Omaha, and his visit to the city caused quite a business flurry to the florists. His headquarters were at the Omaha Club, which had been elaborately decorated by Hess & Swoboda.

J. J. Hess and family returned from a three weeks' trip, visiting the lakes of Minnesota and Wisconsin. They spent two days in Chicago on their way back.

Decorator Wulff, with Hess & Swoboda, will go east to establish a business in his own name. G.

Aggressive Plants.

It seems to me that we too often err on the side of making phenomena more simple than they really are. Plants are vastly more complex organisms than our formulated ideas recognize. Many of their phenomena completely baffle us. For example, I might mention what has been called aggressiveness in a plant, namely, its ability not only to occupy and maintain the soil but to spread and crowd out other plants. This is particularly evident in plants introduced from one country into another. Thus nearly all our weeds are of old world origin. The same is true of our permanent meadow and pasture plants, where ability to occupy and hold the ground against weeds is essential. In this respect our American grasses and clovers utterly fail before the foreign immigrant. Some other striking instances of the great aggressiveness of an immigrant may be cited. The introduced English violet is said to be one of the worst weeds in Mauritius; American cacti are becoming a pest in South Africa; the marvelous vigor and spread of the American water weed (*Elodea*) under European conditions is well known. Several explanations of these and other phenomena have been advanced.

Mention the American Florist when writing

The commonest one is that the plant is introduced but its fungous and insect enemies are not. Therefore the plant is released from all handicaps as it were and can exercise to the utmost its inherent energy. A second and related explanation is that every plant becomes held within limits by the competition of other plants in its native land and very often in the new environment the native plants do not have an equal restraining influence—because they have had to contend with a different set of competitors. A third idea is that organism with the ability to spread at all becomes more energetic through the constant mixing of blood of the advancing population. All these ideas are interesting, but difficult if not impossible of experimental proof. The last suggestion receives some support from the fact that many weeds and other organisms run out after they have ceased to spread. The recent examples of the Russian thistle and the prickly lettuce are familiar cases. Such phenomena may be due wholly or in part to increase in enemies, but in many cases like the two cited there is not one iota of positive evidence. I think we ought to give such phenomena more consideration as they reveal traits in plants that transcend all our stereotyped and inadequate theories. The old gardener often treats his plants as if he regarded them as sentient beings. Perhaps we err in considering them too much machines.—C. V. Piper in Science.

LIMA, O.—E. A. Siraw, who has charge of the flower beds and parking of the public square, has proposed a plan for the rearrangement of the beds which will greatly facilitate public traffic, which has become quite congested at this point. The plan has been endorsed by the merchants, the board of control, and members of the Progressive association. The details are being rapidly completed, and then the matter will be presented to the city council.

"QUALITY" CHRISTMAS SWEET PEAS.

AT the Exhibition and Convention of the National Sweet Pea Society of America, July 13, 1910, we again won the C. C. Morse & Co.'s Silver Cup for the finest and best collection of Sweet Peas open to the trade only.

THE RIGHT TIME TO SOW SWEET PEAS FOR CHRISTMAS FLOWERING IS IN AUGUST AND SEPTEMBER.

All our Christmas-flowering Sweet Peas are true to name and grown from originator's stock (secured by us) by one of the most reliable seed growers and Sweet Pea specialists in California, and we can make immediate delivery. Our output last year was nearly 6,000 lbs. No kicks and plenty of testimonials as to quality, germination and trueness to type.

BODDINGTON'S EXTRA-EARLY CHRISTMAS WHITE SNOW-BIRD. An exceptionally early Sweet Pea for indoor flowering—will bloom six weeks after sowing. Color clear white, upon long stems; habit fairly dwarf and of exceptionally free-flowering qualities. Without doubt, the finest early white for indoor planting. We sell one grower in Pennsylvania 35 lbs. of this variety every year, name on application. Oz. 25 cts., 1/4 lb. 75 cts., 1/2 lb. \$1.25, lb. \$2.00.

BODDINGTON'S CHRISTMAS PINK. This is the earliest and most profitable and useful Sweet Pea in cultivation, as by sowing the seed under glass in the latter part of August, flowers can be cut from Thanksgiving on during the winter months. Oz. 10 cts., 1/4 lb. 4 cts., 1/2 lb. 6 cts., lb. \$1.00.

BODDINGTON'S CHRISTMAS WHITE. A companion to our Christmas Pink. Just as free and profuse a bloomer. Oz. 15 cts., 1/4 lb. 50 cts., 1/2 lb. 85 cts., lb. \$1.50.

CANARY. Similar to the above, but flowers of an exceptionally good yellow. Oz. 25 cts., 1/4 lb. 75 cts., 1/2 lb. \$1.25, lb. \$2.00.

FLAMINGO. Color scarlet; free-flowering and early. Oz. 25 cts., 1/4 lb. 75 cts., 1/2 lb. \$1.50, lb. \$2.50.

Christmas Meteor. Scarlet; fine open red flower. Oz. 25 cts., 1/4 lb. 75 cts., 1/2 lb. \$1.25, lb. \$2.00.

Christmas Captain. Blue and purple. Oz. 25 cts., 1/4 lb. 75 cts., 1/2 lb. \$1.25, lb. \$2.00.

Florence Denzer. Pure white. Oz. 15 cts., 1/4 lb. 50 cts., 1/2 lb. 85 cts., lb. \$1.50.

Greenbrook. White standard, slightly touched with lavender. Large orchid flowering variety. Oz. 25 cts., 1/4 lb. 75 cts., 1/2 lb. \$1.25, lb. \$2.00.

Le Marquis. This is the same color as Princess of Wales violet; has very large flowers. Oz. 25 cts., 1/4 lb. 75 cts., 1/2 lb. \$1.25, lb. \$2.00.

Miss Helen M. Gould. White, open flower; standard lilac, marbled. Oz. 25 cts., 1/4 lb. 75 cts., 1/2 lb. \$1.25, lb. \$2.00.

Miss Josey Reilly. Lilac; very large flowers. Oz. 25 cts., 1/4 lb. 75 cts., 1/2 lb. \$1.25, lb. \$2.00.

Mrs. E. Wild. Carmine or dark pink. Oz. 15 cts., 1/4 lb. 50 cts., 1/2 lb. 85 cts., lb. \$1.50.

Our 1910 Fall Catalogue now ready, contains a full list of Quality Bulbs and Seeds for Fall sowing. If not received, send postcard and one will be sent by return mail.

Arthur T. Boddington, Seedsman, 345 W. 14th St., NEW YORK

Providence.

The past week found the business unusually brisk, caused by funerals. There were also several social functions. There was a large business done in the letting of decorative plants and laurel roping. There was plenty of all kinds of good stock available in all lines, except carnations. The demand for all sorts of roses, including American Beauties, was exceptionally heavy. Asters are arriving heavily and the percentage of good blooms is great deal larger. The lower grades of blooms were bought up very fast for design work, but the higher grade of blooms sell well at very satisfactory prices which range from 30c to \$3 per 100.

Gladioli are scarcer than for some time past and are bringing better prices. Lilies are scarce and not near enough to supply the demand. Tuberoses are to be had but not plentiful. Cosmos in different colors is coming in more abundant and sells well. Orchids and gardenias are very scarce owing to the great demand at Newport. Lily of the valley is abundant. Garden or field grown cut flowers, such as hardy hydrangeas, dahlias, asters, phlox, tritomas, and golden glow were much in demand the past week. Green stock is not scarce in any line, asparagus plumosa and sprengeri have improved very much during the summer and the demand is heavy. Blooming plants in pots are very scarce. The new crop of nephrolepis fern of the different varieties in pots and pan is beginning to arrive in the stores. The month of August was very satisfactory, both to the wholesaler and retailer. The weather was perfect during the days with cool nights.

Geraniums, Rooted Cuttings

Ricard and S. A. Nutt until Oct. 20. at \$10.00 per 1000. better book your order soon. Poitevine all sold until above date.

Perennial Phlox,

A superb Salmon Pink, strong divisions at \$2.00 per 100 or \$15.00 per 1000. (These prices are cash with order.)

ALBERT M. HERR.

NOTES.

The Newport Horticultural Society will hold its autumn exhibition of palms, decoration plants, cutflowers, dahlias, fruits, etc., September 17 to 19 inclusive. Daniel J. Coughlin, recording secretary, Bellview avenue, Newport, R. I.

Prizes awarded at Pocasset Mills for the best kept lawns, gardens and yards at Thornton, R. I., amounted to \$250, which went to tenants who pride themselves in having attractive flower beds and trim lawns.

The funeral of Hunter C. White, high sheriff of this state, was held August 28 and was the cause of a great business among the florists.

John J. Dunn, who by virtue of being secretary of the State Board of Agriculture, is made an ex-officio member of the State conservation commission, took the oath of office on September 1.

J. BRINTON.

Salt Lake City.

BUSINESS IMPROVING.

The long dull season is about to an end. Business has begun to take on some activity although good flowers

Coleus Rooted Cuttings

Verschaffelti Golden Bedder and Fancv assorted among the latter are a good proportion of D. K. Herr's unrivaled Giant Leaved at \$5.00 per 1000 until Oct. 1. (Fine lot ready now.)

Iris, "German"

Mixed colors at \$2.50 per 100, \$20.00 per 1000.

Lancaster, Pa.

are scarce. Asters and gladioli are coming in fairly good. The retail stores are kept busy part of the time with funeral work, of which there is just enough to about make ends meet and to keep in practice. But the future outlook was never better.

Carnations are nearly all planted up and the growers are in good shape to meet Jack Frost and from all indications he will soon be a caller as the nights are getting cool and we may at any time expect to see some of our profits curling from the top of the smokestack.

NOTES.

The Salt Palace was entirely destroyed by fire on the morning of August 28, wiping out one of our points of interest to the tourist. The Salt Palace was built several years ago and was of dome shape. All columns and outside parts were covered with rock and crystal salt. The interior was used as a theater.

W. W. King will be located in his new store in a short time. The store is being constructed especially for a floral store by L. M. Law.

UINTA.

The Nursery Trade

American Association of Nurserymen.

W. P. Stark, Louisiana, Mo., President;
E. S. Welch, Shenandoah, Ia., Vice-President;
John Hall, Rochester, N. Y., Sec'y.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June, 1911.

NEW YORK.—H. F. Darrow, who has just returned from Europe reports that owing to the disastrous floods in France, pear, manetti and mahalet stocks will be very light this season.

MILWAUKEE, WIS.—C. B. Whitnall, treasurer of this city, in a recent address at Oconomowoc before the State Horticultural society stated "that the fundamental basis for a higher and better living is in individual garden experience. We all love flowers and fruits and we can not live without them. The garden is the only leverage that can lift city dwellers into normal activity."

SPOKANE, WASH.—Five experts have been appointed by the board of trustees of the National Apple Show to pass official judgment on all exhibits and award cash prizes and premiums of a total value of \$20,000 at the third annual exposition, November 14 to 19. Prof. H. E. Van Deman of Washington, D. C., is chief judge, his assistants being J. W. Murphy of Glenwood, Iowa; C. J. Sinsel of Boise, Idaho; Professor S. A. Beach of Ames, Iowa, and J. Gibb of Kelowna, B. C. August Wolf, secretary, 225 Hutton building, Spokane, Wash.

Campaign Against Chestnut Blight.

Harrisburg, Pa., August 13.—A vigorous campaign against the chestnut blight, which is playing sad havoc with many of the chestnut trees along the main line near Philadelphia, is about to be undertaken jointly by the State Forestry Department and a committee of well-known main line citizens. The blight is of a fungus nature, and thus far nothing has been found to operate successfully against it. State Forestry Commissioner Robert S. Conklin believes that a remedy can be found, and to this end the department will co-operate in the crusade. Deputy Forestry Commissioner I. C. Williams will have personal charge of the study of the tree plague for one month, beginning August 29, with headquarters at Haverford College. He will be assisted by State Forestry Inspector George H. Wirt and 12 second-year students at the State Forestry Academy at Mont Alto.

Stocks for Roses.

When we consider the great variation of soil often found in a very small area, the necessity of using foster roots that naturally prefer a certain class of soil is evident. The question of suitable stocks is a wide one, for we can make no hard and fast rule even for a given class or section of roses; while in not a few instances it is even better to use no stock at all. So many opinions are given upon this matter, says a correspondent of the Gardeners' Magazine, that I do not expect to escape criticism, and merely give a few of my own experiences and observations.

We use the brier in three forms, seedling, dwarf cutting, and as standards of more or less height, from the hedgerow. Then there are the manetti, de la Grifferaie, polyantha, and sometimes a few of the stronger-

growing varieties. Some of the easiest to grow are Dorothy Perkins, the others of like habit from the Wichuraianas. These root very freely, and most varieties grow well upon them. Unfortunately the persistent and natural tendency to produce root suckers is very troublesome when making use of these as stocks, but with this exception I like it better than de la Grifferaie or Rosa polyantha simplex. It is certainly a good foster stock for the stronger growing teas and hybrid teas when upon a rather light soil, which does not suit the brier so well as that of a cooler and closer nature. But the suckers must be kept down, and these push from the roots like those of the blackberry and raspberry.

Stocks of these roses are very soft in the bark, and swell more evenly with the growing bud of a strong variety than in the case of briers. But it is fatal to a weak grower for the same reason, as it soon overgrows, and practically swamps it with its excessive supply of sap, much more than any but a strong grower can accommodate. Another point in its favor is its doing so much better upon a dry and naturally sandy soil than is the case with brier, and yet it does not provide the same rankness of sap—if I may use such a term—as the manetti; I also find it quite as early to push into growth. In fact, if it were not for its tendency to form suckers rather freely away from the base of the plant I should esteem it much more.

Referring to the manetti, it must be said that this stock is not nearly so much used now, not even for the hybrid perpetuals and Bourbons, two classes that, a few decades back, were seldom grown in any other form than as dwarfs. It is better than the brier in a few instances, such as very light soils, that we seldom find the brier thriving upon in a wild state. Like the stocks previously mentioned, the manetti is not very suitable for weak growers, and yet we find a few notoriously indifferent habited varieties do well upon it in the maiden stage, and perhaps most of the best flowers of Horace Vernet, Marie Verdier, Louis Van Houtte, A. K. Williams, and Monsieur Noman, among others, are obtained the first season from budded manetti. As a rule, however, these deteriorate rapidly, and seldom live more than three or four years.

There is little choice between the cutting or seedling brier stocks. The first certainly throws a better maiden plant, and frequently gives some grand first flowers, but it soon reverts to its natural habit of deep rooting. Both are the best all-round stocks we have. A much deeper shade of color is obtained, particularly among the crimsons and maroons, while the season of flowering is certainly lengthened, and I find plants upon brier longer lived and not so subject to red rust as when upon the manetti, although the same variety is growing side by side upon the two stocks. If the manetti is not so useful for teas and hybrids in the open, plants often do well when grafted, or even budded, in the open and lifted for pot culture, probably because the roots are unable to wander and get into so strong a condition.

A stock that pleases me very much where a few really good flowers are wanted, in preference to greater numbers, is the short hedge brier. When these break from 18 to 24 inches from the ground we can grow varieties with a drooping tendency better than when upon the usual dwarfs. The very fact of these flowers being so full and heavy causes them to hang down, and often be splashed in some form. Most of these roses, too, are produced upon much more slender growths than the trusses of smaller and lighter varieties. I am alluding to such as Dean Hole, Catherine Mermet, Bridesmaid,

Medea, Mrs. Edward Mawley, Maman Cochet, and its white sport. Abnormally short-habited kinds, like Lady Mary Fitzwilliam, Lady Alice, and others, are also helped by the short brier stems, and I have generally succeeded in obtaining better individual flowers of most teas when grown in this form.

Just a word about soils. We have grown roses upon stiff clay, and upon a clayey soil that pulverized almost to dust when exposed to the air. Here we find brier the best. By the way, such soil as that just described is excellent to mix with light sandy loams, and does more good than so much manure without this stay. Black, sandy, and peaty loam suited the manetti better than the brier, but the stock grew too rank for many varieties. A rich, stiff, and fairly deep loam is the most suitable. But we can make up our soils with a very little trouble, far less in fact than when growing lilies, rhododendrons, azaleas, etc., upon soils not naturally suited to them. Much depends upon manures supplied. Use a stiffer and moister natured manure upon light soils than upon those already on the close or stiff side. These notes will, I hope, help those who intend planting out stocks this season for budding upon next summer. We do not plant out our dwarf stocks until early in the spring, so that there is ample time yet, but it is undoubtedly better to have all hedgerow briers planted by November; October is our favorite month for these.

Foxgloves.

Bring orchis, bring the foxglove spire,
The little speedwell's darling blue,
Deep tulips dashed with fiery dew,
Laburnums, dropping wells of fire.
—Tennyson (In Memoriam.)

Both the English and the Latin names of this, one of the stateliest of our British wild flowers, have a similar, if not the same, meaning, for the former is undoubtedly a corruption of folk's glove, and the latter (*digitalis*) is derived from *digitus*, a finger, or, according to some, *digitale*, the finger of a glove. It has the specific name *purpurea* because of the color of the wild form usually found, but a white variety, known as *D. purpurea alba*, is occasionally found also, and it is from these doubtless that the various shades of cream, red, purple, and rose have been obtained. The yellow foxglove met with in gardens is a different species, *D. ambigua* (syn. *grandiflora*), and usually requires cultivation, instead of being treated as a wildling like the varieties of *D. purpurea*.

It is in the matter of selection of varieties that the foxglove needs some attention rather than in the rearing of the plants. Once a stock has been obtained they may be safely left to seed themselves in shrubbery and woodland, though they will repay the thinning out of the seedlings by the handsome spikes of blossom obtained from well-grown plants, sometimes half a dozen or more to the plant. Not that they are unworthy of a place in the hardy flower border, though, perhaps, it is not good economy of garden space to give them good positions when they will grow in very dry places, and do fairly well. The effect, however, of one or two large clumps of the best varieties at the back of a border amongst other tall plants, say, in front of the shrubs, if the background is a shrubbery, is so fine that the border would have to be of very high excellence indeed if we could grudge the space for them.

Beautiful though the wild variety may be in its native habitat, we can do better in our gardens and shrubberies by obtaining a good strain of the large-flowered varieties, sometimes called *D. purpurea gloxiniflora*, the throat markings on the large flowers giving them a resemblance to *gloxinias*. Afterwards, by letting only the best varieties seed themselves, a good selection can be kept, but to do this means cutting back the spikes of those we do not wish to seed before they have finished flowering, as the seed pods from the blossoms lower down the stalk are ready to burst long before the top of the spike has finished flowering. This, however, serves a double purpose, as the side shoots come so much finer than they otherwise would do. It is in fact not a bad plan to cut down all the flower spikes

500 3½-inch Grafted Pink Killarney
at 10 cents each.

POEHLMANN BROS. CO.,
MORTON GROVE, ILL.

Louisville.

Business is improving and flowers are selling readily, roses are in surplus, however, gladioli and asters have sold better than usual this season; asters have been scarce here and a large part have to be purchased outside.

NOTES.

Anders Rasmussen's new greenhouses are nearing completion and the stock is looking fine. He is cutting fine Beauties, Killarneys, Marylands, Richmonds and Golden Gates. He will use 45,000 carnation plants to plant his greenhouses this season.

Mrs. Lizzie Lang is managing the business of Alice J. Miller during Miss Miller's absence. As she has a great many friends and draws a large trade with her wherever she goes, it will, no doubt, be a profitable arrangement for Miss Miller.

Nanz & Nuener who have leased a three-story building in the next block from where they are now, are having the building remodeled and will, no doubt, have one of the most up to date stores in the city.

L. Gibson, the only colored florist in the city and a veteran of the civil war, recently purchased the ground and residence that he has rented for many years. He is very liberal and accommodating.

Mrs. C. B. Thompson has purchased a farm in Oldham county, where she can spend her summers. While on her vacation she was taken ill and now is very low with malarial fever.

Frank Gottwald is the first on the market here with good carnations this year. He is cutting some extra good stock for this season and gets \$1.50 per 100 wholesale.

S. E. Thompson has opened a new store on Walnut street near the Seelbach hotel. He was formerly wholesale grower, but sold his place.

E. G. Reimers is interested with his sons in the automobile business and reports business on the boom.

H. G. W.

Des Moines, Ia.

The annual meeting of the Society of Iowa Florists was held at the state house, Des Moines, August 31. Very interesting papers upon subjects which were of importance to the members were read and discussed, and a large exhibit of the products of the florist of Iowa was staged at the state fair, August 25 to September 2. At the business meeting the following officers were elected for the ensuing year: J. S. Wilson, Des Moines, president; J. T. D. Fulmer, Des Moines, vice-president; Wesley Greene, Davenport, secretary; John T. Temple, Davenport, treasurer. G. A. Heyne, Dubuque; William Trillow, Des Moines; E. J. Olsan, Ames, and Elmer E. Nordwall, Fort Dodge, directors.

The following premiums were awarded at the exhibition:

- Best collection of plants in bloom—Iowa Seed Co., first.
- Best collection of foliage or decorative plants—Iowa Seed Co., first; J. S. Wilson Floral Co., second.
- Best collection of palms—Iowa Seed Co., first; William Trillow, second.
- Best collection of ferns—Iowa Seed Co., first; J. S. Wilson Floral Co., second; William Trillow, third.
- Best collection of coleus—Iowa Seed Co., first; Lozier's Greenhouses, second.

WE TAKE THE LEAD

In what? What a foolish question! Don't you know? Didn't you hear of **GODFREY ASCHMANN**, the great *Araucaria* Importer, Grower and Shipper? These so well favored, everlasting green decorative plants, the *Araucaria Excelsa*, *Robusta Compacta* and *Excelsa Glauca*, are in favor more than ever this year.

This is our 25th anniversary since we began importing *Araucarias*. Watch! See us grow! Beginning 25 years ago with 100, our this year's (1910) importation is **\$10,000**, and more are coming this fall after I have made my selection of the choicest of the choice on my trip to Belgium; the growing district of the world in *Araucarias* and *Azaleas*. The trade is well informed that for many years past I go personally to Belgium to protect and select for my customers the best of *Araucarias*, *Azaleas*, *Palms*, etc., that cash can buy there. Empty houses won't pay. Now is the time to fill your empty houses with something to grow into money while you are asleep.

Remember, it is the wideawake man that is not afraid to invest a dollar that makes the money.

Please look at our special low prices for superior stock.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants, 5-5½-6-7 in. pots, 12-15 18-20-25-30 in. high, 3-4 5-6 tiers, 2-3-4-5 years old, 35c. 50c. 60c. 75c. \$1.00, \$1.25 to \$1.50 each.

Office and Store: 76 Wabash Ave., CHICAGO. Greenhouses: HINSDALE, ILL.

POINSETTIA PULCHERIMA PLENISSIMA.

The Double Poinsettia. Good stock from 3-inch pots (raised from root cuttings) \$15.00 per 100; 25c each. If you grow poinsettias, you want this. Stock limited. Send your order right away. No orders filled after October 1.

Nephrolepis Smithii. The Washington Lace Fern.

This is a sport from Whitman raised at the U. S. Botanic Garden by Wm. R. Smith; the formation of the frond is like Amerpohli, but dwarf and compact; it is the ideal fern for jardiniere work, possessing all the necessary qualifications. Beauty, grace, form and durability. It is a quick producer and a 1000 can be raised from a 100 between now and Christmas. Extra nice, bushy stock from 3-inch pots, 25c each; \$15.00 per 100.

William S. Clark, 1270 Bladensburg Road,
 WASHINGTON, D. C.

Decorative Plants

"The Florist's Trap"

MOREHEAD

The Remedy for
Your Condensation
Troubles.

A Guaranteed
Investment With
Guaranteed Results.

STEAM TRAPS

RETURN.

NON-RETURN.

VACUUM.

YOU, Mr. Florist, can save fuel—cut down labor—and grow better flowers by installing a Morehead Return Steam Trap.

In the first place, there is only a few degrees difference between the steam going into your heating system and the water of condensation coming from the returns.

It is very foolish, therefore, to cool this water down to a low temperature to pump back to the boilers when, by the use of the Morehead Steam Trap, the same water of condensation can be returned directly to the boilers at a very much less expense than by any other method and without losing any of the heat contained in the condensation.

In the first place, to make steam from water, fuel is required to bring this water to the boiling point under the required steam pressure.

For every ten degrees added to the water by any other means, there is a saving of 1% on fuel.

You can readily see that the cooling of the condensation from 250 degrees down to 212 or less, to accommodate your pump, means a considerable loss of heat, fuel and money.

MOREHEAD Return Steam Trap will put this water back into your boiler at a still higher temperature than 250 degrees, and on 90% less steam required by a pump for returning the same quantity of water.

You then have a combined return trap and boiler feed outfit that will prove out to be one of the best investments you ever made.

Write for "Trap Book" and Trial Offer Proposition.

MOREHEAD MFG. COMPANY,

Dept. "N," DETROIT, MICH.

HEATING PLANTS

Standard Steam and Hot Water Heating Plants

WONDERFUL VALUES. We can positively save you from 30 to 75 per cent on Heating Equipment of all kinds. Our plants are of the most modern type, and only the highest grade material enters into their construction. We guarantee them to be exactly as represented, and highly satisfactory in every way. You run no risks. Send us a sketch or diagram of your building and let us make you an estimate.

Do Not Wait Until Cold Weather to Install Your Plant. Start Now

Send for our Special Heating Catalog, filled with valuable information; tells you every angle and phase of the "Heating Question," and how you can make one dollar do the work of two by installing the plant yourself. Ask for Booklet No. 47.

300,000 feet of Standard Pipe, all sizes, will be cut to any length.

BUILDING MATERIALS AND SUPPLIES

Send for our new 500-page Catalog No. 47. Free upon request.

BOOKS FOR FLORISTS

The following books should be in every florist's and gardener's library. A good book on any subject in which you are specially interested is worth years of experience and should be kept convenient for reference at all times.

Send prices quoted and we send the books.

THE HORTICULTURISTS' RULE-BOOK (L. H. Bailey).—Contains information valuable to all those engaged in any branch of horticulture. Illustrated. 312 pages. 75 cents.**STEAM HEATING FOR BUILDERS** (Baldwin).—Contains valuable data and hints for steam fitters and those who employ this method of heating. The 350 pages are fully illustrated. \$2.50.**CHRYSANTHEMUM MANUAL** (Smith).—By an expert who has given his undivided attention for twenty years to the improvement of the chrysanthemum and its culture in detail. Profusely illustrated. 40 cents.**HEDGES, WINDBREAKS, ETC.** (Powell).—A treatise on the planting, growth and management of hedge plants for country and suburban homes. A volume of 140 pages, with twenty-two illustrations. 50 cents.**DWARF FRUIT TREES** (F. A. Waugh).—Their propagation, pruning and general management, adapted to the United States and Canada. It has 45 illustrations and 123 pages. 50 cents.**HEATING AND VENTILATING BUILDINGS.** (Carpenter).—This book covers the entire subject most fully. In the preparation of heating and ventilating plans it will be found a most valuable guide. \$4.00.**CELERY CULTURE** (Vaughan).—The important subject of celery culture is thoroughly covered in this illustrated pamphlet of 59 pages. The florist raising young plants of celery and those who grow the plants to maturity will alike find it valuable. 50 cents.**CABBAGES, CAULIFLOWER AND ALLIED VEGETABLES** (Allen).—The requirements of the important vegetables of the cabbage tribe are given here very fully. The book also contains interesting chapters on seed raising, insects, pests and fungus diseases common to these plants. 50 cents.**THE CULTURE OF WATER LILIES AND AQUATIC PLANTS** (Henderson).—Growers of hardy and tender water lilies and other aquatics will find this an excellent guide in cultural and descriptive matters. The lists of varieties have been very carefully prepared. Handsomely illustrated. 50 cents.**American Florist Co.** 324 Dearborn St. CHICAGO.

THE ALLIED TRADES

Peace in Slight in Illinois.

Chicago.—With the prices of West Virginia, Ohio and Indiana coals soaring daily at the rate of about five cents per day during past two weeks the operators in Illinois were not content with sitting idly and allowing the high figures to swell the coffers of the coal producers east of the Illinois-Indiana state line. Therefore peace overtures emanating from the operators and miners' officials were in evidence all last week with the result that several conferences were held by interested parties in the rooms of the Illinois Coal Operators' association in the Fisher building. In the aggregate the miners get all they stood out for. Several of the operators stood out for a slight modification of the terms of the Peoria agreement, particularly with reference to the differential mining rates of three cents per ton in the south and two cents in the north Illinois coal fields. They held out for a two-cent differential in Franklin and Williamson counties, as was provided for in the compromise agreement. In all other particulars the operators capitulated and virtually accepted the terms and wage scale provided for in the Peoria agreement. It is understood that the operators were forced to yield on the question of the differential mining rates also, as the miners' officials attending the conference had no authority to change the wage scale formulated by the Peoria convention and they were under instructions to "do the best possible in the matter of conditions of employment of minor importance to get an agreement." The Peoria wage scale provides for a raise of 5.55 per cent for all miners in the state, including engineers, firemen, pumpmen, yardage, day labor, and dead work. The operators also will pay the wages of shot firers, who will receive the same general increase. Under the old scale paid by the miners the shot firers received 53 cents an hour. If a settlement is reached on this basis the provision that the operators pay the shot firers' wages will be regarded by the miners as one of the greatest victories in the history of the coal miners' union.

The outcome of the peace negotiations affects more than 40,000 miners who have been idle since April 1. About 30,000 men were at work in various mining districts of the state, including the fifth and the ninth, whose operators seceded from the association last May and signed up with the union on the basis of the Peoria demands.

CROSS SECTION OF A SUNLIGHT DOUBLE GLASS SASH ON A SUNLIGHT FRAME

Here is the sash you don't have to cover

Two layers of glass instead of one. A $\frac{1}{2}$ inch layer of dry, still air between—a perfect non-conductor—a transparent blanket—takes the place of mats and boards.

The saving in time and labor

Sunlight Double Glass Sash will pay for themselves in a single season. They never need covering—and therefore save half the time you have to give to single glass sash in covering and uncovering—in watching them on frosty nights.

Earlier, Stockier Plants

Under Sunlight Double Glass Sash the plants get all the light all the time. Every grower will see at once the value of the earlier, stockier plants resulting. Your crops will mature weeks ahead of the grower's who uses single glass sash—and you will get the benefit of the high prices in the early market.

Here is what one florist says:

"The 100 sash which I bought of you have given greatest possible satisfaction. We got to 4° above zero and I found my flowers untouched

Moreover, I am daily making 25% more than others who have greenhouses. My double glass sash will pay for themselves the first year." O. W. D'Alcorn, Congress Heights, D. C.

Society of American Florists.

REPORT ON SCHOOL GARDENS.

At the annual convention of 1908, held at Niagara Falls, the subject of school gardens as a general economic movement was admirably presented by the late E. V. Hallock, Prof. L. C. Corbett and F. R. Pierson. This movement is of far reaching extent and is one of practical economic value of greater importance than at first may appear.

At the executive meeting of the Society of American Florists, held at the beginning of this year, the following committee was notified of its appointment—B. Hammond, A. T. De La Mare, Prof. John F. Cowell, H. B. Howard, W. B. Durie and Joseph Heacock. Just what was expected to be done no one knew. So a careful effort was made to find out from all parts of the United States and Toronto, how far the plan of teaching gardening in the public schools or otherwise was being carried on. To give more than a summary of what we found would be too voluminous, and therefore we give a brief synopsis of a trend in a useful direction which is of a business interest to every florist. These examples of what is being done are simply samples taken from far and near.

In one school district in the town of Fishkill is a "Home Garden Brigade." A committee of three—a clergyman, a real estate agent and the street commissioner—look after the brigade, which this year numbers 111 girls and boys attending the public school. The president of the board of education has put at the disposal of this committee a number of prizes, and the result is a visible increase in general of ornamental door yards, and more than that it helps to keep the boys out of mischief.

At Barrytown, in Dutchess county, the principal of the public school, W. L. Weldey, after school hours has personally superintended the cultivation of a good sized piece of ground, which is divided into small plats and assigned to the pupils. At the end of the growing season these sections are examined and prizes awarded; these prizes have been given by the owner of the ground, John J. Chopman, in the city of Poughkeepsie a section of Eastman park was set off, and under the direction of the school authorities and with the earnest support of a number of energetic women, much interest in the work ensued.

At Burlington, N. J., they say—"There are no school gardens nor is there any indication that there will be any in the immediate future." On the other hand from Fremont, Nebraska, we learn that—"In all our schools we have gone to considerable expense in decorative gardening. On each of our school grounds we have plants of coleus, canna and salvia, in such combinations and forms as to make the school grounds far more attractive than they could possibly be made without them. The effect is the improvement of the aesthetic taste of the scholars and this of course is reflected upon the homes. We have seven schools so decorated."

At Cincinnati, Ohio, they give the following report—"Little artistic work thus far in Cincinnati, lots are too small, but landscape work has been done at Avondale, Clifton and Westwood. There is, however, at Douglas a fine school garden, and window gardening is carried on in the new schools. School and home gardens should be officially encouraged, seeds and bulbs furnished at cost, school lots enlarged to permit beautifying part of the grounds, and gardening a part of the school work." This is recommended by the superintendent of schools. Then the civic department of the woman's club has directed the work of chil-

years. The boys did good work and were always ready and eager to go at the job. On Mayfield road is the Italian settlement; this deserted spot was cleared of rubbish, and here was a study of family interest in which fathers, mothers, boys and girls and the babies took interest.

At Dallas, Texas, they say "There is no systematic work connected with each school but some quiet individual effort has been done in which our school children have been interested."

At Houston, Tex., the report is that "In several of the schools last year school gardens were started. We did not carry the work on in any elaborate or formal manner; however, we found profitable results therefrom as far as we went. It's a beginning which is likely to grow." At Los Angeles, Cal., we learn "This is a garden city, a city of roses. Each and every homesteader feels it incumbent to keep his home surroundings up—our children are thus naturally trained in the cultivation of things useful and beautiful. Our public grounds are well cared for, all of which is inspiration."

Kansas, on the other hand says: "I am sorry to say that here in To-

GEO. M. GARLAND CO.,
DES PLAINES, ILL.

of school gardens; however, our children have been given encouragement by their teachers to cultivate flowers and vegetable plots about their own

homes." From Birmingham, Ala., we hear: "The only specific work that has been done in this city in the school gardens has been in connection with the public schools for negro children. Several negro schools have attached to them gardens wherein children by classes, have been assigned plots of ground for work under the instruction of a skilled agriculturist. The negro high school, particularly, accomplished splendid results. Excellent vegetables were raised, which indicated care and diligence on the part of the pupils in their cultivation. Some excellent work has also been done in this line in the elementary schools. The best results, however, come from the incentive offered to pupils to utilize vacant ground contiguous to their homes for gardening. It is expected that the work if continued next year will develop splendid results."

From Alabama to Maine is a long stride, but at Bangor the word is: "I am sorry to say that the school garden movement here is at present so very undeveloped that there is nothing of value to report." At Providence, R. I., says Ernest K. Thomas, the instructor, "Last year eight gardens were started and six were well maintained during the whole season. We have a model school garden of some three acres in Roger William park; this is divided into 72 gardens 9 by 22 feet."

At Woonsocket, R. I., the report is: "So far we have not done much in the way of school gardens, but we hope to move in the future." In the old city of New Bedford, Mass., this matter of home gardening goes beyond gardening and the slogan of the city is "New Bedford the Beautiful City." Seeds are sold to the school children at a penny a package. At Springfield, Mass., Miss Fannie A. Stebbins, supervisor of nature study, says: "For several years we have carried on school garden work which has varied much in character. In each primary school where it has been possible to have sufficient ground we have had work which we speak of as demonstration gardening. In several schools each room has a plot of ground where they are gradually getting together good collections of wild flowers. Five schools are making especial effort in establishing collections of native shrubs; another has used rose bushes and vines in decorating grounds. In the fall each school below the high school has an exhibition of products raised by the pupils at home." At Lenox nothing is being done in this line. At Lee, nearby, a more populous and a manufacturing town, much pride is being taken in this sort of work by the residents. Lawns are well kept and a good deal of shrubbery and flowers are set out but in the rural districts the matter of school ground improvement is neglected.

The people of Worcester owe very much to an old gentleman, Adin A. Hixon, who for years has done remarkable work in educating children in gardening. In that city a certain practical work is being done at a place called "Garden City;" this was the old city dumping ground and was reclaimed under the leadership of a clergyman, the Rev. Robert J. Floody, and his wife. The report from the city police is that "This garden work has reduced juvenile crime in this district over 50 per cent; in this work each child paid five cents, was given a card with the number of the garden, also seeds and tools. He was taught how to prepare the ground, how to plant, and how to care for crops. What he produced was his own to sell or take home. This work has grown until its results are regarded by the city authorities as of great economic value in training children in ways of persevering industry. The

of this work reveals the fact, that many a child has never been taught at havoc even the simplest idea of plant growth, not even the difference between weeds and flowers. The child learns by doing and he should be given a small plot and a few seeds which he may call his own. It is a significant fact that nearly all the

boys and girls who did well the first year do better the next. Said one mother, "This is the best thing ever started, it gives my boy something definite to do during vacation."

In the city of Boston the work of gardening in all its forms is bred in blood and bone. From the Washington Allston school district, where Wil-

William C. Crawford is master, "great interest is manifested by the pupils, as time goes on and we are able to systematize the work, meaning by that to arrange it so as to help it. We shall succeed in making this a line of activity of educational and industrial value. We have between forty and fifty beds planted and cared for by as many boys; these are devoted to vegetables, and in addition are numerous flower beds in front and round about the building, all cared for in like manner."

In Pennsylvania, Philadelphia of course is a leader, situated as it is in the best cultivated section of America, and dominated by the best cultivators in the world, the Quakers and old German stock. Miss Stella Nathan says: "All our gardens are under the direct control of the board of public education and the work is under the direction of a supervisor. We have school gardens, kindergartens, home gardens and school yard improvement. (Kindergarten gardens are small gardens varying in size from 2x10 feet to 30x50 feet; as far as possible the planting is arranged so that each child can gather something from the seed he has planted.) We have 35 kindergarten gardens, these were kept in good condition during summer by some of the larger boys. Of the school gardens proper we have eight. Any lot which we can secure which is within four squares of a public school we take. The gardens are divided into three kinds of plots: class, individual and experimental. In the spring and fall the kindergarten class comes to the garden during school hours and first receives a lesson in nature study, then it does the actual work, planting the seeds and hoeing the ground. When the crop matures it is divided among the little ones."

In the county towns of Pennsylvania we get these reports: At Butler they say: "We do nothing in this line." At Washington, the Superintendent says: "I regret we have done nothing." At Erie: "Nothing is being done by the board of education, but this work is carried on under the direction of the woman's club. This stirs up considerable interest in flowers and ornamental dooryard work."

At Harrisburg the superintendent of schools apparently takes no interest but refers such work to the civic club under whose initiative quite extensive gardens are maintained. At Easton nothing has been done in the matter of school gardens. It seems as though in smaller cities and large villages less is being done in any systematic way than in the chief cities; for instance: in Pittsburg there is being done work of a most commendable character that cannot but uplift the everyday life of thousands of people. The Pittsburg Playground Association reports its work in conjunction with the schools of the city: "We are instructing the children in nature study. We have about five acres divided into plots 6x12 feet, and 700 children work them. Then there is the kindergarten work: there are three plots in which the whole class is interested. These little folk are too young to take charge but their interest in this work is not lessened either by tenderness of years or size of the small pupil."

At Williamsport, under the general direction of Mr. J. L. Ulmer of the Science Department, considerable has been done to advance home gardening among school children. Williamsport is not a closely built city, and a large proportion of the children have gardens at their own homes. "This condition has an influence over the interest taken in formal school gardens. Each year Mr. Ulmer has secured from Cleveland, O., seeds and bulbs for both vegetables and flowers. Nearly every family has used these seeds. In September we set apart a day when these

flowers and vegetables are exhibited in our schools. Window garden work is done in the class rooms by many teachers—this needs systematic oversight and is worthy of general support."

At Minneapolis, Minn., Dr. Charles H. Keene, supervisor of physical training in the public schools, says: "At present we are conducting three school gardens, two of which are in school yards, and one is in a park adjacent to a school yard. During the spring and summer these gardens are carried on under special instructors appointed for that purpose. The area of ground used is about three-fourths of an acre. This work is new. The garden in the park has been conducted for several years but no formal report has been made."

From Winona, Minn., comes the report: "We have not any school gardens as such, but we have given out seeds and encouraged our pupils to raise vegetables at home. One school has planned for an exhibit of their products this fall. This work is new, and we hope and expect to have one or two school gardens next year."

Cairo, Ill., reports: "We have taken up the garden work this spring for the first time in the history of our school system. Every school has its flower garden, each room its separate plot, the children and teachers competing with one another for the prettiest and best. We planted annuals as well as biennials and perennials. We are keeping the plots growing during the summer, and on the whole we have much reason to be encouraged."

At Rockford, Ill., the county superintendent of schools, O. J. Kern, has been very active in stirring up the management of rural schools to teach

gardening. In this he has had commendable success. The country school districts are usually more neglected than in cities or large villages.

In Chicago the school authorities encourage the development of school gardens, but the success of this depends greatly upon the interest which is taken in the individual schools. Some are doing remarkably well and much good has resulted among the homes of the district. Illustrated lectures have been given in different parts of the city showing the possibilities of improving and beautifying the homes in the less favored portions of the city. In some districts, prizes have been given to the pupils who showed the best results in improving home surroundings through floriculture.

At Ionia, Mich., W. Sherman Lister, superintendent of schools, says: "I have conducted school gardens in connection with our public schools during the past two years. We secure seeds from the Home Gardening Association of Cleveland, O., and these seeds are very good. We had about 225 gardens each year out of a total enrollment of approximately 800 pupils. Last year prizes were distributed to the amount of \$35." Jackson, Mich., is dependent upon the Improvement Society for what is done to stir up an interest in gardening; in fact, this seems to be the way of first creating an ap-

preciation of the value of this work. Mrs. John Sharp has done much to bring about interest in home gardening. Grand Rapids, the city of well kept homes, has done a good deal of work in this line. This year 12 schools have school gardens; during school sessions these are well maintained, but during vacation it is difficult to keep up the gardens.

In Detroit, many of the public schools maintain gardens in the school yards. Each year seeds are sold to the pupils under the direction of the board of education and efforts are made to encourage the children to plant and raise flowers; these flowers are exhibited in the fall. Detroit is a city where home gardening is regarded as a necessity if a family would be classed as respectable, hence children are probably far better trained generally in this work than in most other cities.

Hartford, Conn., and New Haven, make full and interesting reports. Ansonia says: "We have several excellent lawns and flower beds in which children are greatly interested, but we have no school gardens." From Middletown, the answer comes: "We have no school gardens." Danbury, where the great fair is annually held, says: "We have nothing in the school garden line on the way at present, but the 'clean up and be tidy' spirit pervades the town." From Stonington we hear: "Nothing of the school garden yet, but the old fashioned habit of a nice home garden prevails."

At Newark, N. J., A. B. Poland, Superintendent of schools, says: "This year we have in this city two school gardens; both of these have been in operation for several years. This work if carried on systematically surely is of practical value in influencing the child to intelligent industry, for you cannot have a nice garden or surroundings without constant effort."

At Albany, N. Y., "Five school gardens have been maintained for several years. Three of these have been very successful, while the others have not owing to unfavorable local conditions, in the spring and early summer." At Roslyn, L. I., nothing has been done in the line of school gardening except a few window boxes. At Binghamton, N. Y., they say: "We have one school garden in charge of School No. 1, Oak street. It is our first experiment with the work; thus far there has been marked interest." At Nyack, N. Y., nothing has been done. Schenectady, N. Y., reports: "We have been interested in school gardens for three years. The seeds were supplied by the city during the first two years, while the present year each child paid two cents for the seeds supplied by a committee of principals." At Glens Falls, N. Y., nothing doing. Plattsburg, N. Y., says: "So far have done nothing in the line of school gardens." Fredonia, N. Y., says: "We have quite a large garden on the grounds of our Westhill school, with 15 sections, which is well cared for by the boys and girls, who take great pride in it. Soon as our Eagle Street school is ready, we shall have a garden there." Southampton, N. Y., says: "We have not done anything in this line yet." Schoharie, N. Y., says: "Nothing doing." Jamaica, N. Y., says: "At nearly all our buildings we have little flower beds and borders, which are looked after by the pupils, but we have no department of school gardening. In the future more may be done in this line." Dunkirk, N. Y., says: "No special work has been done in this line here. I am in thorough sympathy with it and hope in the near future we may take it up systematically." From Jamestown, N. Y., we hear: "We have given some attention to this work in two of our grade schools, especially to the raising of vegetables. In one school the children sold nearly \$10.00 worth of potatoes and the money was used to buy pictures for the walls of the school."

The "Meyer Green Silkline"

is the only Green Thread that should be used by florists and growers. It is guaranteed full weight and full measure.

Also Violet Thread for tying up Violets. Price of both, \$1.25 per lb.

HALF HOUR CHAPTERS FOR FLOWER GROWERS

Roman Hyacinths.

The earlier, after arrival, the Roman hyacinths are planted or potted the better as they need plenty of time to root before being introduced to heat for forcing. There is no need to be afraid of their coming too early as they can be held outside as long as necessary and brought in in batches as needed. A good plan where there are large numbers handled is to place the plats one on top of the other in a perfectly cool, dark shed with strips between them to admit air. The question of soil for these bulbs is not a very important one for they contain all the necessary nutriment and, as they are thrown away after flowering, the soil is practically only a mechanical support and a vehicle to carry the moisture to the bulbs. Place them in position so that the tops of the bulbs just peep out of the soil and give one thorough watering to settle the soil around them before stacking the pots or covering with ashes outside. Either plan is good according to the circumstances of the individual grower. Many growers have a demand for this bulb in small pots and fern dishes. When this exists the bulbs can be placed directly into these and treated similarly to the above.

Paper White Narcissus.

Experiences of growers in recent years has been that the very earliest crops of Paper White narcissus have barely paid for the trouble and expense of the bulbs and culture and for this reason we would not advise growers who are going into their culture for the first time to try and open up a new market for a quantity but rather to grow what they think they can dispose of and a few extras to try out the market. When going into this kind of culture one has always to consider that most of the principal markets are already well supplied and any newcomer has to take his chance with those who have already an established trade and reputation. Of course, in most cities there is an increasing demand annually in proportion to the rise in population and we do not wish to say anything

that would look like trying to cut down legitimate business but it is poor policy to glut any market with stock as it makes it bad all around. The man with a retail demand should by all means grow as many flowers as he can use, for at retail they show a good profit and are very useful in made-up designs and numerous other ways. It is quite a different thing to try and unload a lot of stock on an already weak market. The early culture does not differ materially from that advised for Roman hyacinths.

Carnations.

The plants that have been grown indoors all the season and were planted early in their permanent quarters are already flowering a little and will produce some exceedingly useful blooms. The best of all as yet is Enchantress, this popular favorite having produced many handsome flowers for so early in the season and it is being followed by White Enchantress and White Perfection. Winsor and the Lawson types generally are also good but, naturally, short in the stem as yet. The roots are getting well through the soil and already cultivation, disbudding and watering are being regularly carried out. Feeding is not necessary as yet, the soil containing all the nutriment necessary for the plants, but plenty of water must be given. Field plants in many places are small this year, owing to the dry weather, but we have been surprised to see how well they have taken hold of the soil and started to grow. It is quite time now that they were planted and wherever the benches are ready or can be got ready it is a waste of time and the plants' energies to leave them in the field. The shading put on the earliest planted stock should all be removed now and it should not be necessary to shade any planted after this date. Watering of the newly planted stock should be carefully carried out and only around the plants for a time. There is quite a difference in the way plants lift from various soils. When it is heavy, and especially after a drought, the ball is frequently hard and dry and only re-

peated waterings close up to the plants will moisten this. Other plants, lifted from a more favorable soil, will have this looser about the roots and it will be found easier to properly moisten it. The grower who watches these points carefully and does not water everything indiscriminately as he comes to it will stand a far better chance of success than the grower who goes along with his hose in a happy-go-lucky way and treating all alike.

Chrysanthemums.

The chrysanthemum grower at this season has to be constantly on the watch and the plants need daily attention. Side shoots have to be picked out and buds taken, the supports have to be kept in order and the plants are in constant need of water. Then there are always insects prowling around, ready to descend on the plants in myriads. Black fly attacks just at this time will ruin the most promising buds while, if there has been an attack of red spider and it has been in any way neglected, it will be found very difficult, now that the foliage is getting heavy, to destroy the insects without starting a bad attack of mildew. Although apparently of such simple culture the chrysanthemum needs, and must have, constant attention. An experienced grower looking through a house of plants now that has been neglected will notice the crooked stems caused probably by the plants being allowed to lie in the bench and turn up to the light in an earlier stage. He will also see the dead or dying foliage on the bottom of the plants, showing that at some of the earlier stages the plants had been starved in small pots. To avoid this and to keep the work always up-to-date should be the aim of the grower, for he will thereby save money, time and temper. There was never a better exemplification of the old saying that "a stitch in time saves nine" than in the case of the chrysanthemum grower.

Callas.

The sooner now all callas are under glass the better and whether benched or grown in pots they should be growing away and forming roots. Although almost aquatic in their needs the roots should not be soaked out with water early in the season before they have had a chance to get a good hold on the soil. Plants that were well rested in summer and potted or benched in August are already in full growth and will need an ample water supply. Newly imported roots that have not yet started to grow should be kept just moist and, as soon as growth starts, a careful lookout should be kept for insects, especially green fly. Keep the upper soil in the benches scratched over with a rake or the hands to admit air and keep down weeds and keep the temperature at about 50°-55° at night according to outside weather conditions. Should green fly appear lose no time in fumigating every other night until all are destroyed.

BARRABOO, WIS.—William Puck is building an addition to his greenhouse.

KOKOMO, IND.—W. W. Coles is at Oden, Mich., and will return about October 1.

BIDDEFORD, ME.—The Strout Co. have commenced operations on the new greenhouses on Alfred street.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Decorations at Roosevelt Banquet, Chicago.

One of the most elaborate decorations of the season graced the rooms and tables of the Hamilton Club, at the reception and banquet tendered ex-Pres. Roosevelt upon his visit to Chicago September 8. The rooms were banked with palms and the gold room, in which were seated the guests of the evening, the decorations were in the national colors. Covers were laid for 557 in this room and the tables were heavily draped with ferns, upon which were distributed small electric lights of red, white and blue, over these were laid sprays of asparagus sprengeri through which were scattered short-stemmed American Beauty roses. Large vases of long-stemmed roses of the same variety were then placed upon the tables. The balcony was decorated with flags and bunting of red, white and

blue and in the center of the rear of the hall was placed a large American flag constructed of electric lights of the proper colors. The three other rooms, in which were seated the attending members, the tables were similarly decorated, Killarney roses being used instead of Beauties. In making the decoration 700 American Beauty roses and 8,000 Killarneys were used. Strail & Hahn were in charge of the floral embellishment, and received unlimited praise for the manner in which it was executed.

Casket Covers.

The use of flowers at funerals is unlimited in quantity, and the designs into which they are formed are innumerable, dependent entirely upon the ingenuity of the florist and the length of the purses of the customers, but of all the different forms in which the beautiful products of the florist are employed probably today, the casket

URN OF AMERICAN BEAUTY ROSES.

By Miss Clara King, Alton, Ill.

CASKET COVER OF LILY OF THE VALLEY AND CATTLEYA MOSSIAE.

cover is the most elaborate and expensive that is encompassed in any one single form. To the smaller florist or to one who is unaccustomed to the designing of one of these beautiful creations, the first word of the customer in mentioning a blanket or pall, sends a thrill of horror through his entire system, but to one who is fully prepared for this line of work it means an opportunity to put forth his best efforts, and produce an effect worthy of his ability.

The making of a handsome casket cover entails lots of work and usually a large quantity of stock, and the customer must fully understand that a design of this kind cannot be made cheaply, and that the florist must receive a good recompense for his labor. There are four different ways of making this design which are in use by the more prominent florists. First, the wiring together of strands of different greens, generally either smilax or asparagus plumosus; second, the fastening of greens and flowers upon a silken or cotton netting, either by wires or sewn on with needle and thread; third, the procuring of a wire frame of the dimensions of the casket and wiring one of the many greens closely enough together to form a solid screen, and then wiring the flowers on to the frame; and fourth, procuring a frame, so constructed that it can be filled with moss and the design made up as are the other lines of flower work. Each one of these different modes of construction has its strong adherents, who firmly believe that their way is the only way to bring about the desired result, but in all probability the more expensive designs are made upon the wire frames. The first plan, while being the simpler, entails an immense amount of work and patience, but requires no outlay but the greens and flowers that are wired in. One of our first experiences with a blanket of this form was very discouraging, the customer wanted a cover made of smilax with no flowers, and we received a generous price for the work. The

blanket was delivered at the house and placed upon the casket. When the body was removed to the cemetery the cover could not be found and upon inquiry it was discovered that the funeral director, thinking that it was a lot of loose smilax, had bundled it up together and thrown it away. Many of the best florists make their casket covers by the second plan, that is, fastening the greens and flowers upon a silken netting and some beautiful work is thus arranged. This is all right as long as the design is handled by the florist himself, or by those who understand and will give the proper attention to its removal, but in the hands of a careless person, the most elaborate piece of work may be ruined in a minute so that when carried to the burying lot and placed upon the grave it is a disgrace to the designer and a great disappointment to the customer. This manner of making this design more correctly carries out the blanket idea.

The third plan is probably the manner used by more florists than any other and is more generally understood. The frame is made to conform to the size of the casket of single wire with 2-inch mesh, and then covered with suitable green, asparagus plumosus or sprengeri preferred, this being fastened on with fine wire and draped down the sides to cover the entire depth of the casket. The flowers are then wired and fastened to the frame through the green. The fourth manner of treating this design is far easier as regards the labor expended, and capable of much more elaboration. The frame is made in two sections and adjustable to any size casket, it is then covered on the inside with heavy tin-foil or paper to prevent the moisture from injuring the casket and filled with moss and arranged, as are other funeral designs. Being made in two parts, if the casket is open, the one half can be placed upon the lower end, and then, when closed, the other added and the casket completely covered. The accompanying illustration is of

one constructed in this manner and is composed of Lily of the Valley and Cattleya Mossiae, and was arranged by James H. McManus, manager of the Tremont street store of T. F. Galvin Co., Boston, Mass. In the designing of this beautiful floral piece there were used three thousand Lily of the Valley and fifty Cattleyas upon a ground work of adiantum and asparagus sprengeri, much of the latter being covered with its small white flowers.

September Flowers in Philadelphia Stores.

While from the dealer's viewpoint, the best flowers are not arriving this month, it must be agreed that there are many beautiful and meritorious offerings.

One of our popular city newspapers recently published an interesting cartoon showing the city's growth from 565,529 in 1860 to 1,549,008 in 1910. Old Father Time extends his hand and exclaims: "What a big fellow you have grown to be!"

To those interested in horticulture, (and who among our readers is not?) the statistics of the growth and expansion of the florist business and the increase in the number of stores in this city, the change in methods, the new productions in innovations, would probably furnish more interesting reading than the mere counting of noses.

In matters floricultural, many of the people of New York and other suburban cities, look on Philadelphia as a convenient source of supply when they run short of flowers. They sometimes overlook the fact that the retail stores of this city, many of which are among the finest in the country, use an enormous amount of the finest stock. Another feature is that, this being a city of homes with a home-loving population, the revival of fall business begins earlier here than in some other places. Already the retailers report an improvement and by the end of this month it will be much better.

Coming now to the actual stock in trade of the florists, if quantity was the main factor, we would say that the asters were supreme. While, like every other commercial factor, there are many kinds, yet it must be acknowledged that nothing finer was ever seen than a portion of the stock that is now being handled in the stores of this city. Stale jokes sometimes pass around, to the effect that any market gardener can grow good asters. So be it. Let him grow them if he can. There is no royal road either to the wholesale or retail stores. We are writing of what we can see and of what actually exists and leave theories and experiments to the United States Department of Agriculture, Washington, D. C.

We give the asters large space at this time because they seem almost indispensable.

For the higher priced stocks, such as orchids and American Beauty roses, there is not a heavy demand, but what there is can be readily supplied. In the past, in writing of roses, we have always contended that the American Beauty was about the only dependable rose for this season and our opinions have not changed. This, of course, does not cover funeral work. A skillful designer can work most anything in the shape of a fresh bloom into funeral work, but for a nice bunch for my lady, always a person that is very much alive, give us the American Beauty.

However, it is not our purpose to disparage the tea roses. Doubtless there are good people and good customers of the retail stores who do not fancy American Beauties, for such, at this time, Killarney, White Killarney, My Maryland and even Brides and Bridesmaids may be found, although it must be acknowledged that the last two seem to be falling behind in popularity.

A few very fair carnations, for this season, are seen but they are not a factor in the market and will not be until the reign of the Queen of Autumn (excuse the plagiarism) begins and ends. And, in this connection it may be stated that a few chrysanthemums are already seen, but they cut but a small figure. The time for chrysanthemums is "when the frost is on the pumpkin and the fodder 's in the shock."

Most of the people look on a chrysanthemum at this season of the year much as they do on an incubator baby, to-wit, interesting but not seasonable or natural.

Very fine gladiolus are seen, and in window decorations they add greatly to the effect. The hydrangea paniculae grandiflora is now seen with the pink tinge of autumn on its petals, which adds greatly to the effect when it is made a part of a varied collection in a window decoration. The tritomas (red hot polsers) are also being much used for window display and at this time when we have red hot politics, baseball and aviation or sky-flying, they seem very appropriate. The aquatics such as the lilies and lotus are also very noteworthy in the miniature lakes which the clever decorators construct in their show-windows.

CELOGYNE DAYANA.

ORCHID NOTES.

The Cattleya Fly.

Imported cattleyas should be closely examined on arrival for traces of this dreaded pest. If there are any small holes in the bulbs, denoting that they have had the fly, they should be well washed in a solution of insecticide and water, and placed by themselves, quite away from any other cattleya, till they have made one season's growth, a strict watch being kept for any appearance of the fly. An experienced grower will soon tell whether any plant has it, but an amateur, or even a grower who has never seen this pest, will do well to consult someone who has experienced it, and make sure on the subject, for if it once gets a foothold in a collection of cattleyas it will soon ruin the lot. In a young state it is detected by the abnormal size of the young growth at the base, which tapers to such a degree at the top of the growth that it is out of all proportion.

showing that there is something wrong. If such a growth is cut open there will be found about two to eight white maggots, which feed upon the inside of the young growth, and eventually become flies if allowed to develop, and on emerging lay their eggs in other plants, and so ruin the lot. The best way to get rid of them is to cut off all infested growths as soon as noticed, and fumigate the house with XL All fumigating compound twice a week till the pest is cleared out. It is a drastic method, but the safest. If prevented from breeding they can be quickly got rid of—Orchid Review.

Coelogyne Dayana.

The illustration accompanying this note gives an excellent idea of a small specimen of this orchid. Larger specimens, with more leads and consequently more flower spikes, are very much more effective. The plant is a good grower with long cylindrical pseudobulbs tapering at each end and it is extremely free flowering, the

ANGRÆCUM SANDERIANUM.

long pendulous racemes appearing at various times of the year. In this respect it is a good deal like *C. Massangeana* but the two species are quite distinct in every way. The individual flowers are small, the sepals and petals pale nankeen yellow, the lip brown streaked with white, a peculiar but pleasing combination.

C. Dayana likes plenty of heat and moisture, being a native of Borneo. The compost we have found suit it best consists of peat fiber and sphagnum moss with a little good leaf mould. It is rather a restless species, some portions of large specimens being always on the move. The foliage, while fairly hard, is not able to stand much direct sunlight, consequently a fairly heavy shade should be given in summer. It grows naturally in low lying, hot valleys and on the banks of streams where there is always abundant atmospheric moisture and this fact should be kept in mind at all times. In a dry atmosphere the foliage and bulbs soon become in-

festated with red spider and other insects and this is an end to all healthy growth. Plentiful spraying when growth is active and abundant root moisture are the conditions best for *C. Dayana*.

Angraecum Sanderianum.

The small flowering angræcums are pretty and attractive little orchids, not much grown but well worthy a place in collections when variety is looked for. *A. Sanderianum* is practically the same plant as *A. modestum*, an old species from Madagascar, whence also comes the remarkable *A. sesquipedale*. Like it the flowers are pure white and have very long spurs to the nectaries in comparison with the size of the flowers. Its culture is practically the same as for *phalænopsis*, the plants delighting in ample heat and moisture and liking a small basket or pan filled with sphagnum moss and charcoal. The plants are impatient of any sudden changes in the atmosphere, also of sodden or

decayed compost, consequently considerable care in these details are necessary. Otherwise it is not by any means a difficult plant to grow and always flowers freely.

CHRYSANTHEMUMS

Feeding Chrysanthemums.

The buds on the early varieties are swelling rapidly, every few days making considerable difference in size with them. Now is the time that these plants will be benefited by applications of liquid manure but feeding of the early flowering varieties must not be carried on to the same extent as with the later and mid-season varieties for the reason that their blooming period is at a time when the weather is usually warm and sometimes very close and if the flowers are inclined to be a little soft, spotting of the petals will occur. The amount of benefit the plants will derive from the application of liquid manures depends not so much on how often you apply the manure, but more on how systematically the work is carried on and on how close the plants' requirements and the conditions of the soil are studied. Plants cannot assimilate manure properly when the soil in the bed is too wet, neither is a damp, close day a good time for manuring. On the other hand the soil must not be dust dry at the time of feeding or the plants will take up the manure too fast. A bright day and the soil in the beds in a moist, friable state, are ideal conditions for the application of liquid manure. Half a bushel of cow manure to fifty gallons of water, and let it stand for two days before using; then water through a Kinney pump is about as good a manure as you can get for the early varieties. It can be applied once a week for three weeks, which will allow for the buds to be about two-thirds developed. Then, after this, if the leaves are not over-brittle to the touch, the plants can stand a light dusting of pulverized sheep manure over the surface of the soil, which will carry them along in good condition until the blooms are cut. The feeding of the later and mid-season varieties is a different proposition entirely, for the reason that you have a longer period from the time the buds are taken till the flowers show color for doing the work. This gives us a chance to change the kind of food and style of feeding, going from liquid manure to surface dressing and changing to chemicals and back to clear water entirely for a few days.

How much feeding your plants will stand depends upon their present condition, also on how much feeding by the way of top dressing previous to taking the buds, that the plants have been treated to. The early propagated and early planted stock, which has had liberal treatment from the start, should now be in a very vigorous state, and as such can take care of considerable feeding, starting out with liquid cow manure, changing off to top dressing of sheep manure, from this to a four-inch pot of nitrate of soda to fifty gallons of water, then back to clear water, then another application of liquid cow manure until the buds are two-thirds developed, when a light top dressing of sheep manure will carry

them through. I am not a believer in the method of feeding the commercial stock up to the time the petals show color or beyond, preferring to let up a little before and let the plants have a chance to harden off so as to give substance to the petalage. With the exhibition stock the man who undertakes growing it generally figures to grow his plants to the limit, and will carry the feeding along until the petals are showing color, but he has got the feeding process down to a science and watches his plants so closely that he can tell just when to switch off. He knows his soil, knows the atmospheric conditions under which his plants are growing, but to advise another grower what to do along the line of feeding his exhibition stock might be all wrong, the grower for exhibition must, therefore, to a great extent, study out his own problems of feeding.

Taking the buds still takes up considerable of the time, but this part of the work must not be neglected and all buds should now be taken as soon as they can be safely handled. Another thing, that should be attended to right along now, is to keep the plants tied up straight so that there will not be any crooked stems. Afternoon syringings should be dispensed with from now on, also caution must be exercised with any morning syringing; if the weather is hot and bright a daily syringe is beneficial, but during close, muggy weather, it is best not to syringe as often, though the letting up must not be carried to the extent of allowing the red spider to infest the plants. Plenty of fresh air is what the plants delight in just now. Give all the ventilation possible, day and night, but avoid any strong currents through side ventilators or open doors.

C. W. JOHNSON.

Bouvardias.

Although the bouvardia is a much hardier plant than many people imagine, it is time now that the outdoor plants were lifted and potted or benched, according to convenience. Plants that have been kept regularly pinched will now be nice bushy stock, bristling with young shoots and ready, in the presence of a little heat and atmospheric moisture, to burst into flowers. But it will not usually be necessary to start forcing at once. In fact the word forcing is hardly applicable to bouvardia culture as the plants never like much heat, especially overhead. What they like in the flowering season is a little bottom heat to keep the roots moving and a cool temperature overhead to give strength and stamina to the shoots. They also like ample spraying overhead and air on at the same time, this keeping the growth hard yet clean and vigorous and checking insect attacks. The taller growing varieties of the Humboldt order should be allowed ample head room, needing more than President Garfield, Alfred Neuner and the Leianthe and Davisoni (Vreelandi) sections. But all are beautiful flowers well worth cultivating and to the retailer who has a little glass there is nothing more useful from October till March.

OLEAN, N. Y.—Dana R. Herron will open an up-to-date florist store about Oct. 1.

THE CARNATION.

Seasonable Notes.

The plants which have been grown under glass all summer are now well enough established and rooted in the soil to be allowed to come into flower. Not all of the plants on a bench will be of the same size and condition, and if there are among them any that have not made a reasonable number of shoots they can be gone over and their shoots topped back again. Before the plants are allowed to come into bloom the requisite number of wires or stakes should be put on to take care of the shoots as they come up. These indoor grown plants are now making a rapid growth, the fact of their roots having control of the soil and weather conditions being favorable to carnation plant growth, it seems as if one can fairly see the plants take on additional shoots every

same directions should be followed as stated for indoor grown stock. It is a mistake to pinch back a whole bench of plants injudiciously at this late date. If there are any plants already clothed with sufficient shoots to be allowed to let the blooms come along, they can do so, and the backward ones gone over and topped back once more.

The planting in from the field that is still to be done should be pushed along without delay, if flowers at a reasonable early date are desired. Stock planted in after September 15 will take longer to get established in the soil. Less shading will also be necessary than earlier in the season, and after the first watering in they should be treated to slightly dryer conditions, both at the roots and through syringing. One of the things that retard quick recovery after planting at this time is the strong draughts from the cool winds which we usually get from now on at this season of the

VIEW IN ROSE HOUSES AT HOERBER BROS., DES PLAINES, ILL.

day. Plenty of ventilation and clear sunlight, with the soil in the beds kept in an open growing condition, should be the growers' aim from now on. Do not water until the plants absolutely require it, then thoroughly, and between each watering still keep the soil open by frequent scratching of the surface. Syringing early in the day on every bright day to keep down red spider should still be carried on, and if a very hot spell sets in, damping down the walks right after noon is very beneficial.

Stock planted from the field in July or early August should now be on the same basis as those entirely indoor grown. All shading from the glass should be entirely removed and all the light and air given that is possible. We also find one of the necessary items for the plants' well being is to make sure that the soil is not at all spongy, but firm enough for the water to pass through it thoroughly. Regarding the pinching back of the shoots on this early planted stock the

year. It is best, therefore, to run the ventilators a little closer on newly planted stock than is generally the custom; also attend strictly to the keeping down of the insects by fumigating at every favorable opportunity.

C. W. JOHNSON.

Pulverized Sheep Manure for Carnations.

ED. AMERICAN FLORIST:

How much pulverized sheep manure will it take for soil in the houses to be planted the second year with carnations? The bed is 4 feet, 6 inches by 100 feet. Is it well to apply two lots, top and bottom, and is it considered better than cow manure? I. X. L.

We have never used the pulverized sheep manure in this manner, our method of using it being as a mulch for the soil when the plants are well established and in full growth. If we had the choice between well rotted cow manure and pulverized sheep manure for mixing with the soil for the purpose stated we certainly should use the cow manure. Sheep manure is a

EXTERIOR VIEW OF HOERBER BROS. GREENHOUSES AT DES PLAINES, ILL.

highly nitrogenous fertilizer, quick in action but having a tendency to promote a soft growth if not used with caution. Our objection to using it as stated would be for fear of its souring the soil. We advise treating the soil to a liberal application of bonemeal, then, after the plants are well established, use the sheep manure as a top dressing or in liquid form.

C. W. JOHNSON.

Flower Industry in France.

The Syndicat des Horticulteurs gives the production of flowers in the Nice district in 1909 as 7,550 tons, valued at \$5,790,000, the industry employing 18,600 persons. Two special trains transport these flowers daily to the north, especially to Paris, London, Berlin, and St. Petersburg, during the season. The flowers are packed in light willow baskets weighing either 6½ or 11 pounds, and are forwarded to their destination by parcel post. The flowers cultivated for export are chiefly carnations, violets, and anemones, while orange blossoms, tuberose, and jasmine are most extensively used in the perfume factories at Grasse. The production of flowers being more remunerative than farming is the principal reason for the large imports of dairy and farm products into Nice.

In the flower gardens a man earns about 60 cents a day and a woman 40 cents, and in some cases less. A girl flower picker in the district of Grasse earns 20 to 25 cents a day.—Report of Consul William D. Hunter, Nice.

FOXBORO, MASS.—A new heating system is being installed by N. S. Small at his greenhouse plant.

BISMARCK, N. D.—The Hoskins Floral Co. invites the public to inspect their greenhouses Sept. 2 between 2:30 and 5 o'clock. They have five thousand rose bushes and seven thousand carnation plants, which are in very fine condition.

HAMMONTON, N. J.—The commercial growers of this vicinity interested in the cultivation of dahlia blooms for the Philadelphia market have organized the Association of Hammonton Dahlia Growers and elected the following officers: W. F. Bassett, pres.; C. A. Wood, vice-pres., and Edward H. White, sec'y.

WITH THE GROWERS

Hoerber Bros., Des Plaines, Ill.

Not so very many years ago, while visiting one of the largest growers of the east and remarking upon the size of his establishment, he, at that time, having about fifteen narrow houses 100 feet long, each with its head house and boiler at the end, the proprietor laid his hand upon our shoulder and said: "Young man, you are going to live to see this business increase until you see greenhouses built that will cover acres all under one roof." How forcibly this prophecy came back to us upon our recent visit to the recently constructed greenhouse plant of Hoerber Bros., at Des Plaines, Ill., where, standing at one end of the range, we could look for nearly 600 feet in one direction and 300 in the other all under one continuous roof, for this establishment consists of twenty-one houses built upon the ridge and furrow plan, ten of which were erected in 1909 and an addition this year of eleven more, covering four acres of ground, and of the most modern construction.

Particularly fortunate in the selection of a site for their establishment about

one mile south of the Des Plaines station, covered with a strong black loam that shows its rich qualities in all the neighboring vegetation, the Wisconsin Central railroad skirts the rear of the property and foresight was shown in placing the greenhouse plant along that part of the property. The large boiler house is in nearly the middle of the range and backs up to the railroad from which a spur track enters the property running to the coal bin so that the coal can be thrown direct from the car into the coal bunker. A 200 H. P. Fairbanks steam boiler has this year been set in addition to the two 150 H. P. boilers used last year, promising adequate steam capacity. Detroit steam traps are installed to empty the returns. An artesian well 1,150 feet deep supplies the water, which is pumped direct to the mains in the houses, a small upright boiler being used for this purpose. A large packing shed and tool house connects the boiler room with the greenhouses, obviating all danger from gas, and fire extinguishers are handy to prevent a calamity.

Foreman J. W. Dunn kindly escorted us through the range and permitted us to obtain the accompanying illustrations. Fifteen houses are planted to

VIEW IN CARNATION HOUSES AT HOERBER BROS., DES PLAINES, ILL.

roses which are in a very fine condition, this year's planting making very good growths and the two-year-old stock showing fine breaks which promise an exceptionally good winter crop. The varieties here grown are those in greatest demand in the market. The varieties and quantities are as follows:

10,000 White Killarney.
25,000 Killarney.
25,000 Bride.
5,000 Richmond.
1,000 My Maryland.

Although the past summer has been far from auspicious for the production of large carnation plants, yet the houses are filled with stock that is of good size, being well branched and beginning to produce bloom of good quality. Some 40,000 plants are now benched in five of the recently constructed houses, and are growing finely, standard varieties in these quantities:

8,000 White Perfection.
8,000 White Enchantress.
4,000 Enchantress.
8,000 Winsor.
8,000 Victory.
4,000 Beacon.

The chrysanthemums were in elegant shape, and a grand cut of fine commercial blooms is assured. The buds are being now taken and this house by the middle of October will be a grand sight. The varieties grown are Early Snow, Polly Rose, Major Bonnafon, Robert Halliday, Mrs. H. W. Buckbee and W. H. Chadwick. All the spare room which can be utilized, such as the ends of the rose benches, is planted with *Asparagus Sprengeri*.

The stock grown at this establishment is placed upon the market at the wholesale store at 51 Wabash avenue, Chicago, where W. F. Hoerber so pleasantly presides, the brother, F. C., having charge of the greenhouse end of the business.

The School Garden Movement.

A paper read by Wm. B. Du Rie, Rahway, N. J., before the Rochester convention of the Society of American Florists, August 16-19, 1910.

It is scarcely necessary for me to mention the fact that the prospects of the school garden movement have materially improved in the last few years. In a former paper, I alluded to some of the difficulties which stood in the way of their introduction in the common schools. One difficulty was the prejudice against innovations. The successful business man, whose opportunities for schooling had been limited in his boyhood, generally dwelt on the value of "the three Rs" to the disparagement of "fads." What was good enough for him 50 years ago ought to be good enough for other people's children now. This idea, however, has not prevented the wonderful progress of the schools in the last decade, not only as to the subjects taught, but in the methods of teaching.

The requirements of teachers as to their preparation for the training of children have made it possible to take up lines of work not possible in the past. In consequence the prospect of finding a place for school gardens has much improved. Manual training, shop work, drawing, sewing, and cooking, as well as nature study, have found their place in the best school systems. Their advantages to the children are now so well established that what were once regarded as inno-

vations and experiments, are now being regarded as necessities. The benefits to children resulting from these changes, from a wholly literary course to one covering a wider range of subjects, wisely chosen, has opened the way for further advancements of a like nature.

Any kind of school work which enables children to do and to see things done is most attractive to them. It inspires thought and effort. It induces habits of industry. It leads them to express their ideas in words, thus helping them in language study. Features of geography and arithmetic can be applied, and their knowledge strengthened in those subjects in connection with manual training, nature study, or school gardening. This is a great advantage, and gives far better results than simply memorizing alone. The success that has resulted from work of this nature is making it easier to effect other changes in the public school courses of study, especially changes which promise similar beneficial results.

The increasing success of the work of the public schools generally, owing to improved methods of teaching, of better supervision and increased attention from school officials, the general public, and the press, has very greatly advanced the prospect of the more general introduction of school gardening. Not that the subject has received much consideration from school authorities, as yet, but that the time is ripe to press the importance of their doing so. Efforts in this direction now, and for a few years, will doubtless bring satisfactory results.

It is not my purpose to enter upon the details of conducting school gardens. We have not the time. Publications on the subject are sufficiently numerous to point out suitable plans for the adoption of those wishing to carry on the work. Courses of study have been prepared and employed with success over a wide range of territory, covering points extending from the Atlantic to the Pacific. The progress of the movement is our subject, and the consideration of what should be done by our body to help the project along should receive our attention. That some of our universities are providing courses to prepare teachers for the work is a matter of great satisfaction, and if our society, and the individual members, will keep in touch with the movement and exert a proper influence, good results will certainly follow. The success attained in nature study and manual training affords our greatest encouragement.

School gardening, to a great extent, will proceed on similar lines. The good effects on pupils, when school gardens become more common, will be seen and felt somewhat in the same way. There is no doubt as to the interest taken by children in the growth of plants under their care. No subject can be made more interesting to the child. The lessons under the qualified teacher, while bringing out many of the wonders of nature, and the arts of assisting nature, afford some of the best means of developing the child. I should not fail to speak of this. I regard it as the most important fact in connection with the subject.

The development of the child in right thinking and acting is paramount to

all else. To lead the child over delightful paths of recreation to the highways of permanent usefulness and happiness is an aim worthy of our best efforts. In this view we all agree; and it would be a waste of time to argue the point. But I ought to mention some of the more striking benefits to come to children and to communities for development on these lines. First I will mention the importance of diverting children from influences and associations common to all communities, especially large cities. The advantage of counteracting the tendency of young people to flock to the cities for employment and amusement. A love of gardening and farming based on a knowledge of the principles and practice which brings success in these occupations, is probably one of the strongest influences which can be brought to bear to prevent congestion in cities, and consequent poverty among the laboring classes. The blessings of fresh air, sunlight, and room, set against the evils of crowded tenements must appeal to the philanthropy which will provide means suitable for instruction along these lines whenever and wherever the advisability of such action is properly presented.

My attention has been called to the fact that seven families from a certain neighborhood of New York were recently induced to move into the country as a result of the interest awakened in their children by attending the school garden in De Witt Clinton park. This garden is under the management of Mrs. Henry Parsons. It was my pleasure to visit it and to see the excellent work done there by Mrs. Parsons and her assistants. I greatly enjoyed the sight of those boys and girls in their most enjoyable occupations. As I grasped what should be the influence upon their lives through their contact with the soil, their work, and the instruction, I felt that the business done on those three acres, more or less, well paid for all the cost in effort bestowed on it. As an object lesson of what can be accomplished by others it is doing a vast amount of good. That must be the justification for devoting such a valuable plot of ground, almost in the heart of the great city, to such use.

Two books on schools have recently been published in New York to which I wish to call attention. They are reviewed in the Newark (N. J.) Evening News, May 21, 1910. I will quote from this review some of the salient points made: "A strong plea for the institution of school gardens is made by Henry Griscom Parsons in the book, 'Children's Gardens for Pleasure, Health, and Education.' The author is secretary and practical adviser of the International Children's School Farm League, and director of the department of school gardens, New York University. Mrs. Henry Parsons, the author's mother, to whom the volume is dedicated, was the founder of the first children's school farm in New York City, and is prominent in the school farm movement."

"He holds to his mother's view point of the purpose of school gardens; that the main object of the gardens is to foster the growth of children rather than merely to grow plants. This new view point is vitalizing the work. It

has given it, says Mr. Parsons, a reason for more general use than it ever had before and wherever children are being educated the possibility of having a garden is now being considered. During the past few years, such gardens have rapidly increased in number, and from now on they are destined to play an important part in the education of children.

"The author, in presenting the advantages of the school garden, insists, among other things, that in it the child is taught by nature economy and thrift, and that he is in a healthy environment and absorbs lessons making for the health of the individual, and the community; and that he gains knowledge of food value, and his happiness is enhanced by congenial work under skillful direction." The book is published by the Sturges and Walton Co., 31 E. Twenty-seventh, New York, at \$1.

"Dr. M. Louise Green is the author of an extremely interesting volume in the 'Russell Sage Foundation' series. The author describes the evolution of the school garden, pointing out its many advantages and possibilities, not the least of which is the effect on the child's character. The activities of school garden work are natural to the child and give much needed respite from school restraint." This book comes from the Charities Publication Committee, and the price is \$1.25. Both of these books are copiously illustrated by photographic views of the work being done in many communities and institutions, and they contain specific directions for conducting different kinds of school gardens.

Both books were copyrighted in 1910. I am in no way financially interested in these books, but I own a copy of each, and I think everyone before me today should read the books at the very first opportunity. Another valuable source of information on the subject can be obtained by communicating with the University of California, College of Agriculture, Berkeley, Calif. Ask for Circular No. 46, containing suggestions in Garden Work in California Schools, by Ernest B. Babcock. This circular contains, in addition, a list of the publications, bulletins and circulars of the agricultural station of the university, 45 in all, any of which will be sent on application.

Every man, every woman, every child, should have a garden, the size and character depending on the individual, and the space at hand. A flower pot, a window box, a small back yard may have to suffice in a city where nothing better can be had. Any place without some suitable spot for the growth of plants, shrubbery or trees is unsuitable for human habitation. The pleasures and the profits, the companionships elevating to body and mind, tend to restrain from all that might demoralize. A lover of good books and a good garden is not likely to go far astray. He will live in and enjoy a beautiful world.

CHASE, MD.—The Ladies' Aid Society of the Ebenezer M. E. Church will hold their fourth annual Harvest Home in connection with the Vincent Dahlia and Flower Show at Cowentown, B. & O. R. R., on September 27, 28, 29 and 30, 1910.

The Fancy-Leaved Caladiums.

The present is the closing installment of Mr. Nehrling's valuable paper, which commenced in our issue of July 10, 1909, and was continued July 31, October 9, November 27, 1909, and January 8, February 19, April 19, May 7 and 28 and July 2 and 23, 1910. It brings the history, culture and nomenclature of this important plant right up to date and these back numbers should be carefully preserved for reference.

Hyways and Byways.

SCRANTON, PA.—T. B. McClintock and family have returned from their summer cottage at Falls, Pa., in the mountain range, about eighteen miles from Scranton. He has purchased an automobile and this week will take a trip to Buffalo in the same, accompanied by his son.—Morey Bros. have finished planting their large range of carnation houses. They suffered severely with the dry summer weather and, while acceptable plants were grown to fill the house, the surplus was small. They report an exceedingly good summer business. Funeral orders prevented their attendance at the Rochester convention.

ELMIRA, N. Y.—Foreman Salyer of the La France Carnation Co., who was formerly with I. G. Marvin of Wilkesbarre, Pa., has nearly finished planting the carnation houses, the dry weather having greatly delayed the work.—At the United States Cut Flower Co. the carnations, roses and chrysanthemums are in very fine shape. The extremely dry summer prevented the usual growth on their carnation plants and they consequently have not as many field grown plants to offer for sale as usual.

YORK, PA.—Charles E. Smith has erected two new greenhouses, one 15x70 and the other 20x120. He will grow a general line of plants in the latter house and devote the smaller to palms.—C. A. Schaefer has added two new houses to his plant, one 20x130, in which he will grow violets, and one 30x130, planted to carnations.—August H. Schaefer is planting his violets into the new house, 12x150, erected this season; the violet plants have made an exceedingly poor growth this year.

WILKESBARRE, PA.—Alfred Baur, formerly of St. Joseph, Mo., is now in charge of I. G. Marvin's greenhouse plant. Carnations are well established and looking fine and Richmond roses are in excellent shape. ABYDOS.

Charles A. Schramm.

Charles A. Schramm of Toledo, O., died at his home Aug. 30. His death removes the last of the family of three brothers who were among the pioneers in the florist business of that city. He was stricken with paralysis a week before his death and later suffered a second stroke from which he never rallied. He is survived by a wife and five children.

THE AMERICAN FLORIST

1885 TWENTY-SIXTH YEAR 1910

Subscription, United States and Mexico \$1.00 a year; Canada \$2.00; Europe and Countries in Postal Union, \$2.50. Subscriptions accepted only from those in the trade.

When sending us change of address always send the old address at the same time.

Advertising rates on application.

From the first issue the AMERICAN FLORIST has accepted only trade advertisements.

Advertisements must reach us Tuesday (earlier if possible), as we go to press Wednesday.

We do not assume any responsibility for the opinions of our correspondents.

Protecting Dahlias From Frost.

W. H. Tarbox, East Greenwich, R. I., writes that he employs the following method in protecting his dahlias from the early frosts, thereby extending their season of bloom. On nights that frosts may be expected, about every 100 feet on the west or north sides of the bed, and about 15 feet from the plants, are built bonfires constructed of logs 1 foot in diameter and 2 feet in length, to which is sometimes added one-half bushel of coal to each fire. At 10 o'clock, if the thermometer has fallen to 40° the fires are lighted and this will furnish the necessary protection. By this method he has been able to have fine blooms until Nov. 3, in the New England state.

Correction.

In the Ready-Reference poinsettia advertisement of W. S. Clark, Washington, D. C., in last week's issue, the plants were quoted at \$15.00 per 1,000 when it should have been \$15.00 per 100.

Cement Pots.

Truly, this is the cement age, with cement streets, railways laid in concrete, cement bridges, cement public buildings, cement dwellings and cement fence posts. Cement has been very largely employed in greenhouse construction in recent years for walls, paths and benches. We have had pipe-joints of cement and now we are to have cement flower pots. Elsewhere in this issue attention is called to the fact that Howard & Smith, Los Angeles, Calif., have been granted a patent on cement pots and it is stated that these pots have proved a success, especially in the large sizes, 9-inch to 24-inch.

The common clay pot is a time-honored institution and seems thus far to have held out well against all competitors, including wood, iron, paper and compost. The red clay pot has many things in its favor, not the least of which is its color. The development of its latest competitor will be watched with interest.

The Greenhouse Leaf-Tyer.

On January 17, Wm. J. Rowe, gardener to Joel Sperry of Whalley avenue, New Haven, Conn., brought to the station some caterpillars which were injuring greenhouse cinerarias and daisies by devouring the leaves. The following describes the larva:

Average length 14mm. Average width 3mm. General color, light green along dorsal surface with a light greenish yellow tinge on lateral and neutral surfaces. A narrow dark green median stripe extends along the dorsal surface from behind the head to the last segment. Four rows of bristles on each side of mid-dorsal line extending length of body with one bristle on each segment except the row next to mid-dorsal line on each side, which has two bristles on each segment. Head has a light brown tinge with darker brown spots.

On January 21 one of the caterpillars spun a cocoon and transformed to the chrysalis or pupa stage and the others soon followed suit. The first moth emerged on February 10. The insect proved to be *Phlyctenia ferrugalis* Hubn. (*Rubigalis* Gaen). This species is known as the greenhouse leaf-tyer and according to Chittenden has caused considerable damage to greenhouse and field plants, including vegetables, during the past few years. The larva works on the under side of the leaves, often fastening two together with silken threads or curling the edge of the leaf on which it may be feeding, and enclosing itself in a thin web.

The adult is a slender species with a wing-expanse of about three-fourths of an inch and of a pale reddish brown color, with inconspicuous markings. It is said that there are at least two and perhaps more annual generations outdoors, and more—probably five or six—in greenhouses. There are published records of the occurrence of this insect throughout the eastern states and in California. The list of food plants includes cabbage, beets, celery and tobacco, rag weed, hedge mustard, and a large number of greenhouse and outdoor ornamental plants.

The whitish translucent eggs are deposited either singly or in masses of eight or ten on the under side of the

leaf; they hatch in a period varying from five days to nearly three weeks. The larval period lasts from three to five weeks according to temperature and the pupal period usually about two weeks. The adults fly just before sundown and usually rest during the day on the under side of the leaves of the plants, upon which the larvæ feed. When at rest the wings are folded in the manner common to most pyralid and deltoïd moths.

Wherever much damage is done or the caterpillars are sufficiently abundant to cause apprehension, the plants may be poisoned by spraying them with lead arsenate or by dipping them into the liquid. The poison should be mixed at the rate of about one pound in 10 gallons of water. Where spraying is practiced it is necessary to apply the poison to the under sides of the leaves. Chittenden advises fumigating the house in serious infestations and gives directions for carrying out the treatment. For general fumigation from one-tenth to fifteen-hundredths of a gram of 98 per cent potassium cyanide for each cubic foot of space should be used.—Report Conn. Agr. Exp. Sta.

Chrysanthemum Society of America.

Chicago.

ROSES ARE GOOD.

The conditions of the market are fast approaching that stage that can be best described by the old farmer's saying, "between hay and grass." The outdoor stock is rapidly approaching its end and the greenhouse product has not yet attained the title of being of good quality. Roses are by far the best stock that is offered upon the market and some of the wholesale growers really have some superior flowers to show their customers. Killarneys, that would be called first class stock later in the season, and of a color that would satisfy the mid-winter buyer, are seen on some of the counters in the early morning, but they are finding ready sale and soon disappear. American Beauties, both short and long, are quite plentiful and of very good color. Carnations are poor, the recent rains having nearly ruined the outdoor stock, and the blooms that are coming in from the greenhouses are nothing to boast of as yet. Chrysanthemums are now to be seen at all the stores, Golden Glow being the principal offering, but October Frost made its appearance this week at two of the wholesalers. Lily of the Valley is to be found in good, bad and indifferent grades. Some very fine Lilies are on the market of the longiflorum type, and are very acceptable to those having nice work. Auratum and lancifolium are both on sale, but the quality is far

below the former variety. Marguerites of very good quality are also to be seen.

The outdoor products are beginning to decline and the weather of the last few days has assisted greatly in their deterioration. Asters are far from good, very few Al stock can be found, and while there are large shipments being secured every morning, the greater part are of an inferior grade. Gladioli are received in large quantities and some very good stock can be bought, but the blooms are hardly as good as have been offered recently. The light colors are selling well. Some few offerings of dahlias were noted, but they are not yet good enough to attract much attention.

NOTES.

The Richmond roses cut at the Peter Reinberg houses are of fine quality and of exceptionally good substance as is attested by letters of approval received from their customers to whom they are shipping. This establishment are also cutting Mrs. Marshall Field roses and their American Beauties are of their usual good quality.

J. B. Deamud & Co. is disposing of large quantities of gladioli, particularly of the variety Francis King. They are dealing heavily in all the florists' greens and filling large orders of southern smilax. Outside demands are reported good and the shippers are kept busy.

Kennicott Bros. are receiving large consignments of asters and gladioli and

some extra fine boxwood is being offered by this concern. Michael Lynch of this establishment reports business good and shipping trade excellent.

Budlong's roses are of their usual good quality, the American Beauties being exceptionally fine. Their carnations are improving daily and they are now receiving some of the best and longest stem flowers in the market.

Vaughan's Seed Store trial grounds at Western Springs are very interesting and attractive just now, the cannas and asters, and tests of miscellaneous novelties, being especially worthy of inspection at this time.

E. H. Hunt is receiving large shipments of fine Killarney, Bride and Bridesmaid roses. The supply department is exceedingly busy.

N. P. Miller, of the J. B. Deamud Co., will celebrate the twenty-fifth anniversary of his wedding September 15 at his home in Wilmette.

C. Clemenson, 7801 Railroad avenue, reports business as good. A very pretty home decoration on Grand avenue was arranged this week.

H. Van Gelder, of Percy Jones', is offering a very good grade of white asters which are eagerly sought by the trade.

Zech & Mann are exceptionally strong on lilies and carnations, and their roses are up to their usual standard.

John Krutchen presents some of the finest carnations in the market for the inspection of his customers.

Buy Direct of the Grower and Get Fresh Stock.

BASSETT & WASHBURN,

Office and Store:
76 Wabash Ave., Chicago

**Greenhouses:
Hinsdale, Illinois**

Vaughan & Sperry's stocks are of very good quality and being received in abundance, and their boxwood is of excellent quality. The senior member of this firm has just returned from a visit to their shippers at New Castle, Ind., and reports the stock there in the best of condition. This concern will handle the entire output of William Dittman, whose American Beauties are claimed to be the best he has ever grown. A large shipment was made this week to the Kentucky state fair, which was held at Louisville, Ky., by this establishment.

Charles W. McKellar is offering some very beautiful orchids to the trade which are being shipped to him from the east. The varieties received are Cattleya Labiata, Dendrobium Formosum and Oncidium Varicosum Rogersii. The demand for these beautiful flowers at this season is fully equal to the supply, and the receipt of some 200 received September 10 was disposed of within an hour of their arrival. A large consignment arrived September 14.

A. L. Randall Co. is receiving large quantities of all the different flowers of the season, an exceptionally good quality of Killarney roses and some fancy lily of the valley being seen. A large force of carpenters are now at work renovating the premises. The office is to be removed to the third floor and much enlarged and the space occupied by the present office will be used for cut flowers, giving this department the much needed room.

Poehlmann Bros. are supplying their customers with as fine grade of roses for this season of the year as is often seen. Their Killarneys are of an exceptionally bright color, equal to some mid-winter grown. The first of a cut of Cattleyas are being now received and a good supply is promised later. Carnations are very good and Golden

Glow and October Frost Chrysanthemums are among their offerings this week.

Edward H. Blameuser, the well known carnation specialist of Niles Center, Ill., was a visitor Sept. 14. He has 35,000 feet of glass exclusively planted to carnations. He is to be congratulated upon the efficient work of the fire department of his town on the night of Sept. 6, when the shed adjoining his property, caught fire during the burning of three large buildings in his vicinity.

Bassett & Washburn report a very busy week. Some large shipments were called for from their customers at De Kalb, Ill., who furnished the flowers for the funeral of Col. Elwood of that city. They are offering this week some very fine white chrysanthemums. October Frost, this variety is more than ten days earlier this year than in previous seasons, their first blooms being cut Sept. 7.

The retailers are beginning to place their flowers before their customer's eye and the displays of plants which have filled the windows for the past two months are being gradually withdrawn and vases of roses and seasonable blooms are filling their places to tempt the public's appetite.

J. Mangel had a very handsome window this week, the display of nymphaeas attracted the passers-by and a beautifully arranged wreath, composed of nymphaeas and gladiolus resting upon an easel at the base of which were highly colored crotons was a very attractive feature.

Albert Weisenberger, formerly with G. Henry Smith, Walkerville, Ont., and many years with Howard Willett, White Plains, N. Y., is now head gardener to J. Ogden Armour, Lake Forest.

Kyle & Foerster have finished renovating and are looking finely in the

new coat of white paint. A good quality of roses and carnations can be found on their counter as well as a fine stock of florists' greens.

The Horticultural Society may yet secure the Coliseum for the flower show as it is understood the land show has been postponed. The date of the flower show will be November 7-12.

Wieland & Risch are cutting carnations and roses of good quality. Some very fine chrysanthemums are received at the store and they expect to have them in quantity very soon.

Ludwig & Fehrman, 2150 Foster avenue, have completed their new greenhouse, 20x60 feet, which they have planted to chrysanthemums.

J. F. Czarnick & Co., 1514 W. Chicago avenue, report an exceedingly busy week, weddings and funeral work occupying their attention.

Weitor Bros. received an order for 10,000 carnation plants from Will Bros. of Minneapolis, Minn., this week which was promptly executed.

A. Christiansen, formerly with the Chicago Carnation Co., has accepted a position with H. C. Rowe, 42 E. Monroe street.

We were very sorry to miss John Poehlmann from the store this week, a bad cold incapacitating him from business.

The Luxemburg Brudenlund realized the neat sum of \$3,000 from their annual Schobermesse, held September 4-5.

A. W. Glaser, of Dubuque, Ia., accompanied with his wife, was a visitor to the city September 10.

Vaughan & Sperry's increasing business has compelled them to install an additional telephone.

Miss C. M. Burr has sold her business at 1377 East 55th street to Francis N. Moore.

The Chicago Rose Co. is offering a very good quality of roses and asters.

American Beauties in Full Crop

We are the biggest Rose growers in the world. But size is not everything, and in addition we aim to have the **FINEST STOCK**, the best of its kind. During **HOT WEATHER FLOWERS** require great care in handling, and our facilities at the greenhouses are second to none for properly **COOLING OFF** the stock before it is shipped to the store. From here it is sent direct to customers by the quickest and cheapest routes. **CAN YOU BEAT IT?**

Peter Reinberg, 35 Randolph St.,
CHICAGO.

T. C. Yarnall, chairman of the committee on sports, states that the Florists' Club bowling league will open its season on September 26 at Flenner's alleys, corner of Monroe and State streets. The accommodations are better than last year and much pleasanter for the ladies that attend. A meeting will be held September 16 to decide on the personnel of the teams and it will be so arranged as to make them as equal in strength as possible. The league will consist of four teams as usual.

Wm. Graff of Columbus, O., is visiting friends and relatives here, the present week. Mr. Graff states that their place of business has been remodeled and that they have had a very busy season. The strike of the street car employees affected business some but on the whole the season was better than last year.

The picnic given by the employees of the Poehlmann Bros. and Wietor Bros. establishments on September 11 at Wayside Inn, Morton Grove, was a great success and, needless to say, everybody had a good time. Automobiles made regular trips every 15 minutes from Clark street and Devon avenue.

G. R. Riemersma, 7111 Indiana avenue, has nearly completed the erection of greenhouse, 31x86 feet, the material for which was furnished by the John C. Moninger Co. Their house will be devoted to the growing of cut flowers and bedding plants and the stock in all the houses is now in fine condition.

At E. C. Amling's some exceptionally fine Liliun Harrisii were seen this week, the flowers having unusual substance for this time of the year. Killarney roses, both white and pink, and American Beauties of excellent color and quality were noted.

Hoerber Bros. are handling a very good quality of Killarneys, Bride and Richmond roses, and also a very good grade of carnations, of which they marketed their first cut September 13. Business is improving.

George Reinberg is receiving some very fine white and pink Killarneys, Richmond and Bride roses and their American Beauties are exceptionally good. Carnations are improving rapidly and are among the finest on the market.

D. Freres, at the Flower Growers' Market, is handling an excellent stock of Killarneys, Jardine, Richmond and

Maryland roses which were brought in by Adam Zender of Rogers Park.

Mrs. A. Kindler and son, Curt, of the Raedlein Basket Co., 713 Milwaukee avenue, returned Sept. 3 from a month's outing at Fox Lake.

Frank Johnson, of A. L. Randall & Co., returned September 12 from his western trip. Good business and an enjoyable time are reported.

Miss H. Tonner, at the Flower Growers' Market, is this week offering a very good grade of roses and carnations.

E. F. Winterson & Co. are receiving large consignments of asters and gladioli of very good quality.

Wietor Bros. are receiving some fine roses and carnations from their greenhouses.

Visitors: A. C. Rott, Joliet, Ill.; Wm. Femiger, Toledo, O.; Alexander of Lion & Co., New York; George W. Moore, of A. A. Vantine & Co., New York; Wm. Graff, Columbus, O.; — Will of Minneapolis, Minn.; N. H. Long, Dixon, Ill.; W. H. Troyer, Elkhart, Ind.; E. Fancourt, of Philadelphia, Pa., and E. C. Blameuser, of Niles Center, Ill.

St. Louis.

STOCK IMPROVING.

The weather has cooled off considerably and things have commenced to move a little. All theaters are now open and the new Princess Theater opens Monday, which will be quite a society event. The supply of all kinds of flowers are increasing and quite a few go to the dump, but this is only with the poorer grades of stock. Of good and fancy stock there is a shortage. Carnations are improving, the cool nights helping considerably. The local rose growers are starting to cut and some nice clean stock is had from this source. Some very fancy long-stemmed asters are in and six cents is easily obtained for these blooms. Tube roses and gladioli are still plentiful. Greens are arriving in good supply.

NOTES.

The Florists' Club held its meeting last Thursday at Weber's Nursery, thirty-five members and ten ladies attending. Wagons were on hand at the end of the street car line to convey the parties to the Nursery. This meeting was known as the installation meet-

We Have Ample New Houses To Produce Large Supplies of High Grade Cut Flowers DURING THE SEASON OF 1910-11.

Chicago

ing. The following gentlemen were elected: John Cannon, president; Frank Weber, vice-president; J. J. Beneke, secretary; W. C. Smith, treasurer; E. W. Gay, trustee; the last named was unavoidably absent and will be installed at the next meeting. General business routine of the meeting was gone through. Various committees reported. Quite a few of the members who attended the S. A. F. convention at Rochester talked about their trip. After the meeting was over the Weber Brothers escorted the visitors through the greenhouses and inspected their recently built new storage house. Everyone was delighted and expressed their approval of the well kept houses. Their roses are coming on nicely. After going the rounds refreshments, sodas and liquids were dispensed and a jolly time for all was indulged. A vote of thanks and three cheers were given to the entertainers.

F. H. Weber has tendered his resignation on the executive committee of the Horticultural Society, also as chairman of the Sales Booth Committee of the coming Flower Show. This is to be very much regretted as Mr. Weber has always been a very urgent worker and contributed largely to the success of our flower shows.

Alex. Siegel has returned from his cottage at the Northern Lakes. Every one was glad to see Alex. as he is sure to be around when anything is stirring. There is now business at the bargain counters.

Some very fancy asters were seen at Angermueller's during the past week. He is now moving his florist supplies up to the second story, thus giving him more space for the cut flower display.

C. Beyer's improvements have given him increased trade. His supply of decorative and other plants is always of the best. His location is fast becoming a growing business center.

W. M. Meyer is building another house, 18x110 feet for violets and carnations. He is now cutting some good enchantress from his other houses.

Otto Sanders at the Maryland Hotel reports trade as picking up, although trade has been slow all summer, it was better than he expected.

The Retailers' Association will meet this coming week, when matters of importance laid over from the last meeting will be discussed.

John Bubach, with Lion & Co., New York, is with us. Will remain until next Sunday evening.

The Metropolitan Floral Co. is mailing out some very well worded introductory circulars.

H. G. Berning is moving into his new residence in the west end of the city.

C. C. Sanders has returned from his vacation and is attending to business.

W. F.

Milwaukee.

PROSPEROUS MARKET.

Market conditions very prosperous. Everything selling well, roses are still keeping up to grade in quality and enough to fill all orders. There are a few more carnations making their appearance which are being cleaned up at sight. Gladiolus are still about the most plentiful thing in the market. Harrisii Lilies scarce. Asters are plentiful, mostly of the shorter grade. Good stock is bringing fair prices. Enough American Beauties to supply the demand.

NOTES.

E. P. Dilger has a house of Salvias which look very promising. He has planted these for an experiment and expects to cut same about the time the out-door stock has given out. He also has another novelty which he is trying, which is a bench of White Storm

Dahlias, the same are entirely covered with buds. This grower makes a specialty of forcing a large amount of bulbs. He received his shipment of bulbs on Monday and is getting busy putting them in shape.

H. W. Koerner, the Milwaukee's Specialist on Gladiolus and Dahlias, has just returned from the State Fair of Minnesota, which took place last week. He went there to exhibit some of his new varieties and came back reporting everything satisfactory.

This is the week of State Fair and the different florists and seedsmen are making preparation. There are quite a number of florists that have planted flower beds at the fair grounds which are out for competition and they are looking forward for results.

The store of Holton & Hunkel Co. is now ready for the painters, and after this is completed they will, no doubt, have a fine store. This firm is cutting some fine Kaiserin and a nice cut of American Beauties, mostly of a medium grade.

The store of Edlefsen-Leideger Co. certainly looks wonderfully improved. As their new front has given it an entirely different appearance. This firm reports business brisk.

Miss Zender, who has been visiting at the home of F. H. Holton, returned to her home in Chicago after a pleasant visit to Milwaukee.

Heitman & Baerman are commencing to cut some nice clean stock of Asters, which are being readily disposed of at the market.

Mr. A. Liedeger and wife have returned from a trip on the Hudson and New York, and report having had a good time.

Visitors:—Mrs. E. O. Lovell, Grand Forks, N. D.; A. F. Amling and family, Maywood, Ill.; H. Will, Minneapolis, Minn.

STOCK IMPROVING.

In some respects the market is somewhat better than at the last writing, yet nothing much to boast of.

Asters have been arriving very much weather beaten, the heavy rains followed by extremely hot weather surely put a crimp on them. The wholesalers were kept on the jump sorting and re-benching, getting them in salable shape. That is past now, as the stock is coming in all right again.

Gladioli are coming in fine and are cleaning up nicely. Very fine Golden Glow Mums are seen, but the quality and size hasn't much on some fancy Asters in this market.

Rubrum Lilies are coming in but find slow sales. Good smilax is very scarce, all other greens, asparagus, sprengerli, and adiantum ferns are very plentiful.

Answering the query what effect Labor Day has on the flower business here, we would be better off without it, as business is tied up just at the important time of day, causing all kinds of inconvenience to retailer and wholesaler, which means a loss of business to both.

NOTES.

Henry Klunders, of Randolph & McClements, has the sympathy of the trade in the loss of his son, Frederick Klunders.

B. F. Engle, of Rochester, Pa., had a magnificent floral float in the old home week parade of that place.

C. Peterson and family, of East Liverpool, Ohio, have embarked on a trip through the golden west.

G. Manos, of the Union Station Florist, is putting in a fine ice box and show case combined.

M. B. Schreiber, of McDonald, was a business caller in town today and reports business very good.

Harvey Sheaf, manager for Mrs. E. A. Williams, is taking an extended trip through the east.

F. H. Westhoff, of Westhoffman, is cutting some very nice roses from his new plants.

L. T. Neff of Bellevue, has been very busy with funeral work the last few days.

Thos. Fitzgerald, of Beaver, Pa., won the first prize for the best decorated auto.

The McCallum Co. are handling some fine carnations for the time of year.

J. Gerwig and wife are spending a couple of weeks at Westford, Pa.

John Harris, of Harris Bros., spent a few days in Cumberland, Md.

C. Pyros has opened a new flower stand in the Oliver building.

E. C. Ludwig, of the North Side, reports lots of funeral work.

P. Mair, of Woodville, has been cutting some very fine lilies.

Wm. Loew was very busy Friday with funeral work.

J.

Cleveland.

BUSINESS GOOD.

Business the past week has kept up pretty well. Stock has been plentiful with the exception of pink roses, which seemed a little scarce in supply. Beauties are beginning to arrive in better shape, though the new crop is still in the shorter grades. Dahlias are not yet of the best, those arriving up to date being short in stem and small flowers. A few Golden Glow Chrysanthemums are on the market. Swainsonia of exceptionally good quality is on the market. Asters are very plentiful, of all grades, good, bad and indifferent, and many of them go by the back door route. Carnations are gradually improving. Greens of all kinds are plentiful. Gladioli has sold well this season.

A new retail flower store has been opened in the Taylor Arcade, known as "Taylor Flower Shop." Mr. Schoen, formerly of the J. M. Gasser Co., will be manager. Mr. Schoen has been connected with the florist business for many years, and is considered a very able man, both in design and decorative work.

C. B. Wilbeling spent a few days at Detroit and the St. Claire Flats. Mr. Wilbeling has been troubled with hay fever and his doctor advised him to take a trip up the river.

Jones-Russell Co. took first prize in the Horse Parade on Labor Day. Nauman & Son took second.

William Bramley & Son are the latest who have added an automobile to their establishment.

C. B.

JOLIET, ILL.—A. C. Rott, won first prize in practically everything at the flower exhibit of the fair given by the Agricultural Society last week. His booth, 20x40 feet, was prettily arranged and was one of the features of the floral department. Mr. Rott, superintendent of the floral part of the fair for the last two years, was selected by the fair officials to again take charge in 1911.

Pasadena Gardeners' Association.

Members of the Pasadena Gardeners' Association were invited guests of Howard & Smith at their extensive nurseries at Montebello, August 29, about eight miles from this city. Fifty members of the society and quite a number of their wives and sweethearts responded to the cordial invitation of this progressive firm. Included among the visitors were representatives from Santa Barbara and surrounding cities. The forenoon was passed inspecting the extensive nursery and admiring the high quality of the stock grown, consisting of 20 acres of roses, 10 acres of flowering shrubs, plants and bulbs, including cannas of the best type for this climate.

Attention should also be called to the very large stock of kentias in 2-inch to 24-inch pots, all grown under lath, the large stock of Cocos plumosa and other choice decorative varieties of which this firm makes a specialty. Mention should also be made that the firm has been recently granted a patent on cement flower pots which have proved to be a success, especially the large sizes, from 9-inch to 24-inch. The pots are quite porous, but the evaporation is such that they do not dry out like the ordinary clay pots, thereby holding the moisture better for the plants, and come much cheaper in the larger sizes.

At 1 p. m. a bountiful luncheon was served by Mrs. Howard, ably assisted by the visiting ladies, after which speeches were delivered on horticultural subjects by Dr. Houghton, a noted botanist of this section, Messrs. Dietrich, Blake, Pegg, Fred Howard, Farrell, J. G. Morley, Otto Heusche, president of the association, and others. A rising vote of thanks was extended to the firm for the entertainment, and also to Mrs. Howard and the other ladies.

In the afternoon the visitors were taken over to the adjacent rose growing establishment of Dietrich & Turner, which is the best constructed of any west of Chicago. This firm has been very successful, commencing with two houses, 55x300 feet, and are now adding another house, 55x300 feet. This speaks well for a firm that has only been in business 18 months.

DAYTON O.—W. G. Matthews was unusually successful with his numerous exhibits at the recent county fair.

STOCK VERY PLENTIFUL.

The business for the past week has not been so good as the two weeks previous, and prices have a downward tendency, with stock very plentiful and of a first-class quality, excepting carnations, of which the supply is very short at present. Labor Day caused no flurry in the business and all the stores closed at mid-day with a driving rain coming down for two hours.

My Maryland, Killarney, Richmond, Kaiserin and Pres. Carnot roses are coming in of a extra good quality and very plentiful. Asters are the most desirable flower at present, and the quality has been very fine. Some extra fine specimens are to be had and are used very extensively in funeral work and decorative purposes. The poorer grades of blooms find small favor with the buyers and many slaughterings are made to make a clean-up.

Gladioli are not plentiful and the light colored ones are bringing better prices than in the past.

Dahlias are coming in very plentiful and some very fine flowers are to be had at very reasonable prices. Some Chrysanthemums Golden Glow are coming in, but the demand for them is not brisk yet.

Lilies are good and the demand is fully up to the supply.

Violets have made their appearance, but are not of a first-class quality, and only a limited quantity as yet.

Orchids are rather scarce and the demand light.

Gardenia receipts are increasing and there is a somewhat better demand for them.

Lily of the valley is of a very good quality and plentiful enough to supply all demands at the regular price.

There is a great plenty of green stock, such as Asparagus, Adiantum, Smilax, but Galys leaves of a good quality are very scarce.

Nursery men about here are preparing for a very busy fall's work, as their booking of orders during the summer has been a great deal heavier than in former seasons.

Great quantities of rain fell several times the past week and the ground is thoroughly saturated with moisture, so the fall planting of evergreens, herbaceous plants and some varieties of shrubs is now in order. And in a few weeks more a great campaign of tree planting will take place in this city, as there are to be 3,000 trees set out by City Forester Johnson on the neglected streets.

NOTES.

The flower stores are beginning to show more life, and better window

JOHN W. MCINTYRE,

Wholesale Florist, 1601 Ranstead St., PHILADELPHIA, PA.

I will have an opening for a few good growers of Cut Flowers on and after Oct. 1st. Also for some good Plumosus hippers and growers of good Mignonette. For a good article, good prices and prompt returns.

Philadelphia.

IMPROVED CONDITIONS.

During the first of last week the heat and humidity were intense and unseasonable. Fortunately, the clerk of the weather had something better in store for the last of the week, Saturday being very cool.

There is a perceptible improvement in the condition of the market, but nothing to boast about. Stock is moving more freely, but there is no boom in prices. The asters, which have cut a large figure for the past month, are beginning to wane and are being supplanted by the gladiolus, which are now arriving in considerable quantities.

Roses are improving. Very good stock for this season is now seen of American Beauty, My Maryland and the Killarneys. While the best stock of gladiolus is not yet in, there are indications that the cut will, at least, be average. Carnations are scarcely a factor this season, but they are coming in, and better than was generally expected. There is an average supply of lilies and lily of the valley. Tuberoses and various other stocks are also seen, it being now the last call for hydrangea paniculata. There are plenty of celosias, but they cut no figure, possibly, if they were of the Castle Gould variety they would go better.

NOTES.

Samuel V. Smith, 3323 Goodman street, combines the plain every day florist business with aquatics. He is an enthusiast in fancy goldfish culture and has them by the thousands. His aquariums are rare sights to the novice and are filled with many notable specimens of the finny tribes. It may not be generally known that there are goldfish that are black, ring streaked, and speckled and with the diversity of Joseph's coat in colors. There is no nature faking about Mr. Smith's methods. He has the goods, from the little fellows half an inch long up to the aristocratic chaps with goggle eyes and magnificent tails and fins, the kind that is admitted to select society.

His place may be said to be a garden spot in the world of aquatics. His Paradise fish are very interesting. Mr. Smith says that "they build their nests on top of the water, and that the brilliant colors are very handsome and showy."

He has always on hand specially prepared fish food as well as aquatic plants conducive to the welfare of fish, such as anacharis, ragataria, combomba, ladweriga, and water hyacinth.

In addition he has a considerable glass area and grows carnations, ferns, and all kinds of bedding plants, including seedling clematis.

Godfrey Aschmann is in Europe, but is expected home in October with the greatest stock of azaleas that he has ever offered to the trade. Mr. Asch-

mann is a man of infinite variety and versatility and his offerings for this season are sure to be up to the high standard which he has preserved in the past.

During his absence, his son, John Aschmann, is in charge of the range and his management is most creditable.

Arucarias are the specialty at this place and thousands of them are seen in the finest condition. There is a house of Begonia Gloire de Lorraine, in six-inch pots, in splendid condition. There is also a great stock of Boston, Scottii, Whitmanii and Scholzelii ferns as well as rubber plants, solanums and primroses in the best varieties. In palms, kentia and cocos are very noticeable. There is a good lot of cycas in seven and eight-inch pots that can be had at reduced prices to make room for incoming stock.

W. E. McKissick, who for a number of years, in conjunction with his brothers, has conducted a successful wholesale business, has given up his store and retired. He was formerly on Filbert street near the Windsor hotel, but later moved to Ranstead street adjoining the store of the Pennock-Meehan Co. He quits the business with a clean slate and the good will of the trade in general. As he is a young man he will doubtless find something to which to devote his energies, but is yet undecided what it shall be.

C. Eisele of Eleventh and Roy streets, is as usual engaged in propagating thousands of plants. Not long ago the

city authorities extended a street and demolished two of his greenhouses. He says that he misses them very much, but modestly acknowledges that he got something out of it. When it comes to multiplying plants in a limited space, we venture to assert that Mr. Eisele can outdistance the notable John Birnie of West Hoboken, New Jersey.

On October 1 John McIntyre enters his fifth year in the wholesale business. He is a well known hustler and during these years has had a steadily increasing trade. He is noted for his business promptness and will doubtless continue to expand. He has several fine sons who are now a great assistance to him in the business.

It is said that one of the prominent wholesalers will soon change his location, but it cannot be definitely stated where he will go.

John McIntyre has had a fine sign put up on his store on Ranstead street. The Ranstead street wholesalers are all up-to-date.

Arthur McIver, an assistant in Harbermehl's Bellevue-Stratford store, is on the sick list.

The finest orchids on the market are seen at the store of Edward Reid.

sale market, and things had a very busy look Saturday morning.

Walter E. Cook, of Vaughan's Seed Store, was a visitor at the Railway Gardening Association convention, bringing two large bunches of choice gladioli.

Charles Holbrow, at Brighton, is building a third new house for sweet peas. This will give him 500 feet in length.

Carbone's display of imported decorating ware is a revelation. "Everything that goes with flowers."

Mr. Edward Winkler has reappeared at the Market after a visit to Denmark.

A. Christensen has been heard from in London and Paris, as enjoying himself.

George Noyes has returned from a vacation at Wiers, N. H.

F. J. Dolansky, Lynn, will have Bonafon Mums in a week.

Wax Bros.' windows deserve the prize this week.

E. A. Stickel is just back from a Cape Cod trip.

W. T. H.

New York.

UNPROSPEROUS WEATHER.

The torrid weather of the fore part, and the heavy rains in the latter part of the week, have given the market a set back from what it probably would have been, had the cool weather of the week previous continued, the intense heat and almost unbearable humidity driving many of the early arrivals from mountain and seashore back to more comfortable latitudes again, while those remaining in the city were a good deal more apt to purchase fans and cooling lotions than cut flowers. The warm spell also having a bad effect on roses, etc., and is likely to delay the violet crop considerably. Then the heavy rains of Wednesday night and Thursday did considerable damage to the out door stock, particularly asters which are arriving in very poor condition. Good roses, of which a few are being received, are bringing a fair price, but the bud is of poor quality and brings corresponding figure. Some new crop carnations are arriving now, but are short stemmed and very small heads. Quite a number of fair mums are seen, mostly of the Golden Glow variety, one firm receiving as many as 200 in one day. Normal conditions are not expected much before October 1st.

NOTES.

John Burfiend, for thirty-two years manager for Charles Ammann, formerly 120th street and 7th avenue, one of the pioneer and at one time largest florists in New York City, and for the last six years head gardener and superintendent of the estate of Thomas L. Watts at Scarsdale, N. Y., has at last yielded to the advice of his many friends and started in business for himself. He has purchased over an acre of valuable land, upon which there is a handsome residence where he and his family reside. He has finished the erection of two fine greenhouses and a store and office building fronting on Fennimore Road, Scarsdale, and is negotiating for the purchase of adjoining property on which he intends building a large palm house and planting the balance in nursery stock. The location is a fine one and for a man of his experience and popularity, success is assured.

Charles Dards, who has just returned from Europe, found on his return, that not only had his employees been unusually busy during his absence, but that Hymen, the God of Matrimony, had also been working overtime in his Madison avenue store, having in a little over a month's time induced no less than three young men to forsake the paths of single bliss, and shoulder the responsibility, as well as the joys, of matrimony.

W. Hunter and W. L. Trumppore, with J. M. Small Sons, Broadway, are back after vacations spent, the former at Lake Hopatchong, and the latter in the Adirondack mountains. Alterations are now completed and the store is beautifully decorated with hydrangeas and oak foliage, this firm being noted for their artistic display at all times.

William P. Ford expects now to be able to open on September 21, having been delayed by the work of alterations. Mr. Ford, since dissolving partnership with his brother, has been recuperating at his farm in Chadds Ford, Delaware County, Pa.

H. Crawbuck, manager of the Greater N. Y. Cut Flower Association, states that the business is increasing every year. This association is co-operative in nature, some of the largest growers in Long Island being share holders

Mrs. F. R. Pierson was the recipient of a silver mounted silk umbrella from the S. A. F. and O. H., which was delivered to President Pierson for her at the convention.

J. McHutchison reports the banner business year, both in European and American business, and also states that the supply of French fruit stocks is considerably below the demand.

Julius Roehrs, Sr., and his youngest son, Hans, left for a trip through Mexico September 5, expecting to return in about three weeks.

The MacNiff Horticultural Co., are now occupying the store at 62 Vesey, formerly occupied by the Cleary Co., now out of business.

Paul A. Rigo, with Henshaw and Fenrich, has returned after a two weeks' vacation, spent at Raponah Mountain, N. Y.

W. De Forrest of Lord & Burnham, states that this firm has already secured quite a number of contracts for next summer.

E. L. Moore, formerly florist at the Hotel Majestic, has opened a store at 976 Amsterdam avenue, near 107th street.

William J. Elliott, who has been spending a week among the growers, states that all indications point to a very prosperous season to come.

Jones & Russell of Cleveland, were in town last week purchasing supplies for the coming season.

Vaughan Seed Store reports an unusually brisk bulb business.

S. Hoffman of Boston, was a visitor last week.

New York Florists' Club.

The New York Florists' Club held their first meeting of the season September 12, President Miller in the chair. There was an unusually large attendance, with many interesting speeches. The following new members were elected: P. J. Smith, Robt. J. Young, M. Glass. Short and appropriate speeches were made by both Mr. Young and Mr. Smith. Exhibits: Plants of Clerodendron Fallax, by Harry Turner, Castle Gould, and White Chrysanthemum, Smith's Advance, by Elmer D. Smith. J. A. Manda made an appeal to the club to give the bowlers a little encouragement by appropriating funds for a cup, to be played for

by the different branch clubs of New York Florists' Bowling Club, the matter being referred to a committee of the following gentlemen: J. A. Manda, Frank Traendly, Bob Berry, Joe Fenrich, W. Duckham. Opinions on this matter were expressed by John Birnie, John Donaldson, J. A. Shaw, Chas. B. Weatherhed, J. B. Nugent, Jr., Alex. Burns, and F. R. Pierson, the latter gentleman kindly donating a prize to be played for. The following committee was appointed by Pres. Miller to prepare resolutions on the death of Lyman B. Crawl: Chas. B. Weatherhed, F. R. Pierson and W. J. Stewart. The exhibition committee granted the following awards: Elmer D. Smith, vote of thanks; Harry Turner Hitchings, cup and 5 points.

President Pierson of the S. A. F. spoke on the convention, thanking the members of the New York Florists' Club for their hearty support, and also for the gavel presented to him, and of his great appreciation of it; also, the splendid welcome by the Rochester boys, and stated that the past convention had been the banner one. Harry Bunyard made a short address, stating that the last convention had the largest exhibits and was the best arranged and most successful he had ever attended, and also requested the S. A. F. to take up the matter of uniform signs at the next convention, and concluded by calling for a rising vote of thanks for Bob Berry for his efficient services on the train en route to Rochester. P. O'Mara also spoke on the past convention, stating that it was as good a convention as the society ever had and that the voting attendance was larger than that of Cincinnati. He also spoke of the growing importance of the S. A. F. and that she had covered herself with glory. All honor to the Rochester boys, calling for a standing vote of thanks for their kindness and hospitality, concluding with words of praise for President Pierson for his fair and generous work at the convention. Short addresses were made by J. A. Shaw, W. J. Stewart, J. H. Pepper, Jas. Meikle, John and President Miller, who commented on the fact that both President Mrs. Phillips and Vice-President Mrs. Julius Roehrs, Jr., of the ladies' S. A. F. were from New York.

Its merits have been conclusively proven through Public Demonstrations.

—FLOWERS SHIPPED BY—

P. J. SMITH,

Are the best product of the best growers
for the New York market.

Adiantum Croweanum sold here exclusively.

49 West 28th St., NEW YORK
Telephone 1998 Madison Square.

Orange, N. J.

After an intermission of two months the N. J. F. S. held their regular meeting September 9 in Lindsley Hall, 240 Main street, Orange. Light refreshments were served to the members and others by the society. Arrangements for the dahlia show, to be held October 1st, were completed. This show has always attracted attention and promises to be the largest exhibition of its kind the society ever held. Albert F. Larson, Walter Gray, William Reid and John Hayes were appointed a committee to go to New York and select the silver cups which will be awarded in January for the year's competition, at the monthly exhibitions. It was decided to award the large silver cup donated by Mr. Le Crunt at the last meeting, for the best 24 cut chrysanthemums, 6 varieties, 4 flowers of each, at the chrysanthemum show, which will

Get Ready NOW to Sell Palms for Use Indoors this Winter

There's this beauty about selling well-grown Palms: the demand is steady. Palms are just as good for indoors as for porch and lawn decoration—and now that your customers are commencing to "live inside" more, you have a splendid opportunity to handle our Palms and make money with them.

They are grown right here in our own houses, from the seed, by men who know how; they are clean, healthy, vigorous plants, and will give the best of satisfaction—both to you and your customers. Let us fill your order for some of them; we have an excellent stock and will ship promptly, and if you order at once, we can still forward by freight, saving you the heavy express charges that you'll have to pay if you wait till frost. Here are our prices—may we not hear from you NOW?

We Call Your Special Attention

To our quotations on **Latania Borbonica**, 7-inch pots at 75 cents each or \$9.00 per dozen. These are plants ready to shift into 8-inch pots, and are fine, perfect specimens.

Our **Assorted Ferns for Ferneries** are also to be recommended.

Dracena Fragrans, 6-inch pots at 50 cents; 7-inch at 75 cents; and larger plants at \$1.00 and \$1.50 are fine stock. Be sure to include some of these in your order; they are sure to please you.

Our **Kentia Belmoreana**, 6-inch pots at \$1.50 each, are exceptionally fine, perfect specimens—the kind of stock that will sell on sight.

Kentia Belmoreana.

Never before have we had such a fine lot of Kentias as quoted in the following sizes. A sample order will certainly satisfy you as to the value of this stock.

The Seed Trade.

American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

VISITED CHICAGO: Henry Nungesser, New York; J. Chas. McCullough, Cincinnati, O.; A. J. Brown, Grand Rapids, Mich.

BIRMINGHAM, ALA.—The business of the Amzi Godden Seed Co. has increased to such an extent that it became necessary to increase the capital stock of the corporation from \$40,000 to \$100,000. The officers of the company are: J. H. White, president; G. B. McVey, vice-president and general manager; J. B. Dolsen, secretary and treasurer.

BOSTON, MASS.—Hovey & Co., are showing flowering and fruiting plants of Pan-American strawberry that bear up to November.—P. J. Van Baarda, at Breck's, is just back from Europe, and Russell O. Gardner is going on his vacation.—John Farquhar will go to Oyster Bay, L. I., to talk on "Gardens of Italy," September 12.—Rawson's window collection of dahlias attracted much attention last week. W. T. H.

PHILADELPHIA, PA.—Walter P. Stokes says: "Tell us where to get some garden pea seed." He also advises us that timothy seed is scarce and high, as well as bluegrass seed. The crimson clover season is about over. Bulbs are going well. This firm has had heavy sales of pansy seed.—The Moore Seed Co. advises us regarding the bean crop as follows: "Pencil Pods, Golden Wax, Red Kidney Wax, Red Valentine, Late Refugee and White Marrowfat will run 100 per cent; Indian Chief and Scarlet Runners are failures. A frost may lower these figures, as well as those of other varieties that range much lower than those quoted."

BALTIMORE, MD.—A seed trade, or any other firm that has withstood the storms and stress of over ninety years, is well worthy of some notice. Recently, under the guidance of Chris J. Bolgiano, one of the active members of the firm of J. Bogliano & Son, our representative was shown through their extensive establishment, located at the corner of Light and Pratt

streets. They occupy a five-story building, comprising 40,000 square feet of floor space, and have just acquired another building containing 20,000 square feet of floor space for warehouse purposes. This has both extensive trackage and waterfront. While this firm deals in all kinds of seeds and bulbs, it is at present doing an extensive business in crimson clover, timothy and alfalfa seed. An immense business is done in poultry food, the firm being about to install a plant that will turn out 2,000 bags per day. Kaffir corn has been handled quite extensively the past season. John F. Meyer, manager of the seed department of S. L. Lamberd Co., 111-115 Light street, reports a fine trade on all summer seeds, and is now getting in a large supply of Dutch bulbs.

Danish Seed Crops.

Hjalmar Hartmann & Co., Copenhagen, report as follows, August 25: For cabbage and cauliflower seed the outlook is very encouraging as well for quality as quantity. Early frost last fall injured many heads. In addition, damage was done by insects during the summer. The very favorable weather, however, during spring and summer has helped somewhat, but it is expected Danish Ballhead, tall-stemmed, will still show a shortage of 25 per cent and even more in Danish Roundhead, short-stemmed, and Danish Summer Ballhead.

Turnip and swedes are excellent and mangels medium.

European Grass Seeds.

Conrad Appel, Darmstadt, Germany, in his latest report on grass seeds issued August 30, has the following: "The harvest of the natural grass seeds is so far finished, that I can now give a correct idea as to quantity and quality of home-grown and foreign natural grass seeds, adding a few words on the prospects for the new crop of clover and agricultural seeds. The warm weather in April and partly in May influenced maturing of our home-grown natural grass seeds to some extent, and one could reckon on a good, early and satisfactory yield this season. But these expectations have been diminished by very unfavorable weather conditions, with continuous rains in June and July. The harvesting of some sorts has been delayed, and the quantity and quality of this season's crop

are affected. Many lots are discolored and dark, containing a good deal of weeds, and are of light weight. Under these circumstances one has to pay special attention to the buying and selection of best qualities."

Formalin and Seed Grain.

In a bulletin recently issued by Robert Stewart and John Stephens of Utah Experiment Station at Logan, on the "Effect of Formalin on the Vitality of Seed Grain" conclusions have been reached as follows:

- 1.—The formalin treatment is effective in preventing the loose and covered smut of oats, the covered smut of barley and bunt of wheat.
- 2.—The formalin solution, even as dilute as one pound of formalin to sixty gallons of water, reduces somewhat the vitality of the seeds of wheat, oats and barley.
- 3.—Oats are more resistant to the influence of formalin than are wheat and barley.
- 4.—The best strength of solution to use is one pound of formalin to fifty gallons of water.
- 5.—The seed may safely be treated for one hour in a solution of one pound to fifty gallons of water.
- 6.—If the treated seed be thoroughly dried, it may be safely kept for at least six weeks after treatment.

Imports.

During the week ending September 10, imports were received at New York as follows:

Burnett Bros., 103 cases bulbs.
Stumpp & Waller Co., 77 cases bulbs.
C. C. Abel & Co., 73 cases bulbs.
H. F. Darrow, 67 case bulbs, 81 pkgs. seed.
C. T. Meyer, 64 cases bulbs.
F. R. Pierson & Co., 45 cases bulbs.
W. Hagemann & Co., 38 cases bulbs.
J. M. Thorburn & Co., 30 cases of bulbs, 34 bags seed.
Henry & Lee, 19 pkgs. bulbs.
Vaughan's Seed Store, 21 pkgs., two cases bulbs.
E. T. Buckingham, 15 cases bulbs.
McHutchison & Co., 14 cases bulbs.
W. Elliott & Sons, nine cases bulbs.
J. Dunn, Jr., nine cases bulbs.
W. H. Siebrecht, eight cases bulbs.
Anton Schultheis, six cases bulbs.
W. Jurgens, three cases bulbs.
A. Baldwin & Co., two cases bulbs.
S. D. Woodruff, 48 bags seed.
P. Henderson & Co., 32 pkgs. seed.
To others, 1,919 cases bulbs, 650 bls., 157 bags clover seed, 348 bags seed, 100 bags poppy seed.

Greenhouse Tomatoes.

The essential points to success with tomatoes under glass are: Good plants, rich soil, full light, a congenial temperature, controlled moisture. Any one of these is as important as the other, and it is the harmony of all the necessary elements that brings success. Too often a grower is able to furnish nearly all requirements, yet the one he cannot master may cause a bad failure. A common cause of indifferent success is poor plants. Because a tomato is a rank grower, almost a weed, some think most any plant will do. We know that no matter what after care is given, a tomato plant once checked will give a poor crop. Thus, from the time the seed germinates until we get the plants out in the house, there should be no stop. To get the best plants they must have rich earth from the start and only moderate moisture. Plenty of room is needed—that is, just as fast as the plants need it they must be re-spaced and re-potted. If a grower cannot command perfect plants at

the proper time, he had better change his program and plant something else.

The matter of moisture needs great attention. The aim should be from the very start to produce sturdy growth and to avoid watery, rank foliage. The aim is fruit and not foliage, and water is the controlling factor. For this reason we do not like mechanical watering as well for tomatoes as for lettuce; for often the duration of the watering is too long and thereby softens growth. To a close observer there is a constant guide in the color of the foliage. An even green color always means too much water, while faint traces of blue, with a metallic lustre all over leaf and stem is the desired condition.

From a business standpoint, winter tomatoes are a difficult problem. Too often they do not pay because we cannot obtain prices to make good the great outlay of labor and heat. Many growers have found the late fall crop preferable. Thus they aim to get all the fruit set before dark weather comes and then ripen it during November and December. It is easy enough to ripen fruit, but it is hard to get a good set in mid-winter.

In localities where many outdoor tomatoes are grown and blight is prevalent it is almost a necessity to spray with Bordeaux under glass to escape disease. Blight under glass means speedy ruin. Some operators have an idea that cuttings would give better results. We don't want any ourselves—they lack vigor and generally bring disease with them.

"QUALITY" CHRISTMAS SWEET PEAS.

AT the Exhibition and Convention of the National Sweet Pea Society of America, July 13, 1910, we again won the C. C. Morse & Co.'s Silver Cup for the finest and best collection of Sweet Peas open to the trade only.

THE RIGHT TIME TO SOW SWEET PEAS FOR CHRISTMAS FLOWERING IS IN AUGUST AND SEPTEMBER.

All our Christmas-flowering Sweet Peas are true to name and grown from originator's stock (secured by us) by one of the most reliable seed growers and Sweet Pea specialists in California, and we can make immediate delivery. Our output last year was nearly 6,000 lbs. No kicks and plenty of testimonials as to quality, germination and trueness to type.

BODDINGTON'S EXTRA-EARLY CHRISTMAS WHITE SNOW-BIRD. An exceptionally early Sweet Pea for indoor flowering—will bloom six weeks after sowing. Color clear white, upon long stems; habit fairly dwarf and of exceptionally free-flowering qualities. Without doubt, the finest early white for indoor planting. We sell one grower in Pennsylvania 35 lbs. of this variety every year, name on application. Oz. 25 cts., ¼ lb. 75 cents, ½ lb. \$1.25, lb. \$2.00.

BODDINGTON'S CHRISTMAS PINK. This is the earliest and most profitable and useful Sweet Pea in cultivation, as by sowing the seed under glass in the latter part of August, flowers can be cut from Thanksgiving on during the winter months. Oz. 10 cts., ¼ lb. 4 cts., ½ lb. 6 cts., lb. \$1.00.

BODDINGTON'S CHRISTMAS WHITE. A companion to our Christmas Pink. Just as free and profuse a bloomer. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.

CANARY. Similar to the above, but flowers of an exceptionally good yellow. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

FLAMINGO. Color scarlet; free-flowering and early. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.50, lb. \$2.50.

Christmas Meteor. Scarlet; fine open red flower. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

Christmas Captain. Blue and purple. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.
Florence Denzer. Pure white. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.
Greenbrook. White standard, slightly touched with lavender. Large orchid flowering variety. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.
Le Marquis. This is the same color as Princess of Wales violet; has very large flowers. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.
Miss Helen M. Gould. White, open flower; standard lilac, marbled. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.
Miss Josey Reilly. Lilac; very large flowers. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.
Mrs. E. Wild. Carmine or dark pink. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.
Mrs. Alex. Wallace. Lavender. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.
Mrs. Geo. Lewis. Large, pure white wavy flower. Oz. 15 cts., ¼ lb. 50 cts., ½ lb. 85 cts., lb. \$1.50.
Mrs. W. W. Smalley. Satiny pink. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.
Mrs. Hannan. Deep rose-pink of a very pleasing shade; medium flower. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.
Mrs. F. J. Dolansky. Daybreak pink. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.
Mrs. Chas. H. Totty. Sky-blue; late. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.
Mrs. Zvolanek. Blue, variegated; good for variety. Oz. 50 cts., ¼ lb. \$1.50, ½ lb. \$2.75, lb. \$5.00.
Wallacea. Very fine lavender, a grand florists' variety. Oz. 50 cts., ¼ lb. \$1.50, ½ lb. \$2.75, lb. \$5.00.
Watchung. Pure white. Oz. 20 cts., ¼ lb. 60 cts., ½ lb. \$1.00, lb. \$1.75.
Wm. J. Stewart. Blue self. Oz. 25 cts., ¼ lb. 75 cts., ½ lb. \$1.25, lb. \$2.00.

All other varieties of winter and summer flowering Sweet Peas supplied. Write for quotations upon large or small quantities.

Our 1910 Fall Catalogue now ready, contains a full list of Quality Bulbs and Seeds for Fall sowing. If not received, send postcard and one will be sent by return mail.

Arthur T. Boddington, Seedsman, 345 W. 14th St., NEW YORK

Baltimore.

BUSINESS IMPROVING.

It is generally agreed among the dealers that business is improving, but good flowers are not plentiful. It is true that there has been plenty of asters, but their finish is in sight. While some very good roses are seen, there is no surplus. Gladiolus are about finished and it is feared that on account of so much dry weather during the summer, the supply of dahlias will be short. Little attention is given to the growing of American Beauty roses in this vicinity, but My Maryland, Radiance, Killarney and Golden Gate are very good.

NOTES.

The Misses Matilda and Rose K. Held are on a European tour. They left this city in July, and have visited the cities of Berlin, Bremen, Dresden, Frankfurt, Brussels and Cologne. They spent some time at the Lakes Constance and Lucerne in Switzerland, going next to Paris. They expect to reach home about the last of September. During their absence, their sister, Miss Lena Held has successfully managed the business, which is still conducted at 32 South Eutaw street under the name of Mrs. Chas. Held.

By taking advantage of the long sheds on the pier, nearly all the sports on the programme were carried through but the baseball game had to be given up. Prizes for the various events were donated by Robt. Graham, Jr., C. L. Seybold, Florists' Exchange employees, J. W. Boone, W. Tilton, P. B. Welsh, F. C. Barnes, J. J. Perry, Lehr Bros., Geo. Eberle, M. Thou, A. G. Fiedler, James Hamilton and O. H. Guerth. A number of fine scarf pins

Carnations

125 Bountiful, 200 Carnegie, \$4.00 per 100. Fine plants. Will exchange for Princess of Wales Violet Plants.

A. G. PRINCE, Iowa City, Ia.

and cuff buttons were won by the bowlers.

Mrs. W. B. Sands, of Lake Roland, has been seriously ill for the past two weeks, but is now reported as improving. Mr. Sands has long been the local representative of the American Florist, and he and his family are highly respected by the trade of this city.

The Gardeners' and Florists' Club held its annual picnic at Bayshore Park on September 1. There was a good attendance. A heavy rain about noon somewhat marred the occasion, but everybody made the best of it.

Otto Bauer, manager of the Washington Florists' Co., Washington, D. C., visited this city September 9, accompanied by several friends. Mr. Bauer is a brother of F. C. Bauer, the well known grower of Govanstown.

It is stated that the Fernery, 1421 North Charles street, will change hands on October 1. It is understood that the new proprietor, Mr. Wilcox, will make great improvements.

Chris. Gregarius, of the Pimlico greenhouses, visited the Rochester Convention and also Niagara Falls. He is enthusiastic about both as well as about Baltimore in 1911.

Edwin A. Seidewitz shows an unselfish disposition in handing his customers a card on which is inscribed minute directions how to keep cut flowers.

LANCASTER, PA.

The store of Mary Paterson Johnston, 221 West Madison street, shows a number of fine features, noteworthy being a nice conservatory well stocked with palms.

John J. Perry and C. L. Seybold acted as judges of the horticultural exhibits at the state fair, which was held at Limoulim this week, ending September 10.

The Halliday Bros., 329 North Charles Street, are showing good stock, much of which comes from their own greenhouses. S. B.

The Nursery Trade

American Association of Nurserymen.

W. P. Stark, Louisiana, Mo., President;
E. S. Welch, Shenandoah, Ia., Vice-President;
John Hall, Rochester, N. Y., Sec'y.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June, 1911.

CHICAGO.—Peterson's Nursery patrons are receiving attractive souvenirs in form of leather pocketbooks and gardeners' rule-knives.

Railroad Gardeners' Convention.

The American Association of Railroad Gardeners, which has now changed its name to The Railway Gardening Association, held its fourth annual meeting at Boston, Mass., September 5-6. About 50 were present, members and wives. The membership consists of men who hold positions under the different railroad systems as landscape gardeners and superintendents of the floral departments. Fifteen new members were added to the previous enrollment of 41. The officers holding over from last year were: George B. Moulder, Illinois Central, Chicago, Ill., president; Patrick Foy, Norfolk and Western, Roanoke, Va., vice-president; J. S. Butterfield, Mo. Pac. System, Lee's Summit, Mo., secy. and treas. Executive Com., John Gipner, Mich. Central, Niles, Mich.; J. E. Smith, Pennsylvania, Ridley Park, Pa.; C. H. Tritschler, N. C. & St. L., Nashville, Tenn.

The new officers are: Patrick Foy, president; J. E. Smith, vice-president; J. E. Butterfield, sec'y. and treas. Executive Com., A. V. Smith, Pennsylvania, Ridley Park, Pa.; F. W. Vail, Central of New Jersey, Dunnellan, N. J.; H. A. Bode, Illinois Central, Champaign, Ill.

A publicity committee was added to which N. S. Dunlop, Canadian Pacific, Montreal, Quebec, was appointed.

The date of the meeting happening on Labor Day the Convention was adjourned from the Crawford House, Boston, to the Boston and Albany R. R. depot at Woodland, where a session was held, and papers were read. J. A. Byrne, Baltimore & Ohio, Relay, Md., spoke on "Arrangement of Ideal Station Grounds"; J. Gipner, Mich. Central, Niles, Mich., on "Trials of Railroad Gardener"; R. J. Rice, Mich. Central, Niles, Mich., on "Effect of Railroad Gardening on the Traveling Public"; C. H. Tritschler, Nashville, Chattanooga and St. Louis, Nashville, Tenn., on "How to Grow Carnations"; N. S. Dunlop on "Neater Appearances"; E. A. Richardson, Boston and Albany, Newtonville, Mass., on "The Cinder Problem." A letter from Robt. W. Wallace discussed "The Station Prize System," and a paper by H. A. Bode on "Propagating Shrubs." The retiring president, Geo. B. Moulder, then addressed the convention.

The second day the whole body of delegates left the hotel at 8:30 a. m. for a trip to Beverly, Riverside and Arlington. And the third day was given to a ride through the Boston park system. The next meeting will be held in Chicago, Aug. 15-18, 1911. A beautiful printed and illustrated souvenir was prepared by E. A. Richardson, landscape gardener of the Boston and Albany R. R., Boston, Mass.

Trade Lists of Nursery Stock.

At the thirty-fifth annual meeting of this Association, held in Denver Colo., June 8, 9 and 10, 1910, Mr. J. H. Dayton, Painesville, O., reported for a committee appointed at the 1909 meeting to consider suggestions contained in a paper read by Mr. Dayton. This committee, composed of Messrs. Dayton, Irving Rouse and Wm. Pitkin, recommended as follows:

"That our lowest prices or trade lists should be mailed only to nurserymen or dealers with established headquarters, who are known to be actively engaged in the trade.

"That some effort should be made to have our price lists and quotations to orchardists and retail buyers nearer a uniform basis for same grade and varieties of stock.

"That as the practice of cutting prices as the season advances is one of the great demoralizers of both the wholesale and retail trade, established rates should be adhered to throughout the season.

"That parks, cemeteries, and other public institutions are not in the trade and are not entitled to trade rates.

"That stock shipped on orders of landscape architects and invoiced direct to their customers should be billed at same retail rates as if the order came direct from the planter."

The report was unanimously adopted.

DES MOINES, IA.—The Iowa Seed Co. furnished bouquets for every man and woman who participated in the Labor Day parade Sept. 5, there being about 6,000 people in line.

Buffalo.

Everything in the shape of weather that suggests fall has been what we have had since September set in, rain, cool and sunshine, which makes all look forward to business. The past week has been a busy one for funerals, Palmer and Anderson's having some large orders. Anderson's work necessitating his sending men to Lockport and Rochester. Gladioli are now at their best, perfect flowers and good varieties. My Maryland roses are good, also American Beauty. White roses and carnations are very scarce. Asters are plentiful, but only fair in quality.

There was another good meeting of the Florists' Club September 6, the principal business being the flower show, which is now an assured thing. W. F. Kasting is chairman and with his past experience in other affairs, the success of the event is assured. Exhibits of the local growers will greatly add to the beauty of the show.

Good & Halliday have opened up their wholesale house and seem well pleased with their start.

F. C. Brown, formerly of Toronto and Philadelphia, is now with S. A. Anderson.

The next week will be a busy one, store openings being announced.

BISON.

Lenox, Mass.

The monthly meeting of the Horticultural Society was held in the Town Hall on Sept. 3, when members were treated to a great display of Dahlias, staged by A. H. Wingett, superintendent for Charles Lanier. Three types, Cactus, Show, and Pompons, were represented in thirty-six varieties. The best of these were: W. W. Rawson, Sylvia, Annie Boylin, Chas. Lanier, Giesha, Queen Wilhelmina, Queen Emma, Catherine Duer, Countess of Lonsdale, Earl of Pembroke, Duchess of Cambridge, Romeo, Acquisition, Ella Kramer, Bertha Von Sutton, Mrs. Wirth, Aug. Norrin, John Walker, Empress of Austria. A diploma of commendation was awarded the exhibit. He also exhibited a giant melon, Vieux's Perfection, 24 pounds in weight, for which he was awarded a first class certificate. This is the first year he has attempted to grow Perfection; rightly named for its allround qualities, size, flavor, and depth of flesh. One of them weighed over 31 pounds. Mr. G. Instom, his able foreman, deserves a fair share of praise in growing them so successfully.

E. A. Jenkins, one of the Bar Harbor judges, reported on his visit there. He spoke very highly of the show, and how well the Bar Harbor gardeners had treated him.

Mr. Foulsham had on view the silver cup, presented by Mr. W. B. O. Field, for the best collection of twelve varieties of vegetables at the fall show.

The Florists' Club held its meeting in the store of Gude Bros., 1214 F street, Sept. 6th. The special committee on flower show reported favorably upon an exhibition to be held the first week in November in Convention Hall. After the business meeting all adjourned to the basement which had been fitted up as a rathskeller and royal good cheer enjoyed. The victory which was won by the home bowlers at the convention at Rochester was appropriately celebrated.

WE TAKE THE LEAD

In what? What a foolish question! Don't you know? Didn't you hear of **GODFREY ASCHMANN**, the great **Araucaria Importer, Grower and Shipper**? These so well favored, everlasting green decorative plants, the **Araucaria Excelsa**, **Robusta Compacta** and **Excelsa Glauca**, are in favor more than ever this year.

Belgium to protect and select for my customers the best of **Araucarias, Azaleas, Palms, etc.**, that cash can buy there. Empty houses won't pay. Now is the time to fill your empty houses with something to grow into money while you are asleep.

Remember, it is the wideawake man that is not afraid to invest a dollar that makes the money. Please look at our special low prices for superior stock.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants, 5-5½-6-7 in. pots, 12-15 18-20-25-30 in. high, 3-4 5-6 tiers 2-3-4-5 years old, 35c. 50c. 60c. 75c. \$1.00. \$1.25 to \$1.50 each.

Robusta Compacta, Excelsa Glauca, 6 in. pots. \$1.00 to \$1.25 each.

Kentia Forsteriana, in fine shape 6-in. pots 30 35 40-45 in. high, 4-5-6 years old, 75c. \$1.00 \$1.25 \$1.50. \$2.00 to \$2.50 each; 4-in., 35c each 25 in. high.

This is our 25th anniversary since we began importing **Araucarias**. Watch! See us grow! Beginning 25 years ago with 100, our this year's (1910) importation is 10,000, and more are coming this fall after I have made my selection of the choicest of the choice on my trip to Belgium; the growing district of the world in **Araucarias** and **Azaleas**. The trade is well informed that for many years past I go personally to

Kentia Belmoreana, 25 31-35-40 in. high, 5-5½-6-7 in. pots, 5-6 7 years old, 50c. 75c. \$1.00. \$1.25. \$1.50 to \$2.00 each; 4-in., 25c each.

Kentia Belmoreana, 2½ to 3 in., 10c each.

Cyclamen Grandiflora, best strain, 4 in., 15c.

Begonia Gloire de Lorraine, deep pink, and **Begonia Lonsdale**, pale pink, 4-in., 25c; 6-in., 50c.

Our Ferns this year are exceptionally very fine.

Boston, Scottii, whitmani and **Scholzii**, 5½ and 6 in., 35c, 40 and 5c; 7-in., large bushy plants, 75c to \$1.00.

Pteris Wilsonii, in 6-in. pans. nice plants, 25c.

Neph. Todeaoides, New London Fern, 2½-in., 5c; 3 in., 7c.

Special to Close Out: 4-in. **Whitmani** and **Scottii** Ferns, fine to grow on, 15c.

Ferns for Dishes, big assortment, 2½-in. pots, at \$3.00 per 100.

Rubber Plants, 6 in. pots, 35c and 40c.

Asparagus Plumosus, 2½-in. 3c; 3 in., 5c; 4-in., 10c.

Asparagus Sprengerii, 2½-in., 3c.

Sago Palms, 6-7 8 in. pots, from 5 to 20 leaves, 10c per leaf.

Cocos Weddelliana, 3 in. pots, 15c, 18c and 20c.

Adiantum Hyb., 2½ in. pots, 5c; 3 in., 8c; and 4-in., 12c.

Primula Obconica, best strain, 4-in., 10c; 5-in., in bloom, 15c.

Primula Chinensis, 4-in. pots \$10.00 per 100.

We have an unsurpassed strain of **Solanum Multiflorum** (Jerusalem Cherries). Can offer only a limited quantity. 3½-in. pots, strong, \$5.00 per 100.

Hydrangea Otaksa, pot-grown, 6-in., 25c.

Azaleas, good well-shaped plants, **Deutsche Perle**, **Simon Mardner**, **Niobe**, **Van der Cruyssen**, **De Schryveriana** 75c. \$1.00, \$1.25, \$1.50 and \$2.00.

"The Florist's Trap"

MOREHEAD

The Remedy for
Your Condensation
Troubles.

A Guaranteed
Investment With
Guaranteed Results.

STEAM TRAPS

RETURN.

NON-RETURN.

VACUUM.

YOU, Mr. Florist, can save fuel—cut down labor—and grow better flowers by installing a Morehead Return Steam Trap.

In the first place, there is only a few degrees difference between the steam going into your heating system and the water of condensation coming from the returns.

It is very foolish, therefore, to cool this water down to a low temperature to pump back to the boilers when, by the use of the Morehead Steam Trap, the same water of condensation can be returned directly to the boilers at a very much less expense than by any other method and without losing any of the heat contained in the condensation.

In the first place, to make steam from water, fuel is required to bring this water to the boiling point under the required steam pressure.

For every ten degrees added to the water by any other means, there is a saving of 1% on fuel.

You can readily see that the cooling of the condensation from 250 degrees down to 212 or less, to accommodate your pump, means a considerable loss of heat, fuel and money.

MOREHEAD Return Steam Trap will put this water back into your boiler at a still higher temperature than 250 degrees, and on 90% less steam required by a pump for returning the same quantity of water.

You then have a combined return trap and boiler feed outfit that will prove out to be one of the best investments you ever made.

Write for "Trap Book" and Trial Offer Proposition.

MOREHEAD MFG. COMPANY,

Dept. "N," DETROIT, MICH.

HEATING PLANTS

Standard Steam and Hot Water Heating Plants

WONDERFUL VALUES. We can positively save you from 30 to 75 per cent on Heating Equipment of all kinds. Our plants are of the most modern type, and only the highest grade material enters into their construction. We guarantee them to be exactly as represented, and highly satisfactory in every way. You run no risks. Send us a sketch or diagram of your building and let us make you an estimate.

Do Not Wait Until Cold Weather to Install Your Plant. Start Now

Send for our Special Heating Catalog, filled with valuable information; tells you every angle and phase of the "Heating Question," and how you can make one dollar do the work of two by installing the plant yourself. Ask for Booklet No. 47.

300,000 feet of Standard Pipe, all sizes, will be cut to any length.

BUILDING MATERIALS AND SUPPLIES

Send for our new 500-page Catalog No. 47. Free upon request.

That Burnham With Hub Connections

Just the boiler for greenhouses, especially in shallow cellars, as the flow pipe hub connections are no higher than the top of the boiler itself. This means a lot of trouble and expense saved in making connections.

Then after your connections are made, the Burnham will keep money in your pocket through the coal it saves.

This hub boiler is made in 16 sizes. Heats 2,800 sq. ft. to 27,600 sq. ft.

The Grandeur of Flowers.

In all the history of the world nothing has given more pleasure to the eye and the mind of man than the wonderful array of colors with which nature has kindly showered us. The simple and pleasing task of raising flowers for the edification of strained eyes and weary minds is second to no other. The inspiration produced by a neat display of flowers can be likened to the steadfast ambitions of youth. Picture to yourself the sitting room of a home where the wife has decorated the windows with an array of flowers. A few home-made boxes covered with coat of paint, and some sod of earth, and the essentials are at hand. The pleasure of the woman in the care of such a

garden is nothing compared to the delight of the head of the family as he asks, "Well, mother, how is the garden today?"

The Standard Steam Trap

Has established a record far above that of any other trap for florists; being very simple, durable and easily taken care of.

Catalogues of the Trap, Duplex Gutter, and Standard Ventilating Machinery, mailed free upon application.

Cord and Twine at Full Weight.

The following from an upholstery trade publication will be of interest to many of our readers at this time:

President Nathaniel McGrane, of the D. P. Winne Company, 121 Worth street, New York, has done a lot of work in standardizing the cordage business. He has introduced a series of tests by which a purchaser can get exactly the weight and tension of cord or twine wanted for any purpose, frequently at a revolution in his cord and twine buying methods, but many times at a remarkable saving in cost. Now Mr. McGrane is doing yeoman work in putting into practice a reversal of the cordage trade policy that has obtained for years. The letter he is sending to the larger consumers of cord and twine is as follows:

"Our new standard is 16 ounces of twine to the pound. Trade custom has been to weigh paper, burlap, woolen reels and all coverings, and charge as twine. We welcome this opportunity, and to show our appreciation for your trade we will guarantee all tare deducted on twine you may purchase from us. Many manufacturers are fighting hard to retain old "trade custom," and we ask for your co-operation to weigh all goods carefully. Thanking you for your repeated favors, we remain," etc.

Two or three manufacturers, including the Linen Thread Company, have announced that they deduct all tare on these goods, but many manufacturers do not, and still charge cord and twine prices for the burlap, paper, woolen reels, barrels, etc. Notwithstanding that the new practice among manufacturers is not general, the D. P. Winne Company, as extensive dealers, have taken the bull by the horns and are buying all their goods with tare deducted from weight, and selling exactly 16 ounces of cord and twine for a pound, even though some manufacturers have not adopted this new practice.

If buyers will see that they receive 16 ounces of cord and twine to the pound, exclusive of package, wrapping, etc., and only take cord and twine under these conditions, they will assist this excellent trade reform. But they will be sure of getting this weight, and a cord or twine assured to be, by test, exactly adapted to their requirements, by connecting with the D. P. Winne Company. A recent letter of Mr. McGrane's to the Cordage Trade Journal is as follows:

The obstinate stand taken by some manufacturers on the now all important subject of having them issue revised price lists based on their guaranteeing to deliver 16 ounces of twine to the pound rather suggests a condition a little like the Irishman's pig. You must make him think you want him to go to Dublin in order to get him into Cork.

WHY

ARE WE SUCCESSFUL IN

Greenhouse Construction

Because we know how to do it and apply to the subject scientific knowledge regarding all the strains and conditions in a greenhouse as well as a wide experience in all kinds of construction. Write for Bulletins.

Many are just pretending that it is an abuse being forced upon them and that they cannot afford to give away paper, burlap, tubes, cones, reels or barrels as is called for to pack twine as fits the trade requirements. But they are reminded that the new idea of delivering 16 ounces of twine to the pound is with the understanding, that all admit, prices must be advanced to a basis so that the manufacturers will be paid for all the paper, burlap, paper tubes, paper cones, wooden reels, bar-

rels or any other package used to put up goods to fit trade requirements. They then fall back with the argument that they will not destroy old trade custom. Remind them that our New York city authorities are forcing the issue and exacting honest weights and their answers are not fit for publication.

Challenge any one of these manufacturers to put their views in black and white, so they can be read by all who are interested in this honest subject, and they refuse.

Trade is being reflected upon by the delays of manufacturers to properly adjust this most important subject. As soon as it is settled you will find trade more healthy and vigorous.

Illinois Coal Strike Ended.

Chicago.—With an aggregate loss of nearly \$20,000,000 sustained by coal operators of Illinois, and a loss in wages of about \$13,000,000 sustained by miners, the five months' strike in the coal fields of this state came to an end with the signing of documents at the final peace conference last week at the headquarters of the Illinois Coal Operators' association, Fisher building. By the terms of this act the miners get virtually all they fought for, including payment of shot firers' wages by the operators and differentials of three cents a ton in Franklin and Williamson counties and two cents a ton in northern Illinois. The settlement affects the entire state of Illinois, except two districts, whose operators seceded from the association and signed

A Light House is the Only Right House

and you don't have to look twice to see how light this house is. It is our Flat Iron Rafter Construction—strong, rigid, durable—the result of years of experience in the development of high grade greenhouses. You cannot afford to go ahead with the building of your houses until you have investigated our method of building them. Drop us a line.

Hitchings & Company

Preparation and Quality as They Should Be.

up the Peoria agreement previously. By the terms of this agreement the miners will gain \$4,000,000 annually under the new increased wage scales. It was regarded as the greatest victory ever gained by organized coal miners. As a result of the settlement a force of 44,000 miners will return to work as soon as the mines are made ready for operation. The new contract will run until April 1, 1912.

Under the new wage scales the men will receive an average increase of eight cents a ton. The chief factors in this increase are a general increase of three cents a ton for all miners and a raise of 5.55 per cent for shot firers, engineers, firemen, pumpmen, day labor, yardage, and dead work. In addition to the raise of three cents a ton, the miners in Franklin and Williamson counties will get an extra raise

of three cents a ton, making it a raise of six cents a ton in those two counties. In the "long wall" mines in the northern field the miners will get an extra raise of two cents a ton, making the increase there five cents a ton. In the Ellisville mines, the men will get a mining rate of 69 cents a ton, which is a raise of seven cents a ton. A rate of \$2.36 a day for eight hours' work was granted firemen in the northern field mines. This is an increase of 15 per cent. Added to the average of eight cents a ton that will go to the miners there will be from two to three cents a ton more to the cost of production by reason of the expensive safety appliances and fire fighting apparatus the mine owners are compelled by law to install in their mines. While the miners will get the benefit of these appliances they will not have to pay for them. As a result of the increased cost of production it is likely that the price of bituminous coal will be boosted 15 cents a ton at least to reimburse the operators for the new costs of increased wages and safety appliances.

Reports originating at Kansas City, Mo., promulgate news that the coal strike in the southwest, affecting about 38,000 miners, has been settled, miners winning.

What Is a Gardener?

The Duke of Bedford, who was represented by his agent, was summoned before Mr. Marsham, at Bow Street Police Court, August 3, for employing five male servants without having proper licenses for them. Mr. Pickford supported the summons on behalf of the London County Council. Mr. Bodkin appeared for the defendant.

Mr. Pickford stated that the five men in question were employed as gardeners by the Duke of Bedford, their duties being to attend to Bedford Square Gardens, Ridgmount Street Gardens, and a number of spaces at the end of houses on the Bedford estates. There were shrubs, plants and flowers in the gardens, and

The Superior Standard

RETURN FLUE FIRE BOX BOILER

contains more heating surface, and less water space than any other steel boiler.
¾ of the heating surface is in the tubes.

Ask the man that knows the one using different style boilers—names are yours for the asking.

After using our boiler one season, you will say like all others: Nothing but "Superior" for me.

This boiler has given better satisfaction than any other boiler on the market

MADE IN NINE (9) SIZES FOR HOT WATER.

he (the counsel) maintained that the men who looked after them were gardeners or under-gardeners and therefore came within the act.

George Beck, foreman of the men referred to, said he was employed by the Duke of Bedford and was paid a salary of £2 a week. One of the other men received 32s and the others 30s a week. At one time he was a farm laborer and was afterwards employed by a cheesemonger. He had worked on the Bedford estate for many years. He looked after the gardens, kept the grass cut, and in the spring planted Pelargoniums (geraniums) and stocks. Although he could do that, he did not regard himself as a skilled gardener and would not take charge of a gentleman's garden even if he had the opportunity.

Mr. Bodkin: Of course you can plant a geranium the right way up? (Laughter.)

The Witness: Certainly.

Boiler Flues

HENRY A. DREER,
714 Chestnut St., Phila., Pa.

In reply to the magistrate, the witness said he formerly sowed the seeds of annuals but he had not done so for more than twelve months past.

Mr. Bodkin: Is there a man in this court who has not at some time or another sown mustard and cress in a box, or even on a piece of wet flannel? That does not make him a gardener.

Mr. Bodkin went on to say that the Duke of Bedford disputed this matter, because it was of some importance both to him and owners of property throughout the country who maintained open spaces. A man who worked in a garden was not necessarily a gardener and the men in question simply did rough work which did not bring them within the act. They only put in flowers which had been grown by someone else, and it could not in any sense be said that these gardens were places in which flowers were cultivated. The men were not attached to any establishment; they were not skilled men and they were only paid the wages received by laborers in London.

Mr. Marshal: "One of them received £100 a year. That is not a laborer's wage."

tion every year, and he ordered them. Nothing was propagated in the gardens. When a shrub died it was replaced by another one. A laborer's wage in London was 7d an hour. This was the first time the Duke of Bedford had been asked to pay a tax for the men employed to keep the square gardens in order.

Mr. Bodkin: Have you considered the advisability in the event of these men being taxed of employing lady gardeners?

The Witness: I think it will be worth consideration.

The case was adjourned.

On the 10th inst. Mr. Marsham delivered a considered judgment. He said that since the last hearing he had visited the gardens and was impressed by the beautiful array of flowers. He came to the conclusion that the foreman, Beck, was a gardener within the meaning of the act. He had some doubt about the other men, whose wages were 32s a week, but with regard to the other three men they were, in his opinion, not gardeners but men who worked in a garden. In regard to the foreman, he imposed a penalty of 20s, which would include the cost of the license, 15s. It was intimated that there might be an appeal. —Gardener's Chronicle.

TRADE IMPROVING.

Trade conditions for the month of August, 1910, show a fair improvement to the retailers over the same month one year ago. The market at all times was firm, and very little surplus stock was left on hand. Chrysanthemums and violets, while they have been in the market for the past few weeks, are now beginning to be more plentiful. Asters are now beginning to get scarce and the prices, in some instances, have increased 50 per cent. Carnations and roses are still scarce but within a short time this condition of affairs will be somewhat relieved.

There will be an amateur concert and flower show, under the auspices of the Bay City Circle, No. 11, Companions of the Foresters of America, the Washington Literary Society and Lafayette Schools Parents' and Teachers' Association at Lyric Hall, 513 Larkin St., on Labor Day, September 5, in the afternoon at 2 o'clock and in the evening at 8. The evening program will be followed by dancing from 10 to 12 o'clock. Cash prizes will be offered for the best exhibition of flowers. The affair is under the direction of Mme. Ellen Roeckel-Davis, Mrs. Mary D. Roberts assisting.

J. A. Carbone and wife welcomed at their pretty home in Berkeley, quite a number of their florist friends from San Francisco, who called upon them to attend a double christening at the Carbone home. Prominent among those who attended were Frank Pelicano, V. Podesta, V. Matraia, and Chas. Matraia. It is needless to say that this well known nursery man of the coast was a most delightful host as well as a happy father.

J. Fonta, superintendent of Audubon Park, New Orleans, accompanied by his wife, were visitors in this city last week. J. R. J.

Kennett Square, Pa.

This may literally be said to be one of the garden spots of Pennsylvania, for here we find a soil that is friable and easily worked and which responds abundantly to the work of the farmer, florist, or gardener. It is a particularly good soil for carnations, which are made a specialty by a number of growers and their stock is looking fine.

The mushroom growing industry is also carried on here very extensively, and is greatly on the increase. Nearly every florist who has glass has also mushroom houses, and in the construction of many of these expense has not been spared to have them convenient and suitable. A great amount of manure is brought by the car load from Philadelphia and used in mushroom growing. There is here one firm, the Anglo-American Spawn Co., that manufactures and sells mushroom spawn.

H. K. Hicks is an importer and dealer of English spawn, and is also an extensive grower of mushrooms.

Some of the growers combine tomato growing with their mushroom business, but there are places where only mushrooms are grown.

Howard Thompson has just completed four connecting houses for carnations, the whole comprising about 25,000 square feet. This is a very fine range. The material was furnished by the Lord & Burnham Co. The side walls are all of concrete, as are the beds, and everything shows good work.

J. B. Swayne of this firm is also interested in the Anglo-American Spawn Co., and is a large grower of mushrooms, his place being extensive and having a switch track which brings the manure in.

Pecky Cypress

Pecky Cypress is the greatest money saver discovered in years. Will last at least three times as long as any other wood for bench material. We can make immediate shipments at all times from our large stock.

HALF HOUR CHAPTERS FOR PLANT GROWERS

Hydrangeas.

The principal detail now in the cul-
ture of hydrangeas is to encourage
any late plants to finish up their
growth and to thoroughly ripen the
growth made on the forwarder plants.
A good position for them is outside in
a plant protector, the pots plunged in
ashes or some other material, the heads
fully exposed to sun and air. Any
earlier plants that have been standing
this way for some time should be
given a new stand and more room in
order that the sun and air can play
freely about the growth and consoli-
date the stems and forming buds
thoroughly. The roots must be kept
well supplied with water and, if there
is any suspicion as to the soil being
poor or if the plants are potbound a
light feeding with liquid manure will
be of advantage. Do not shorten the
water supply until the leaves show
signs of turning color preparatory to
falling when less can be given, but it is
important that the swelling buds be
given all the sustenance necessary to
induce the formation of fine flowering
heads in spring. A light frost at this
time of year does not hurt hydrangeas
in the least but they must be covered
or taken inside before there are signs
of severe weather.

Begonia Gloire de Lorraine.

The plants of Begonia Gloire de
Lorraine and kindred varieties will be
making a better growth now that the
nights are cooler and any plants not
yet potted from the smaller sizes should
have attention at once and be given
all the encouragement possible. A good
light position with shade from only
the brightest sunlight, and a cool bot-
tom of earth, ashes or shingle for the
pots to stand on is about the best ar-
rangement that can be made for the
plants and it is a good plan to keep
the stages or benches well dampened
down by day but on the dry side at
night. This will prevent spotting to
some extent, or at least will prevent
it spreading if it starts. When only a

few leaves are spotted they should be
removed. Take particular care with
the watering after the plants are re-
potted and before the roots obtain a
good hold of the soil. If they are
over-watered now the plants will never
obtain a good hold and consequently
will not grow strongly or well. The
earliest plants may be opened out a
little in the center if necessary and the
lower shoots supported with a neat
stake and raffia. Continue to pinch
out any flowers that appear and also
stop the shoots to induce a good, full
bushy habit.

Poinsettias.

The bright weather of the past few
weeks has been all in favor of the
young stock of poinsettias and the
plants look well. From the time they
are well established in the small pots
until the bracts show a poinsettia can
hardly have too much light or air,
provided the temperature is maintained
and the sun is not allowed to scorch
the foliage. The time is at hand for
making up the large pans, with several
plants in a pan, that have become so
popular of late years. A little careful
selection of the plants is well repaid
here by the more regular plants pro-
duced. Plants a little higher may be
placed in the center, though it is not
absolutely necessary, as the center
plant if as good as those surrounding
it will naturally keep the lead. From
five to nine plants may be placed in
each pan according to size of the lat-
ter and considerable care is needed in
planting not to break the balls un-
necessarily and to see that plenty of
soil is worked in between them leaving
no vacant places. A light shade for a
few days should be given if the sun is
very bright but after this keep the
glass clear, damp down the stages and
floors regularly and keep full air on.
Everything in short must be done to
keep the plants dwarf and hard yet
growing freely, as such will produce
much finer bracts than soft very green
specimens.

Coleuses.

Coleus cuttings root very readily now and a good stock can be worked up quickly and easily by inserting them in the bench and potting up into stock pots later. Choose as far as possible cuttings from flowerless shoots as these usually root more readily than those that are producing flowers. Cut the stem clean through with a keen knife and remove the lower leaves, also pinch out the point of each shoot to induce the resulting plants to bush out from the start. A great pest on coleuses grown under glass is mealy bug and in taking cuttings from such plants be sure they are clean and free from this mischievous insect. For bedding purposes the old Verschaffelti and Golden Bedder are about the best, but there are hundreds of varieties, named and otherwise, that are far better for pot plants. Everyone interested in coleuses should raise a batch of seedlings each year from selected seed as it is very interesting work and some very beautiful varieties are almost sure to appear that are fine for pot and window box work. Early spring is the best time to raise seedlings.

Winter Flowering Geraniums.

It is too late now to propagate winter flowering geraniums and those growers who wish to have good plants for Christmas sales must procure plants from some of the specialists in their culture. Good plants from 2½ and 3-inch pots are offered at very low rates and if these are secured and potted in 5-inch pots they will make fine stock by winter. Geraniums must be firmly potted in a compost of good loam and well-dried cow manure, with a little sand if the loam is inclined to run closely together. The plants should be protected from the sun for a few days until re-established in the pots when they must be kept in the lightest and best position available and given ample room. Growth will be very free and it will be necessary to pinch somewhat closely to keep the plants bushy and form plenty of shoots. Geraniums are not particularly strong feeders but they like to be kept going and as soon as it is seen that the pots are well filled with roots and the growth is capable of standing it light feeding with liquid manure is advisable. The flower buds must be kept pinched out up till about six weeks before the plants are wanted in bloom and the winter temperature for the double varieties should not be less than 58°-60°. A few degrees less will be all right for the single varieties.

Pot Chrysanthemums.

Where pot plants have been prepared as described in previous notes and potted in small shifts they will by now be ready for a little feeding. They should be bushy, dwarf, and have plenty of shoots. In a short time the buds will be showing and ready for "taking" on plants that are to be grown to a limited number of flowers. Those that are to be grown for sprays on the plants are simply left alone to form flowers as they come naturally. There are days, even as late as the end of September, when a little spraying may be required to prevent loss of the bottom leaves but this must not, of course, be done should the weather prove dull or wet. Returning to the feeding, almost any

class of manure is suitable and it is better to change it frequently than to continue for long with one kind. Peruvian guano forms a good change from the ordinary tank liquid manure and soot water or sulphate of ammonia may follow this. See that the soil in the pots is rather moist before applying the liquid manure and give this several times in a weak state rather than one heavy dose. Keep the plants in a cool light house where ample air currents are always circulating.

Royal League Floral Emblem.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

TOLEDO, O.—George A. Heintz has sold his retail florist business to Mrs. J. B. Freeman, who has been with him for many years as manager of his store.

Royal League Floral Emblem.

The accompanying illustration of a design representing the Royal League emblem, which is a triangle within a square within a circle, the colors are red, white and blue, the triangle white, the square red and blue in the spaces between the square and circle, and was composed of immortelles, red and white roses. The wreath, which was made of pink roses was 27 inches in diameter, and with the panel enclosed was placed upon an easel decorated with asparagus and bearing a scroll of white asters upon which were the words "Our Scribe." The Douglas Boulevard Floral Co., Chicago, were the designers of this beautiful piece of work.

Santa Fe Cross Panel.

We herewith present an illustration of a floral panel designed by C. P. Mueller, Wichita, Kan. which was arranged for the officials of the middle division of the Santa Fe system for the funeral of the general manager. The lower half is a reproduction of the

Santa Fe cross in blue and white asters. Above this is a broken wheel of white asters and Killarney roses resting upon a background of galax leaves bearing the inscription, "Middle Division." The whole having a border of liliun lancifolium, tuberoses and gladioli. The panel, when completed, was seven feet high and four feet wide.

The Non-Breakable Flower Vase.

The company which has this new production on the market has headquarters at 1100 New York avenue, Washington, D. C. Albert Schnell is the patentee and associated with him in the enterprise are Z. D. Blackistone and Adolphus Bowdles, both well known florists of Washington. It may here be stated that samples of these vases were exhibited at the Rochester convention and received honorable mention. The vases are non-breakable, as is claimed for them, and in addition are light, convenient and attractive. They are sold at a reasonable price and are well worthy the attention of prospective buyers. Mr. Schnell, the patentee, is also manager of the Washington Florists' Exchange.

How About it? Will You Help Us?

If you seek information about present conditions of business, they are good. The writer found several business men this week who were more than interested in a "National Florists' Commission" to regulate retail prices. You read the letter in the August 6 issue what another florist said about retail prices. Why do we not hear your opinion? Why not send a letter to the editor of the AMERICAN FLORIST stating your views on the matter and giving formulas, and suggestions what you think ought to be done.

Is it not to your interest as well as to all those who are in the business to do something to bring the retail flower trade to a basis of dignity and in keeping with other business enterprises of standing? It is a stupendous task we know to get a matter of this kind started, especially, where so many are inclined to think lightly of the feasibility of such an undertaking. But, let me assure you that this can be done in the flower trade just as others have done in other business channels where at first it was thought an impossibility.

We want each and every retailer to become a member and we want each and every one to voice an opinion in the FLORIST. Do it now—just take a minute and write what you think of the proposition and send it to our "Special Corner For Improvements" which we are trying to organize and make it a success and in various other ways help you to increase your business and bring the retail trade on a sounder basis as to prices, etc.

Bright prospects are with us and extend far into the future. We will show you that you can increase your profits and you will be only too glad to join us in this crusade for bettering the retail conditions of the flower trade. A better motive at this time would be to come and help us do it—knowing that union of forces, and councils of men, must be all for the good.

Do not retard the movement—stand with us—and the National Florists' Commission will be a synonym of success. Every retailer who has the best interests of his business at heart as well as that of the whole country should make a start and do it now.

A. E. KLUNDER.

Florists' Flowers and Their Arrangement.

A paper read by A. C. Willshire, before the Montreal Gardeners' and Florists' Club, August 1, 1910.

Before going into my subject proper I would like to suggest some of the qualifications that I consider necessary to make a successful florist from an artistic point of view.

First, some natural taste is indispensable for practice will undoubtedly do much. The lack of this will show itself in all we do and back of this must be a love of flowers for their own sake, not so much of the commercial spirit that sees nothing but so many dollars and cents in the beautiful things around us, it is also necessary to have some originality.

The ability to present the same material in new form will create and maintain an interest in our products with those to whom we cater. Added to these should be the knack of making the most of the material at our disposal. The uncertainties of our business often finds us with very little to fill pressing orders and here scheming and contriving are brought into play and if this quality is present some of the best work will sometimes be turned out.

Other things being equal, any one thus equipped will have the advantage in the struggle for success.

My experience as a florist dates back some 25 years. At that time we had to depend upon a very different class of flowers to those we handle today. Everything was cut short and made-up work was necessary of the stiffest kind.

New methods, the bringing out of more variety and higher quality changed the whole aspect of the trade. With the improvement in the quality of the flowers came the fashion of cutting long stems, and we went to the other extreme and had American Beauties and chrysanthemums three to four feet, carnations two feet, and so on. The evolution of the rose and the carnations has been most marked since that time, new varieties have been constantly introduced, to be in turn discarded for better. From a retailer's point of view it seems a pity that some of these should have been dropped. Take Papa Gontier rose—a far better bud for gentlemen's button-holes than any that exist today. Mad Hoste, a delicate creamy shade and perfect form. Perle des Jardine, the only yellow we had, has been taken from us and nothing given to replace it.

In fact, there has been a tendency to narrow down the varieties of both the rose and carnation to those that are the most prolific. I am glad to say that this does not apply so much to chrysanthemum, and that mere size does not count for everything with the grower.

The introduction of the orchid as a florist's flower enables us to meet the demand for something out of the ordinary and their use gives a tone to the best class of work that would be otherwise lacking.

At this season sweet peas and asters are our chief standby. It is much to be regretted that better provision is not made for the store trade of summer, which though not large is better than formerly. The roses we have to offer need to be apologized for and,

to say the least, are no improvement on those of ten years ago.

FLORAL OFFERINGS.

In the making up of floral offerings many florists still use wire and tooth picks. We use neither and believe that by this method a more natural and certainly more lasting effect is produced.

As in all other set work we try to place each flower so that its full form

sicken people of this custom of sending offerings to deceased friends than the uninteresting sameness of so much of this work. While color is not barred as it used to be, I think soft shades are best adapted for this purpose, and under no purpose should more than one color be used. Avoid overcrowding in this as in all other arrangements when one kind of flower is used and a stiff effect is liable to occur.

SANTA FE CROSS IN FLORAL PANEL.

is shown, using the best material at our disposal. When a number of designs are being sent for one occasion, it is best to vary them as much as possible. Nothing does so much to

This can be overcome by varying the length of the stems, and placing overhead some very light and graceful green, such as maiden hair fern or in flowers Gypsophila, Spiraea, etc.

BOUQUETS.

The dictates of fashion have arranged the style of these considerably. At the time I speak of we had the perfectly round, compact mass, with paper fringe and tin foil handle. Then came the loosely arranged bunch, with long uncovered stems. Next, what was called the shower, with its irregular spreading form and streamers of foliage and baby ribbon and clusters of lily of the valley. We now have a modification of this in the lightly arranged circular bunch, a mixture of flowers, ribbons and knots of valley, streamers of narrow ribbon, etc. Recently there has been an attempt to revive the old fashion bouquet, paper and all. It seems likely that we may have again to construct curious freaks. For some years ribbon and chiffon have played a prominent part in the making up of floral work. To this some object upon the grounds that they are out of place. I think, however, that at any rate in the case of weddings their association is in keeping with these dressy occasions. But they must be used judiciously, and right here is needed a neat light hand; a lady is quick to note a mussed and creased ribbon or a stiffly tied bow.

HOUSE DECORATIONS.

In the selection of flowers for the house either at weddings or other functions, no set rules can be followed. So much must depend upon the size of the rooms, prevailing color of walls, etc. Flowers such as chrysanthemums, American Beauty roses and Gladiolus arranged in large vases are suitable,

keeping each color by itself, while in smaller houses hanging baskets, cut glass bowls, and low vases filled with smaller stock will add to the brightness of the rooms without crowding other ornaments.

For the dining table the best flowers should be reserved as here their perfection or their defects are mostly noticed. On ordinary occasions the dining table should be furnished with a few good flowers of one or two colors. These should be varied as much as possible, so as to maintain the cheerful effect their presence is intended to produce. Where possible the foliage that nature provided for each flower should be worked in with them. Although nice sprays of asparagus or fern will often help to bring out the color effect and reduce the stiffness of a vase or basket.

The art of harmonizing colors and bringing together effective contrasts requires steady and practical experience.

BATTLE CREEK, MICH.—The H. A. Fisher Co. are remodeling their store and adding many modern improvements.

PATERSON, N. J.—The People's Park Cottage Gardeners' Association held their first annual exhibition of flowers and vegetables Sept. 10-11, 1910.

ALTON, ILL.—The Alton Floral Co. has been incorporated with a capital stock of \$2,400. The incorporators are Allen Keizer, Irving Keizer and George Madison.

THE DAHLIA.

Dahlia Growers of Hammonton, N. J.

Hammonton is just half way between Philadelphia and Atlantic City, but its fame is not founded on that fact.

Dahlia growing has reached an advanced stage at this place and considering the acreage, we doubt if it is rivalled by any other place of similar area in the whole country. For mutual advancement and protection, the Association of Hammonton Dahlia Growers was organized on August 29 of the present year. The officers are: William F. Bassett, president; C. A. Wood, vice-president; Edward H. White, secretary. The association has adopted a label which will be used as a guarantee of quality. All the members of the association are men of sterling worth and their records are clean cut. We desire to make particular mention of the venerable president of the association, William F. Bassett. Born in Massachusetts eighty-five years ago, he, when a lively youngster, got tired of picking rocks and came on to New Jersey. All told, he has been growing dahlias for seventy years, but his interest has not flagged. On his eighty-fifth birthday, July 11, 1910, he turned over the ownership of the nursery to his younger son, George W. Bassett, but his health is yet good, his faculties are unimpaired and he takes the same lively interest in the work that he did in past years. He is a grand old man and

A FIELD OF A. D. LIVONIA DAHLIAS AT J. MURRAY BASSETT'S, HAMMONTON, N. J.

DAHLIA STAR OF THE EAST, AT J. K. ALEXANDER'S, EAST BRIDGEWATER, MASS.

we expect, if we live that long, to see him reach the one hundred mark. Another son, J. Murray Bassett, is also an extensive grower of dahlias. He has a large acreage and grows selected stock, and the same can be said of all the Hammonton growers. More than sixty per cent of all the cut dahlias used in Philadelphia are grown at Hammonton and many shipments go to other cities. While at the farm of Geo. W. Bassett we were much pleased with a vase of "Susan," a new decorative dahlia, put out by Henry A. Dreer. Mr. Bassett, who is growing a large quantity for the Philadelphia cut flower market, says of it: "One of the most promising of the new productions." The color is a soft pink. Other fine varieties that are favorites with the Hammonton growers are: Jack Rose, crimson; Flora, white; Kriemhilde, deep rose pink, with white center. The keeping qualities of this variety are unexcelled. Delice is by many considered the very best decorative dahlia. It is a fine rose pink, is of good form and is a good keeper. Catherine Duer, orange crimson; Clifford W. Bruton, canary yellow; Lyndhurst, scarlet; Maid of Kent, cherry red tipped with white, and Perle d'Or are other fine decorative varieties. In the show class, A. D. Livonia, Arabella, Aurora, Bonton, Storm King and White Swan are extensively grown.

Single dahlias, which now are meeting with great favor, are extensively

grown here. There are a number of good ones but it is doubtful if any variety has thus far become as popular as Twentieth Century. Peacock's fringed Twentieth Century seems to be coming into favor. We here noticed Frank Smith, a variety originated away back in the 40's. There is an interesting story connected with this variety. It was for a time apparently lost. Nobody had it or could learn where it could be had. Some years ago W. F. Bassett, in passing a garden, noticed one in bloom. He secured the plant and worked up a stock and restored it to popularity. It is a fine maroon, tipped into pink and white. In addition to what has already been mentioned, several very promising seedlings have been noticed among the Hammonton growers. Near to the Bassett farms are Edward H. White, Hugo Kind, Watkis & Nicholson and C. A. Wood. All these men are up-to-date growers. In making more extended mention of the Bassetts we have had in mind the venerable head of the house and pioneer of the business, William F. Bassett. Before closing we must tell one of his jokes. He says that one day a visitor, after looking over the farm, remarked: "Well, Mr. Bassett, you grow good stuff here, but for the life of me I cannot tell what makes it grow." The point is that the principal ingredient in the "soil" is white sand.

New England Dahlia Society.

The New England Dahlia Society held its third annual exhibition at Horticultural Hall, Boston, Mass., September 16-18. There are about four hundred members, distributed mostly through New England. The officers are: Henry W. Kendall, Newton, Mass., president; Geo. B. Gill, Medford, Mass., vice-president; Loring M. Bates, West Bridgewater Mass., secretary; Wilber D. Moon, Lynn, Mass., treasurer. The season has been remarkably favorable for dahlias.

The hall presented a magnificent display, pronounced the best exhibition that has ever been given. The leading dahlia growers of this region, such as J. K. Alexander, E. Bridgewater, Mass., who has had thirty acres of them this year, and will add on twenty acres more next year; Edgar W. Ela, Woburn, Mass.; Fottler, Fiske, Rawson Co., Boston; George H. Walker, N. Dighton; W. D. Hathaway, New Bedford, Mass., and Lindvall & Delury, Dorchester, Mass., all had large exhibits. In some cases the entire length of long tables was filled with the very best Cactus Dahlias. There were 300 vases of them on the Alexander table.

The schedule called for 71 regular classes, besides a few specials, and the number of entries gave the judges so much work that they did not get through their duties till the second

day. The judges were J. K. Alexander and E. F. Dwyer of Lynn.

There were three classes of Cactus Dahlias, respectively of twelve, twenty-four and forty-eight blooms; two classes of Decorative, twelve and twenty-four blooms; three classes of show, twelve, twenty-four and forty-eight blooms; two classes of Pompon, twelve and twenty-four vases; two classes of Peony Flowered, six and twelve vases; two classes of Single, twelve and twenty-four vases. From class 15-39 vases of one color each and eighteen blooms. Class 40, a combination. 41-43, Seedling Dahlias. 44, general effect, one flower per bottle. 45-58, small amateur classes. 59-63, largest blooms. 64, smallest. 65-69, distinct colors, six blooms each. 70, combination. 71, general exhibits. Special classes, (Dreer) six best of new show, "Susan," \$5.00 and \$3.00; (Turner, New Bedford) six best of "Ruth Forbes," silver cup; (Newport Horticultural Society) one hundred best Cactus, silver cup, this last awarded to Geo. H. Walker, N. Dighton. On collections of single blooms in the first fourteen classes the winners of first prize were, respectively: 1, W. D. Hathaway; 2, W. D. Hathaway; 3, J. P. Bodge; 4, J. P. Bodge; 5, A. E. Johnson; 6, E. W. Ela; 7, E. W. Ela; 8, W. D. Hathaway; 9, E. W. Ela; 11, Lindvall and Delury.

J. K. Alexander got 1st prize on classes 15, 17, 18, and 19, and would have had first on 44 but was disqualified by having duplicates. G. B. Gill got first on classes 16, 21 and 40. Lindvall and Delury got first on classes 22, 27 and 29. A. E. Johnson got first on classes 41 and 42. Wilber D. Moon got first on class 44.

Six especially interesting novelties on the Rawson table were: Fireburst, decorative scarlet; Mrs. Wm. H. Taft, cactus, pink, white center; Gracie Fuller, cactus, mauve; Snowstorm cactus, white; W. W. Rawson, of the Grand Duke type, with more mauve; Delice, decorative, pink, and Mrs. E. C. Swift, rose. Six cactus varieties on the Alex-

ander table of special note were: Lady Fair, primrose and soft pink; The King, deep crimson; Miss McMullen, delicate pink, lemon center; Thos. Woolson, light salmon; Miss Dorothy Oliver, light lemon, ivory white tipped and Prince of Orange, deep orange. On Edgar W. Ela's table special decorative sorts were: Yellow Colossa, Paul David, deep red; Mme. Lawrence Chabanne, light mauve, flaked with dark; Gen. Miles and Mrs. Alice Longworth, white, mauve flushed. Geo. B. Gill had the largest bloom, the Souv. de Gustave Douzon, which measured full eight inches in diameter. "Dreer's White," of the Grand Duke Alexis form, is a choice dahlia.

The show was well attended.

W. T. H.

William F. Bassett.

Dahlia Grower of Hammonton, N. J.

FLORISTS' PALMS.

Seasonable Notes.

With the approach of autumn and the return from their summer outings of the many thousands of city dwellers upon whom the retail dealers depend for a large proportion of their sales, it becomes necessary for the dealers in question to stock up their windows with something more than a few jars of outdoor flowers, and it is at this time that the palm grower gets busy. The stock that has been in course of preparation for the past year or so, is, or should be, in prime condition at this season, and there is no good reason why the season of 1910 should not be a profitable one for the plant grower.

The market widens from year to year, and from the quantities of palms that are still imported from Europe it is evident that the home production does not yet equal the demand. Many of these palms are imported in the early spring, potted up and grown on during the summer, and then sold during the next fall and winter. Some of the plants thus treated are very good, some are fair, and some are very indifferent stock, with artistically trimmed leaflets, poor roots, and an air of general debility. Naturally much depends upon the way these plants have been grown prior to their shipment from Europe, whether they have been handled on the hot-bed plan or whether they have been grown rationally and hardened off in readiness for their long and stifling journey on shipboard. But the fact remains that all such plants are perishable and liable to injury in transit, and it would probably be readily admitted by the largest dealers in palms in this country that they would import much less were they able to

BASKET OF CACTUS DAHLIA, KRIEMHILDE, GROWN BY J. MURRAY BASSETT, HAMMONTON, N. J.

get the quantities and sizes they need on this side of the water.

This means that there are still opportunities in this line of trade, but it also means that capital is required by anyone who goes into it, for considerable outlay will be made before there is much return. It takes about two and a half years to grow a Kentia from seed to the size that wholesales for a dollar, so the grower must cultivate patience in addition to plants, and not every plant in a batch of young stock will make a saleable specimen in the time mentioned. But granting that the seedlings are potted off as soon as they are ready, which means that they are handled as soon as the second leaf begins to push up, and that afterward they are shifted along in regular order when the roots are fit, and a large majority of Kentias, either *K. Belmoreana* or *K. Forsteriana*, may be grown to the ordinary sized dollar plant in the time specified. But to make this size the plants must be kept clean and in a good growing condition by means of regular temperature and proper attention to moisture. And in the case of the Kentias a regular temperature does not necessarily mean a very high degree of heat, for these palms come originally from a comparatively small island in the South Pacific where the climate is continually tempered by ocean breezes in consequence of which the Kentias do best when grown in a night temperature of 60 degrees throughout the winter.

takes into consideration not simply the form of leaf and those general characteristics that appeal to the plant grower, but also the flower and seed, and thus he finds that in the plants commercially known as Kentias the flowers are arranged in four rows on

H. V. Hunkel.

Greenhouse Superintendent of the Holton & Hunkel Co., Milwaukee, Wis.

of plant growing, it may be said that September and October are two especially favorable months for the Kentia grower, for it is at this season that these plants become more active after the partial rest of the summer the growth made during these two months being frequently the best of the season. With this in view, the fore-handed grower takes advantage of any open spaces that may appear on the benches from early sales, spreading out the stock that it may have the benefit of the light and air, and also shifting on any plants that are in condition to be repotted, feeling sure that the Kentias will repay the expense of the extra handling. As the nights grow longer and colder, do not indulge in the false economy of doing without fire-heat because the days are warm, a little circulation in the pipes helping greatly in the atmosphere at night—and the plants will fully repay the outlay.

W. H. TAPLIN.

WITH THE GROWERS

Holton & Hunkel Co., Milwaukee, Wis.

A half hour's ride from the Cream City on the Milwaukee Northern railroad through a beautiful stretch of country landed us at Brown Deer where are located the greenhouses of the Holton & Hunkel Co., and after a short walk up a spur track we were welcomed into the establishment by the genial foreman, Frank Bernet, who

HOLTON & HUNKEL'S GREENHOUSE PLANT AT BROWN DEER, MILWAUKEE, WIS.

And that short, sturdy-growing species that was once known as *Kentia Canterburyana* (though now termed *Hedyscepe Canterburyana*), grows at a considerable elevation on the same island and will consequently endure an even lower temperature without injury. The similarity in foliage, habit and general characteristics of growth between *Hedyscepe* and the plants commercially known as Kentias brings to mind the fact that these reclassifications and new names are often quite a puzzle to the ordinary plant grower, partly because in many instances he is not familiar with the mature plant, but rather knows it only in the juvenile form. As a matter of fact the botanist

the flower stems, and the seeds adhere to the stem from the bottom, while those of *Hedyscepe* are arranged spirally on the flower stems and the seeds are attached at the side. Working on the same plan, the botanist finds that although the common coconut, *cocos nucifera*, does not bear much resemblance to that favorite dwarf palm of the plantsman, *cocos Weddelliana*, yet in the matter of flower and seed the same characteristics are found, even though the comparison in point of size is almost as that between a peach and a watermelon.

But to return from our brief excursion into the realm of botany, and once more to get down to the practical end

kindly escorted us around the plant. This range of glass has been erected some eight years and Frank has been managing the plant ever since its completion. With the addition of the house now under construction, there will be 175,000 square feet of glass at this plant and this concern also operates a plant of 50,000 square feet on Humboldt avenue. The houses are all of Moninger construction with Garland gutters, and consists of eight houses, 27x400 feet, with a large boiler house and work shed. From this central point extends another range of eight houses, each 17x100 feet. The houses which are now being constructed, under the watchful eye of H. V. Hunkel, will be

connected to the latter set of houses by a packing and potting shed, and later there will be built a corridor 60 feet long which will connect both of the ranges with the larger houses. While the material used in the construction was purchased of the Moninger Co., the actual building operations are done by themselves and all cement walls, walks and benches are of their own labor. Three 100 H. P. Milwaukee boilers supply the necessary heat and Morehead steam traps are used to return the condensation to the boilers. A large reservoir 30x100 feet and 5 feet deep is being built with cement walls, into which will flow the water from the several roofs and this will furnish the water for the necessary need of the plants. There is also a large well upon the place which will guarantee a reserve supply. A very novel idea for furnishing liquid manure attracted our attention. The manure is thrown into a large tank and then steamed, the water then passing through strainers and draining into a basin from which it is distributed to the several houses.

The eight large houses are planted out to roses which are in excellent condition and during our short stay we had the pleasure of witnessing the men make the morning cut and inspect the stock, which was of a very high grade. The American Beauties were particularly fine and the Killarneys, Perles, Brides and Kaiserins were exceptionally good. Two houses devoted to greens were promising well. These were devoted to asparagus plumosus and sprengeri and a bench of smilax just ready to be strung promised a good winter's supply. The smaller houses were devoted to chrysanthemums, adiantum and Boston ferns, which were all in fine condition.

This firm is to be highly congratulated upon the rapid progress which they have achieved in their business in the eight years they have been located at this site and in the extensive shipping business which they have built up throughout the northwest. H. V. Hunkel superintends the greenhouse work and overlooks the culture of the crops, and F. H. Holton has charge of the wholesale store in Milwaukee. Too much praise cannot be lavished upon this hustling firm and their courteous foreman for the able and efficient manner in which all details are carried out, the general neatness of the establishment and the fine condition of their stock.

Florists' Jargon.

The florists have a trade jargon of their own. When a man who grows flowers for a living rattles off something like "paper whites, valleys and Romans" the confused layman has to stop to think what the jumble of words means. It is only the trade way of saying paper white narcissus, lily of the valley and Roman hyacinth. Likewise "mum" is their word for chrysanthemum, and time and space are likewise saved by saying "cyp" instead of cypripedium. So Bridesmaid roses are "maids," American Beauties are "beauties," Perle des Jardin becomes "perle" and is pronounced pearl, while Souvenir du President Carnot is reduced to its last word, just as those other illustrious French rose names, General Jacqueminot and Marechal Niel, were shortened to "Jack" and "Niel" in the heyday of their glory.—New York Press.

CHRYSANTHEMUMS

Specimen Exhibition Plants.

The training and tying out of the specimen plants is a part of the work connected with the growing of these exhibition plants, which must receive attention at this time. The buds are beginning to appear on several of the varieties, and it is much better to have the training and trying out over with before the buds are very far along, as the plants shape themselves better now than after the shoots have stiffened themselves up following the setting of their buds. The style of tying out the plants must be governed to a great deal according to the circumstances. If the plants have attained a great size, and contain plenty of shoots, so that when spread out to rings four feet or over in diameter,

F. H. Holton.

Store Man of the Holton & Hunkel Co.,
Milwaukee, Wis.

they still look good and full, then the best specimens can be made by training them out in this fashion, but it must be borne in mind that plants trained out in this style require lots of space to properly care for them, also they cannot be squeezed together very much to get them through ordinary size doors, and if they have to travel very long distances to the flower shows, they will make very bulky packages.

To train a plant out on this plan, the first necessity is a strong supporting stake at the center of the plants and the main stem securely fastened to it. We use a wire stake similar to those used for staking roses, allowing for it to extend about four inches above the plants. The outside ring is then put in place and secured to four stakes set in around the edge of the pots. Only enough stakes should be used to properly support the ring, a finished plant having a much neater appearance the fewer the stakes it contains. Another smaller ring can be put in nearer the center of the plant, but this is not a necessity if a good specimen can be made with the one outside ring. Silka-

line should be used, for tying the shoots fasten it to the center stake, then loop every shoot to it with a double knot so that it will not slip to cut the stem, then tie the string to the outside ring, starting over again with another string, finishing up as before, following this up all around the plant until every shoot is taken care of. Careful judgment should be used to space the shoots evenly, so that the plant when finished has a uniform appearance and not look bunched in some places and bare in others. The outside ring can be left off entirely and the training taken care of with the center stake and strings looping each shoot as before, but plants tied up in this way cannot be made as large as when the rings are used, but they have one advantage and that is the plant can be drawn in close without danger of breaking the shoots when it is necessary to ship them long distances. Every little detail in caring for these plants must be followed up closely.

The plants having attained such a large size the soil is now full of roots, so do not let them suffer for water, also let them dry out well between each watering, this will keep the soil sweet and the roots active. Continue the feeding of liquid manure a little stronger with each watering, changing off to clear water between each application. Plenty of ventilation day and night is one of the essential things for the plants' well being, also pay strict attention to keeping the plants free from insects of every description.

C. W. JOHNSON.

Chrysanthemums in the South.

Chrysanthemums intended for All Saints' Day should now have the buds well advanced. All lateral growths should be kept picked off clean, to give the bud the best chance to develop to its fullest extent. Liquid manure may be given twice a week until the flowers show color which is generally about October 1st when its use should be stopped. Sulphate of ammonia, a four-inch potful to a barrel of water, is good to alternate with the liquid manure, or a three-inch potful may be used with the same quantity of liquid manure. Syringing must be kept up daily as long as possible to prevent the appearance of red spider. This pest will quickly destroy a whole crop if it once gets a foothold, although it is more liable to appear on plants grown under glass than on plants grown in the open. For greenfly the best remedy is to sprinkle the plants in the evening and dust heavily with tobacco dust. Should the following day be very bright it is well to wash off the dust with the hose otherwise the sun is liable to scorch the leaves. One or two applications should clean the fly out thoroughly.

As soon as the flowers show color is the proper time to put on a cover. Light frames are erected over the beds and covered with sash or cotton cloth stretched tightly. This is about the time thrips are likely to appear, but a liberal sprinkling of tobacco stems in the walks and bunches hung here and there on the wires will make almost a complete safeguard. Very little water is required after the cover is put on,

but the plants may be daily sprinkled half way up the stems to keep just a little moisture in the atmosphere. In cutting the blooms it is always better to cut each grade by itself and place in water 25 or 50 to a vase. This saves time in handling and minimizes the danger of spoiling the blooms.

WM. LEAR.

Propagating Hydrangea Paniculata.

ED. AMERICAN FLORIST:—

When is the proper time, and what is the best way to strike cuttings of hydrangea paniculata grandiflora and syringa?

A. P.

Cuttings from the ripened wood may be rooted in the greenhouse or in the open air. In the former case the wood should be gathered before severe frost, selecting the current year's growth, and the cuttings made and planted in October and November. Make them two to four inches long, sometimes with one eye but preferably with two, and plant with a dibble in pots, pans or flats. They should be kept cool until a callous is formed or roots produced which will require from one to six months; they can then be potted or planted into the ground in May or June. To root in the open air, wood of the same as before mentioned should be gathered in autumn or early winter before severe frost and after it has well ripened, and either stored in a cool cellar, covering with moss or fresh earth to prevent drying, or immediately made into cuttings. These should be six or more inches in length and should contain at least two buds. They should then be tied into bundles with tarred rope with the bases level and buried in a sandy soil with the butts down and protected from frost. In the spring they should be planted in trenches in well-prepared soil an inch or more apart in rows 1 to 1½ ft. apart. The upper bud should be just at the surface of the ground. In the fall they should be dug and sorted and heeled in for the winter.

W.

Lilium Harrisii for Easter.

ED. AMERICAN FLORIST:—

When is the proper time to pot Lilium Harrisii in order to have them in bloom at Easter? Of what should the soil be composed?

AMATEUR.

The time to pot Lilium Harrisii bulbs is immediately upon their receipt, and then placing the pots in a dark, cool place, preferably burying them in a frame. If not wanted until late in the season a good covering of leaves will be necessary. The date of blooming is regulated by the time they are brought into the greenhouse. In a house with a night temperature of 60° thirteen weeks from the required time of blooming will be required.

All lilies require a good live fibrous loam with a small amount of rotted manure and a good generous addition of clean sharp sand. Do not use any old heavily manured soil or the result will be failure.

W.

ST. CATHERINES, ONT.—The Horticultural Society held its annual exhibition September 14-16, 1910.

NORWICH, CONN.—The annual exhibition of dahlias and other autumn flowers of the New London County Horticultural Society will be held September 24.

OBITUARY.

George Wittbold.

George Wittbold, pioneer florist of Chicago, passed quietly away at his home September 19, advanced years closing a long life of unostentatious industry at the age of 78 years. Some years ago THE AMERICAN FLORIST gave a sketch of Mr. Wittbold's career, which will bear repetition at this time: "Away back in the days before the Civil war floriculture in Chicago was conducted along very narrow lines and afforded a livelihood to a mere half dozen men. The history of the trade in the days when Chicago was yet a struggling village is clouded in the obscurities of the past, but it is undoubted that Samuel Brooks was the first of the commercial florists by some years. Then came Edgar Sanders and Williams & Wittbold. Of these George Wittbold, president of the company which bears his name, is the only one who is still in business. This dean of the profession was born in 1832 at

The Late George Wittbold.

Hanover, in Germany, and in his youth acquired a knowledge of plant life in the Royal Botanical Garden at that place. Coming to America and Chicago when 25 years of age, Mr. Wittbold soon became engaged in the business which has been continued to the present day. The firm was Williams & Wittbold, the former having a greenhouse on what is now Fullerton avenue. Mr. Wittbold's glass was at another location, about where Clark street and North avenue intersect. Mr. Wittbold says that at that time his only competitors were Mr. Brooks, away out on the South Side, south of what is now Kenwood, and Mr. Sanders, at the spot which is now the northwest corner of Belmont and Evanston avenues. It was just after the war that Mr. Wittbold left the partnership of Mr. Williams and in 1869 he bought the land on which he has lived and done business for the past thirty-one years. At that time it was largely a slough; there were four acres of it and people said it was not worth the \$2,000 which he paid. There were no streets, not even roads, and all there was on it was water, pond lilies, grass and a few rattlesnakes.

But about the time Mr. Wittbold had his slough filled in he was offered seven acres for his four, seven acres of pretty high land just south of his and consequently nearer the city. Now he wishes he had that seven acres, but then he thought that four acres was all his greenhouses could earn the taxes on; as a matter of fact, when it came to building streets and other public improvements, he couldn't pay the taxes out of his business and sold nearly an acre of his land, but out of that acre he got not only enough for the improvements but enough to give him his other three acres clear of cost, and they are worth probably \$30,000 an acre today. All through the time that Chicago was growing to be great, Mr. Wittbold's business was keeping pace. He brought up a family of five such boys as are a comfort to a man's declining years, and with their aid the business was not only pushed into the front rank but Mr. Wittbold was enabled to entirely throw off its burden and go back under the three acres of glass and potter about at will among the palms and ferns, the friends of his youth, the reliance of his manhood and the pleasure of his ripened years."

Mr. Wittbold married Miss Emma Fricke, sister of Dr. Fricke, the well known Chicago physician, May 29, 1863, and their were eight children, five sons, Gustave, who died January 24, 1908; Henry, Fred, Louis and Otto, all of Chicago, and three daughters, Mrs. Fletcher James, Des Plaines, Ill.; Mrs. Henry Neve and Miss Helen Wittbold, Chicago, all of whom, with Mrs. Wittbold, survive. Funeral services were held at the residence September 21, and interment was at Graceland cemetery. There was a great profusion of handsome floral offerings.

Lake Forest, Ill.

The fourth annual exhibition of the Horticultural Society was held September 16, 1910, at the Art Institute. The building was well filled with groups of decorative plants, cut flowers and vegetables. The exhibition of vegetables was the best ever shown at any of the shows given by this society and the judges had great difficulty in deciding which of the six collections exhibited by G. F. Swift, A. C. Farwell, Cyrus McCormick, E. A. Hamill, H. H. Martin and C. H. Heywood should receive the silver cups offered as prizes. There were 150 entries in vegetables, sixty entries in cut flowers and thirty-five entries in plants. The judges of the vegetables were Charles Gebhard, Robert J. Sampson and A. Johnson, all of Lake Geneva, Wis., and the flowers and plants were judged by W. Longland of Lake Geneva, Wis., P. Myers of Waukegan, Ill., and G. Woodward of Chicago, Ill.

The following premiums were awarded:

Best display of vegetables, to occupy not more than 20 square feet—E. A. Hamill, H. C. Peterson, gardener, first; H. H. Martin, W. Henzel, gardener, second; G. F. Swift, G. Koppenhoeffer, gardener, third.

Best display of vegetables on board 3x5, not over 25 nor less than 20 varieties—D. M. Cumming, K. Lafig, gardener, first; H. H. Martin, W. Henzel, gardener, second; G. F. Swift, G. Koppenhoeffer, gardener, third.

Best display of perennials—A. M. Day, G. Whidahl, gardener, first; Cyrus McCormick, W. Griffiths, gardener, second; H. H. Martin, W. Henzel, gardener, third.

Best general display of annuals—B. A. Echard, B. Seifert, gardener, first; A. M. Day, G. Whidahl, gardener, second.

Best group of greenhouse plants arranged for effect, to occupy not less than 100 square feet—G. F. Swift, G. Koppenhoeffer, gardener, first with a group of well grown palms, cypresses and crotons; H. C. Chatfield Taylor, C. Gennert, gardener, second with a group of seedling fuchsias; B. H. McElwee, J. Newbon, gardener, third with group of heliotrope.

THE AMERICAN FLORIST

1885 TWENTY-SIXTH YEAR 1910

Subscription, United States and Mexico \$1.00 a year; Canada \$2.00; Europe and Countries in Postal Union, \$2.50. Subscriptions accepted only from those in the trade.

REPLACE all the broken glass without further delay.

NOW WANTED.—Those roses that give all the fragrance of summer when summer has gone.

SUBSCRIBERS should renew promptly to insure regular delivery of the paper. The yellow address label on the paper shows date of expiration.

FROST may be expected any time after September 15 and it is well to be prepared for it. The first frosts are frequently followed by a prolonged period of fine mild weather and the season of tender stock may be prolonged very materially by light protection on frosty nights.

The Southern Fern Cutworm.

The velvety green caterpillar which has recently been reported to me by the editor of the AMERICAN FLORIST, as damaging ferns by feeding on the unfolding shoots, is the southern fern cutworm (*Callophistria floridensis* Guen.), an insect which has only been known as a pest of greenhouse ferns about two years. The green cutworms and their parents, which are moths, have habits almost identical with those of the common brownish or grayish cutworms, the well known pests of carnations, asparagus plumosa, etc. The cutworms feed at night, concealing themselves during the day at the base of the plant, or if the houses are dark, stretched along the mid-rib of the leaf and are easily overlooked because of their remarkable resemblance to the color of the fern leaves. The moths are night flyers, usually concealing themselves beneath the benches or other dark places during the day.

Arsenicals, especially arsenate of lead, are effective in controlling this insect, but should not be used on salable plants. In one infested fern house we had good results from spraying with pyrethrum decoction, prepared by steeping 2½ ounces of fresh pyrethrum, or Bubach powder for one hour in 5 gallons of water. In addition, a trap lantern consisting of an ordinary lantern suspended above a tub containing an inch or two of water in which a little kerosene has been added—just enough kerosene to make thin film over the surface is advised. This trap lantern should be lighted at night, the object being to attract and capture the night flying moths. Though we have had no experience with nicotine extracts, they should be of value if sprayed in the evening when the cutworms are feeding. Hand-picking has proven of value, this being accomplished most satisfactorily at night. The cutworms will be found feeding on the tenderer fronds, usually near the tip.

A full account of this insect is given in a report on the more important insects injurious to greenhouse plants, which is soon to be issued as a special bulletin of the Office of the State Entomologist of Illinois.

JOHN J. DAVIS.

Coming Exhibitions.

(Secretaries are requested to supply any omissions from this list and to correct any dates that may have been altered since the last advices.)

Boston, Mass., September 23-25, 1910.—Autumn exhibition of the Massachusetts Horticultural Society at Horticultural Hall, Boston. Address Wm. P. Rich, Horticultural Hall, Boston.

Baltimore, Md., December 1-2, 1910.—Fall exhibition, Maryland Horticultural Society, Fifth Regiment Armory. Address C. P. Close, College Park, Md.

Chicago, November 7-12, 1910.—Annual fall exhibition, Horticultural Society of Chicago, Coliseum, Wabash avenue near Fifteenth street. Address J. H. Burdett, 1620 W. 104th Place, Chicago.

Hartford, Conn., September 22-23, 1910.—Dahlia exhibition, Connecticut Horticultural Society, Unity Hall. Address Geo. W. Smith, Melrose, Conn.

Hartford, Conn., November 3-4, 1910.—Chrysanthemum exhibition, Connecticut Horticultural Society, Putnam Phalanx Hall. Address Geo. W. Smith, Melrose, Conn.

Indianapolis, Ind., November 8-12, 1910.—Fall show, State Florists' Association of Indiana, Tomlinson Hall. Address A. F. J. Baur, Thirty-eighth street and Senate avenue, Indianapolis, Ind.

Lenox, Mass., October 26-27, 1910.—Tenth annual fall exhibition, Lenox Horticultural Society, Town Hall. Address Geo. H. Instone, Lenox, Mass.

Long Branch, N. J., November 9-10, 1910.—Second annual chrysanthemum exhibition, Elberton Horticultural Society. Address R. Carey, Long Branch, N. J.

Milwaukee, Wis., November 7-14, 1910.—Flower show, Milwaukee Florists' Clubs, in the Auditorium.

Minneapolis, Minn., November 16-20, 1910.—Flower show, Minnesota State Florists' Association, National Guard Armory, Kenwood Parkway. Address Jerry P. Jorgenson, 3501 Portland avenue south, Minneapolis, Minn.

Morristown, N. J., November 2-4, 1910.—Annual exhibition, Chrysanthemum Society of America, in conjunction with the Morris County Gardeners' and Florists' Society. Address Edward Reagan, Box 334, Morristown, N. J.

Morristown, N. J., November 2-4, 1910.—Fifteenth annual flower show, Morris County Gardeners' and Florists' Society. Address Edward Reagan, Box 334, Morristown, N. J.

New Haven, Conn., November 1-3, 1910.—Annual exhibition of the New Haven County Horticultural Society, Music hall, 115 Court street. Address Frederick H. Wirtz, 86 Nicoll street, New Haven, Conn.

New York, September 20-22, 1910.—Seventy-ninth fair of the American Institute, Berkeley Lyceum building, 19 and 21 West Forty-fourth street. Address W. A. Egelson, American Institute, New York.

New York, November 9-11, 1910.—Annual exhibition of chrysanthemums, American Institute, 19 and 21 West Forty-fourth street.

Pasadena, Calif., November 3-5, 1910.—Fall flower show, Pasadena Gardeners' Association, Maryland hotel. Address Angus McLeod, 1632 Alleen avenue, Pasadena, Calif.

Poughkeepsie, N. Y., October 27-28.—Annual flower show, Dutchess County Horticultural Society.

St. Louis, Mo., November 8-12, 1910.—Fourth fall floral exhibition, St. Louis Horticultural Society, Coliseum, Jefferson and Washington avenues. Address Otto G. Koenig, 6473 Florissant avenue, St. Louis, Mo.

Worcester, Mass., November 10, 1910.—Chrysanthemum exhibition, Worcester County Horticultural Society, Horticultural Hall, 18 Front street. Address Adin A. Hixon, Horticultural Hall, Worcester, Mass.

Meetings of Florists' Clubs.

[Secretaries of clubs and societies are requested to send notice of change in date, time and place of meeting.]

ALBANY, N. Y.—Albany Florists' Club, W. C. King's, 24 and 26 Steuben street. First Thursday of each month, 8 p. m. Fred A. Danker, Secretary, 40 Maiden Lane, Albany, N. Y.

BALTIMORE, MD.—Gardeners' and Florists' Club of Baltimore, Florists' Exchange hall, St. Paul and Franklin streets. Second and fourth Monday of each month, at 8 p. m. Noah F. Flitton, Secretary, Patterson Park, Baltimore.

BUFFALO, N. Y.—Buffalo Florists' Club, 385-387 Elliott street. First Tuesday of each month, at 8 p. m. Wm. Legg, Secretary, Buffalo.

BUTTE, MONT.—Montana Florists' Club, Columbia Gardens. Second Friday in each month. S. Hansen, Secretary, W. Galena and Excelsior street, Butte.

CHICAGO.—Chicago Florists' Club. First Thursday of each month, at 8 p. m. in Union Restaurant, 111 Randolph street. Louis Winterson, Secretary, 45 Wabash avenue, Chicago.

CHICAGO.—Gardeners' and Florists' Union No. 10615, 10 and 12 Clark Street. Second Wednesday of each month. T. Rodgers, Secretary, 958 Harrison street, Chicago.

CINCINNATI, O.—Cincinnati Florists' Society, Jabez Elliott Flower Market. Second Saturday of each month, at 8 p. m. Alex. Ostendorp, Secretary, Cincinnati.

CLEVELAND, O.—Cleveland Florists' Club, Progress Hall, 2510 Detroit avenue. Second and fourth Monday of each month, at 7:30 p. m. Isaac Kennedy, Secretary, West Park, Ohio.

DAVENPORT, IA.—Tri-City Florists' Club. Second Thursday of each month in Davenport, Rock Island and Moline, alternately. J. T. Temple, Secretary, Davenport, Ia.

DAYTON, O.—Dayton Florists' Club, 37 E. Fifth street. First Monday of each month, at 8 p. m. Horace M. Frank, Secretary, 112 South Main street, Dayton.

DETROIT, MICH.—Detroit Florists' Club, Cowie building, 42-44 Gratiot avenue. First and third Monday of each month, at 8 p. m. Hugo Schroeter, Secretary, Detroit.

GRAND RAPIDS, MICH.—Grand Rapids Florists' and Gardeners' Club, office of member. First and third Monday of each month. Edward Freyling, Secretary, 891 Wealthy avenue, Grand Rapids.

HARTFORD, CONN.—The Connecticut Horticultural Society, County building. Second and fourth Friday, at 8 p. m. Geo. W. Smith, Secretary, Melrose, Conn.

INDIANAPOLIS, IND.—State Florists' Association of Indiana, State House. First Tuesday of each month, at 3:30 p. m. A. Baur, care of Baur & Smith, Secretary, Indianapolis.

LA CROSSE, WIS.—La Crosse Gardeners' and Florists' Society, Hotel Stoddard. Second Tuesday of each month. W. R. Eilers, Secretary.

LAKE FOREST, ILL.—The Horticultural Society of Lake Forest, Council Chamber, City Hall. Last Wednesday of each month, at 8 p. m. L. Guppert, Secretary, Lake Forest, Ill.

LAKE GENEVA, Wis.—Lake Geneva Gardeners' and Foremen's Association. First and third Saturday of each month, at 8 p. m., at News building. A. J. Smith, Secretary. Lake Geneva.

LENOX, MASS.—Lenox Horticultural Society. First Saturday of each month. Geo. H. Instone, Secretary. Lenox, Mass.

LOUISVILLE, KY.—The Kentucky Society of Florists. First Tuesday of each month, at 8 p. m., Third and Broadway. H. Kleinstark, Secretary, Letterle and Ewing streets, Louisville.

MADISON, N. J.—Morris County Gardeners' and Florists' Society, Masonic Hall. Second Wednesday of each month, at 8 p. m. Edw. Reagan, Secretary. Morristown, N. J.

MILWAUKEE, Wis.—Milwaukee Florists' Club. First Thursday of each month at 8 p. m., in Quiet House, corner Broadway and Mason street. Eugene Oestreich, Secretary, R. F. D. 10, N. Milwaukee.

MONTREAL, QUE.—Montreal Gardeners' and Florists' Club, Royal Guardians building, 211 Sherbrook street, west. First and third Monday of each month, at 7:45 p. m. W. H. Horobin, Secretary, 283 Marquette street, Montreal.

NEW LONDON, CONN.—New London County Horticultural Society, Elks' Hall. Second and fourth Wednesday of each month. Frank H. Allen, Secretary, New London.

NEW ORLEANS, LA.—Gardeners' Mutual Protective Association 118 Exchange alley. Second Sunday of each month, at 2 p. m. John Parr, Secretary, 4539 North Rampart street, New Orleans.

NEW ORLEANS, LA.—German Gardeners' Club, 624 Common street. First Wednesday of each month, at 8 p. m. Otto Werner, Secretary, New Orleans.

NEW ORLEANS, LA.—New Orleans Horticultural Society, Kolbs hall, 127 St. Charles avenue. Third Thursday of each month, at 8 p. m. C. R. Panter, Secretary, 2320 Calhoun street, New Orleans.

NEWPORT, R. I.—Newport Horticultural Society. First and third Wednesday of each month. P. F. Reynolds, Secretary, Ruggles avenue, Newport.

NEW YORK—New York Florists' Club, Grand Opera House building. Second Monday of each month, at 7:30 p. m. John Young, Secretary, 110 W. 34th street, New York.

NEW YORK—Horticultural Society of New York at American Institute rooms. Second Wednesday of each month, at 4:30 p. m.: May and June, at 3 p. m., at Botanical Garden. Geo. V. Nash, Secretary, N. Y. Botanical Garden, Bronx Park, New York.

OMAHA, NEB.—Omaha Florists' Club, City Hall. Second Thursday in each month, at 8 p. m. J. H. Adkinson, Benson, Neb.

PASADENA, CAL.—Pasadena Gardeners' Association Board of Trade rooms, West Colorado Street. First and third Friday of each month, at 8 p. m. A. McLeod, Secretary, 163 S. Alleen Ave., Pasadena.

PHILADELPHIA, PA.—Florists' Club of Philadelphia, Horticultural Hall, Broad street, above Spruce. First Tuesday of each month, at 8 p. m. David Rust, Secretary, Horticultural Hall, Phila.

PITTSBURG, PA.—Florists' and Gardeners' Club of Pittsburg, Fort Pitt Hotel, 10th street and Penn avenue. First Tuesday of each month, at 8 p. m. H. P. Joslin, Secretary, Ben Avon, Pa.

PROVIDENCE, R. I.—Florists' and Gardeners' Club of Rhode Island, 96 Westminster street. Third Monday of each month at 8 p. m. Wm. E. Chappell, Secretary, 333 Branch avenue, Providence.

ROCHESTER, N. Y.—Commercial Florists' Association of Rochester, 416 Cutler building. Second Monday of each month at 8 p. m. H. B. Stringer, Secretary, 24 Stone street, Rochester.

SALT LAKE CITY, UTAH.—Salt Lake Florists' Club, Huddart Floral Co., 114 East Second South Street. First and third Tuesday of each month. Chas. Butchart, Secretary, Box 336, Salt Lake City.

SAN FRANCISCO, CAL.—Pacific Coast Horticultural Society. First Saturday of each month. T. F. Taylor, Secretary, 2735 Golden Gate avenue, San Francisco.

SCRANTON, PA.—Scranton Florists' Club, Guernsey building. Third Friday of each month, at 7:30 p. m. T. B. McClintock, Secretary, Scranton.

SEATTLE, WASH.—Seattle Florists' Association, Chamber of Commerce, Second avenue and Columbia street. First and third Tuesday of each month. A. Balmer, Secretary, 316 Taylor avenue, Seattle.

SPRINGFIELD O.—Springfield Florists' Club, office of the Good & Reese Co. Second Monday of each month. Carl E. Glenn, Secretary, care American Rose & Plant Co., Springfield, O.

ST. PAUL, MINN.—Minnesota State Florists' Association, 510 Snelling avenue, north. First and third Tuesday of each month, at 8 p. m. J. P. Jorgenson, Secretary, 3500 Portland avenue, Minneapolis, Minn.

ST. LOUIS MO.—St. Louis Florists' Club, Odd Fellows' building, 9th and Olive streets. Second Thursday of each month, at 2 p. m. J. J. Beneke, 1216 Olive street, St. Louis.

TOLEDO, O.—Toledo Florists' Club. Second and fourth Wednesday of each month. J. L. Schiller, Secretary, 929 Prouty Ave., Toledo.

TORONTO, ONT.—Toronto Gardeners' and Florists' Association St. George's Hall, Elm street. Third Tuesday of each month, at 8 p. m. E. F. Collins, Secretary, Allan Gardens, Toronto.

UTICA, N. Y.—Utica Florists' Club, Genesee Hall, Oneida square. First Thursday of each month, at 8 p. m. J. C. Spencer, Secretary, 111 Oneida street, Utica.

WASHINGTON, D. C.—Florists' Club of Washington, 1214 F street, N. W. First Tuesday in each month, at 8 p. m. A. C. Oehmler, Secretary, 1214 F street, N. W., Washington.

WINNIPEG, MAN.—Winnipeg Florists' Association. Second and fourth Wednesday of each month. A. R. King, Secretary, 325 Portage ave., Winnipeg.

Wants, For Sale, Etc

One Cent Per Word, Cash with Adv. for Plant Advs., See Ready Reference Section.

Where answers are to be mailed from this office, enclose 10 cents extra to cover postage, etc.

Situation Wanted—By experienced seedsman; steady position. Address Key 209, care American Florist.

Situation Wanted—By German; married; gardener and florist; experienced in nursery, orchard and vegetable grower; sober and reliable; best of references; would like to take full charge of place. ERNEST GROSCHEPT, 4431 Stuart St., Denver, Colo.

Situation Wanted—Private or commercial, by practical florist and gardener; German, married, 30; well up in all branches of horticulture; experience in Germany, Holland, England and America; best recommendations; state particulars. Key 210, care American Florist.

Situation Wanted—As a grower of cut flowers and potted plants on a first class place in the south-west by October 7th; practical experience in the trade 26 years; expect fair wages; middle-aged, single man; honest and sober. Please state full particulars in first letter. Address Key 207, care American Florist.

Help Wanted—A middle-aged man, with a good character, for all-around work; a well-provided home awaiting him. Address MRS. M. A. LUESSEN, Westbury L. I., N. Y.

Help Wanted—An energetic reliable man experienced in growing pot plants of all kinds as well as cut flowers; \$55.00 per month, with cottage and garden. F. WALKER & CO., 634 Fourth Ave., Louisville, Ky.

For Sale—Model boiler, No. 5-30; good condition; cheap. Address Key 201, care American Florist.

For Sale—Well established retail seed store; location: Cleveland, Ohio. Key 205, care American Florist.

For Sale—Hippard steam trap; good as new; in use two years, will take care of 25,000 feet of glass. JOHN A. KELLER, Lexington, Ky.

For Sale—A well-established retail flower and seed store; splendid opportunity for the right party; easy terms; owner has other business; Pacific coast. Address Key 202, care American Florist.

For Sale—One good second-hand Ericsson hot air pumping engine; this engine is in first-class condition, capacity 500 gallons per hour reason for selling, well went dry and I have put in city water; price cheap write at once to E. H. MARSHALL, Florist, Sabatha, Kan.

Wanted—A good second-hand hot water boiler. JOHN W. MCINTYRE, 1601 Ranstead St., Philadelphia, Pa.

Wanted.

Two Rose and Carnation Growers for section. Permanent positions to reliable men. Address

J. F. WILCOX, Council Bluffs, Iowa.

For Sale--Retail Store.

Well established; located on fine transfer corner in San Francisco. Completely stocked and doing good family and counter trade. Address

Key 208, care American Florist

WANTED

Young man with thorough ornamental nursery stock training. Splendid opening for right party. Must furnish the best of recommendation. Address

Elm City Nursery Co., New Haven, Conn.

Seedsman Wanted.

Energetic young man who knows the seed business thoroughly, to organize and manage a seed department for a well established nursery business. Address, giving full particulars,

Elliott Nursery Co., Pittsburg, Pa.

WANTED.

A working foreman to take charge of 50,000 square feet of glass where roses, carnations, mums and bedding plants are grown; wages \$16.00 per week; send references, age, etc., in first letter; position open about Oct. 10. Also a helper to grow carnations; wages \$12.00 per week to start.

W. W. COLES, Kokomo, Ind.

WANTED.

A seedsman who is thoroughly versed in grass and field seeds—one who has had considerable experience in the house working on orders assisting in shipping; also must be capable of buying grass and field seeds in the country from the producer. Want a man capable of earning \$1000 per year or better.

Key 166, care American Florist.

CALIFORNIA

Party with \$2,000 to \$7,000 to invest can obtain a fine connection in old established and prosperous business having splendid properties.

Party must be energetic, and with some knowledge of the florist, nursery and seed trade, or having other business ability. Useless to answer unless you can prove qualifications in first letter.

Key 196, care American Florist.

Trade Directory

(EDITION OF 1910.)

Of the Entire Horticultural Trade of America
Is Now Ready for Mailing. Price \$3.00, Prepaid.

A complete alphabetical list of all American cities, with the names and addresses of all commercial horticulturists therein. A separate list, arranged alphabetically, of every commercial horticulturist in this country. These lists are keyed to indicate the special line or lines of each establishment. The book also contains special lists, as follows:

Park Superintendents,	Horticultural Societies,*	Florists' Clubs,*	Supply Concerns,
Landscape Gardeners,	Experiment Stations,*	Foreign Houses,	Judging Scales,
Trade Associations,*	Botanical Gardens,	Catalogue Firms,	Seed Growers,
Leading Cemeteries,	Postage Rates,	Express Rates,	Statistics.

CUT FLOWERS

ROSES, CARNATIONS, CHRYSANTHEMUMS and all other Seasonable Stock.

Our Roses are of exceptionally good quality. Our Carnations, although a little short of stem are as Good a Grade as can be found in the Market.

WIETOR BROS., 51 Wabash Ave., Chicago.

Chicago.

STOCK IMPROVING.

The quality of the different flowers to be seen around the market is showing improvement every day. The weather for the past week has been very pleasant and the stock cut from outdoor plants is much better than what could be procured last week. The cooler nights are enabling the greenhouse men to regulate the temperature and consequently this line of stock is improving rapidly. Roses continue to be of fine quality and good stock can be obtained of all the standard varieties. American Beauties are plentiful and of very good grade. Carnations are improving rapidly, stems are longer and flowers are far better than a week ago. Chrysanthemums are more plentiful and some very handsome blooms are to be seen, but as yet only white and yellow have reached the market. Lily of the Valley is improving and abundant enough to supply all demands. Lilies are a little shorter and sell well. Violets have made their appearance but are of the early fall grade. The market is still well stocked with out-door products, quantities of asters are received daily and while some bear evidence that their season is closing some very fine blooms of the branching sorts are obtainable better than last week, after the rains. Large shipments of gladiolus are being received and are selling very well. Quantities of the coarser out-door flowers are being disposed of and the store windows are decorated with Golden Rod, Rudbeckia, Helenium, Na-

tive Asters and Clematis paniculata. Greens of all kinds are in good supply and demand.

NOTES.

H. Van Gelder of Percy Jones' is enjoying an exceptionally good business, and the last week sales proved to be the largest he has had since Memorial week. The last shipment of colored asters were disposed of on Monday but he still has a number of acres of white asters coming in. A large quantity of carnations are arriving of exceptionally good quality and are among the best to be found on the market.

The stock of palms and greenhouse plants that the George Wittbold Co. is offering this fall is in exceptionally fine condition. They also have fifty acres planted out to nursery stock, including ornamental shrubs, trees and perennials. A complete catalogue has been issued, which will be furnished upon application.

The Horticultural Society executive committee met at the Union Restaurant September 16 and considerable progress was made with flower show business. Geo. Asmus was appointed manager, with offices downtown. The show will be held at the Coliseum, November 7-12.

Vaughan & Sperry are offering their trade a very high grade of roses in all the leading varieties and are receiving large shipments of carnations that are quickly disposed of. Saturday was a very busy day, the busiest of the season, both in local and in shipping trade.

Hoerber Bros. are cutting a very good grade of Killarney, Jardine and Hill roses. Two new unnamed varieties of white and pink roses will soon be ready for the market. September 20 was the first anniversary of the opening of their wholesale store.

One of E. C. Amling's shippers is sending him three shipments of 800 lilies each week, of excellent quality, making a weekly receipt of 2,400. Mr. Amling is now able to handle orders for them in any quantity.

At Vaughan's Greenhouses there is now a fine assortment of Phoenix Roebelenii, Asparagus plumosus nanus, bay and box trees, crotons and other indoor plants in great variety and fine condition.

News was received by Chas. W. McKellar from Columbus, O., that his brother, James, of the Fifth Avenue Floral Co., is in a hospital seriously ill with pneumonia.

Zeck & Mann are this week offering a fancy grade of indoor carnations to the trade. This firm reports a heavy demand for asparagus strings and A. sprengeri.

J. A. Mendel, West Eighteenth street, nominee for county commissioner, is this week attending the national democratic convention at St. Louis, Mo.

It is with much regret that we record the death of George Wittbold, pioneer florist of this city, in our obituary column this week.

Weiland & Risch are cutting a very good quality of roses and carnations, the latter as good a grade as can be found in the market.

BASSETT & WASHBURN,

Office and Store:
76 Wabash Ave., Chicago

Greenhouses:
Hinsdale, Illinois

At a meeting of the Florists' Club bowling league, held September 16, T. C. Yarnall was elected president, Allie Zeck secretary and E. F. Winterson treasurer. The league will open its season September 28 at Bensinger's alleys, 118 East Monroe street. The members of the different teams were selected at a meeting held September 21. Poehlmann Bros. have donated five very handsome scarf pins, which will be given to the five men having the highest score at the end of the season. Geo. Asmus is offering what is known as the Asmus cup to the player having the highest individual score at the close of the season. In addition to these, several other valuable prizes have been offered.

Bassett & Washburn are cutting an excellent grade of chrysanthemums. Golden Glow is exceptionally large and October Frost is showing up remarkably well. This firm is also cutting a large quantity of their new red carnation, O. P. Bassett, for which the demand is heavy. An excellent quality of Rhea Reid, Killarney and American Beauty roses was seen here.

J. A. Budlong is handling a very good grade of carnations from indoor stock. Several letters were received from their customers at Fort Worth, Texas, complimenting them for the excellent quality and the fine condition in which the carnations arrived. We also noticed some white and yellow chrysanthemums of an excellent quality.

The roses that are being received every morning at the store from the Poehlmann Bros. houses are as fine as is often seen at this season of the year. The Killarneys are of excellent color and stem, and the Beauties of fine quality. Chrysanthemums are being received that almost rival the later sorts.

The Mrs. Marshall Field roses cut at the Peter Reinberg houses are of

extra fine quality and the 2,500 which were offered to the trade on September 19 were disposed of as soon as placed on sale. They are of a very rich pink color with long, straight stems. The shipping trade this year is far better than last.

J. B. Deamud Co. is receiving large quantities of gladioli and carnations, the latter being of an exceptionally good quality. Chrysanthemums have made their appearance and Golden Glow is showing up remarkably well. This firm is handling large quantities of wild smilax.

The work of renovating George Perdikas' store, corner of Dearborn street and Jackson boulevard, has been completed. A new front has been constructed, new fixtures added, telephone installed, the interior newly decorated and two large signs placed over the entrances.

John Krutchen is this week offering a very good grade of carnations; his crop is in the best of condition and looks very promising. Regular shipments of chrysanthemums will commence to arrive the latter part of this or the first part of next week.

Wietor Bros. are cutting a very good grade of Kaiserin, Richmond and Killarney roses and are handling carnations of a very good quality. This firm is now offering chrysanthemums to the trade, the yellow ones are of exceptionally good.

A. L. Randall Co. is receiving regular shipments of orchids from the east. An exceptionally good quality of roses was seen here. The changes which are being made in the store will be completed next week.

Chas. W. McKellar is now receiving regular shipments of orchids from the east, several new varieties being seen this week. We noticed Vanda Cærulea and Dendrobium Phalenopsis.

The Raedien Basket Co., 713 Milwaukee avenue, is receiving a large number of orders for their baskets. An illustrated catalogue and price list has been issued and will be mailed to anyone on request.

Fred Franke, who has been visiting his sister, Mrs. R. C. Lange, 3339 North Whipple street, this summer, returned to his home at Santa Anna, California, September 19.

Miss J. Then, daughter of Anton Then, has charge of the floral department of the Pasteur Filter Sales & Repair Co., 105 Dearborn street.

George Reinberg is cutting a very good grade of roses. Their Brides and American Beauties are of an exceptionally good quality.

N. P. Miller of J. B. Deamud Co. on September 17 underwent an operation for the removal of several large tumors from his head.

O. P. Bassett and wife took their departure September 20 for Pasadena, Calif., where they expect to make their future home.

Miss G. Harper of E. H. Hunt's on September 19 returned from her vacation in northern Michigan.

The date of the State Fair at Springfield is September 30 to October 8, inclusive.

E. H. Hunt is this week receiving a very good grade of gladioli and carnations.

Visitors: D. E. Law, Salt Lake City, Utah; Mr. Burt of Burt & Coggan, Battle Creek, Mich.; C. E. Franke, Supt. of parks, Oklahoma City; J. A. Carbone, West Berkeley, Calif.; John Rindfleisch, Beloit, Wis.; E. J. Fancourt, Philadelphia, Pa.; Henry E. Klunder, Pittsburgh, Pa.; Miss Myrtle Somers, Keokuk, Ia.; S. Wachenheim, Vicksburg, Miss.; Theo. Miller, St. Louis, Mo.; Geo. H. Service, Batavia, Ill.

Peter Reinberg,

35 Randolph St.,
CHICAGO.

St. Louis.

FULL OF BUSINESS.

We have now had some fall weather. All last week the nights were cool and the days were bright. Sunday, however, the weather was very warm and sultry. Everybody seems to be more lively. Our wholesalers wear a smile which will not come off until next summer unless some heavy and tiresome gluts should make their appearance. Roses are daily improving, showing more vitality, better shape, size and color. Carnations also have shown a marked improvement. Of course, the majority are short-stemmed. Asters are with us but in reduced quantities. Gladioli and tuberose are somewhat plentiful. Yellow and white cysanthemums are in. The retailers, owing to the cooler spell, had their windows decorated with all flowers in season. In two weeks we will be in the midst of our annual fall festivities, including the Industrial parade and the Veiled Prophets' ball. These events, together with the reception to be given this week at the Knights of Columbus hall to Cardinal Vannutelli, will use a certain amount of flowers.

NOTES.

The Metropolitan Floral Co. had the decorations at the opening of the new Princess theater, Grand avenue and Olive street, September 19. They supplied over 3,000 American Beauty roses, one being pinned at every seat and large bunches were used in the adjoining reception rooms. Every lady received an American Beauty rose as a souvenir.

A. Siegel has several store openings this week for which he will furnish plants and other floral decorations. Alex has leased a space at Schaper Bros.' new dry goods emporium at Eighth and Washington avenue, to be opened November 1, which will be a branch of his present location.

We regret to announce the illness of Mrs. John Steidle from nervous prostration. She is at present under treatment at the Deaconess hospital. The sympathy of the trade is extended to John Steidle and a speedy recovery is prayed for.

Henry Wegmann, 84 years old, a pioneer gardener, died September 14 at his home, 8932 Halls Ferry road, and was buried September 16. He was born in Germany and established a floral business in St. Louis in 1855.

ORCHIDS

A SPECIALTY.

CHAS. W. McKELLAR

51 Wabash Avenue.
CHICAGO.

Fred Sandoz received first premium at the county fair for display of foliage plants and palms. Cut flower bouquet, Miss Josie Mosely, first, and E. Knoche, second. Floral design, Mrs. E. Knoche, first, and Mrs. Stephens, second.

Gustave Gross has just completed three houses for violets and carnations, each 32x100 feet. His brother, Rudolph, has also completed another house, 16x135 feet, for violets.

The Florists' Bulletin seems to have caught on and its next issue will show enlargement. This is a local sheet and run in the interests of the Florists' Club.

Adolph Ahner is now bringing 300 tuberose stalks into the market every other day. His carnations are improving daily.

Werner Bros.' roses are showing marked improvement. They are of good color and foliage.

The Horticultural Society held a meeting of the executive committee last week.

Mrs. E. Buechel, of the Riessen Floral Co., has just returned from Cleveland, O. W. F.

Louisville.

The display of plants and flowers at the state fair, held Sept. 14th, was the finest that had ever been held in the state of Kentucky, the florists of this city making every possible effort to make this feature a grand success.

The following premiums were awarded:
Best group of palms—Nanz & Neuner, first; Mrs. M. D. Reimers, second.
Best floral design—Jacob Schultz, first; Mrs. M. D. Reimers, second.
Best bridal bouquet—Jacob Schultz, first.
Best basket of flowers—C. B. Thompson, first; M. D. Reimers, second.
Display of cut flowers—M. D. Reimers, first; J. Schultz, second.
Display of asters—J. J. Schultz, first; M. D. Reimers, second.
Display of gladioli—J. Schultz, first; M. D. Reimers, second.
Chrysanthemums—J. Schultz, first; M. D. Reimers, second.
Pink roses—Nanz & Neuner, first.
Best table of cut flowers—M. D. Reimers, first; J. Schultz, second.
Best basket of fruit—S. H. Blankenbaker, first.
County display—Baldwin of Henderson, first; Johnson of Jefferson, second; Smith of Bullitt, third.
Best selection 25 varieties of grapes—S. H. Blankenbaker, first.

100 Live Goldfish Free.

The majority of people who never handled Goldfish have the mistaken idea that Goldfish die very rapidly and are a great care. Handle fish as we instruct and you will not lose two out of a hundred and they will be but little care. There is nothing that you can put in your window that will attract more attention than Goldfish.

We are giving away, **FREE** of all charge, to one florist in each town, 100 live, healthy Goldfish. The florist can give one Fish to each customer as a premium and thereby increase his regular sales.

Special Offer---Here is a Profit for You.

The Auburndale Goldfish Company, New No. 920 W. Randolph St., Chicago, Ill.

Goldfish and Aquariums.

An attractive and interesting window display that has been used by many florists is furnished by an aquarium or small dishes of gold fish and in many cases has proven, very remunerative. Some florists have beautified their stores with expensive fountains but the less expensive manner of showing these beautiful little creatures of the finny tribe in globes and aquariums is sure to attract attention and create an interest in nature.

The Auburndale Goldfish Co., 920 W. Randolph street, are headquarters for American and imported gold fish and aquarium supplies and are conversant with all the details conducive to successful care of them and will gladly furnish all necessary information. They carry in stock from ten to twenty thousand fish, and is the only concern in the country dealing exclusively in gold fish. Mrs. K. N. Cooper, who has successfully managed this concern for the last four years is of very pleasing address and calls special attention to the liberal offering made in their advertisement upon this page of this issue, and will gladly furnish a catalog upon application, and any information that may be desired.

Mrs. K. N. Cooper.

Manager Auburndale Goldfish Co., Chicago.

La Crosse, Wis.

The meeting of the Florists' and Gardeners' Society was held September 13. J. P. Wagner opened the discussion on the growing of Cyclamen. After this the subject was generally discussed by those present. A committee was appointed to report on the advisability of the Association holding a flower show some time during November. The feeling seemed to be that the La Crosse florists could get up a very interesting flower show that would attract the attention of our citizens and of florists in nearby towns.

J. S. M.

How to Grow Exhibition Sweet Peas.

L. E. Renault in the Revue Horticole, gives most interesting directions for the special culture of sweet peas from which we cull the following extracts: "The sweet pea demands a deep, calcareous, humous soil, rather light but quite firm. The plants may be grown in rows or clumps, as required for flowers or for general effect; the fundamental principle is that each plant should be supplied with a square foot of well-prepared soil. Rows should be five feet apart, which will

leave just space to pass when the plants are developed. Trenches two feet wide and three feet deep should be dug, a considerable labor, but one which pays in the prolongation of bloom, diminution of watering and improvement of soil. It is better done in the fall but may be done in late winter, and if the soil is too heavy, leaves, wood ashes, leaf mold or other humus must be added, but manure, even half rotted, should be avoided on account of cryptogamic diseases. Sweet peas are fond of lime, of which of course an excess is to be avoided, as that would 'burn' the soil. A simple test is to take a drinking-glass, half filled with the soil to be examined and pour over it a wineglassful of hydrochloric acid; if there is an intense boiling, the soil is rich enough in lime, and the feebleness of the effervescence the greater the need of lime. For a trench 30 feet long, about two pounds of slaked lime will supply a soil which shows no reaction of lime. Superphosphate of lime (six ounces per yard of trench), if prepared in spring, or fine bone meal if in the previous autumn is the best fertilizer.

Sowing in the open ground never gives very large flowers; the great secret of attaining monster sweet peas is to secure an uninterrupted and regular growth, especially when the plants are young. Sow them in thumb pots, one seed to each, or in 4 to 6-inch pots, five or six to each. Any porous soil will do; ours consists of turf two parts, leaf mould one part, sand one part. Fill the pots lightly to an inch from the top and water lightly an hour or two before sowing. Seeds of light colors, and mauve and light blue, recognized by their shriveled appearance, have a tendency to decay instead of germinating, and it is prudent to cover the soil that is to receive them with sand. The dark sorts, on the contrary, often have a covering as hard as that of a canna which may be lightly scored on the side opposite the eye. This method is much more successful with the canna than the long soaking in tepid water that is often advised. Cover the seeds with half an inch of soil and place in the cold frame on a bed of ashes until germinated. Seeds which have not come at the end of 25 days may be scored and will then germinate without difficulty. Harden as soon as possible, and the week before planting out they should be uncovered day and night. Water plentifully rather than often.

Plant out on a mild and cloudy day; the plants in thumb-pots may be set

"THE BUSIEST HOUSE IN CHICAGO."

SOMETIMES a man is satisfied with the stock he is receiving because he has never received any better, is not sure that he can, and believes that he had better let well enough alone.

Did it never appeal to you that you might get better stock for the same money, or the same stock for less money. You can't lose anything by finding out. A trial order will convince you.

J. B. DEAMUD CO.,
51 Wabash Avenue. CHICAGO.

without breaking the ball; the others must be carefully separated and planted with a trowel, at the very least, 16 inches apart; 24 inches would be better. A few days after sowing an ounce or so of nitrate of soda per yard stimulates the root growth. The question of supports is a serious one, for well cared for sweet peas will grow 10 to 12 feet high in a season with good support, without which they produce many branches and mediocre flowers with short stems. Some growers use tall trellises of large-meshed wire, connected with strings eight inches apart. Others place posts at each end of the trench and connect by wires. Of course, it is awkward to pick from such tall plants, and a new procedure is finding favor;—after six or eight weeks of blooming, when plants are six to seven feet high, the plants are cut back to 12 to 16 inches from the ground, keeping only the main stem; the trenches are copiously watered and the plants are kept constantly moist. This is the essential condition. At the end of a week, new shoots appear on the old stem, of which only the strongest one or two are retained; the first buds are pinched off to strengthen the shoots, and in a month the rejuvenated plants are giving a harvest equal to the first, which continues till frost. Watering is necessary, and must be extremely abundant so that the water may reach the bottom of the trenches, lest the deep roots die. Half-waterings are the secret of the most frequent failures. Fifteen gallons of water are required to water a yard of trench three feet deep. A mulch of tanbark, fern or pine branches and early morning spraying may reduce the waterings to one a week, but two are better.

Horticultural Society of New York.

The fall exhibition of this society will be held at the American Museum of Natural History Nov. 8-13, 1910. The halls selected are ideally located and ample in size to grant the necessary room for each exhibitor to display his entries to the best advantage. The premiums are open to competition to all, whether members or not. The schedule of premiums has been published and is ready for distribution and a copy will be sent on application to the secretary, George V. Nash, New York Botanical Garden, Bronx Park, New York City. Liberal prizes are offered for chrysanthemums, roses, carnations, orchids, stove and greenhouse plants, and fruits and vegetables.

Baltimore Notes.

Miss Fiedler has opened a neat and attractive looking store at Hampden, a locality where there have been few florists' stores, and which ought to be good territory for her enterprise.

R. Vincent Jr. & Sons have invited the Gardeners' and Florists' Club to visit their dahlia and canna show, to be held September 27 at Cowenton.
S. B.

ROCKLAND, ME.—Walter O. Frost, of Munising, Mich., has purchased the greenhouse and florist business formerly conducted by H. J. Billings.

DEFIANCE, O.—Christ Winterich has been awarded the contract for furnishing the floral work at Riverside Cemetery for the season of 1910-1911.

Percy Jones

60 Wabash Ave., CHICAGO

Milwaukee.

Roses at the present time are exceptionally fine, with good grade and quality. Carnations are still scarce but few growers cutting same. The out-door stock is rapidly coming to an end, although quite a number of gladioli and dahlias are still being cut. The majority of asters are of a poor grade, mostly short stemmed. Lily of the Valley selling readily. Lilies still scarce and bring good prices. American Beauties mostly of the medium grade are quite plentiful but of good quality. Majority of stock is bringing good prices and business has been satisfactory, considering the dull time which usually prevails during state fair week.

NOTES.

Wm. Eschrich has opened up a floral department at Esphenhain's, which is a new venture in the department stores.

Increasing business has caused the E. Welke Co. to erect another greenhouse, which is nearing completion.

Henry Preuss, previously located at 14th and Walnut street, is opening up a new store on Twelfth near Vliet.

Mr. A. Leidiger of the Edlfsen & Leidiger Co., has gone to Cedar Lake to spend a few days fishing.

James Fox, of J. M. Fox & Son, has left for Crandon, Wis., to spend a two weeks' vacation.

M. A. McKenney & Co. reports business very satisfactory.

Visitors: J. J. Karrins, Dreer Co., Philadelphia, Pa.; J. E. Matthewson, Sheboygan, Wis.; J. N. Johnson, Racine, Wis.; Mrs. T. Hinchliffe, Racine, Wis.; N. B. Lassen, Racine, Wis.

Of Special Interest to Retailers Is Our Offer in

EASTER LILIES

\$1.50 per dozen; \$10.00 per 100. Thoroughly reliable stock in every respect. We have Lilies every day in the year, and can furnish them in most any quantity on short notice.

THE LEO NIESSEN CO.,**BRONZE GALAX**

\$1.00 per 1000; \$7.50 per case.

A STAPLE ARTICLE YOU USE EVERY DAY.

The stock we offer is of an unusual good quality. Try a case.

1209 Arch St., Philadelphia, Pa.**Philadelphia.****SIGNS OF AUTUMN.**

All about us are signs of autumn. The straw hats have nearly all been harvested or destroyed, and vests are again fashionable. If Lewis Carroll's whimsical "walrus and carpenter" were here they would doubtless "talk of many things" and wind up by eating their companions, the oysters. A good fall suit of clothes is now available, providing you have the price, and it is also comfortable. With all this evidence at hand, it is evident that the florist's dull days are almost over. Dahlias are now a great feature of the market. The growers of Hammonton, N. J., are sending in much fine stock, which, in addition to what comes from many other sources, supplies a great wealth of bloom. Cosmos is also very abundant and they are poor indeed who cannot have a small bunch of some kind of blossoms. A number of the retail stores feature the golden rod in their windows.

September 19.—There is an abundance of stock to supply all demands. Orchids are probably the scarcest but there seems to be enough to go around. Some gardenias are coming in but they are not potent factors in the market. The supply of roses is normal. The weather is much cooler, which indicates, if continued, that the supply of stock will soon be lessened.

NOTES.

Lloyd G. Blick, a leading florist of Norfolk, Va., visited this city during the past week. With his sister and a party of friends he motored up from Norfolk in a high power Packard car. While here the party were the guests of Edward Reid and wife at their country home. Mr. Reid took them out in his car and showed them a large section of New Jersey. Mr. Blick and his party journeyed from here to Atlantic City and other seashore resorts. It was their intention to visit New York city, going thence to Maine. They will, on returning, go through the mountains of New Hampshire, the Mohawk valley and will view Niagara Falls, then through the Cumberland valley and the Valley of Virginia, toward home. Mr. Blick and his party were greatly pleased with what they saw here, but are yet fond of the sunny south.

The Henry F. Michell Co. will open their second annual dahlia show at their store, 1018 Market street, on September 27, continuing till the 30th. All the best varieties will be exhibited and prizes awarded to private gardeners. Philip Freud will be in charge.

Komada Bros., 921 Wood street, manufacturers of wire designs, are an enterprising body of young men. They do a large business because they are always on the job and turn out work on very short notice.

Charles Henry Fox, Broad street, below Walnut, is again in his store, the picture of health. Mr. Fox is thoroughly up-to-date and many features of his store are unique and interesting.

Robert Kift is handling very fine Dorothy Gordon carnations from the range of Joseph Heacock, Wyncote. The flowers are good and the stems long for this season.

The store of M. C. Riehs, 1020 North Fifth street, is always a busy place and the genial and kindly lady who presides has many friends in that section of the city.

In the show window of Habermehl's Bellevue-Stratford store, very handsome combinations of dahlias and golden rod are seen.

Charles Fox, Sr., of 1307 North Broad street, was serving on a jury last week, and left the big store to his young men.

George Craig, 211 South Eleventh street, has recently been sending out a large number of fine funeral designs. Godfrey Aschmann, who has been looking up stocks in Europe, will sail from Rotterdam for home October 8.

T. Nelson Geiger, Thirteenth and Walnut streets, is showing very original designs and decorations.

The Chestnut Hill Horticultural Society held its annual dahlia show September 13.

The Robert Craig Co. continues to ship large numbers of their splendid crotons.

John McIntyre is receiving a fine quality of cattleya orchids.

Single violets are on the market.

Pittsburg.

There is a slight change for the better in the flower market over last week. Asters are still coming in fine, but are gradually getting shorter in the stem. Stock is moving out nicely and Saturday evening found the commission houses pretty well cleaned up. Carnations are coming in more plentiful, with a good demand. Beauties are moving out nicely. Greens of all kinds are still very plentiful.

McRae & Jenkinson & Co., New Kensington, Pa., have leased the Eisner Flower Store on Penn. Avenue and

opened September 15. Frank Stafford, formerly with Zeiger Co., is in charge. H. L. Blind & Bros., East End, are booking a number of weddings for next month. This firm was unfortunate September 14, having their delivery truck damaged in an accident.

DeForest Ludwig, son of E. C. Ludwig, North Side, leaves Monday for Ithaca, N. Y., where he intends to take a special course at Cornell University.

A new flower store has opened at No. 1 Federal street, North Side, known as the Allegheny Floral Co., proprietors, J. F. Jedicka and A. J. Perlik.

J. N. Thomas, Greensburg, Pa., has his share of misfortune. Just nursed one through typhoid fever, when the second one developed it.

Albert Lorch, Allison Park, Pa., while out speeding his new automobile, met with an accident which wrecked his car almost completely.

There are rumors out to the effect that another new store will be opened shortly. This one will make the fourth in four weeks.

The McWilliams Floral Co., Natrona, Pa., have just finished two new houses, 35x300.

Breitenstein Co. are showing pretty windows of yellow mums and gladioli.

Randolph & McClements had several very large weddings on this month.

M. Anderson is putting in a new ice box in his Fifth avenue store.

T. E. Butler, New Kensington, Pa., reports business picking up.

Mrs. E. A. Williams has a very fine window display of dahlias. J.

ASTERS ABUNDANT.

Fridays, Saturdays and Mondays are the busy days at the Park street markets. Asters are still abundant, but show the approaching end of the season. The prices are very unstable. One man asks 50 cents and the man next to him 75 cents for about the same quality. Another who has a reputation for asters sells out readily for \$1 a hundred. At Park street no roses more than twelve or fourteen inches are offered, and they are mostly Killarneys, Kaiserins and Richmonds. Carnations are coming into form again. Gladioli are approaching their end. With home coming the retail florists again begin to be busy. At Galvin's "trade improving—new violets begin to come—pink Killarney roses better quality." Business at Carbone's "exceptionally good." Hoffman, on Mass. avenue, is extending his fine front to over 100 feet. Penn. Bromfield street, will begin to put in a new front next week. He is handling a large number of American Beauty roses daily.

NOTES.

The committee on gardens in the Massachusetts Horticultural Society, made a visit September 13 to Dr. W. T. Kendall at Atlantic. The committee were very greatly pleased and interested in what he was doing in growing high grade pears, apples, plums, grapes and peaches.

The schedule of prizes for the General Autumn Exhibition at Horticultural Hall, September 23, 24 and 25, is ready for circulation. The competition is open for plants and flowers, fruits and vegetables. There are seventy-one classes, three prizes to each.

Robt. Cameron's stricture on the Dahlia Show proves how near we come to failure when we think we have done a big and fine thing. "Do you call this a magnificent dahlia exhibit? Why there's nothing here to show what the florist can do with it."

W. H. Elliott, Brighton, utilizes space by laying planks along the upper interior of his asparagus houses and filling them with potted Mums. He waters them with a long hooked pipe.

A. M. Davenport, Watertown, is putting up a bungalow for his foreman,

Asparagus Plumosus Nanus

Supplies and Everything in Season always on hand

At McCarthy's auction sales Boston and Adiantum ferns, carnation plants and Asparagus Plumosus were the stock sold.

William Nicholson has sixteen or more varieties of carnations that are coming into the market in fine condition.

Mann Bros. are large sellers of "everything"—lilies, chrysanthemums, tuberose, dahlias, salpiglossis and cosmos.

The September Fruit, Vegetable and Flower Show at Horticultural Hall this coming week promises great attraction.

W. E. Doyle has been using large quantities of Lily of the Valley, exhausting the market.

N. A. Hudson, Natick, makes a specialty of yellow Marguerites, and will have an abundance.

Norris S. Comley, Lexington, is cutting 1,000 new crop carnations daily.

J. G. Forbes' Auburndale asparagus of both kinds were praised.

The firm of C. Casey, Melrose, is now Cornelius Casey & Sons. W. T. H.

New York.

DULL BUSINESS.

There is little change in the market over that of last week, while there may be a few more buyers around than there has been of late, their general demeanor denotes a don't care whether I buy or not spirit which is not at all conducive to good prices. Some pretty good roses and mums are arriving now but the lack of demand still holds the prices down. Gladioli are thinning out but the supply of asters does not seem to diminish any. Dahlias are now arriving in great quantities.

NOTES.

A new company has been incorporated, styled Badgley, Riedel & Meyer, Inc., successors to A. J. Guttman, 34 West Twenty-eighth street. H. C. Riedel and Meyer Othle, two members of the company having been in the employ of A. J. Guttman for over six years and are well known in the trade. W. G. Badgley, another member is a large rose grower in Chatham, N. J. Great things are expected of this firm who will start business September 17.

Some very artistic show windows are now noticed among the retail stores, the various hued crotons with backgrounds of cybotium ferns seem to be very much in favor, while bright colored tritoma and pots of celosia appropriately named the ostrich feather plant by a certain Broadway dealer, add considerably to the color effects.

A meeting of the New York Florists' Bowling Club was held in F. H. Traendly's office on September 17 and the following officers were elected: J. A. Manda, president; John B. Nugent, treasurer; J. A. Shaw, secretary. The meeting was adjourned to meet September 23. Alleys were also inspected and engaged for every Friday night and second Monday afternoons.

The new store of Max Schling at Fifty-ninth street next to the Plaza hotel is by far exceeding the expectations of the proprietor. The store is artistically decorated and carries a very large stock of cut flowers. An auto delivery car is a new acquisition.

The first Thursday in October will be prize night at the Astoria Florists' Bowling Club, which will resume bowling for the season on that date.

M. Bowe, the Herald Square florist, has taken a temporary store at 60 W. Thirty-third street, where he will conduct business until permanent quarters are procured in the vicinity.

David Clarke Sons have just completed alterations on their Broadway store having installed many more electric lights and painted the interior. Mrs. J. Trepel, wife of Jake Trepel, died while on a trip to South America. The remains will be brought home for interment.

Kessler Bros. will open their new wholesale plant store at 136-138 West Twenty-eighth street about September 15.

N. J. Hill & Co. will open a wholesale cut flower store at 58 West Twenty-eighth street on or about September 20.

The Pennock & Meehan Co. of Philadelphia, will open their New York store on Monday, Sept. 19.

John Huber of Hanft will succeed Mr. Ross as head florist at Sherry's October 1.

Yonkers, N. Y.

A meeting of the Horticultural Society was held September 2. The prizes for the best collection of six varieties of vegetables offered by H. Nichols and L. Taylor were productive of a fine display. The judges, John Barry, J. Mooney and L. Taylor, awarded the prizes as follows: H. Scott, 1st, and J. Goff, 2nd. Louis Milliott read an interesting paper on "The most popu-

lar Christmas flower, the poinsettia." The executive committee reported that the annual exhibition would be held in Co. G's armory Nov. 10-11, 1910. A schedule of prizes and entry blanks have been issued and can be procured of the secretary, H. Scott, 615 No. Broadway, Yonkers, N. Y. L. W.

Washington.

DEMAND FOR DECORATIVE PLANTS.

While there is an improvement in business it progresses very slowly. The householders are returning to their homes but the "season" has not yet opened. The most noticeable effect of the return of the many voyagers, is the increased demand for palms and ferns. When a house that has been closed all summer is again opened, the first requisite is plants to brighten it up and make it appear more homelike. Taking advantage of this sentiment, a number of the dealers have been holding plant sales which, as a rule have been very successful. Cut flowers move slowly. We have noted some very fine American Beauty roses, for the season, going to waste. There is an abundance of tea roses and many of them are good but, it is hard work to push them. Of dahlias and cosmos there is an overabundant supply. Carnations are seen in surprising quantities for the season, but they are of little use except in funeral work. A few chrysanthemums are seen; they are not factors in the market but serve well as novelties.

NOTES.

As president of the Chamber of Commerce, W. F. Gude has been very busy during the past week, receiving delegates to the various conventions that have held meetings here. On September 17 he welcomed more than five hundred delegates from various cities, attending a convention arranged by the Builders' and Manufacturers' Exchange of this city. Incidentally, it may be stated that another prospective florist has arrived at Mr. Gude's home, a boy, which increases his little flock to three boys and two girls.

George C. Shaffer executed a fine decoration at the Mexican Legation on the night of September 15. It was a dinner decoration and there were thirty-five guests. There was a magnificent centerpiece and two smaller oval pieces, all of the best flowers, one at each end of the table. He is receiving fine chrysanthemums of Golden Glow from Shaffer & Co., Alexandria, Va.

Alexander B. Garden, who enjoys the unique distinction of being the only florist in the District who was born on the place on which he now resides, was severely bruised while boarding a street car on September 15. Though painfully injured, it is the belief of his physician that he will soon be around again. During his enforced idleness Mr. Garden spends much of his time reading the AMERICAN FLORIST.

J. H. Small and wife, who have been touring Europe for the past two months reached New York September 15. They are expected home early this week. Mr. Small is a veteran in the business and his impressions of European horticulture are sure to be interesting and instructive.

Leapley & Noyer, who opened a retail store at 905 G street, N. W., last May are doing a good business. Both are young, but experienced. One of the features of their store is a pebble dashed icebox, an original idea of Mr. Leapley.

C. Ponnent & Co., who have to stands in the Centre Market, with greenhouses at Alexandria, Va., are showing an exceptionally fine stock of ferns and other plants. This firm also grows large quantities of mushrooms.

John Robertson had the misfortune to slice the end of one of his thumbs while doing a job of pruning, one day last week. As he is serving on the jury, a little thing like that does not bother him much.

The Philipps Flower Shop, 2926 Fourteenth street, N. W., has just received consignments of palms from Chas. D. Ball, Holmesburg, Pa., and foliage plants from Robert Craig, Philadelphia.

L. E. Hoover, of Mayberry & Hoover, has just returned from a month's stay at St. George's Island at the mouth of the Potomac. This is a noted resort for fishermen and Mr. Hoover is a disciple of Isaak Walton. Enough said.

Manager Schnell of the Washington Florists' Exchange is handling a very fine quality of lily of the valley, grown by M. R. Gray, Oakton, Va. He has also fine ferns from Ley & Bickings, Goodhope, D. C.

P. H. Dorsett of the Department of Agriculture has just returned from a four months' tour of inspection. He visited California and the northwestern states, going thence to the South.

G. E. Anderson has rented his greenhouses at Ballston, Va., to Kendall O'Dwyer, and is now in charge of the estate of Mrs. Gardner Hubbard, Twin Oaks, D. C.

J. Louis Loose and wife celebrated their silver wedding on September 16 and received many congratulations from their numerous friends.

Geo. H. Cooke has been very busy of late fitting up the houses of a number of his customers with palms, ferns and other foliage plants.

Z. D. Blackstone has been having a palm sale and it was very successful. He is also making a fine display of cut flowers.

John Gutman of Congress Heights, D. C., has just completed a new house 25x200 feet, for the growth of mixed stock.

Visitors: Fred. J. Michell and W. P. Craig, Philadelphia; Julius Dilloff, representing Schloss Bros., New York.

Theodore Dietrich of Congress Heights has fine crops of violets and sweet peas coming on.

Its merits have been conclusively proven through Public Demonstrations.

Aphine will not injure the the tenderest flower or foliage—in fact it invigorates plant life.

It possesses excellent cleansing qualities.

LOW WATER SUPPLY.

The month of September is showing its accustomed vagaries, and within a week the mercury has ranged from 92 down to 45 degrees. In this immediate locality the long, continued drought is unbroken, and the question of water supply for the city and suburban district is becoming very trying. The collecting reservoirs do not receive as much water as they supply, and the surplus in the storage reservoir gets lower and lower. One private company which supplies the densely populated suburb east of the city turns off the supply at night, much to the disgruntlement of many persons who carry on establishments of various sorts requiring large quantities of the element. In the churches prayers are being offered for rain, and a condition exists all around which is full of in-

convenience and fraught with possible disaster to a great population. Quite a destructive fire reached far larger proportions because of the diminished pressure in the pipes, and a very uneasy feeling prevails. There is somewhat more animation in business; the streets are filling up, the sojourners by the sea, in the mountains and the country-side, are resuming their old haunts and customs and the demand for flowers and plants begins to be felt. Unfortunately, the supply of material is rather limited and, as might

be predicted from the sudden and great alternations of temperature in the houses, the quality is not of the best. Out-door stuff, owing to the drought, is not abundant, and roses and carnations are hardly up to the standard. Asters are finished up, the dahlia is not in great favor, and the gladiolus is not adapted to general requirements. Lehr Bros. lost a valuable horse a few days ago, it dropping dead in the street without apparent cause after leaving home in good condition with a load of plants. S. B.

The Seed Trade.

American Seed Trade Association.

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

MICHIGAN beans are reported two-thirds of a crop.

VISITED CHICAGO: Geo. H. Dicks, of Cooper, Taber & Co., London, Eng., and Catesby Spears, Paris, Ky.

COMMENTS on the seed crops of 1910 remind us of James Sproule's famous "Season of growth depression."

STUART LOW & Co., London, Eng., reports cyclamen seed an average crop this season and in one novelty they are already sold out.

PEA growers in Michigan say the more peas are threshed the smaller the quantity grows, most discouraging to dealer and farmer alike.

J. C. VAUGHAN was nominated as the democratic candidate for congress in the second Illinois district, September 15, in opposition to James R. Mann, republican.

CHICAGO.—Prices on the board of trade September 21 for grass seed were noted as follows: Timothy, \$7.75 to \$8.75 per 100 pounds. White clover from 20 cents to 25 cents.

THE crating and cleaning of onion sets now in progress at Chicago indicate a yield somewhat in excess of earlier expectations. The quality is excellent.

PURE SEEDS IN VICTORIA.—The government of Victoria, according to a British trade paper, is drafting a bill to insure, as far as possible, the purity and germination value of seeds sold and, contrary to the custom usual with some other governments, has invited the co-operation of the seed trade.

NEW YORK.—The seed stores are getting up some very attractive and artistic windows of Dutch bulbs just now. —Wm. Elliott reports a very successful auction for the first of the season.—Buds' report a very busy year for their first and all indications point to the following one being much better. D. Adams, formerly of Thorburn's, is now on the road for this firm.

SAN JOSE, CALIF.

Rains Damage California Beans.

Ventura, Calif., September 16.—The Hogue-Kellogg Co. write as follows: "On September 14 and 15 the lima bean growing district of southern California was visited by the most disastrous rainstorm in the history of the state. Some three or four inches of rain fell throughout the lima bean territory, coming at a time when not over five per cent of the crop had been harvested. If dry winds follow the loss will not be great, but at this time the weather is damp and foggy and the loss to the bean crop may run as high as 25 per cent. The rain was not nearly so heavy at Lompoc, however, where nearly all the garden varieties of beans are grown and the loss will not be serious there."

Carpinteria, Calif., September 16.—The Henry Fish Seed Co. write as follows: "These unusual rains in September are getting too common for the comfort of the bean growers. After the damaging rain of September 14 we are thankful for the wind and sun this afternoon. The rain will cause much handling and shrinkage but harvest will be resumed as soon as the beans are dry."

Harvesting Michigan Beans.

The time for harvesting beans depends largely upon climatic conditions, earliness of planting and varieties grown. The latter part of August and early September comprise the common harvest time. If weather conditions are favorable for quick curing, according to the Michigan Experiment Station bulletin, it will be well to begin harvesting before the beans are ripe enough to shell. On the other hand, if weather conditions are unfavorable, it is well to let the crop get ripe so that most of the leaves have dropped off. The crop will then cure quickly and can be stored away. The sooner the bean crop can be stacked or housed safely, the less the liability to loss by unfavorable weather.

The pulling of beans is usually done with a bean puller or harvester, replacing the old tedious, back-breaking method of pulling by hand. The bean puller pulls two rows at a time, placing them together in a row between. Care should be taken to have the draft to the puller adjusted so that the blades cut about one and a half to two inches below the surface the whole length of the puller blade. This should

be adjusted with each team that is used by raising or lowering the end of the pole, so that when the blades strike the ground they will cut the whole length. Men should follow with forks and put the beans in small piles, about four to six rows into one, for convenience in hauling. The rows of piles should be far enough apart so the wagons can be driven between them. In some parts of the state the side delivery rake is used for separating the beans from the ground after being pulled. This is objectionable on all but light soils as it gets too much soil among the vines and as the threshers do not separate the soil from the beans, they go to the elevators in that condition.

Should the beans get wet after being pulled, they ought to be turned as soon as possible after the storm. The wetting of beans does not injure them materially, provided they are not allowed to lie on the ground without being turned over. They should be sacked or put in sheds or barns as soon as cured.

THRESHING.

Beans are now threshed by a special machine or beaver which has been instrumental in materially increasing the acreage of beans grown. These machines are usually introduced into localities where beans are grown commercially and offered for hire on a plan similar to that used by grain threshers.

Imports.

During the week ending September 17, imports were received at New York as follows:

McHutchison & Co., 182 cases bulbs.
C. C. Abel & Co., 79 cases bulbs.
Stumpp & Walter Co., 76 cases bulbs.
C. F. Meyer, 72 cases bulbs, 34 cases plants.
F. R. Pierson & Co., 44 cases bulbs.
W. Elliott & Son, 41 cases bulbs.
Vaughan's Seed Store, 32 cases bulbs, nine cases plants.
H. F. Darrow, 31 cases bulbs.
W. E. Marshall & Co., 13 cases bulbs.
Hinsdale Florist Co., 13 cases bulbs.
A. Rolker & Son, 12 cases bulbs.
P. Henderson & Co., nine cases bulbs.
McHutchison & Co., eight cases bulbs, 150 tubs laurel trees, 44 cases plants.
J. M. Thorburn & Co., three cases bulbs, 145 bags seed.
Burnett Bros., one case bulbs.
J. Roehrs Co., 96 tubs laurel trees.
H. Nungesser & Co., 61 bags grass seed.
To others, 2,222 cases, 146 pkgs. bulbs, 43 cases plants, 396 bags seed, 350 bbls., 300 bags clover seed, 100 bags poppy seed, 50 bags sunflower seed.

Greenhouse Vegetable Growers and Market Gardeners' Association.

C. W. Waid, New Carlisle, Pa., President;
Franklin DeKleine, Grand Rapids, Mich.,
Vice-President; S. W. Severance, 508 Illi-
nois Life Building, Louisville, Ky., Secre-
tary; M. L. Kuetenik, Cleveland, O., Treas.
Annual meeting at Grand Rapids, Mich.,
Sept. 27-29.

Market Gardeners' Convention.

The third annual convention of the Greenhouse Growers' and Market Gardeners' Association of America, will be held at Grand Rapids, Mich., Sept. 27, 28 and 29, 1910. All persons engaged or interested in the growing of vegetables for market are eligible to membership in this organization and their co-operation in the work of the society is earnestly solicited. The following program has been issued and distributed by the secretary, S. W. Severance, Louisville, Ky., who earnestly appeals to all vegetable growers and market gardeners to attend the convention and join the association:

Tuesday, September 27.

9 a. m.—Call to order—President C. W. Waid, New Carlisle, Ohio.

Welcome Address—Geo. E. Ellis, Mayor of Grand Rapids.

Response—Prof. Wm. R. Lazenby, Columbus, Ohio.

President's Address.

Report of Secretary.

Report of Treasurer.

Reports of State Vice-Presidents.

Reports of Standing Committees.

"Results of Local Organization"—Floyd J. Zuck, Erie, Pa.

"Some Recent Investigations in the Pollenization of Tomatoes"—Prof. O. I. Gregg, Michigan Agricultural College.

"Detail Methods of Operating a Massachusetts Market Garden"—Prof. H. F. Tompson, Attleboro, Mass.

Detroit.

TRADE ERRATIC.

Trade these days is quite erratic but on the whole is fairly good for the season. Some lively spurts occasionally are experienced when all the available good stock is used up. Some good asters are on the market but the trade is tiring of them and seek even the short stem carnations that are now coming in. Roses are in good supply and fairly good stock can be had at most times.

FLORISTS' CLUB MEETING.

The Florists' Club meeting September 19th was most successful in point of attendance and features of the proceedings. President George Browne was in the chair and showed rare ability as a presiding officer, impressing all with the wisdom of his election to the presidency. M. Bloy read a paper on "Observations and Benefits to Be Derived By Attending the S. A. F. Convention." He reviewed the various exhibits and stronger features of the Rochester meeting and elicited a hearty vote of thanks for his interesting and instructive address, which was followed by a general discussion of the same subject by all of those present who had visited the Flower City convention week. E. A. Scribner also read a paper entitled "My Vacation Trip," which he took with Mrs. Scribner to New York and Atlantic City, including the S. A. F. convention. This address also was most interesting and much of the well known originality and humor of the venerable ex-president of the club was injected into it, and received a vote of approval at its conclusion. President Browne, who visited the School Garden exhibits at twenty public schools last week, commented approvingly on this good work in which the club is interested, making an annual donation of fifty Boston ferns as awards to the school children making exhibits. The work is carried on under the direct supervision of the Twentieth Century Club, having the co-operation of our club. This year the judges of the exhibits were: Robt. Unger, Walter Taepke, E. A. Scribner, Frank Danzer and J. F. Sullivan. Mayor Breitmeyer is especially identified with the work and annually donates a Boston fern to each

school making an exhibit. Elmer D. Smith & Co., Adrian, Mich., sent a number of blooms of their new aster, "Peerless." It is a pure white variety of immense size on long stems, and a shell pink variety not yet disseminated was also shown. Both were highly commended and a vote appreciative of their merits was given the originators.

NOTES.

Chas. Hufford has opened a store at 51 Gratiot avenue and it will be called "The Cash Flower Shop." He conducted the flower department at 14-16 Gratiot avenue the past two years. The latter place is now conducted by the Misses Lillian and Clara Rauss. Miss Clara got her floral experience at Breitmeyer's.

BERRYDALE EXPERIMENT GARDENS,
Route 1, Box 54. **HOLLAND, MICH.**

John Klang, for many years with Breitmeyer's, will soon embark in business with Wm. Rockelman in a neat little store, corner of Forest avenue and Chene street.

Miss Hattie Halzhauer, with years of experience in florist work, has joined Edward Bleil in partnership and opened a store at 20 John R. street.

Mayor Philip Breitmeyer will retire from political life January 1 next and thereafter give his undivided time to the florist business. J. T. S.

Cleveland.

Stock has shortened up considerably the past week. Carnations are rapidly showing better form. Asters are becoming less plentiful and of poorer quality, those now coming in being about the last of the crop. There are plenty of Kaiserin roses on the market and of the best of quality. Pink roses are short of the demand. Adiantum fern is finding a slow market. Plumosus and sprengeri is plentiful but cleans up nearly every day. Good Valley is finding a ready market.

NOTES.

Another retail flower store has opened at 1282 Euclid avenue right next to the Jones-Russell Co., and will be known

The Nursery Trade

American Association of Nurserymen.

W. P. Stark, Louisiana, Mo., President;
E. S. Welch, Shenandoah, Ia., Vice President;
John Hall, Rochester, N. Y., Sec'y.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June, 1911.

THE ninth annual convention of the National Nut-Growers' Association will be held at Monticello, Florida, November 1-3, 1910.

CHARLES CITY, IA.—E. N. Sherman, president of the Sherman Nursery Co., has the sympathy of the trade in the loss of his daughter, Catherine, September 12, age 19 years.

In our reply to "A. L. G.," issue of September 3, page 308, the last question, what is the best variety, or varieties, later than Festira Maxima and Whitley to prolong the cutting season; other than Drop White which has a short stem? was unanswered. Mad Crousse is one of the best to follow the above varieties.

ELLWANGER & BARRY, Rochester, N. Y., were awarded the highest prize for the largest and best collection of fruit trees, ready to plant, embracing apple, pear, peach, plum, cherry and quince, at the state fair at Syracuse. They also received the highest award for grapevines and bush fruit plants, and received over fifty prizes for their display of fruits.

WHILE the southern states at present have a monopoly upon the growing of pecan nuts, yet like all other vegetable life, they are susceptible of improvement when guided by the intelligence of man, and a variety of pecans may yet be discovered or originated that will mature in the northern states, and the vast hickory forests of North America can be made to bear profitable crops of this queen of nuts.

The Seventeen Year Locust.

While the people of New Jersey are recovering from their struggle with the mosquito, Dr. John B. Smith, state entomologist, announces that the seventeen year locust (*cicada septendecim*) will visit them next May. This insect has an evil record and is able of converting a paradise into a waste. It will probably be most abundant in eastern New Jersey and Dr. Smith says: "There is no way of poisoning the insects for they do practically no feeding, and it is not the least dangerous to handle them. All insectivorous birds feed freely on these cicadas and so does the ordinary farm poultry of all kinds. Sparrows take a malicious delight in tearing them to pieces and little damage may be expected where these birds occur in large numbers. But it is one thing to have the locusts destroyed by bird executioners and quite another to deal with the damage the locusts do.

"The injury is done by the females in laying eggs in twigs and small branches making slits that do not heal, these result in the ultimate death beyond the point of injury of every punctured branch less than half an inch in diameter and where there are many punctures on the trunks of small trees or on branches up to three-quarters of an inch, these are apt to be seriously damaged or killed.

A BLUE ROSE

The Greatest Rose Novelty of the Century

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

Dreer's Hardy Perennial Phloxes

We are the largest growers of Perennial Phlox in the world, having this season over a half million field-grown plants in stock.

The collection offered below embraces every known color in this gorgeous race of summer-flowering plants, and we are prepared to furnish many of the latter as well as the older standard varieties in large quantities at a low uniform price.

The plants we offer are all strong one-year-old field-grown, and will make a fine display of flowers next season.

Three Fine New Hardy Phlox

We would particularly call attention to the following *Three New Varieties* as not only the most distinct in color, but in every way superior to all varieties of recent introduction which have come to our notice:

Elizabeth Campbell. Very bright salmon-pink, with lighter shadings and dark crimson eye, an entirely new and much-wanted shade in Phlox.

Frau Anton Buchner. The finest white variety yet introduced, having the largest truss and individual flowers; of dwarf habit,

Rosenberg. Bright reddish-violet, with blood-red eye, large truss and individual flowers as large as a silver dollar.

PRICE: Any of the above three new varieties, \$1.50 per dozen; \$10.00 per 100; \$90.00 per 1000.

General Collection of Hardy Phlox

Aiblon (Medium). One of our own introductions; producing very large panicles of pure white flowers with a faint aniline-red eye.

Algae Adamson (Medium). Immense flowers, snow-white, with red eye.

Antoin Mercie (Medium). Light ground color, upper half of petal deeply suffused bluish lilac; large, white halo.

Bacchante (Tall). Tyrian rose, with crimson-carmine eye.

Beranger (Dwarf). Ground color white, delicately suffused with rosy pink, distinct aniline red eye.

Bridalmaid (Tall). White, with large crimson-carmine centre.

Belte Alliance (Medium). White, with large pure red eye.

Charles Seiler (Dwarf). Bright reddish violet, with large white star-shaped centre.

Clara Benz (Dwarf). Lovely carmine-rose, with darker eye.

Colibri (Tall). White, with crimson carmine centre; very late.

Consul H. Trost (Medium). Pure red, with bright French-purple eye.

Champs Elyses (Dwarf). A very bright rosy magenta of an effective shade.

Coquelicot (Dwarf). A fine pure scarlet, with crimson-red eye.

Caran d'Ache (Medium). Geranium-red, with old rose shadings and white eye; very effective.

De Miribel (Medium). White, suffused with bright rosy scarlet, red eye.

Diadem (Dwarf). A fine dwarf pure white.

Danton (Medium). Scarlet, with pure red eye.

Etna (Medium). Crimson red, suffused with fiery red; cherry-red eye.

Edmond Rostand (Medium). Reddish violet, shading brighter towards the centre with an exceptionally large white centre.

Eugene Danzavillier (Tall). Lilac, shading white towards the edges; large white centre.

Edmond Boissier (Dwarf). Bright reddish violet, with large white halo.

Eclair (Tall). Brilliant rosy magenta, with large lighter halo; an excellent variety.

Frau Dora Ungeller (Tall). Crimson red; a strong free-flowering late variety.

Gruppenkönigin (Tall). Delicate pale rose mauve, with claret-red eye.

George A. Stronheim (Medium). Bright scarlet, with crimson-red eye; does not bleed.

General Giovaninelli (Dwarf). Bright tyrian rose, with light shadings at the base of each petal; a pure red eye; very effective.

General von Heutz (Medium). Scarlet, with rose shadings and crimson-red eye.

Hermine (Dwarf). The dwarfest variety in our collection, never exceeding ten inches in height; pure white flowers of good size, early; unequalled for bordering; a perfect little gem.

PRICE: Any of the above General Collection, \$5.00 per 100; \$40.00 per 1000.

For a complete list of seasonable stock see our current wholesale list. If you have not received a copy

it will be mailed to you on application.

HARDY PHLOX.

Helena Vacaresco (Dwarf). Very large-flowering dwarf; white.

H. O. Wijers (Tall). Glistening white, with bright crimson-carmine eye.

Henry Murger (Tall). Beautiful variety; white, crimson-carmine centre.

Henry Marcel (Medium). Pure red with very bright salmon shading.

Henry Royer (Medium). Tyrian rose, with lighter shadings; large flower, dwarf.

Jules Cambon (Medium). Brilliant reddish-purple, with exceptionally large, pure white centre.

Jeanne d'Arc (Tall). A good standard late white.

Louis Blanc (Tall). Reddish violet with purple shadings and darker eye.

La Vague (Medium). Pure mauve, with aniline-red eye.

Le Manji (Tall). Deep reddish violet, with darker eye.

La Foulra (Tall). Rich glowing French purple, shading crimson.

Louise Abbema (Dwarf). Very large dwarf, pure white of fine form.

Le Prophete (Dwarf). Bright violet-rose, large light halo and bright rose eye; fine.

Mme. Paul Dutrie (Tall). A delicate lilac-rose, reminding one of some of the beautiful soft pink Orchids. The flowers are very large and borne in panicles of immense size.

Mozart (Tall). Ground color white, suffused salmon; aniline-red eye.

Mrs. Jenkins (Tall). The best tall early white for massing.

Obergartner Wittig (Medium). Bright magenta, with crimson-carmine eye; large flower and truss; one of the best.

Professor Virchow (Medium). Bright carmine, overlaid with orange scarlet.

Panthoea (Tall). Bright carmine rose.

Pecheur d'Islande (Tall). Crimson-red suffused with cochineal-red and carmine red eye.

Prosper Henri (Dwarf). Pure white, with large decided eye of rosy magenta.

Pacha (Dwarf). Deep rose pink, suffused with solerino-red and carmine-purple eye.

R. P. Struthers (Tall). Rosy carmine, with claret-red eye; fine.

Sunshine (Dwarf). Large aniline-red, with crimson-red eye and light halo.

Seima (Tall). Large flower, pale rose mauve, with claret-red eye.

Seibold (Tall). Bright vermilion-red, overlaid with orange scarlet; crimson-red eye.

Sar-bande (Medium). Reddish-violet, with lighter shadings.

Von Goethe (Tall). Tyrian rose, suffused with carmine-lake and carmine-red eye.

Von Hohenberg (Tall). The ideal crimson Phlox, the richest of its color.

Vesuvius (Medium). One of our new seedlings; pure red, with bright purple eye; a dazzling color.

Von Lassburg (Medium). The purest white in cultivation; individual flowers larger than any other white.

Providence.

With the fall season now open, the people that were away for the summer months home, and the schools open, there is every indication of a prosperous business being done this fall and winter. At all the stores great cases of supplies, decorative and house plants are arriving and every place has the appearance of prosperity. There are a number of good orders booked for millinery and other openings, also a number of autumn weddings taking place now. The condition of the business is considerably better than a week ago and funeral work is a great deal better. The supply is about the same excepting asters, which were somewhat scarcer the first part of the week, owing to the heavy rains of the week previous. But at present there is a great plenty of a first class quality to supply all demands. There continues to be a great influx of outdoor flowers, such as dahlias, hydrangeas, clematis paniculata, cosmos, heliotrope, tuberose and cannas. Killarneys, My Maryland, Kaiserin, Richmonds, Brides and Bridesmaids roses continue to come in of a good quality and more than enough for the demand at present. This condition means low prices. Carnations continue to be very scarce, but the demand for them is not great, as there are so many other flowers to take their place. Orchids are very scarce at present. Gardenias are coming in only in small quantities but enough to supply the demand. Chrysanthemums are not a favorite while the weather is warm and those coming in are selling slowly. Violets of a poor quality are coming in and there is very little demand for them. Gladioli are much scarcer and sell for better prices. Some good sweet peas are coming in, owing to cool nights and so much moisture in the land from the recent heavy rains. There is a good supply of lily of the valley but it is not selling very well. Harrissii lilies are not over plentiful and are much sought for for large design work for funerals. Adiantum Asparagus and smilax are abundant and are moving slowly. The seed and supply stores report business good and at all of them all hands seem to be very busy. The indoor planting with all the growers is completed and everything is in ship-shape. A killing frost can be expected any night now.

NOTES.

O. H. Williams has finished housing his carnations. The plants are in excellent condition and he expects good results will ensue this coming season. He has also 10,000 chrysanthemums in fine condition, mostly grown to single stem flowers, which he will begin cutting soon. Great quantities of violets, bulbous stock, are grown here and there is a fine collection of palms, rubbers and ferns to be seen here also. Oak Grove Cemetery, Fall River, Mass., has built two new greenhouses 100x25 feet during the summer and there is still another of the same size under construction for the housing of large decorative plants.

John R. Perkins, Greene, R. I., has returned from a two weeks' trip to Milwaukee, where he attended the encampment of the Knights of Pythias. Edward Gaunier, an employee of John F. Wood, died last Saturday. Mr. Gaunier had been ill for a long time with Bright's disease.

The Melrose Gardens, Howard Pepper, proprietor, are making a fine showing of roses in bloom, as there are about 1,000 plants in flower at the present time.

Clinton Macomber, Taunton, Mass., has built a greenhouse 25x150 feet at his home on West Britannia street.

The season has started well and retailers are all busy. There is every prospect of an extremely good time ahead and those who have good orders in hand are hustling around for stock. Good roses and carnations from indoors are not over plentiful, but outdoor flowers are in over-supply and consequently cheap. My Maryland is in very fair shape and Richmond especially good for the season. American Beauty is fair, but light in color, owing to the great heat of the past few days. A few chrysanthemums are in but are not much of a feature as yet. Good Boston ferns are scarce, but fair Whitmani can be had at moderate figures.

NOTES.

Although the date has not been decided, a meeting is in prospect to resuscitate the Florists' Club for the winter season and it is hoped that more interest than formerly will be taken in it. At the outing and barbecue at Wright's greenhouses some 70 or 80 pledged themselves to attend and do all they could to forward the interests of the club.

Wright's Flower Shop's new greenhouses, nine miles southwest of the city, in the San Pedro line, was the scene of a most enjoyable outing and barbecue September 10. About 100 attended at the invitation of the firm and were met in wagons at the cars and taken direct to the greenhouses. These form a compact, modern range and include four houses, each 27x300 feet, planted in May to roses exclusively. With the exception of a narrow sill the walls of the houses are entirely of glass, thus admitting all possible light and, as the beds are on the soil level, this is a decided advantage. The stock is in first rate order and good cut of Richmond and other varieties is being taken. Frank Spiekman, the grower here, came in for considerable congratulation on the excellence of his stock. The overhead system of steam heating is used and an ample water supply is secured from a well on the premises. A large lath house has also been built and is used for Asparagus plumosus and smilax.

After a look through the houses the cook pronounced the barbecue ready and all did full justice to it, the brisk ocean breeze and the ride having given all an excellent appetite. Tom Wright presided at the feast and worked hard to make all feel at home and happy and as there was a good supply of liquid refreshments of a kind suited to the occasion, he succeeded admirably, being ably seconded in his efforts by Wm. Werne the genial manager. Great enthusiasm prevailed at the baseball game, which, it was decided, resulted in a score of 13 to 23, the winning side being still in doubt. Tom Wright, Dave Wolfskill and Chas. Brazee of Wilmington pulled off some marvelous stunts in batting and catching and put the crowd in greatest good humor. A few brief speeches and hearty cheers and thanks for the gorgeous time shown brought a most enjoyable day to a close and the crowd again piled in to the wagons for the home journey, all declaring they had never spent a happier time.

Wm. Haerle is cutting a fair number of Cattleya Trianae from newly imported plants. C. labiata is coming along well and a good cut is expected on this shortly. His roses are in fine condition and he is busy potting a large consignment of Formosum lilies. Mr. Haerle is well satisfied with his orchids and intends to add another large house shortly, growing commercial cattleyas only for the present.

Charlie Morton is looking well, doing well, and has no intention of returning to Chicago. He says California is good enough for him.

H. R. R.

WE TAKE THE LEAD

In what? What a foolish question! Don't you know? Didn't you hear of **GODFREY ASCHMANN**, the great **Araucaria** Importer, **Grower and Shipper**? These so well favored, everlasting green decorative plants, the **Araucaria Excelsa**, **Robusta Compacta** and **Excelsa Glauca**, are in favor more than ever this year.

This is our 25th anniversary since we began importing Araucarias. Watch! See us grow! Beginning 25 years ago with 100, our this year's (1910) importation is **10,000**, and more are coming this fall after I have made my selection of the choicest of the choice on my trip to Belgium; the growing district of the world in Araucarias and Azaleas. The trade is well informed that for many years past I go personally to Belgium to protect and elect for my customers the best of **Araucarias**, **Azaleas**, **Palms**, etc., that cash can buy there. Empty houses won't pay. Now is the time to fill your empty houses with something to grow into money while you are asleep.

Remember, it is the wideawake man that is not afraid to invest a dollar that makes the money. Please look at our special low prices for superior stock.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants 5-5½-6-7 in. pots. 12-15 18-20-25-30 in. high. 3-4 5-6 tiers. 2-3-4-5 years old. 35c. 50c. 60c. 75c. \$1.00, \$1.25 to \$1.50 each.

Robusta Compacta, **Excelsa Glauca**, 6 in. pots. \$1.00 to \$1.25 each.

Kentia Forsteriana, in fine shape 6-in. pots 30 35 40-45 in. high. 4-5-6 years old. 75c. \$1.00 \$1.25. \$1.50. \$2.00 to \$2.50 each; 4-in., 35c each 25 in. high.

Kentia Belmoreana, 25 30-35-40 in. high. 5-5½-6-7 in. pots. 5-6-7 years old. 50c. 75c. \$1.00, \$1.25. \$1.50 to \$2.00 each; 4-in., 25c each.

Kentia Belmoreana, 2½ to 3 in., 10c each.

Cyclamen Grandiflorum, best strain, 4 in., 15c.

Begonia Gloire de Lorraine, deep pink, and **Begonia Lonsdale**, pale pink. 4-in., 25c; 6-in., 50c.

Our Ferns this year are exceptionally very fine. **Boston**, **Scottii**, **Whitmani** and **Scholzeli**, 5½ and 6 in., 35c. 40 and 5c; 7-in., large bushy plants, 75c to \$1.00.

Pteris Wilsonii, in 6-in. pans. nice plants, 25c.

Neph. Todeoides, New London Fern, 2½-in., 5c; 3 in. 7c.

Special to Close Out: 4-in. **Whitmani** and **Scottii** Ferns, fine to grow on, 15c.

Ferns for Dishes, big assortment, 2½-in. pots, at \$3.00 per 100.

Rubber Plants, 6-in. pots. 35c and 40c.

Asparagus Plumosus, 2½-in. 3c; 3-in., 5c; 4-in., 10c.

Asparagus Sprengeri, 2½-in., 3c.

Sago Palms, 6-7 8 in. pots. from 5 to 20 leaves. 10c per leaf.

Cocos Weddelliana, 3-in. pots. 15c. 18c and 20c.

POINSETTIA PULCHERRIMA PLENISSIMA.

The Double Poinsettia. Good stock from 3-inch pots (raised from root cuttings) \$15.00 per 100; 25c each. If you grow poinsettias, you want this. Stock limited. Send your order right away. No orders filled after October 1.

Nephrolepis Smithii. The Washington Lace Fern. This is a sport from Whitmani raised at the U. S. Botanic Garden by Wm. R. Smith; the formation of the frond is like Amerpohlii, but dwarf and compact; it is the ideal fern for jardiniere work, possessing all the necessary qualifications. Beauty, grace, form and durability. It is a quick producer and a 1000 can be raised from a 100 between now and Christmas. Extra nice, bushy stock from 3-inch pots, 25c each; \$15.00 per 100.

William S. Clark, 1270 Bladensburg Road, WASHINGTON, D. C.

Magnifica, 2½-inch 15c each.

HENRY H. BARROWS & SON, Whitman, Mass.

Toronto.

STOCK IMPROVING.

Summer business has been the best for many years past and at present there is a good demand for bloom of all description, roses have again reached that stage when you are not ashamed to offer them and with good Golden Glow and Fittsgram chrysanthemums, fairly good carnations, valley, lilies, orchids and a host of outdoor flowers there is plenty of variety. In roses American Beauties are attaining length of stem and good flowers, Richmond are better colored and Killarney, Maids and Brides are all showing great improvement in quality, so much so that the prices have advanced to \$8.00 per 100. Carnations are not plentiful enough to fill orders, but the quality is good for the early season.

The Canadian Industrial Fair now on has helped considerably, especially to those who loan palms, and H. G. Dille-muth had the grain decoration for the Grand Trunk, Pacific and Canadian Northern Railways, many compliments were received, but modesty forbids of further eloquence. The large groups of palms and foliage plants were again the feature of admiration in the Horticultural building and, it is doubtful if better arrangement can be seen at any of the exhibitions, a comment often heard from many of the visiting florists, the quality is most excellent and all details are carried out to a nicety. Geo. Robinson, of Montreal, was judge and his position was no sinecure, but after careful consideration and scoring, Thos. McVittie, gardener for Sir Henry Pellatt, was first; E. A. Collins, of Allan Gardens, second, and Thos. Manton, third. In the made up work, Judge S. A. Anderson, of Buffalo, had an easy time of it, as the entries were the smallest for years, the first and second prize money mostly going to Thos. Manton and S. A. Frost. It appears that the showing days for the retailers are past, as most of them fail to see where the advantage lies.

NOTES.

W. W. Tattle, of Deer Park, has planted his two lately constructed houses with Chrysanthemums, their vigorous growth and well set buds give promise of fine blooms, his specialty, which are dahlias, are in no way neglected, and he is sending them in by the wagon load.

J. H. Dunlop has completed his planting for this year and the roses and carnations look fine and are decidedly ahead of former seasons. Mrs. Jardine proved so great a favorite that two benches are now devoted to this variety.

E. Crowhurst, of Humber Bay, is cutting thousands of his seedling white dahlia. This is truly a remarkable variety of the show type, and its large size makes it desirable for funeral work and decorations.

Also 10 secondhand 4-in hot water valves at \$2.50 each.

BRANT-HENTZ FLOWER CO., MADISON, N. J.

R. Jennings, of Brampton, is again shipping quantities of Mums and Carnations, while Mums may burn and carnations may rust with other growers. Jennings can always produce the goods.

Grobba and Wandrey had the decorations for the Simpson department store and have received considerable praise from the dailies. Mrs. Karl Grobba has returned from her trip abroad.

J. A. Simmers had a good bed of Countess of Lonsdale dahlia, whose freedom of bloom and pleasing color won first prize.

Miller and Sons have their place in fine shape and a bench of Golden Glow is quickly being cut down. H. G. D.

"The Florist's Trap"

MOREHEAD

The Remedy for Your Condensation Troubles.

A Guaranteed Investment With Guaranteed Results.

STEAM TRAPS

RETURN. NON-RETURN. VACUUM.

YOU, Mr. Florist, can save fuel—cut down labor—and grow better flowers by installing a Morehead Return Steam Trap.

In the first place, there is only a few degrees difference between the steam going into your heating system and the water of condensation coming from the returns.

It is very foolish, therefore, to cool this water down to a low temperature to pump back to the boilers when, by the use of the Morehead Steam Trap, the same water of condensation can be returned directly to the boilers at a very much less expense than by any other method and without losing any of the heat contained in the condensation.

In the first place, to make steam from water, fuel is required to bring this water to the boiling point under the required steam pressure.

For every ten degrees added to the water by any other means, there is a saving of 1% on fuel.

You can readily see that the cooling of the condensation from 250 degrees down to 212 or less, to accommodate your pump, means a considerable loss of heat, fuel and money.

MOREHEAD Return Steam Trap will put this water back into your boiler at a still higher temperature than 250 degrees, and on 90% less steam required by a pump for returning the same quantity of water.

You then have a combined return trap and boiler feed outfit that will prove out to be one of the best investments you ever made.

Write for "Trap Book" and Trial Offer Proposition.

MOREHEAD MFG. COMPANY,

Dept. "N," DETROIT, MICH.

HEATING PLANTS

Standard Steam and Hot Water Heating Plants

WONDERFUL VALUES.

We can positively save you from 30 to 75 per cent on Heating Equipment of all kinds. Our plants are of the most modern type, and only the highest grade material enters into their construction. We guarantee them to be exactly as represented, and highly satisfactory in every way. You run no risks. Send us a sketch or diagram of your building and let us make you an estimate.

Do Not Wait Until Cold Weather to Install Your Plant. Start Now

Send for our Special Heating Catalog, filled with valuable information; tells you every angle and phase of the "Heating Question," and how you can make one dollar do the work of two by installing the plant yourself. Ask for Booklet No. 47.

300,000 feet of Standard Pipe, all sizes, will be cut to any length.

ENGINES, BOILERS, VALVES AND FITTINGS. BUILDING MATERIALS AND SUPPLIES.

Send for our new 500-page Catalog No. 47. Free upon request.

CHICAGO HOUSE WRECKING CO.,

35th and Iron Sts., Chicago

Ready Reference Section.

10 CENTS PER LINE, NET.

ACHILLEA.

ACHILLEA "THE PEARL." Field-grown clumps, \$2.50 per 100; \$20 per 1,000. Wagner Park Conservatories, Sidney, O.

AMPELOPSIS.

AMPELOPSIS VEITCHII, 2½-in., fine stock, \$5 per 100. Wagner Park Conservatories, Sidney, O.

Ampelopsis Veitchii, 4-in., \$10 per 100. C. Eisele, 11th and Westmoreland Sts., Philadelphia.

ARAUCARIAS.

Araucaria excelsa glauca and A. robusta compacta. For prices see advertisement elsewhere in this issue. Vaughan's Seed Store, Chicago and New York.

Araucarias, excelsa, 4-in., 50c each; \$6 per doz. Glauca, 6-in., \$1.75 each. Compacta, 6-in., \$1.75 each. D. U. Augspurger & Sons Co., Box 394, Peoria, Ill.

Araucarias. For prices and varieties see advertisement elsewhere in this issue. G. Aschmann, 1012 W. Ontario St., Philadelphia.

Araucaria excelsa, 5-in., 50c each. C. Eisele, 11th and Westmoreland Sts., Philadelphia.

Araucarias, Anton Schultheis, College Point, L. I.

ASPARAGUS.

Asparagus plumosus, 2½-in., strong, \$3 per 100; \$27.50 per 1,000; 3-in., strong, \$5 per 100. Asparagus Sprengeri, 2½-in., strong, \$2.50 per 100; \$22.50 per 1,000; 3-in., strong, \$4 per 100. Skidelsky & Irwin Co., 1215 Betz Bldg., Philadelphia.

Asparagus plumosus, 2½-in., \$3 per 100; \$27.50 per 1,000; 3-in., \$6 per 100. Sprengeri, 2½-in., 2c; 3-in., 4c; fine 4-in. stock ready for benching, 8c each. Mosbæk Greenhouse Co., Onarga, Ill.

Asparagus Comorensis, 1-year clumps, \$5 per 100. A. elongatus, 1-year clumps, \$5. Geo. Reinberg, 35 Randolph St., Chicago.

Asparagus Sprengeri, 2-in., \$2.50 per 100; 3-in., \$1 per doz.; \$6 per 100. D. U. Augspurger & Sons Co., Box 394, Peoria, Ill.

Asparagus Sprengeri, 2-in., \$1.50 per 100; 2½-in., \$2.50 per 100; 3-in., extra strong, \$4 per 100. Wettlin Floral Co., Hornell, N. Y.

Asparagus plumosus, 2-in., \$3 per 100; \$25 per 1,000; 2½-in., \$4.50 per 100; \$40 per 1,000. Vaughan's Seed Store, Chicago and New York.

Asparagus plumosus, fine stock, 3-in., \$4 per 100; Sprengeri, fine stock 3-in., \$3.50 per 100. John A. Keller, Lexington, Ky.

Asparagus plumosus, 2½-in., 3c; 3-in., 5c; 4-in., 10c. Asp. Sprengeri, 2½-in., 3c. Godfrey Aschmann, 1012 W. Ontario St., Philadelphia.

Asparagus Sprengeri, 2-in., \$2 per 100; 2½-in., \$3; 3-in., \$5. C. Eisele, 11th and Westmoreland Sts., Philadelphia.

Asparagus Sprengeri, 2-in., 2c. Byer Bros., Chambersburg, Pa.

Asparagus Sprengeri, 2-in., extra-strong, 2c; \$17.50 per 1,000. J. L. Schiller, Toledo, O.

Asparagus Sprengeri, 2½-in., \$2 per 100. Jos. H. Cunningham, Delaware, O.

Asparagus Sprengeri, 2½-in., \$2 per 100. J. C. Schmidt, Bristol, Pa.

Araucarias, McHutchison & Co., 17 Murray St., New York.

AUCUBAS.

Aucuba Japonica, 35c to \$3 each; also plants, \$4 to \$6 per doz. Anton Schultheis, College Point, L. I.

AZALEAS.

Azaleas, Deutsche Perle, Simon Mardner, Niebe, Van der Cruyssen, De Schryverlana, 75c to \$2 each. Godfrey Aschmann, 1012 W. Ontario St., Philadelphia.

Azaleas, Jacs Smits, Naarden, Holland.

BAY TREES.

Bay trees. For prices and sizes see advertisement elsewhere in this issue. Vaughan's Seed Store, Chicago and New York.

Bay trees. McHutchison & Co., 17 Murray St., New York.

Bay trees. Bobbink & Atkins, Rutherford, N. J.

BEGONIAS.

Begonia Gloire de Lorraine, 2½-in., \$2 per doz.; \$15 per 100; 3-in., \$3.50 per doz.; \$25 per 100; 4-in., \$5 per doz., \$40 per 100. Vaughan's Seed Store, Chicago and New York.

Begonia Lorraine, 2½-in., twice transplanted, \$12 per 100; in 500 lots, \$50 the 500. Julius Roehrs Co., Rutherford, N. J.

Begonia Gloire de Lorraine, and Lonsdale, 4-in., 25c; 6-in., 50c. Godfrey Aschmann, 1012 W. Ontario St., Philadelphia.

Begonia Vernon, 4-in., \$1 per doz. C. Eisele, 11th and Westmoreland Sts., Philadelphia.

Begonia Glory of Cincinnati. J. A. Peter-son, Westwood, Cincinnati, O.

BOXWOOD.

Box trees. For sizes and prices see advertisement elsewhere in this issue. Vaughan's Seed Store, Chicago and New York.

Box trees, all sizes. Ask for special list. Julius Roehrs Co., Rutherford, N. J.

Boxwood, McHutchison & Co., 17 Murray St., New York.

Boxwood. Bobbink & Atkins, Rutherford, N. J.

BULBS.

Bulbs, Narcissus Paper White grandis, Star brand, 1,000 to case, \$11 per 1,000; fancy grade, 1,250 to case, \$9 per 1,000. Roman hyacinths, 1½-12 cm., \$19 per 1,000. Lilium Formosum, 7-9, 300 to case, \$70 per 1,000; 9-10, 200 to case, \$90 per 1,000; 10-11, 120 to case, \$100 per 1,000. Harrisii, 5-7, \$40 per 1,000; 6-7, \$60; 7-9, \$85. Chinese lilies, select, \$3.50 per 100; mammoth, \$6. Vaughan's Seed Store, Chicago and New York.

Bulbs, Paper White Grandis, \$8 per 1,000. Empress, Dbl. von Sion or Princeps, \$10. Empress, \$12. Stella, Fggaro, Cynosure, \$2. Grand Monarque, \$8. The Leedham Bulb Co., Santa Cruz, Calif.

Bulbs, Callas, 1 to 1¼-in., \$3 per 100; \$25 per 1,000. Berrydale Exp. Gardens, Holland, Mich.

Bulbs, Japanese lilies, Formosum, Gigantium, multiflorum, etc. McHutchison & Co., 17 Murray St., New York.

Bulbs. For prices see advertisement elsewhere in this issue. F. R. Pierson Co., Tarrytown-on-Hudson, N. Y.

Bulbs, Lilium longiflorum multi., 7-9, \$50 per 1,000. Giganteum, 7-9, \$65. Formosum, 7-9, \$65. Buds, 76 Barclay St., New York.

Chinese sacred lilies, \$3 per 100; \$25 per 1,000. Dingee & Conard Co., West Grove, Pa.

Bulbs, all kinds. J. M. Thorburn & Co., 33 Barclay St., New York.

Bulbs, all florists' varieties. H. E. Fiske Seed Co., Faneuil Hall Square, Boston.

Bulbs, of all kinds. Henry F. Mitchell Co., Philadelphia.

Bulbs, of all kinds. Jas. Vick's Sons, Rochester, N. Y.

CACTI.

Cacti. Over 100 varieties of cacti, from \$7 per 100 up. Write for 28-page catalogue and prices to the trade. Also Mexican Resurrection plants. The Francis E. Lester Company, Dept. 9, Mesilla Park, N. M.

CANNAS.

Cannas, fall or winter delivery. R. Vincent, Jr., & Sons Co., White Marsh, Md.

The L and B Page

Glazing Nails

They are zinc $\frac{5}{8}$ of an inch long, and are the kind we have been using for years in glazing our houses. Easy to drive, are strong and stay driven. Listed at 33c per pound. Also have steel staples if you want them. No. 2½ are listed at \$1.00 per 1,000. Send for discounts.

White Lead

This is the real Greenhouse White Lead. By real, we mean that like the Burnham Boiler, it is made especially for greenhouse use. It goes farther than other leads, is freest from mildew and cracks. Costs 7½c a pound in small lots and is worth every cent it costs.

Stay Put Putty

Not just putty—any old putty—but a stay put greenhouse putty made by greenhouse people for greenhouse work. Not an ounce of anything but white lead and

pure linseed oil in it, and the proportions are right and its mixed right—and there is much very much in the mixing. 100 lb. tub like this costs \$3.35 F. O. B. Irvington. Money back if not "up to specification."

That Iron Frame House of Ours

This illustration shows the way our wider houses are built, such as have recently been put up by Henry Hession, Flatbush, N. Y., P. M. Pierson, Briarcliff, N. Y., E. H. Kroninger, Allentown, Pa., and so on. When you get right down to the last analysis it is far and away ahead of any other house built any other way. It has strength, lightness and a proven durability all in its favor. It is the surely safe construction for wide houses.

Automatic Headers

The kind that takes air vent worries off your mind. It does the trick whether you are looking or not, and does it day after day and year after year. Construction is simple—nothing to get out of order or wear out quickly. Made for 2 inch wrought pipe or 3½-inch cast iron. Look them up in the Handy Hand Book.

Roller Bearers for Concrete Benches

No. 1092.

Don't scratch your head over how you are going to support the pipes on your concrete benches or beds. Send for our Supplement No. 1 to the 1910 Handy Hand Book, and it will solve the worries in a jiffy.

Concrete Bench Hangers

No. 1091 is for one line of 1½ in. pipe

No. 1090 for carrying a double line of 2 in. pipes.

The Allied Trades

Descriptive particulars—with drawings or photographs, if possible—of any new apparatus or device which may prove helpful to the trade are solicited for this department.

Refrigerators Designed by Experts.

The McCray Refrigerator Co., Kendallville, Ind., has just completed one of the largest and handsomest Florist's Refrigerators ever made, built for the West View Floral Co., of Atlanta, Ga. This refrigerator is of peculiar shape, owing to the limitations of the space which it will fill. There is not a square corner in it. The front is 24 feet wide and the rear 26 feet. The ends are three feet and 6½ feet respectively and it is 10 feet high. The outside is white enamel, with drawers in front for mosses, ferns, etc. The floor is of tile; the back is mirrored and it is fitted with wire shelves. The cost was \$1,800. It is not only a unique refrigerator, but one that will make a beautiful display.

Semi-Annual Nitrate of Soda Review.

The fertilizer trade, both in Europe and the United States, has continued to expand. Nitrate of soda has been specially favored, and has shown an increase in deliveries from the ports of importation, as compared with the first six months of 1909, of about 25 per cent. for the world, or 18 per cent. for Europe and Egypt, 62 per cent. for the United States, and 40 per cent. for other countries. The average value has ruled about 1 shilling per hundred-weight lower than last year. The production of atmospheric nitrogen has made little progress as a competitor to nitrate of soda.

The half year's deliveries from direct imports reach about 78,000 tons from United Kingdom ports, 1,183,000 tons from continental ports, 290,000 tons from United States ports, and 42,000 tons from direct imports into other consuming countries, or a total of about 1,593,000 tons. Stocks at date are estimated at about 18,000 tons in the United Kingdom, 121,000 tons in continental ports, and 15,000 tons in the United States and other

ports, and 268,000 tons afloat for Europe and 75,000 tons for the United States and other countries.

The deliveries last year, July to December, reached, in Europe and Egypt, 412,000 tons, and in the United States and other countries 256,000 tons, against 365,000 tons and 198,000 tons, respectively, for the six months ending December 31, 1908.

The total production for the twelve months ending June 30, 1910, which is generally regarded as a fair gauge of the maximum that existing oficinas can produce under free production at the present level of price, reached about 53,000,000 quintals, against 41,000,000 for the previous 12 months. Shipments during the same period reached about 50,500,000 quintals, against 40,250,000 quintals, and consumption, including losses and loss in weight, about 50,500,000 quintals, against 40,750,000 quintals for the year ending June 30, 1909. New oficinas in course of construction or projected are few, and an important increase in production from this source during the next 12 months is not looked for.

Private endeavors for the formation of a new combination have from time to time been started, but the general belief now is that no combination on anything approaching the lines of the last is at all probable, nor likely to prove beneficial to the interests of the majority of producers. In view, however, of the big expansion in the consumption of nitrate during the last 12 months, and the hope that under favorable conditions a sufficient increase may take place during the next 12 months to dispose of nearly all that is produced, the feeling is gaining ground that if some scheme, by which 5 or 10 per cent. of each in-

E. HIPPARD, Youngstown, Ohio.

States is understood to have been largely for fertilizing purposes, and the belief is held that the demand, now started from that source, is likely to continue increasing. It is therefore probable that the increased shipments will be more marked during the late autumn and early spring months, to suit the early spring consuming period.

Freights have fluctuated between 15s and 18s 6d per ton for sailing vessels, and 14s and 20s per ton for steam tonnage, closing at about 18s and 14s 6d per ton, respectively. Exchange was about 11½d at the beginning of the year, declined to 10 9-16d at end of January, rose to 11½d about middle of June, and closes at about 11½d. The labor outlook continues satisfactory, although many oficinas complain of an insufficiency of workmen, which may become more accentuated when the new Chilian railways projected are being built. The cost of production to some of the better-placed oficinas has been further reduced, but in many of the smaller oficinas costs are still unsatisfactorily high.—From Report of Thomas Aikman, Jr., London.

Davenport, Ia.

BUSINESS VERY BRISK.

The past two weeks found the business quite brisk, caused by an unusually large number of funerals. On account of the hot weather and dry season stock has been very scarce and suffered badly. Out door asters were a failure with most of the growers and are about done. Some fine Dahlias are now coming in, as are Yellow Mums, but there is no call whatsoever for the Mums, and very few if any will be grown again. Cool weather the past weeks has greatly improved roses and carnations, and some real nice ones are now finding their way to market.

NOTES.

The Florist Club held their regular monthly meeting at the home of John Staack, of Moline, Ill., and all members were present, with the exception of two, and a very interesting meeting

was held. John Temple entertained the members with a talk on the "Doings at the S. A. F. Conventions," and of his trip through the east in general. A. Anderson entertained the members with a fine talk on his trip to Europe. He visited London, Hamburg, Paris, Stockholm, Copenhagen and other cities and his description of the scenes he visited was much enjoyed, and he also remembered the boys with a box of Swedish cigars. The Club accepted Wm. Goos' invitation to meet at his home in Bettendorf, Ia., on the evening of Oct. 14. Peony Culture was the topic for the evening's discussion, and a part was taken by every member, which brought out many valuable points as to the keeping of the blossoms, and so forth, after which a fine luncheon was served and a lively time took place.

G. A. Heyne, superintendent of one of the parks at Dubuque, Ia., stopped in Davenport for a day on his way from the State Fair to Chicago. Mr. Heyne was well pleased with the showing the Florists made at the fair this year.

Mr. and Mrs. Chas. Hummel are taking a well earned vacation, and are spending a week at Benton Harbor, Michigan, at the home of Mrs. Hummel's brother.

THE TALK OF THE TOWN.

John Bertermann and wife have returned from Wawasee Lake by way of automobile. His son, Walter, drove the family touring car to the summer resort for the express purpose of bringing the old folks home. Walter Bertermann was accompanied by Mr. and Mrs. Herman Junge and daughter, Mrs. Paul Shidler.

Bertermann's Bros. Co. are trying to adopt the idea of showing that they are florists by suffixing the word Flowers to their already popular name, and styling their firm as Bertermann's Flowers.

The Wiegand boys have bought a new Overland car, for pleasure purposes, trading their old one of the same make. Homer Wiegand expects to get a business automobile in the near future.

A. W. Brandt, while making a hurry-up call in his automobile to the greenhouse after more flowers, was arrested en route for speeding by a motorcycle officer. Keep your horses, florists.

Billy Roepke has returned from a week's fishing on White river, and Chris Roepke, his father, followed the son's example by going to Manitou Lake for a fortnight.

An advertising war among local florists is imminent. A. W. Brandt started running a display card a few weeks ago and others are following.

The Reinken Floral Co. has acquired a new wagon, painted the same shade as that of the Pahud Floral Co.

Henry Rieman was also on a vacation. He went to Yellowstone Park to forget the florist business for a while.

"Benson, the Florist," has started a new stand in the Terminal Station so as to keep his horse and wagon busy.

John Rieman has just had his store-room freshly papered.

JOHN C. MEYER & CO., 1449 Middlesex St., Lowell, Mass.

The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass.
The pump is of brass throughout, simple and powerful.
The mixing device keeps the contents of the tank well stirred up from
start to finish.

When the machine is filled to within six inches of the top, a few strokes
of the pump will compress enough air in the tank to produce a continuous
mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our Extension Hose, Extension Rods,
and the Mastin Whitewash Nozzle for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. MASTIN & CO., 3124 West Lake St., CHICAGO, ILL.

In the afternoon a lecture was given
on "Gardens of Italy," by J. K. M. L.
Farquhar of Boston, to the members
and friends of the society at the opera
house. The views were exceptionally
fine; it was just like walking across
the finest gardens of Europe with a
guide explaining the different places.
The lecturer was so much at home
with his subject, going into the most
minute details of everything of interest
to horticulture, and giving us a com-
plete history of gardening from its
earliest stages up to the present date.
A most hearty vote of thanks was
extended to Mr. Farquhar for giving
us such a treat.

HALF HOUR CHAPTERS FOR FLOWER GROWERS

Lilium Longiflorum.

So much has been written about forcing lilies, both for Easter and during the earlier holidays and winter, that it seems almost unnecessary to write again, but frequent enquiries upon the culture of this plant indicate that many readers have overlooked these articles. The bulbs for Easter blooming will soon be received and should be handled as soon as possible. While the growers that handle these in large quantities pot them at once into their blooming pots, we certainly advise the smaller grower to adhere to the old time custom of first placing them in four-inch pots and then setting them in a frame or other suitable place for two or three different reasons. Economy of space and time are both large factors to be taken into consideration by the enterprising grower and the difference of space occupied by a number of 4-in. and 6-in. pots and the number of trips required in moving them from one location to another, is very great and should be considered before the bulbs are potted; of course, if they are first placed into 4-in. pots they will again have to be repotted into larger sizes but this can be done after the holiday season when the rush is over, and our experience has been that a better plant is secured by this method than where the bulb is first placed in the 5½-in. or 6-in. pot, and if any decorative plants are to be grown (that is, larger pots with three to five bulbs in them) the plants that are uniform can be selected at this time and a much better result obtained. If any *Lilium Harrisii* are to be forced for Thanksgiving, they should by this time have made a good start and those that are in the proper condition (and be sure that the pots are full of good, strong roots) should now be brought into a house with a night temperature of 55° and gradually increased to 60° and later to 65°. The bulbs that are not as forward should be retained in their cooler quar-

ters and brought in for the Christmas crop or later in the winter season. Keep a close watch for aphids all the time that a lily is growing and fumigate regularly.

Sweet Peas.

The early chrysanthemums will soon be cut and sweet peas are one of the best crops with which to follow them. Remove the stock plants of the chrysanthemums and then fork the soil over carefully, picking out all the debris and stir in a generous supply of well rotted manure. Peas of all kinds are not partial to fresh manure, which if too strong will burn the tender growths. To have flowers for Christmas or early in the year, the grower should have plants in pots grown from seed planted late in August or early in September, and these should be set into their blooming quarters at the earliest possible moment. Seed sown now will produce a crop of flowers in February and March. Plant the rows far enough apart so that they can be easily picked, that is, with room enough for the picker to walk between the rows without brushing the plants away from the strings. The best growers advise five feet between rows, and don't plant too thick if you expect a high grade of bloom. Be sure and have plenty of head room, eight feet from bed to glass is the minimum distance, and winter sweet peas often make a growth exceeding that length. Water thoroughly before the plants or seed are put into the ground and then sparingly until they show that they require more, when they get to growing luxuriantly they will require a copious supply. Some support for them to climb upon is necessary as soon as they begin to grow; strings are by far the best, and these may be strung from wires stretched at the base and over the rows, and some growers place stakes at the ends and through the rows and strings are fastened to them on each side of the growing plants,

other strings being added as, the growth advances.

Dutch Bulbs.

The large growers of the imported bulbs, knowing by past experience the exact date upon which to expect their consignments to arrive, have made arrangements to handle them immediately upon their receipt, but the florist who grows but a few thousands too often is so rushed with his other fall work that when he receives his shipment, has made no preparation to handle them and the cases are stored away, the bulbs to be potted when he gets time. If you want good blooms during the next winter and spring, this is a great mistake, for while these Dutch bulbs will stand lots of abuse and yet produce fair results, they are losing vitality all the time that they are left in such a dry state and especially if they are stored in a warm room, so get them into their pots or flats as soon as possible. Make up your mind just how many of each kind you are going to grow in both pots and flats and plan so that after you begin to bring them into bloom you will have a constant succession, so that your customers can be assured of getting the varieties that they desire. In planting them out they can be placed as closely together as possible, if so desired, and for pot culture make a much handsomer and more salable article if the pot is well filled, but a factor that must be taken into consideration is the price that can be obtained for the pot when in bloom. The culture of these bulbs has been so thoroughly covered that little can be added, but as soon as placed in the soil they should be thoroughly watered and placed in a cool, dark place, that root action may be induced as rapidly as possible, for the great secret of forcing bulbs is the production of pots full of good live roots and then success is assured.

Poinsettias in the South.

The growers are waking up to the fact that, though these plants will bloom in most anyone's back yard, yet when well grown in pots or pans they are the leading sellers at the Christmas holidays. They are now receiving something like the attention they deserve.

Hardwood cuttings and soft wood cuttings are taken with a heel root readily enough in the spring time, but the growth is so rapid that these are only useful to increase the stock. In July and August the cuttings are harder to root, and only in exceptionally favorable locations, such as in outside lath houses where the moisture is well maintained, is any degree of success attained. The better and surer way is to layer them exactly the way rubbers are rooted. The stock plants may either be planted out in the open ground or the pot plunged in a cold frame. Planted out the plants make a very rapid growth, but those in pots make a stockier growth and the layers root quicker and are altogether more satisfactory. The layers should have no more than three or four eyes at the most, and in the case of a long shoot two or more layers can be made from it. A slanting incision about one inch long, and that cuts about half way

through the stem, is made with a sharp knife. A little sphagnum in the incision will keep it from closing and then a small bunch of wet sphagnum is bound round the whole with string or raffia. As soon as made the layer should be securely tied to a stake to prevent its being broken off. Care is needed in the whole operation, as the shoots are very brittle and snap off easily. If the moss is kept constantly wet the layers will root in from seven-teen to twenty days. Three-inch pots are big enough for the first potting. A frame, under a lath house, with a cheese cloth shading, is an ideal place

want of water or feeding. They can be watered and sprayed two or three times each day during hot weather to advantage. The least approach to a yellow tinge in the foliage is a sign that the plant requires feeding. A little Clay's or other vegetable fertilizer and some well pulverized cow manure will quickly restore the color. A dose of liquid manure each week after housing until the bracts begin to show color will be a great benefit. A night temperature of 56° to 60° is plenty until the bracts are well developed, when the plants can be removed to a cooler place if required. By proper

GATES AJAR BY HUGH SEALES, BIRMINGHAM, ALA.

for the young plants until established. Spraying a few times each day will prevent any tendency to wilting or dropping of the leaves. Gradually inure them to the full sun, when they can be repotted or made up in pans.

In making up pans select plants as nearly alike as possible, in habit of growth and size, so that when finished each pan will have its plants even. An outside frame in the full sun is the best place for them until the advent of cool weather, when they can be placed in a clear house with plenty of light and as near the glass as possible. This plant must never suffer for

attention to watering and feeding a plant two to two and a half feet high, with perfect foliage, can be grown in a five-inch pot. About the middle of August is the right time to make layers intended for pans. Layers made at this time will grow nearly two feet high. If shorter plants are wanted, layers can be made a couple of weeks later.

BUTTE, MONT.—The offices of the state board of horticulture have been moved to Missoula, at which place the Western Montana apple show will be held, October 10-15.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Gates Ajar.

The accompanying illustration is of a gates ajar composed of roses, carnations, callas and marguerites, a dove rests upon the base bearing streamers of wide chiffon which are knotted into bows at the sides. This beautiful design was arranged by Hugh Seales, of Birmingham, Ala.

A Standing Wreath.

The design in the accompanying illustration was made on a frame thirty inches in diameter and stood five feet over all. The body of the wreath was of dark purple asters, made solid, with a spray effect of valley and a few cattleyas at the ribbon to give it character. The base was of white asters, with a sprinkling of purple on one side. Easter lilies and white gladiolus were also prominent flowers. A purple ribbon bow, about the folds of which were placed a few choice purple asters, gave a finish and also provided a place to which the card was attached. This is one of the most popular designs and as it can be made in so many different combinations, it always seems fresh and is as a rule very satisfactory. It is much easier made than a column and is more effective for the number of flowers used, as the whole display in the wreath is seen at a glance, while but little more than half of the column is visible at one time, the other portion being on the other side and hidden from the direct sight of the observer. To facilitate shipping of the standing wreath the center rod is cut about eighteen inches from vase and six inches from the wreath. A piece of iron pipe into which the rod fits firmly is used when the design is set up at destination, the pipe being first pushed down on the foot and the stem or rod of the wreath being pushed into the top of pipe, working a quick and firm connection.

K.

The Figuring of Cost.

Has it ever occurred to the retailer that many of us overlook a great many of the little details of business costs? Too much cannot be said about figuring accurately the cost of doing business in order to conduct a store on a profitable basis.

Various lists of the things to be taken into consideration in figuring costs have been given. This is a good one: Rent (regardless of ownership of building), insurance, taxes, salaries, cost of cases, trucking, postage, advertising, fixture account, cost of heating and lighting, wrapping paper and twine, discounts, deterioration (in stock or store building, etc.), delivering goods, bad accounts, freight and express charges, exchange, telephone, repairs, charity, printing, stationery, depreciated values, and sundry supplies of all kinds.

It might be interesting for all retailers, before whose attention this article comes, to investigate and see if all of these items are being taken into consideration in fixing the selling price of everything they sell. It is practically a certainty that in the majority of cases they are not, and yet there seems

to be absolutely no question but that they should be.

As Abraham Lincoln said: "We should build for the future, in addition to making provisions for the present." What we want to do is to build up the retail trade on a firmer basis, not only for the present time, but for the future needs as well, by way of fixing a schedule of prices by which each and

Notes of the Chicago Retail Florists.

THE E. WEINHOBBER FLORAL CO.

On the north side of the city, about one mile from the business center, and only one block from the celebrated Lake drive, upon which reside so many of Chicago's wealthy families is located the store and greenhouses of the Ernest Weinhoeber Floral Co., 22 E. Elm

STANDING WREATH. HEIGHT, FIVE FEET.

every one should be guided. We want good staunch followers of the trade to help us build. Perhaps, you, my reader—you could help, if you would discuss the subject with your fellow workers and write us the results. The big fact stands out for the success of the National Florist Commission, viz: Co-operation.

A. E. KLUNDER.

street. While a little early at the time of our visit to find this concern at its busiest, for a large proportion of their customers have not yet returned to their city homes, still all hands were diligently engaged in preparing for the coming fall trade. Entering the door, we step into a beautiful office, equipped with refrigerators and counters, in and

upon which are displayed the best that the market affords of seasonable flowers. On the right are the greenhouses, filled with fine specimens of palms and decorative plants, a bunch of Phoenix Roebeleni in house sizes being in splendid condition. Thousands of small ferns of the useful and hardy varieties, all ready for the fern dishes, are in fine shape, and the orchid house gives promise of some beautiful blooms of these exotics when they will be needed later in the season. The patronage of this establishment is of the highest quality, and the demand for the best material, and when the question was asked the proprietor as to what the probable demand and outcome of the coming season would be, he jovially responded, "We would like to know ourselves." But American Beauties, lily-of-the-valley, orchids, a high grade of roses, carnations and chrysanthemums will be the product that this firm will handle this season and furnish to their customers in the most advanced and approved fashion.

W. J. SMYTH.

Situated upon the corner of Michigan avenue and Thirty-first street, in one of the exclusive parts of the city, is the store of W. J. Smyth. Up to date in every particular, with the stock to supply the most fastidious, greets the eye when the door is opened and entrance made into the store. The proprietor gladly meets the visitor and enthusiastically escorts him through the store. At the rear, with a door on Michigan avenue, is a conservatory filled with fine palms and other plants for home decoration. The summer business has been very good, and the autumn trade has opened auspiciously, weddings and society functions keeping all hands busy. The call for the highest quality is the demand of the custom of this establishment, and orchids, American Beauties, lily of the valley, the high grade roses and other exotics are the stock which is constantly being called for. In funeral work, while many of the set forms are made, yet the call is for light, artistic arrangements, and sprays some of which are very expensive, are in increasing demand. Ribbons are, of course, used in quantity, but no more than the demands of the occasion require. A beautiful store, in an elegant location, with an energetic proprietor, is the verdict which should be rendered of this busy corner.

MUIR'S.

A little farther out of the city than the last named place, on Michigan avenue, one of the aristocratic thoroughfares between Thirty-fifth and Thirty-sixth streets, is the well-equipped store and greenhouses of John and Samuel Muir, but their reputation is so well known and their trade so well established that the word "Muir," as it reads on the sign, is all that is necessary, and means that everything is of the best that can be procured. Extensive alterations are in progress, including the laying of a new concrete floor in the office and a thorough renovating in preparation of the coming season. A trip through the greenhouses found the stock in fine condition, and a nice lot of decorative plants are now ready for the purchaser. Nephrolepis in the different forms fill one house, and some elegant specimens

of the old Boston fern were noted. Dracenas of the different varieties and palms, all in fine condition. The growing of Christmas plants is very extensive and poinsettias are in elegant condition, and a large stock of begonia, Gloire de Lorraine, Christmas peppers and primulas are being rapidly gotten ready for the holiday trade.

STRAIL & HAHN.

One of the down-town stores that enjoys the patronage of the elite of the city, and is especially fortunate in

season would be, the proprietor kindly stated that in all probability no radical changes would be made, the calls of fashion changing slowly. Orchids, American Beauties and other roses, carnations, and later violets and sweet-peas would be in demand, but in the case of the smaller flowers large bunches, more artistically arranged, are preferred; in fact, orders are now frequently received for corsages of a size that a few years ago would have abashed the salesman; but the custom

FIRST PRIZE DAHLIA BASKET.

At the Exhibition of the National Dahlia Society of England.
After the Gardeners' Magazine.

catering to the floral wants of the prominent clubs, is Strail & Hahn, on Jackson boulevard. In the Wellington Hotel, and directly opposite one of the prominent theaters, on one of the principal streets, this small but thoroughly equipped and up-to-date store, presided over by the genial proprietors, has acquired a very prosperous and select trade. An exceptionally good summer trade and a very promising lookout for the winter season is anticipated. Upon inquiry as to what the styles and demand for the coming

has grown, and these demands are easily handled today. In funeral work, while the older forms are still in vogue, yet the shapes are not too closely adhered to and compactness is shunned and light, artistic work is arranged with plenty of light green and ribbons of the proper texture and quantity to finish the work.

H. C. ROWE.

In one of the many stores in the Palmer House, Chicago's famed hostelry, is located the prettily arranged store of H. C. Rowe, who not only en-

joys the patronage of the guests of this hotel, but enjoys the confidence and custom of the wealthy and aristocratic society people of the city. A beautiful window at 48 E. Monroe street, always artistically arranged, induces the customer to enter and inspect the floral beauties which are offered. Vases of American Beauties and chrysanthemums, with green and autumn foliage so placed as to form a beautiful combination, made a very attractive display as we approached the entrance. The summer business has been normal, and the autumn trade has but just commenced. American Beauties are having the call now, but the usual demand for high grade stock of all kinds is being looked forward to as soon as it appears upon the market and will be furnished as soon as the trade demands.

The Growing of Lilies for Easter.

A paper read by Harry J. Faust at the April meeting of the Florists' Club of Philadelphia.

I have no desire to pose before you as "Sir Oracle," the subject "The Growing of Lilies" being given to me by your essay committee, and almost insisted upon that I comply, by the chairman of your committee, Mr. Thilow. I could not but consent without appearing ungracious. So whatever apology there is for my being before you this evening must come from your committee.

I do not suppose there is anything grown for Easter more uncertain and requiring a greater amount of skill and attention than the lily, especially the growing of good lilies for Easter. To make this paper interesting it has been suggested that I take up the entire subject of forcing lilies from years ago to years to come, to illustrate my subject by samples of well grown and diseased plants, in fact, to enter upon a long and learned discourse and kick up such a lot of dust and bemuddle my subject to such an extent that you would have to catch on to my coat tail in order to follow me. But in this I saw no use. The diseased plants you all have seen enough of; you have had a heart's scald of them—the good ones are all sold.

VARIETIES.

As far as my experience goes there are only two varieties of lilies worth attempting for Easter, Giganteum and Formosum. To grow in quantity and to produce good, even results there is at present only one lily—Giganteum. This is a variety almost perfect; it comes true to its name, while for health it is all that could be desired. This year out of 13,000 bulbs I did not have to throw out 10 plants from disease; but as far as health goes I can give the Formosum an equally good character. Let us suppose there is only one variety—Giganteum. The first essential is to get good bulbs. I do not think it makes any difference from whom you procure them, any house of repute can supply you. My bulbs this year came in three separate lots. I saw no difference, they were all in perfect condition. Just as soon as you receive your bulbs get them potted. I have a way of potting that may interest you, as I never knew anyone else to pot in the same way. It is a very quick and cheap way of doing what would often in the ordinary way of potting be a slow and

worrisome job, especially when you grow in quantity. A few days before we receive our bulbs we have a large space cleared on the ground near the soil pile, we then cover this space with 2,000 to 2,500 empty 6-inch pots, say 20 to 25 pots wide to 100 long, then have a man fill the pots about two-thirds full of soil; we are then ready

then we start to plant, two men planting and two following up filling the pots with soil and so on until the end.

In filling the pots we throw plenty of soil on top, leveling it with the back of a rake. In this way we have often been able to use up 10,000 pots in three days, and last fall we did 10,400 pots

LILIIUM LONGIFLORUM MULTIFLORUM.

for the bulbs. When the bulbs arrive another 2,000 to 2,500 pots are placed on the floor, the bulb cases are opened and sorted; selecting all the best bulbs in the case, the cullings being kept separate. The good bulbs are for growing on in 6-inch pots, the culling we place two bulbs in a pot, then we take a 16-foot board to place upon top of the pots to stand or rather kneel upon,

in three days. I think you will acknowledge this to be a much more expeditious way of getting lilies potted than the usual way of potting at a bench. The lilies now being potted, all the work, especially selecting the bulbs and planting, being done at a minimum cost by two laboring men (not interfering at all with our regular work) the bulbs are now ready to wheel in-

side to be placed under a bench, or, just as well, to leave out, covering up carefully and bringing in later, or at your convenience. We usually leave ours out until we are rid of the chrysanthemums, although it does not hurt to bring them in at once if more convenient. We always like to have our lilies inside on the bench by December 15, and that reminds me of the great difference in forcing a lily for Easter.

Years ago when we first commenced growing lilies, we grew *Harrisii* and got our bulbs in August or early September. We would pot at once and have them two or three inches high when brought inside, but we always had trouble getting them in bloom for Easter. Of later years, since the Japanese bulbs have been grown and, although we do not get them until November, and often late November, we have no trouble, although as in this year, needlessly anxious.

CULTURE.

Now we come to the growing. We always start the lilies at a cool temperature and hold them in this temperature according to the date of Easter. The longer they stay at a cool temperature in the early stage the better. After we see they are well rooted and starting to grow the temperature can be increased up to any reasonable extent until they show evidence of making buds; then it is better to go slow. From the time that they first start to make bud to the time the bud is well developed is what might be called the critical period; stunted plants or blasted buds may very easily be your lot. All that can be said of this period is "Beware."

In growing a lily for Easter the credit is due to two people, the fireman and the man at the hose. There is no plant that loves syringing more than a lily, yet no plant resents more quickly an over-supply of water at the roots. I often on a bright day syringe two or three times, and have frequently at night gone into the houses and given them a good syringing, wetting down the paths, and also the steam pipes. I think syringing is very beneficial in growing lilies, especially if you have an apparatus for heating your water. We have an arrangement for tempering the water that enables us to have a constant flow of water at a temperature of 70° and upwards. This water heater is a very simple apparatus; anyone who uses steam heat could at the expense of a few dollars so equip themselves.

After a lily is in condition to stand it, I believe the quicker it is grown the better, only, of course, remembering to gauge the growth and development according to the date of Easter. This year was one calculated to try men's souls. We did not get our bulbs until November 18, and on account of the late chrysanthemums, could not get them on the benches until December 24. Out of 10,000 pots I do not believe 25 showed growth above the soil. Then came the month of anxiety and worry; how slowly they seemed to grow, how quickly the weeks flow by, a constant fluctuation between hope and fear, and cloudy weather seemed our portion and still the few short weeks we had to Easter were being rapidly counted off; eight more weeks

we anxiously said to ourselves, then seven, six and five.

TIMING.

It is usually calculated that it takes six weeks for a lily flower to develop from the time the bud first shows. It can be done in less. I would prefer to have six weeks to do it in than attempt to do it in four, yet it can be done in four. Just to satisfy myself how long it would take, or rather how quickly a lily could be brought into bloom, I this year marked a few plants. On February 22 I selected a few plants, marking them "No buds in sight." On February 25 buds could be seen on several and by February 27 all showed bud. We were then running a night temperature of 70°, or a little over, letting the day temperature with sunshine run higher. They were all in bloom in time for Easter, taking about a month from the time of first showing of bud to the blooming period.

Lilium Longiflorum Multiflorum.
Japanese Type.

One of the most important points in handling the lily is selling it. I think I am speaking advisedly when I say it does not pay to grow lilies to sell at 10 cents. Now, don't misunderstand me on this point: I do not mean that a lily cannot be grown and sold at 10 cents per bud and not yield sufficient margin for the grower to pay his debts, but that is all it will yield; it will give the grower no real profit, that is, no such profit as will in any way reward him for his risk, trouble and anxiety. Right at this point I cannot refrain from wondering if we are conducting our business in as wise a manner as we should. Are we not just stumbling along in the dark?

Every year as long as I can remember I have heard the report that lilies were going to be scarce, but without any real foundation. No one knows how many lilies it takes to fill the requirements of the city of Philadelphia. Don't you think we should know? If we only knew, or had a way of finding out, we would commence to be on a business basis; we would then be in a position to regulate prices. I have thought that a florists' board of trade might be a benefit, with committees to

look after the different branches of the trade. The committee on lilies would get reports from all the seed houses and know just how many bulbs were in the growers' hands, or get the report direct from the grower, with monthly reports as to progress, condition and number expected to be put on the market, in much the same way as the government gets its agricultural reports.

I believe if we all were to cut down the lilies grown 25 per cent and try to grow better lilies and get a better price, it would be a move in the right direction. There is one thing sure—none of us make enough money. We have the most anxious, worrisome business in the world, everything we buy costs more, and still more, but every time we get our returns we find them marked less. The only ones I see making any money on flowers are the street fakirs and the commission men, yet I think the commission men deserve all they get, for without these hustling and enterprising business men, who are ever advertising to find an outlet for our goods, I fear often our business would be in a bad way.

Two-thirds of the time the flower market is glutted, prices demoralized and the growers building more houses to throw more flowers upon the market to compete with themselves. Would it not be advisable to call a halt; let every grower who has more than 10,000 feet of glass pledge himself not to build any more for five years until the market catches up with the supply. Almost every week during the season we read in the trade papers of carnations, roses, violets, or lilies being a glut on the market. Let us work for prosperity and better prices not for the street fakirs. Lilies to afford the grower a proper profit should bring 15 cents per flower. We have been too much in the habit of rubbing shoulder with poverty. Let us put ourselves up on an equality with other professions and get more of the sweets of life and not so much of the bitter.

Chrysanthemum Worms.

ED. AMERICAN FLORIST:

Please give name of worms on chrysanthemum leaves herewith and remedy. A. M.

From the leaves submitted would conclude they were defaced by the leaf tier. The worm is about ½ inch when it reaches maturity at which stage it rolls or ties itself up in a leaf where it is transformed into a larvae and then into a small moth.

Persistent hand picking and destroying the worms and killing every moth is the only effective remedy we know of Paris green and arsenate of lead have been recommended, but the great difficulty is to apply them to the leaves thus affected. ELMER D. SMITH.

Lilies in Benches for Easter.

ED. AMERICAN FLORIST.—

When should Easter lilies be planted to bloom for Easter? C. S.

Easter lilies should be planted in pots or flats and placed in a dark cool place preferably buried in the ground until well rooted and then brought in to the house at least thirteen weeks before the expected time of blooming. W.

ORCHID NOTES.

Cypripedium Caudatum.

No one can fail to be struck with the unusual appearance of the flowers of *Cypripedium caudatum*. They are remarkable in respect of the length of the linear, ribbon-like pendulous petals that often extend two feet or upwards. When the flowers open they are usually about three inches in length, but they continue to grow rapidly for about 10 days when growth ceases. Often they grow as much as two inches a day and it is most interesting to set a mark one day and see how much they grow by the next. The species belongs to the *selenipedium* section and has larger flowers than any other in its class. The flowers vary somewhat in color, the upper sepal, which is about six inches long, being usually greenish yellow; the petals, above mentioned are reddish brown over the greater part of their length, the tips being yellowish. The lip is a beautiful bronzy tint becoming white at the opening and spotted with purple. In one peculiar variety, *Lindenii*, the lip is pendulous and ribbon-like, similar to the petals.

C. caudatum is a native of Peru, and, although previously known to botanists was one of the many grand orchids introduced in the earlier years of the last century by the very successful collector, William Lobb, who sent it home to his employers, James Veitch & Sons, of England, about 1847. It has been frequently sent home since by other collectors and is usually found growing in wet marshy places, a fact that accounts for its needing so much moisture at the roots under cultivation. Newly imported plants, in fact, are frequently covered with a whitish muddy deposit showing the class of soil it grows in naturally. Although not a cool orchid *C. caudatum* does not need any great heat to do it well. It thrives in a shaded part of a house devoted to cattleyas if kept moist at the root, especially when growing freely and its beautiful and interesting flowers remain a long time in perfect condition.

Odontoglossum Citrosum.

While a number of the *odontoglossums* are difficult to grow in this country, owing to the great heat of the summer, *O. citrosum* can be handled with ease by anyone with a little experience in orchid growing. It is a native of Mexico and has been known to orchid growers for nearly 100 years. There are other Mexican *odontoglossums* that will not thrive in heat, but these come from the higher mountain regions, while *O. citrosum* inhabits the plains between the ranges of the Sierra Madre. Veitch's "Manual of Orchidaceous Plants" quotes M. Roezl, who sent home great quantities of this orchid to Europe as follows: "Great was my surprise to see trees clothed with a profusion of orchids which proved to be *Odontoglossum citrosum*, whose pendulous spikes, a yard long, were adorned with innumerable white and lilac flowers

CYPRIPEDIUM CAUDATUM.

which perfumed the air with their delightful fragrance. The stoutest branches of the oaks were literally loaded and it was a pleasure to see the profusion of flowers produced by these plants, a single spike bearing upwards of 30 flowers. During several days' march we noticed that all the oak trees were clothed in this way by this same orchid, which flowers the more freely it is exposed to the direct rays of the sun."

In this quotation there is a useful hint as to culture. Those who keep this plant always moist and in a shaded house will never flower it to any extent. In order to flower profusely the growth must be well ripened by exposure to sun and air and the plants must have a distinct season of rest. The big, apple green pseudobulbs and the leathery looking foliage are of the kind that likes exposure to sunlight and get soft if grown in dense shade. Our own practice, for a number of years, has been to allow the plants to become absolutely dry during winter and until the points of the spikes can be seen in the center of the new

growth. Some growers simply reduce the supply of water and do not allow the bulbs to shrivel, but we have never seen any ill result follow the drying process, as the plants have increased in size and flowered freely every year while the pseudobulbs fill out again very rapidly when water is again applied in spring. Just as soon as the tips of the spikes are seen we take the plants down and place them in a water tank, leaving them there for 24 hours so that the whole of the compost, the roots and the leaves are thoroughly soaked with water. The flower spikes lengthen very rapidly and in a few days the bulbs are as plump as ever.

From this time on until the new growth is finished in September, or around there, the water supply must be very liberal for *O. citrosum* is a decidedly thirsty subject. It does best suspended in a good light from the roof of a house devoted to cattleyas or Mexican *lælias* and in such a position the pendant flower spikes look best. For a rooting medium good fibry peat and sphagnum moss is best and when repotting or rebasketing,

which is not necessary oftener than once in three or four years, all the old material possible should be picked out from among the bulbs and roots and plenty of rough charcoal, crocks or some such material added as the work of filling proceeds. While making growth the plants must be freely sprayed every bright day as well as kept moist at the root, and just before the flowers begin to open, the plants should be thoroughly soaked, as it is difficult to water after they are open without wetting and spotting the flowers. Insects are not usually very troublesome and are easily kept under by occasional sponging of the bulbs and leaves in conjunction with the spraying noted above.

THE ROSE.

Seasonable Notes.

It is rather a difficult matter to suggest anything in the way of cultural methods of the rose stock at this meeting that will differ to any great extent from the statements in our recent article. Since then we have had some of the hottest of weather in the eastern states which is at this writing being followed by a very cold wave for this time of the year, making it necessary to carry a little heat through the night. These sudden changes are very delibitating to the stock, and great care must be exercised all around. Ventilating now becomes a matter of great importance and during the latter part of September usually high winds prevail, accompanied by dark days and often cold rains. The only thing to do under such conditions is to start the fires if the thermometer should happen to go as low as 55°. By carrying a little air and painting the pipes with sulphur a dose of mildew can be avoided. However, if too warm for firing keep the sulphur on grapedust blown over the foliage and water very carefully. If the stock is growing vigorously (especially young stock) and, there is plenty of surface roots, these plants will not stand for light watering. Care should be taken at all times, ascertaining the condition of the soil from the surface to the bottom, otherwise the sometimes moist condition of the soil on the surface will be deceptive. Very little cultivating is done as a rule after the 15th of September; if the planting has been done in season, owing to the surface roots, although as we often state in these columns, it should be kept up until there is danger of injuring the surface roots. Be as careful as possible in selecting a bright day for syringing from now on especially the Beauties and do the syringing early in the day, using plenty of pressure and spraying the foliage underneath as well as overhead. If there are any of the plants affected with "Black Spot" remove all affected foliage and burn it, but do not run them too dry in order to check the black spot, which is likely to be caused by a stuffy atmosphere in the houses due to careless ventilating and sloppy surroundings. The use of air-slacked lime dusted around freely in all the rose houses under the tables and in the walks, the latter being kept as dry

as possible tends to help matters considerably.

It might not be amiss to state that where there is a range of rose houses comprised of from 15 to 20,000 feet or more of glass, a very sane idea would be to have the night fireman take up his duties at once. Many of us know that to look at the fires at midnight expecting to find things O. K. at daylight is a rather risky thing to do even when the firing must be very light for often the temperature drops suddenly between 3 and 6 a. m. and

the size of the plants too much, a regular cut can be established which is to be preferred on a small range. It is of course hard to go by any set rule in describing this work which must be left almost entirely to the intelligence of the grower. Most any one though should be intelligent enough we think to keep the smaller plants disbudded until they catch up to their more thrifty neighbors, and to only let such plants bloom that will not be seriously set back from over producing from the start. Remember the mum season is

ODONTOGLOSSUM CITROSUM.

the fires just as suddenly, causing a great deal of condensation in the house after covering the foliage with moisture as cold as ice water or nearly so. With the night fireman at his post such conditions can be easily avoided and it will be found that it more than pays to take these precautions.

A few suggestions in reference to disbudding. Do not cripple the young plants by turning them loose with a full crop at this time. If the grower can not give this work his personal attention the next best plan will be to select a trusted employe and instruct him carefully how to proceed, by removing the short growth to carrying a bud back to a firm eye and letting the strong stemmed flowers bloom. Where the removal of the latter does not reduce

almost at hand and from now until the middle of November one had best try to build up good strong stock in the rose houses, reserving the heavier cutting from the last of November on.

E.

Roses in the South.

Although the growth is exceedingly active at this period the plants require close watching in regard to both watering and ventilating, in order to prevent them getting soft and drawn. Water they must still have in abundance and in some sections probably a good spraying at mid-day, but by all means keep plenty of ventilation on the houses. The doors may have to be kept open during the day and the side ventilation should not be en-

tirely closed at nights. Don't get alarmed at a few cool nights. Leave plenty of air on both top and bottom to fully care for the condensation and the roses will be all the better for it. The idea is to toughen the foliage, the better to resist the mildew, which only waits for a let-up in the precautions to make its appearance. When the time for firing arrives, use the minimum amount of heat and the maximum amount of ventilation at the top. This insures a thorough movement of the air and provides a typical condition for good, healthy growth. Some growers are mightily afraid of a draft, but plants that won't stand a draft for some time to come are in poor shape for a good winter's work.

The plants will require a little feed from now on. A light mulch of cow manure is all that is required at present, and the manure can be on the fresh side. Well rotted cow manure is all right to mix with the soil, but is of very little account for mulching. Apply the mulch of pretty fresh manure lightly and often. As soon as it is well washed into the beds renew it. The plants must be kept properly tied up so that the syringing will easily reach all the leaves. Disbudding must also be attended to in time. The plants are throwing lots of flowers now which should be pinched out as soon as they show color. Beauties will need tying up about every week or ten days to keep the shoots straight. This rose is not very subject to black spot in the South, though it is occasionally seen. The causes most contributory to this condition are: planting too close, crowding the shoots in tying, leaky houses and bad hygiene. These can all be easily guarded against, and with ordinary care this rose is one of the most profitable that can be grown in the South. WM. LEAR.

Rose Stems Weak.

ED. AMERICAN FLORIST.—

What is missing on my roses, they grow very thin flowers, stems are not stiff? I like to have stiff stems and good flowers. I am a new man in cut-flower growing and need some advice. I use liquid manure twice a week and have top-dressed the roses. C. S.

Without knowing anything about the planting and culture of your roses it is difficult to say what is the cause of your trouble but if they were small plants bedded in the houses this summer you are certainly overfeeding for no liquid manure or top-dressing should be applied until the bushes have made a good root growth in the soil in which they were planted. Hold off with your manuring and give the plants plenty of air. W.

The Rose Leaf Roller.

A well known correspondent advises us that he has adopted a very simple and efficient device to catch the moths of the rose leaf roller. A shelf is hung in the center of the greenhouse and on this is placed a kerosene lamp and then tanglefoot fly paper laid on the shelf around the lamp. The lamps are lit at night and the moths flying are attracted by the light and fly against and over the lamp and drop upon the sticky paper and are caught.

CHRYSANTHEMUMS

Feeding and Fumigation.

Disbudding, removing laterals, stools and tying are the things requiring attention in addition to the regular routine of watering, feeding and keeping insects in check which will keep the growers busy these days. All interested in exhibitions have their buds selected, but those who planted in July will be obliged to continue this work into October before the late varieties are finished. Laterals push faster after disbudding and the same may be said of the stools, which spring up from the bottom, which are more persistent than ever as the wood begins to ripen.

As the days shorten greater care must be exercised in the application of water. The evaporation is much slower, but the plants are at their height of vigor, particularly those which have not been disbudded, so they must not suffer from the need of it, but on the other hand the free and unstinted waterings we were giving in July and August must be reduced. Touching up the dry spots each day and a good spraying overhead on forenoons of bright days, is about all that is required from now on until the flowers are cut. Chrysanthemums are grown under such varied conditions that one is at a loss to know just how to handle the subject of feeding comprehensively and avoid the unpleasantness of misleading the beginners. We all know they can not be grown on barren soil, yet the amount of food required to properly nourish a plant is in reality an atom. The commercial grower who plants in June and July upon fairly good soil need not give much thought to the subject. All such stock requires is a few applications of liquid fertilizer after the buds are formed. Those growing for exhibitions where size is such an important factor, must be more conversant and know how far such treatment can be continued.

It matters not for what purpose they are grown it is the height of folly to overfeed and thus ruin many blooms for the sake of a few large ones. The mastery of this important subject is gained only by the closest observation, so as to determine the course to follow by the appearance of the plants. The condition of the leaves must be our index. The smaller, thinner and more pliable the greater the need for liquid applications. When the plant has had all it can properly assimilate the foliage is thick and dark in color, with lighter midribs showing very distinctly, which are usually raised or corded, while the whole leaf's surface is much undulated and has a decided ruff or harsh feeling when passed between the thumb and finger. Such conditions should not be manifest during the active growing season, as the full effect of the food is not fully apparent until the bud has assumed considerable size. For this reason it is important that all applications prior to bud formation be weak, and at intervals of not less than a week or ten days apart. Sometimes the soil is so rich that no liquids are required, and again it may

be of such a quality as to need solutions weekly to promote the desired activity. It matters little what we use for making liquid fertilizer, good results can be secured by using either cow or sheep manure or chemicals, it is more the knowledge used in their application than the materials, but remember whatever is used weak solutions are much safer.

It is advisable to keep aphids in check at all times, but from now on the stock should be entirely free of them. There are various ways this can be done, some prefer the various forms of tobacco or the nicotine extracts. We have used the past season hydrocyanic acid gas and are so well pleased with the results, that we shall discontinue all other insecticides for aphids. When properly applied it keeps all other insects in check except the tarnished plant bug and leaf tyer. We made several unsuccessful attempts before we found the right kind of cyanide. A 48 per cent potassium was first used, increasing the quantity until it would burn the foliage without destroying the aphids. We are now using Sodium cyanide in a very concentrated form. It comes in one pound tins marked 129 per cent cyanide. Upon writing the manufacturer we learn that 100 pounds of this brand is as efficient as 129 pounds of the 100 per cent potassium cyanide, and for this reason it is marked 129 per cent cyanide. Cannot say which of the supply houses are handling it, but we procured it from Arthur T. Boddington, New York. For houses 30x100 containing about 24,000 cubic feet of air space, we use four small jars which after putting 6 ozs. of water and 2 ozs. of sulphuric acid in each one, they are placed on the walks so as to divide the floor space as equally as possible. One ounce of cyanide is weighed out for each dish wrapped in tissue paper and placed on the walk beside the jar. When all is in readiness two persons drop the cyanide in the jars and pass rapidly to the next and out of the house, locking the door. When the plants are once thoroughly cleaned of the aphids they do not reappear under four to six weeks. Most every one knows the danger of inhaling this acid gas, but for fear some one may be careless will say there is no time to investigate the action of the cyanide after it has been dropped, and such a procedure would be useless, as the gas thus formed is as transparent and colorless as the air. By dropping the cyanide and passing to the next there is no danger of inhaling this poison, and it is then only necessary to see that such houses are locked, to prevent anyone from entering. In three hours it is considered safe to enter and put on ventilation. There is only one other precaution necessary and that is avoid spraying the plants in the afternoon of the day they are to be fumigated so the foliage will be perfectly dry.

ELMER D. SMITH.

WARREN, O.—Thos. Fletcher has completed two new houses, 9x25 feet each.

CINCINNATI, O.—Ninety-two automobiles and floats decorated with flowers made a beautiful floral parade September 14.

Personal.

Benjamin Hammond is at Saratoga Springs for a brief outing.

THORLEY'S bouquets are described and illustrated in the Ladies' Home Journal for October 1.

VAUGHAN'S SEED STORE, Chicago and New York, was awarded a bronze medal at the Brussels (Belgium) exposition for Gladioli Mastodon, Mrs. Francis King and Princeps.

ONE Philadelphia wholesale house refers to the Killarney rose as ever dear, but most dealers will say, quality considered, it is always cheap. The other Killarney is an unknown quantity to the Bard o' Ayr's champion.

FROST may be expected any time after September 15 and it is well to be prepared for it. The first frosts are frequently followed by a prolonged period of fine mild weather and the season of tender stock may be prolonged very materially by light protection on frosty nights.

PUSH retail bulb sales now. Run out some postal cards to your special customers who have fine grounds for bulb beds.

The American Rose Society.

The schedule for the spring show of 1911 will soon be issued, giving the list of premiums to be offered for special prizes at the coming National Show in Boston. At the last annual meeting special letters were issued to Mr. Richard Vincent, Jr., as representative of the American Rose Society at the Nation Exhibition held in Belgium, and also in the Royal Botanic Gardens at Regent's Park, London. Mr. Vincent reports back, having received the kindest attention and that the people were delighted with the American Rose Society having extended the courtesy of a special representative. The honorable secretary, Mr. Edward Mawley, of the National Rose Society of England, writing under date of September 6, says: "We were pleased to see the representative of your society, The Rev. Dr. B. S. Sulliger and to welcome him at our leading exhibition on July 8, and we are glad to hear from him that he much enjoyed the time he spent with us." These are pleasant acknowledgments of courtesy that cement the friendship between the nations, the most desirable thing in these days of communication between civilized peoples.

The American Rose Society aims to have a "Rose for every home, and a bush for every garden," and it is a fact that more outdoor roses have been planted within the last three years, and are now in bloom, than every before saw the sunlight in America.

BENJAMIN HAMMOND, Sec'y.

Massachusetts Horticultural Society.

The Massachusetts Horticultural Society held its general autumn exhibition of flowers, fruits and vegetables September 23, 24 and 25. The display of dahlias was a duplicate of the show given by the New England Dahlia Society at the same place the previous week. Indeed, it more than duplicated the preceding show, for there were more exhibitors and more space occupied, and it seemed as if the entries that took the first prizes were better in quality. Besides Messrs. Alexander, Rawson, Ela, Hathaway and Walker there were Wm. Turner & Co., New Bedford; Andrew W. Preston, Swampscott; Mrs. L. A. Towle, Everett; Mrs. L. M. Towle, Reading; Wm. H. Symonds, Marblehead; W. H. Crupp, Marblehead; A. E. Johnson, Montello; F. L. Tinkham, Brockton; Jos. Thorpe, Taunton; R. & J. Farquhar & Co.; W. H. Hall, Montello, and Herman L. Winter, Medford. The first prize winners were W. D. Hathaway, twenty-four blooms show; W. K. Hall, twelve blooms show; W. D. Hathaway, twenty-four peony flowered; Turner & Co., twelve peony flowered; W. D. Hathaway, twenty-four cactus; Turner & Co., twelve cactus; W. D. Hathaway, twenty-four decorative; Turner & Co., twelve decorative; J. K. Alexander, twelve vases pompons; Turner & Co., twelve vases singles; Geo. H. Walker, largest and best collection named varieties. Other dahlia awards, besides the second and third prizes,

were: Thanks to R. & J. Farquhar & Co. for a large central stage of dahlias in vases and bouquets; W. D. Hathaway, gratuity, for a table of 80 vases; Andrew W. Preston, gratuity, for a general display; G. B. Gill, gratuity and honorable mention.

R. & J. Farquhar & Co. received a silver medal for the best collection of hardy herbaceous plants; B. Hammond Tracy, Wenham, a silver medal for the best display of gladioli, arranged for effect; R. & J. Farquhar & Co., honorable mention for a magnificent specimen of drooping begonia, Alice Manning and for a collection of hardy phlox; Mrs. H. F. Durant, gratuity for orchid, Oncidium Varicosum Rogersii; Mrs. J. L. Gardner, gratuity, display of ferns, and Thomas Proctor, honorable mention for display of adiantum Farleyense.

The exhibition of apples, pears, peaches and plums was of familiar sorts, and of average merit. The entries of foreign grapes was the sensation of the fruit show, on account of the immense clusters and giant size of the fruit. First prizes for fruits: Thomas E. Proctor, foreign grapes; apples, Elliott & H. Ward Moore, Gravensteins; E. S. Cole, Maiden's Blush; N. J. Andrews, Wealthy; H. A. Clark, Sutton Beauty; Wilfred Wheeler, Porter; pears, G. V. Fletcher, Bartlett; W. C. Kendall, Beurre Bosc; F. W. Dahl, Sheldon; W. C. Kendall, Seckel; peaches, A. F. Estabrook; plums, G. V. Fletcher, collection of varieties; grapes, C. W. Libby, Moore's Diamond (white); C. W. Libby, Brighton (red); H. J. Andrews, Worden (purple); W. G. Kendall, best collection of five varieties; melons, James Garthley, Improved Honey Drop (cantaloupe); Oliver Ames, Halbert Honey (watermelon).

The most interesting exhibit in the vegetable department was the large and very educative showing of mushrooms, edible and non-edible.

Dreer's contribution of nymphaeas was a great addition to the floral display. John S. Hay came with them. They seem to grow more and more wonderful in their beauty.

W. T. H.

Coming Exhibitions.

(Secretaries are requested to supply any omissions from this list and to correct any dates that may have been altered since the last address.)

Baltimore, Md., December 1-2, 1910.—Fall exhibition, Maryland Horticultural Society, Fifth Regiment Armory. Address C. P. Close, College Park, Md.

Boston, Mass., March 27-April 1, 1911.—Second National Flower Show, Society of American Florists, Mechanics' building, Chester I. Campbell, general manager, 5 Park square, Boston, Mass.

Chicago, November 7-12, 1910.—Annual fall exhibition, Horticultural Society of Chicago, Coliseum, Wabash avenue near Fifteenth street. Address J. H. Burdett, 1620 W. 104th Place, Chicago.

Hartford, Conn., November 3-4, 1910.—Chrysanthemum exhibition, Connecticut Horticultural Society, Putnam Phalanx Hall. Address Geo. W. Smith, Melrose, Conn.

Indianapolis, Ind., November 8-12, 1910.—Fall show, State Florists' Association of Indiana, Tomlinson Hall. Address A. F. J. Baur, Thirty-eighth street and Senate avenue, Indianapolis, Ind.

Lenox, Mass., October 26-27, 1910.—Tenth annual fall exhibition, Lenox Horticultural Society, Town Hall. Address Geo. H. Instone, Lenox, Mass.

Long Branch, N. J., November 9-10, 1910.—Second annual chrysanthemum exhibition, Elberon Horticultural Society. Address R. Carey, Long Branch, N. J.

Milwaukee, Wis., November 7-14, 1910.—Flower show, Milwaukee Florists' Clubs, in the Auditorium.

Minneapolis, Minn., November 16-20, 1910.—Flower show, Minnesota State Florists' Association, National Guard Armory, Kenwood Parkway. Address Jerry P. Jorgenson, 3501 Portland avenue south, Minneapolis, Minn.

Morristown, N. J., November 2-4, 1910.—Annual exhibition, Chrysanthemum Society of America, in conjunction with the Morris County Gardeners' and Florists' Society. Address Edward Reagan, Box 334, Morristown, N. J.

Morristown, N. J., November 2-4, 1910.—Fifteenth annual flower show, Morris County Gardeners' and Florists' Society. Address Edward Reagan, Box 334, Morristown, N. J.

New Haven, Conn., November 1-3, 1910.—Annual exhibition of the New Haven County Horticultural Society, Music hall, 115 Court street. Address Frederick H. Wirtz, 86 Nicolli street, New Haven, Conn.

New York, November 9-11, 1910.—Annual exhibition of chrysanthemums, American Institute, 19 and 21 West Forty-fourth street.

New York, November 9-13, 1910.—Fall exhibition, Horticultural Society of New York, American Museum of Natural History. Geo. V. Nash, secretary, New York Botanical Garden, Bronx Park, New York.

Pasadena, Calif., November 3-5, 1910.—Fall flower show, Pasadena Gardeners' Association, Maryland hotel. Address Angus McLeod, 1032 Alleen avenue, Pasadena, Calif.

Poughkeepsie, N. Y., October 27-28.—Annual flower show, Dutchess County Horticultural Society.

Springfield, Ill., September 30 to October 8, 1910.—State fair. Robert O'Dwyer, superintendent, Monroe and Des Plaines streets, Chicago.

St. Louis, Mo., November 8-12, 1910.—Fourth fall floral exhibition, St. Louis Horticultural Society, Coliseum, Jefferson and Washington avenues. Address Otto G. Koenig, 6473 Florissant avenue, St. Louis, Mo.

Worcester, Mass., November 10, 1910.—Chrysanthemum exhibition, Worcester County Horticultural Society, Horticultural Hall, 18 Front street. Address Adin A. Hixon, Horticultural Hall, Worcester, Mass.

Meetings Next Week.

Albany, N. Y., October 6, 8 p. m.—Albany Florists' Club, W. C. Kings, 24 and 26 Steuben street.

Buffalo, N. Y., October 4, 8 p. m.—Buffalo Florists' Club, 385-387 Elliott street.

Chicago, October 6, 8 p. m.—Chicago Florists' Club, Union Restaurant, 11 Randolph street.

Cincinnati, O., October 3, 8 p. m.—Cincinnati Florists' Society, Jabez Elliott Flower Market.

Dayton, O., October 3, 8 p. m.—Dayton Florists' Club, 37 E. Fifth street.

Detroit, Mich., October 3, 8 p. m.—Detroit Florists' Club, Cowie building, 42-44 Gratiot avenue.

Grand Rapids, Mich., October 3.—Grand Rapids Florists' and Gardeners' Club, office of member.

Indianapolis, Ind., October 4, 3:30 p. m.—State Florists' Association of Indiana, State House.

Louisville, Ky., October 4, 8 p. m.—Kentucky Society of Florists, Third and Broadway.

Milwaukee, Wis., October 6, 8 p. m.—Milwaukee Florists' Club, Quiet House, corner Broadway and Mason street.

Montreal, Que., October 3, 7:45 p. m.—Montreal Gardeners' and Florists' Club, Royal Guardians building, 211 Sherbrook street, west.

New Orleans, October 5, 8 p. m.—German Gardeners' Club, 624 Common street.

Newport, R. I., October 5.—Newport Horticultural Society.

Pasadena, Calif., October 7, 8 p. m.—Pasadena Gardeners' Association, Board of Trade rooms, West Colorado street.

Philadelphia, Pa., October 4, 8 p. m.—Florists' Club of Philadelphia, Horticultural hall, Broad street, above Spruce.

Pittsburg, Pa., October 4, 8 p. m.—Florists' and Gardeners' Club of Rhode Island, 96 Westminster street.

Salt Lake City, Utah, October 4.—Salt Lake Florists' Club, Huddart Floral Co., 114 East Second South street.

Seattle, Wash., October 4.—Seattle Florists' Association, Chamber of Commerce, Second avenue and Columbia street.

St. Paul, Minn., October 4, 8 p. m.—Minnesota State Florists' Association, 510 Snelling avenue north.

Utica, N. Y., October 6, 8 p. m.—Utica Florists' Club, Genesee hall, Oneida square.

Washington, D. C., October 4, 8 p. m.—Florists' Club of Washington, 1214 F street, n. w.

Want a man capable of earning \$1000 per year or better.

Key 166, care American Florist.

Bids for Carnation Crop

At the Florists' Experiment Station
Asked for.

The experiments with carnations being carried on at the Florists' Experimental Houses at the University of Illinois require the growing of 3,200 plants. During the past season, from the middle of November to the first of July, over 58,000 marketable flowers were cut and disposed of. This does not include those required for the college and for class work.

Bids are now being asked for by the Department of Horticulture of the University for the cut from November, 1910, to July 1, 1911, under the following conditions:

That the contract is to include all saleable flowers not required by the college in class and decorative work during the above period.

That the purchaser make a settlement monthly.

That the purchaser give a sufficient bond.

That the University is to sell no carnations to any other party or parties.

In the experiment work with **Roses, 640 Killarneys and 640 Brides** are grown. Bids for the cut for the coming season are also asked for under the above conditions.

Bids for both the Carnation and Rose crops will be received up to and including October 7, 1910. All bids should be sent to

H. B. DORNER,
Asst. in Floriculture, Urbana, Ill.
September 23, 1910.

CUT FLOWERS

ROSES, CARNATIONS, CHRYSANTHEMUMS and all other Seasonable Stock.

Our Roses are of exceptionally good quality. Our Carnations, although a little short of stem are as Good a Grade as can be found in the Market.

L. D. Phone Randolph 2081

WIETOR BROS., 51 Wabash Ave., Chicago.

Chicago.

AUTUMN WEATHER.

The cooler weather of autumn has made its appearance and while no frosts have as yet been reported, they may now be expected at any time. The out door stock is rapidly approaching its end. Asters are nearly all cut, every morning sees large shipments but nothing, either in quantity or quality, as have been received for the past two or three weeks. Some very handsome dahlias were seen this week and cosmos in large vases are to be found at the stores. Gladioli are still fine in quality and in good quantity. The coarser flowers are not seen as frequently as they have been. Autumn leaves of the various hues are seen everywhere and are used for decorative effect. The cooler and darker weather, for the past week has been quite cloudy, has shortened up the inside cut, while there appears to be roses enough to supply the demand yet the cut is hardly up to what has been received lately but the quality is all that could be asked. American Beauties on extra long stems of good size and color, Killarneys and other roses in excellent quality are to be found at all the stores. Carnations are more plentiful and of far better quality, but the decrease in the outdoor stock causes more demand for these flowers and the outlook, at present, is that the first heavy frost will see a shortage. Chrysanthemums are much more plentiful and of excellent quality. Some orchids are being received but not in any great quantity, and the demand is fully

equal to the supply. Lily of the valley is in fair quantity and is good. Gardenias are to be found on the retail counters, and some beautiful nymphaeas are seen in the store windows.

NOTES.

The stock which is being received every morning at Poehlmann Bros. Co. is of exceptional quality for so early in the season and is very quickly disposed of shortly after its arrival, but it keeps coming, and all demands are satisfied. American Beauties in all grades, Killarney of both colors and all the other desirable varieties of roses in elegant quality and of any length of stem that may be desired. Carnations in the best varieties, of good stem and size, Golden Glow and October Frost chrysanthemums that equal in size the mid-season sorts, are daily arrivals. Cattleyas are now beginning to arrive in beautiful shape and lily of the valley is of the first quality. It looks when the early shipments arrive as if all the wants of the customer could be bountifully supplied.

The stock at Bassett & Washburn's store is all of excellent quality. Chrysanthemums, both of Golden Glow and October Frost, are as fine as is often seen and their carnations are rapidly approaching mid-season form, both in stem and flower. Roses in the extra good quality for which this firm is noted and American Beauties that are A1, both in stem and color, are received every morning. Some extra Rhea Reid roses were noted this week. The quality of stock is well

appreciated by the trade, for the business last week was the best of the season.

The interior of the Hoerber Bros. store has been repainted with a coat of white enamel and the office partition extended to the ceiling, while before it was but half way. Two new wall cases have been added and they are now prepared to handle the fall business. Harry Manheim, who has charge of the store, did the largest part of the painting and showed himself to be quite an artist. The stock is in good condition, business is good, and they are receiving an average of 7,000 roses a day from their young stock.

Vaughan & Sperry are receiving extra large shipments from their growers of an exceptionally fine grade of American Beauties, which are eagerly sought by the best trade, and are selling very readily at good prices. Orchids are arriving in fine condition and the demand for these exotics keeps pace with the supply. Carnations of good quality are moving readily and chrysanthemums, both yellow and white, are finding a good market, for the quality is of the best.

Miss Edna Kindler, daughter of Mrs. A. Kindler of the Raedlein Basket Co., 713 Milwaukee avenue, returned September 21 from Ebersdorf, Germany, where the manufactures of this concern are located. She has selected an unrivalled assortment of these necessary wares for the fall trade. A large shipment of baskets, including many new and attractive forms, arrived last week and another is due very shortly.

BASSETT & WASHBURN,

Office and Store:
76 Wabash Ave., Chicago

Greenhouses:
Hinsdale, Illinois

J. B. Deamud Co. is this week offering an excellent grade of Golden Glow chrysanthemums which are eagerly sought by the trade. Some fancy carnations were seen here, Victory being of exceptionally good quality. The demand for southern smilax is heavy and a large quantity is kept constantly on hand. The finest dahlias yet seen on the market were noted here this week, some dark reds of the cactus type were particularly handsome.

E. E. Pieser of Kennicott Bros. Co., returned September 23 from a month's tour of the Canadian country. It was his intention to pass the time hunting and fishing, but owing to the cold weather Mr. Pieser and wife, in company with Mrs. Noel, a sister of Mrs. Pieser, visited the larger cities of Canada. Mrs. Pieser and sister remained at Toronto and are expected home Sunday.

The Chicago Rose Co. is offering a very good quality of roses. Looking into the wire working department we saw all hands as busy as bees. Our attention was called to a novelty in a design by Joseph Ziska. It was a 12x24-inch pillow frame on a reclining stand and from the base were suspended five small hearts intended to represent the five remaining members of the family.

The American Beauty roses cut at the George Reinberg houses are as good a grade as can be found in the market, the stem being extra long and the substance of the flower exceptionally good. R. C. Northam is at his wits end to fill the orders for short lengths, the large amount of funeral work creating an exceedingly large demand for this grade of stock.

E. H. Hunt is this week offering a very good grade of roses. A very large trade was handled this week in florist's greens and a large shipment of southern smilax and Mexican ivy

has just arrived. Clifford Pruner, of the supply department, is looking forward to a very busy month, and the business the past season has been exceedingly good.

R. Van Gelder, of Percy Jones, has made several changes in his place of business. The office was moved to the northeast corner, giving him a very much needed floor space. Additional help has been secured and more will soon be added. Mr. Van Gelder is this week offering an excellent grade of carnations and chrysanthemums.

Frank S. Ayres, of the Chas. W. McKellar establishment, is again on deck at the store after a five weeks' outing in the wilds of Canada. Frank spent most of his time in a canoe cruising among the lakes and enjoying himself hunting and fishing. Large game is very plentiful this season throughout that section of the country.

Buchbinder Bros., 518 Milwaukee avenue, manufacturers of and dealers in store and office fixtures, are making some extraordinary offers to florists who wish to exchange or buy new fixtures, and a cordial invitation is extended to all to come and look over their stock.

Word was received this week from O. P. Bassett and wife that they had arrived at Pasadena, Calif., safely and were expecting to proceed to Long Branch. They have taken their automobile with them and intend to spend the winter enjoying the scenery of that beautiful part of the country.

J. A. Budlong has an exceedingly heavy crop of roses and carnations this time of the year, the latter being of an exceptionally good quality. The shipping trade has been very heavy and the stock has given splendid satisfaction as attested by the letters received by Phil. Schupp.

Wietor Bros. are right in crop and their cut of all varieties of roses is large and the quality is exceedingly fine. Special mention should be made of their American Beauties, which are exceptionally good, and their chrysanthemums rival any in the market.

The fair at Springfield opens September 30 and many prizes are offered in the horticultural section. Premium lists may be had on application to Superintendent Robert O'Dwyer, Monroe and Desplaines streets. Telephone, Monroe 1620.

J. W. Starrett, who has charge of the cut flower decorations at the Hotel LaSalle, has been very busy during the present week. The electrical convention brought many guests to the hotel and kept everything on the move.

The Chicago Carnation Co. have engaged space in Room 203, Atlas building, Randolph street, where they will sell the stock grown at their houses at Joliet, Ill. They will open October 1 and A. T. Pfeifer will be the manager.

John Kruchten received his first shipment of a fancy stock of dahlias September 26 and will have them in quantity from now on. An excellent quality of carnations and chrysanthemums were also seen here.

E. R. Armstrong, of the Palace Floral Co., sold his business on North Clark street to L. M. Leveson and has accepted a position with George Perdikas, corner of Dearborn street and Jackson boulevard.

H. Radtke, California avenue, has erected a new greenhouse this summer 17x100 feet which is nearing completion. The material was furnished by the Foley Manufacturing Co. of Chicago, Ill.

Richard Rolston, formerly an employee of the Wietor Bros., and later in business on East Forty-seventh street, has disposed of his store and

is now connected with the Wise Furniture Co.

E. C. Amling is receiving an excellent grade of lilies and roses. Killarneys showing up remarkably well. Chrysanthemums are now arriving in quantity, and Golden Glow is in fine shape.

George Proppis, formerly of St. Paul, Minn., is now in business with his nephew, Geo. Perdikas, and has taken charge of the store on the corner of Dearborn street and Jackson boulevard.

Schiller, the florist, West Madison street, has placed an order with the Buick Motor Car Co., Michigan avenue, for a 22 h. p. gasoline auto, which will be used for delivery purposes.

At J. F. Farrell's, 4643 State street, an exceedingly busy season is being enjoyed and everything points to prosperous outlook. Weddings and funeral work have kept all hands busy.

A. L. Randall Co. is receiving plenty of everything, their lily of the valley being of exceptionally good quality. This firm is handling large quantities of florist's greens of all kinds.

Peter Reinberg is cutting an excellent grade of roses, the Mrs. Marshall Field and Richmond being of exceptionally good quality. Tim Matchen reports a very busy week.

Weiland & Risch are cutting a very excellent grade of carnations for this season of the year and their roses, especially white and pink Killarneys, are showing up remarkably well.

Zeck & Mann are this week offering a very good grade of roses and carnations. The latter are of exceptionally good quality. Business has been very good.

Kennicott Bros. are this week offering an excellent grade of Golden Glow chrysanthemums to the trade. Carnations are arriving more freely and more readily.

John Horstman, of Bassett and Washburn's, went to Beecher, Ind., September 25, where he officiated as best man at the wedding of one of his friends.

E. F. Winterson Co. is handling a very good grade of gladioli and carnations. The latter are of exceptionally good quality. Business has been very good.

Ed. Misiewicz, 1166 Milwaukee avenue, has had a very busy week, wedding decorations occupying his attention.

J. Mergen, 2025 West Twelfth street, is enjoying a very fine business this

fall. The many funerals causing quite a call for flowers for the sad occasions.

Kyle & Foerster are handling a large quantity of gladioli, roses and carnations, the two latter being of exceptionally good quality.

Sinner Bros. of the Flower Growers' Market are cutting a very good grade of Killarneys, Maryland, Richmond and Jardine roses.

The regular meeting of the Florists' Club will be held next week, Thursday, October 6, at the Union Restaurant at 8 p. m.

C. Kranz and wife of Great Falls, Mont., spent a few days in the city last week, returning home September 23.

J. F. Klimmer's health, we are pleased to state, continues to improve. John Kruchten spent September 27 at Aurora.

Visitors.—C. Kranz and wife, Great Falls, Mont.; H. W. Koerner, Milwaukee, Wis.; W. J. Vesey, Fort Wayne, Ind.; B. Schroeter, Detroit, Mich.; W. F. Duntemann, Bensenville, Ill.; J. A. Carbone, West Berkeley, Calif., returning from the east; B. York, Hancock, Mich.

BOWLING.

The Florists' Club bowling league opened its season September 28 at Bensinger's alleys, 118 East Monroe street. Vaughan & Sperry have offered a very handsome silver cup as a prize for the best individual average for the season. The several teams are to be known as the Roses, Carnations, Orchids and Violets and are composed as follows:

Roses.	Violets.
O. Goersch.	T. C. Yarnell.
A. Fischer.	W. Loman.
W. Wolff.	H. Schiller.

Manager's Downtown Office Will Be Opened Next Week.

sultry they do not want to buy and say, "what is the use, flowers don't keep?" Store openings have given a little impetus to the plant trade and the decorators have been kept busy. Not until we get a good frost and people feel a touch of winter can any marked revival in trade be expected. Everything seems to be plentiful. There has been a very large supply of carnations, also of roses. The warm weather opens Richmonds, Killarney and even American Beauties up quickly. A few dahlias are seen but not many of the fancy varieties.

NOTES.

A large number of carnations and American Beauty roses were used here during the visit of Cardinal Vannutelli. The reception by the Knights of Columbus and at the Sacred Heart Convent called for quite a few red roses. Many flowers were sent to Archbishop Glennon's house where the cardinal was housed during his visit. At the churches where the cardinal said mass the altars were beautifully decorated with the papal and cardinal colors. White Killarney, Perle roses and white and yellow chrysanthemums formed the papal colors. Chas. Beyer had the decorations at the cathedral chapel. Foliage plants filled the sanctuary and the altars were beautifully decorated with wild smilax, white Killarney and Perle roses. Geo. Waldbart had the decorations at the home of Archbishop Glennon. Large bunches of white and yellow chrysanthemums formed the papal colors, huge vases of American Beauties, the cardinal colors. George also had the decorations at Sacred Heart Convent. He provided large bunches of white and yellow chrysanthemums and American Beauties which were presented to the cardinal by the school children. Ostertag Bros., F. H. Weber and almost every florist had

something to do with the reception afforded the cardinal.

The Eggeling Floral Co., who suffered severe loss during the late freeze in April are getting in shape again nicely and expect good crops in chrysanthemums and carnations. Their greenhouses are six in number, 30x250 feet each, and are under the management of Jabez P. Gadd who puts his heart and soul in rebuilding the place. The losses from the freeze were very heavy, \$1,400 worth of bedding stuff,

\$700 to replace the carnation cuttings, and \$3,000 worth of chrysanthemums. He has now on hand 25,000 chrysanthemums, over 11,000 carnation plants. He has also quite a large stock of nursery plants.

While Gus Eggeling, of the Eggeling Floral Co., was returning in his automobile from his greenhouses Saturday evening at Kinloch, Mo., accompanied by his negro chauffeur, he was twice held up by masked men concealed at the side of the road but each

VAUGHAN & SPERRY

LONG DISTANCE PHONE
CENTRAL 2571

52-54 Wabash Ave., CHICAGO.

time put on steam and escaped the bullets which were shot after him. The county is aroused and will deal quickly with the culprits if caught.

Grimm & Görlly had the decorations at the anniversary opening of Werner & Werner, furnishing goods store. The upper windows on the outside were filled with window boxes, very tastefully arranged by Mr. Geiger. Several hundred yards of laurel was used in interior decorations. Many bunches of American Beauty roses adorned the different departments.

Park Commissioner Scanlon has returned from the east where he has spent three weeks. He has made investigations on road and park conditions and thinks favorably of introducing these ideas in the city, especially the outer park district. There is also talk of establishing a first-class zoological garden in Forest park.

A severe hail storm passed over St. Louis at 3 a. m. September 26. Damages to greenhouses are reported but not so severe. C. Young & Sons Co. had about 50 panes of glass broken. Slight damage at Sanders Nurseries and at Alex. Waldbart & Sons.

Everything at A. Jablonsky's place is planted and a fine stock of roses and carnations will be on hand this fall and winter. Mr. Jablonsky has always been one of our most successful growers.

We are glad to announce that Mrs. John Steidle has sufficiently recovered from her illness to go to her home. She expects to be fully convalescent in a few days.

At John Steidle's everything is in fine shape. Carnations are improving daily. His stock in roses is disposed of entirely by F. C. Weber.

Mrs. Chas. Schoenle is at Kansas City on a visit to her aunt. Charlie is keeping bachelor's home. W. F.

Louisville.

Chas. Rayner, formerly of Louisville, now employed at the McCoy greenhouses at Seattle, Wash., is delighted with the climate there and writes expressing wonder at the way things grow out there: Sun-flower stalks twenty-five feet high, carnation plants doing service three years or more without replanting and producing fine carnations with stems two and three feet long at this season. He also reports that he has recovered his health and spirits and feels like a new man.

"THE BUSIEST HOUSE IN CHICAGO."

IT IS well to be satisfied, but sometimes satisfaction means a loss of money because contentment dulls the perception to such an extent that one does not realize he might make more money and be better satisfied.

We don't want your trade on promises. We simply ask you to let us show you what we can give you for your money, and we know that this will insure your business.

J. B. DEAMUD CO.,

51 Wabash Avenue, CHICAGO.

Frank Dieterich, of the firm of Dieterich Bros., of Maysville, was recently in Louisville on business. He says he is going to make a change and go out west and start in business and build some greenhouses. He thinks of locating in Oklahoma City. He will be missed in Maysville, as he is prominent in politics there and president of the board of councilmen.

Anders Rasmussen's new houses are getting their finishing touches and are being planted in carnations. The outside walls are of concrete and are built on the most up-to-date plans, with some entirely new ideas of his own invention and the entire new plant of 50,000 feet of glass was built by and under his personal supervision.

Nanz & Neuner will remove to their new store about October 1. The new store is three stories high and will have a conservatory in the rear. This firm is the oldest in Louisville, being in existence over fifty years. They won the silver cup for the best floral design at the state fair in a very close competition with other florists.

Wm. Walker is making a display in his windows of a fine collection of dahlias. His greenhouses are in fine trim and his roses, carnations and chrysanthemums are looking fine. He also has a fine lot of Cyclamen plants that are extraordinarily fine and will bring fancy prices.

Jacob Schulz has had a large electric sign made in the lot adjoining the post office. It is very large and has an immense American Beauty rose bud and the words, "Jacob Schulz, The Florist Across the Street." He is the only florist using street car advertising in the city.

F. Walker and Jacob Schultz are using orchids in their window displays. These flowers are finding a ready sale and a good demand for the coming season is promised.

Nelson Morton is sending in quantities of fine dahlias from the floral establishment he bought of Geo. Thompson.

F. Walker & Co. have completed their rebuilding one house, 20x150, and two smaller houses.

Mrs. C. B. Thompson, who was sick with malarial fever, has recovered. H. G. W.

Baltimore.

A LONG CONTINUED DROUGHT.

The strip of territory, narrow by comparison, but which includes the entire watershed from which is received the water supply of Baltimore and its suburban dependencies (towns of considerable size, which it ought to be known are not included in the figures of its population as determined and published by the census department) is still as dry and dusty as the desert of Sahara, and out-of-doors crops, field and garden, are parched and in many cases absolutely destroyed. The churches and ministers are taking a hand and offering supplication for rain, but so far their prayers have no response. It is curious how small a distance separates the area which has so long been rainless from that where moderate if not abundant precipitation has been the rule. The usual supply of out-door stuff which at this season overwhelms the markets is this year lacking, and the very poor quality of what comes in is palpable. S. B.

WELCH BROTHERS, 226 St. Boston, Mass.**Asparagus Plumosus Nanus****Extra large, heavy strings 50c each.****W. H. Elliott, Brighton, Mass.****Philadelphia.****BUSINESS IMPROVING.**

Though the weather sharps have sent out warnings of storms to come, we are moving along serenely, with Old Sol wearing the smile that won't come off—at least it hasn't at this writing. Business continues to improve, though slowly. The dahlias continue to be a feature of the market. They are not over plentiful and very good prices are being realized. It is said by experts that a soaking rain would greatly increase the supply. It seems to be a toss-up between rain and Jack Frost as to the future supply of dahlias. Orchids are not very plentiful, but there is not a heavy demand; nevertheless prices keep up to stiff figures. The demand for American Beauty roses is limited. Of the tea roses, the Killarneys are most noticeable, and there are some fine ones, for the season, on the market. Carnations of very good quality continue to come in but they will soon be eclipsed by the chrysanthemums. The asters are in the sere and yellow leaf and the gladioli are has-beens.

Boston.**STOCK PLENTIFUL.**

A quiet week at the Park street markets, but ending up with a Saturday rush. Growers came stringing in with their boxes of stuff and buyers were on hand with cash. The first white frost, September 23, was reported, both at the Dahlia show and the market. Not serious. Pinks are of course more plentiful. A. Christensen, Stoneham, is making a good cut. Robt. Dougherty has been shipping in a fine stock of Fair Maids. John Foote, Reading, held up some bunches of Beacon with very long stems, and was proud of some Bouvardia Humboldtii he had brought in. E. Wood, Lexington, has completed another cement bottom house for pinks. Besides Golden Glow mums the market now shows the pink Montmort and two whites,—October Frost and Bergman. J. H. Leach & Son, N. Easton, cut twelve dozen mums one day this week, mostly white. F. J. Dolansky, Lynn, is cutting 7-12 dozen Golden Glow daily. Roses plentiful. At Stickel's stall there were some yellow Ward roses, among the rest. M. J. Aylward, Woburn, has been shipping in an excellent stock of Bridesmaid. In violets, Harry Wood, Brookline, is specially men-

tioned. W. E. Turner, Woburn, showed the first new stock pansies. J. T. Gale, Tewksbury, wins praise for his double violets.

Pittsburg.**STOCK GROWING SCARCE.**

There is nothing startling in the market. Business continues pretty good. Asters and carnations are very scarce; the former are just about done. This is a trifle earlier than usual, consequently there will be a scarcity of stock until carnations come in heavier. Roses are more plentiful and help out nicely. Beauties and lilies are coming in in larger quantities. Violets have made their appearance but do not amount to much, as it is a little too warm to ship good. Valley is still very scarce.

NOTES.

E. C. Ludwig, North Side, recently purchased an eighty-acre farm near Butler which he intends to devote to raising flowers.

STOCK SCARCE.

Ideal fall weather and trade has been fair. Stock is not plentiful. Carnations and roses are scarce. Chrysanthemums are here but quality only fair. Gladioli and asters are getting poor. Gaillardia has filled in for cut flowers and is certainly a good fall flower. It should be handled more than it is. Tritomas have been a decided novelty in window work and a good seller. There have been quite a number of weddings this month which have taxed the florist to get fine stock. Funeral work has been unusually good.

NOTES.

The flower show, which will be held in Convention Hall on November 2-4, promises to be a big hit. The hall plan is something entirely new in arrangement. Each exhibitor will have an opportunity to show his flowers and not have any chance of their being mixed with others. Growers, with an

exhibit of their new chrysanthemums, will be well repaid. The hall committee will have a plan to mail within a week or so which will be well worth looking into. The hall is large and every convenience will be given for the care of flowers sent for exhibition. Any information wanted regarding the hall before the circular, can be had from Geo. McCline, Jr., 892 W. Delaware avenue. BISON

New York.

SIGNS OF AUTUMN.

Business of the past week has been all that could be expected for this season of the year, the market showing a good deal more snap than it has for some time past. Gladioli are about over and asters, while still a drug on the market, are not arriving in such profusion as hitherto. Killing frosts are expected soon in the outlying districts, which will eliminate the aster crop entirely before long. Some fine mums are arriving and a few branches of autumn foliage have been noticed on the market, which is generally considered a harbinger of the opening in earnest of the fall season. Some good roses are now arriving and are bringing a fair price, while lilies are bringing in some instances as high as 12 cents for specimen blooms. Carnations are arriving in better condition every day. Some good sweet peas are coming in. Orchids are still quite scarce. An occasional shipment of violets are arriving but are not to be depended upon and are of poor quality yet.

NOTES.

The New York horticultural import houses receive and ship some peculiar horticultural products sometimes. When we visited McHutchison & Co., the New York import house, recently, they were exporting a consignment of 300,000 galax leaves to Europe; they also had just received a consignment of 215 bags of English soil to be used for growing rhododendrons in this country. Their regular shipment of plants, bay trees, etc., from Belgium consisted of 429 packages, most of which went in carload lots to the Pacific coast and other far distant points.

At a meeting held in the office of F. H. Traendly, it was decided to change the name of the New York Florists' Bowling Club to the New York Florists' Club Bowling Association. G. W. Scott was elected vice president at this meeting. All members of the Florists' Club are eligible to membership in this association, on payment of \$6.00 for the season of seven months or \$1.00 per month, payable in advance. Address all communications to J. A. Shaw, Secretary, P. O. Box 545, N. Y. City, or J. B. Nugent, Jr., Treasurer, 42 West Twenty-eighth street.

The officers of the Florists' Club have decided to make October 10 ladies' night and extend a cordial invitation to them to come and hear J. Horace McFarland lecture on "The Florist and Town." It is also requested that the gentlemen refrain from smoking, particularly during the lecture, as it interferes with the views and also the speaker's throat. John B. Nugent of the house committee will make special arrangements for the occasion.

Wm. P. Ford is now open for business and is receiving considerable stock among which some very fine mums are noted. He has engaged S. C. Hopkins, who was for three years head book-keeper for A. J. Guttman, to take charge of his office September 26. Also Wm. Mack, for seventeen years in the wholesale business, as head man on the floor.

G. H. Stuber, florist, of Woodlawn, is building a new greenhouse, 20x85, on his Yonkers, N. Y., place, in which he intends to grow Easter stock this season.

American Institute Dahlia Show.

The seventy-ninth fair and dahlia show of the American Institute of New York was held in the Berkeley Lyceum building, 19-20 West Forty-fourth street, September 20-22 and, according to Manager Rickards, was most successful. The attendance being about the average and taking into consideration the weather, which was unusually

warm, was all that could be expected. The exhibit of Harry Turner and A. J. Manda's collection of foliage and flowering plants attracted considerable attention, as did also the new chrysanthemum blooms exhibited by Chas. H. Totty, of Madison, N. J. The judges were John McNicholls, Wm. Turner, Edward Reagan and Peter Duff. Following is a list of the awards:

DAHLIAS.

Professional class. Competition open to commercial growers only.

Best collection of 50 varieties, one flower of each—Wm. P. Lathrop, first; W. D. Hathaway, second.

Best collection of 25 varieties, one flower of each—H. F. Burt, first; Wm. P. Lathrop, second.

Best collection of 10 varieties, one flower of each—Wm. P. Lathrop, first; W. D. Hathaway, second.

At the Dahlia Show.

The Manager's Class is Not in the List of Awards, but this Exhibit is Well Worth Special Mention.

Best display of single dahlias—J. T. Lovett, first; H. T. Burt, second.

Best display of cactus dahlias—John K. Alexander, first; Geo. L. Stillman, second.

Best display of pompon dahlias—Wm. P. Lathrop, first; H. T. Burt, second.

Amateur class. Competition open to non-commercial growers only.

Best collection of 50 varieties, one flower of each—H. W. J. Bucknall (Geo. Barton, gardener), first; E. D. Andrews (Geo. H. Hale, gardener), second.

Best collection of 25 varieties, one flower of each—Walter M. Gray, first; Geo. Barton, second.

Best collection of 12 varieties, one flower of each—Geo. Barton, first; Geo. N. Hale, second.

General class. Competition open to all.

Best vase, 25 blooms, show dahlias, yellow, one named variety—Wm. P. Lathrop, first; J. T. Lovett, second.

Best vase, 25 blooms, show dahlias, white, one named variety—Geo. L. Stillman, first; Wm. P. Lathrop, second.

Best vase, 25 blooms, show dahlias, pink, one named variety—W. D. Hathaway, first; G. W. Young (Jas. Kenny, gardener), second.

Best vase, 25 blooms, show dahlias, any other color, one named variety—Geo. L. Stillman, first; Henry Goldmeyer (Anthony Bauer, gardener), second.

Best vase, 25 blooms, decorative dahlias, yellow, one named variety—J. T. Lovett first.

Best vase, 25 blooms, decorative dahlias, white, one named variety—Wm. P. Lathrop, first.

Best vase, 25 blooms, decorative dahlias, pink, one named variety—Geo. L. Stillman, first; J. T. Lovett, second.

Best vase, 25 blooms, decorative dahlias, any other color, one named variety—J. T. Lovett, first; Max Schneider, second.

Best vase, 25 blooms, cactus dahlias, yellow, one named variety—J. T. Lovett, first; Geo. L. Stillman, second.

Best vase, 25 blooms, cactus dahlias, white, one named variety—Geo. L. Stillman, first.

Best vase, 25 blooms, cactus dahlias, pink, one named variety—J. T. Lovett, first; Wm. P. Lathrop, second.

Best vase, 25 blooms, cactus dahlias, any other color, one named variety—J. T. Lovett, first; H. P. Osborne (Wm. Ingles, gardener), second.

Best 6 varieties, cactus dahlias, 5 blooms each, shown in vases—Wm. P. Lathrop, first; J. T. Lovett, second.

Best display single cactus dahlias, in vases—Geo. L. Stillman, first; H. T. Burt, second.

Best display of pompon dahlias, in vases—H. T. Burt, first; W. D. Hathaway, second.

Best vase of 50 single dahlias—G. W. Young, first; J. T. Lovett, second.

GLADIOLI.

Best collection of 50 named varieties—J. L. Childs, first; J. K. Alexander, second.

Best 25 named varieties—J. K. Alexander, first; J. L. Childs, second.

Best 10 named varieties—J. L. Childs, first; J. K. Alexander, second.

MISCELLANEOUS CUT FLOWERS.

Best 20 varieties of hardy herbaceous named flowers—R. Guggenheimer (Peter Murray, gardener), first; J. T. Lovett, second.

Best collection of annual flowers, not exceeding 12 varieties—W. S. Dowlen, first; R. Guggenheimer, second.

ORNAMENTAL PLANTS.

Best group of flowering and foliage plants, covering a space about 80 square feet, variety and effectiveness to be considered—Howard Gould (Harry Turner, gardener), first; Mrs. H. Irving Pratt (A. J. Manda, gardener), special prize.

ORCHIDS. PALMS. FERNS.

Specimen palm—Mrs. H. I. Pratt, first; H. Gould, second.

Specimen fern—Mrs. H. Irving Pratt, first.

ROSES—CUT BLOOMS.

J. J. EUBANK, Brown's Store, Va

It's a Real Pleasure to Sell Heacock's Fine, Home-Grown Palms

Your customers get the kind of quality they like when you sell them Heacock's Palms—and you get the kind of returns you like. It's a real pleasure to handle our Palms—they are sure to please the most particular of your customers—and besides, they enable you to make money in three ways:

First, you can sell them on a good margin.
Second, they "move" quickly,—don't tie up your floor and counter space for long at a time.

Third, there need be no loss by their perishing on your hands—a little attention from one of your clerks will keep them in first-rate shape. This is because they are grown by palm specialists from seed to mature plant right here in our own houses.

There's money for you in handling our Palms—we can prove it by hundreds of orders who have been our customers for years. Here are our prices, and the stock was never better—let us hear from you NOW.

THE Ohio crop of sweet corn is very disappointing.

RED TOP prices show considerable advance over those of last year.

HOLLAND BULBS are smaller than usual this year but moving off briskly.

GET busy now with your 1911 catalogue work—this is about the last date for taking photographs.

CHICAGO.—Prices on the board of trade September 28 for grass seed were noted as follows: Timothy, \$7.50 to \$8.75 per 100 pounds. White clover from \$20 to \$25.

BOSTON, MASS.—There is a feeling on South Market street that the fruit and vegetable end of the autumn exhibit at Horticultural Hall is not what it used to be. Here is where the subject of a more distributive policy of using the Society's money for awards finds its loyal agitators.—W. T. H.

SOME growers at Chicago are complaining that onion seed, supposedly California grown, is turning out a product which proves that the seed planted must have been imported and of the New Queen variety. If California growers are guilty of such practices they will soon kill their trade.

NEW YORK.—Alfred Emerich, representing Messrs. Vilmorin, Andrieux & Co., Paris, France, is expected to arrive in this city about October 1, per S. S. La Provence, on his annual visit to the American seed trade. During his stay here his headquarters will be care H. Frank Darrow, 26 Barclay street, New York.

A. LE. COQ & Co., Darmstadt, Germany, in their annual report on grass seeds, issued September 10, say "the crops are on the whole by no means satisfactory. The early part of spring was unfavorable to the plants, night frosts in May and the large quantity of rain we had during summer have checked the development of the seeds and have been most deleterious during harvest time."

California Beans.

Ventura, Calif., September 20.—We are now having good drying weather. There will apparently be very little damage to the bean crop on account of the storm last week. The Henderson bush limas are shattering out some and there will be some loss on that account. HOGUE-KELLOGG Co.

Conviction Under English Fertilizers Act.

Robert Fussell, dealer and artificial manure merchant, was summoned at the petty sessions for selling artificial turnip and mangold manures deficient in potash compared with the invoice, the proceedings being instituted by the Wiltshire county council. The prosecution proved that the manure, though stated to contain 2 per cent of potash, actually only contained a half per cent. For the defense it was urged that, though there was a deficiency of 1½ per cent of potash, it was more than compensated by the excess of other ingredients. The bench imposed a fine of five pounds and thirteen shillings court fees, and allowed five pounds, five shillings costs to prosecution, making a total penalty of 10 pounds, 18 shillings.—Horticultural Advertiser, September 14.

California the World's Seed Garden.

In 1793 Cooper, Tabor & Co., of London, Eng., offered to the public seven varieties of sweet pea seed. Today the same firm offers, from a complete list, at least 700 varieties and the majority of them came, originally, from California. "Truly the world turns round."

S. B. Dicks, of the firm of Cooper, Tabor & Co., said as much this morning and, although not audible, the trace of a sigh escaped the lips of a man who has written the history of the sweet pea and is an authority on horticulture. Mr. Dicks is making his annual tour of the United States in the interest of his firm. Incidentally, one member of the firm has visited the United States for the past 82 years, without exception. Nowadays the tour is not complete without a visit to California.

"The time was," Mr. Dicks said this morning, "when England sent seed to California. Now California is sending seed to Europe and that is why I say the world is turning round. At one to England for the seeds that were time California was sending its money

necessary in its development. Now we are sending our money here for seeds that we distribute to the world.

"There are three special kinds of seeds in which the trade of Europe has been transferred to California, and to Los Angeles, I may say. First, there is the lowly onion. The onion is grown to greater perfection in California than in any other state of the Union or in Europe. At one time we drew upon the East for our supply of onion seed, but now we are coming to California and to Los Angeles. California has given the East a knockout blow, so far as onions go.

"Second, there is the seed of the lettuce. Lettuce is grown by the hundred thousand pounds in this state, I find. The seed is of particular value because of the state of perfection which it reaches. This climate allows it to grow to greater maturity and, consequently, is more hardy and even after two or three years is as good for our purpose as it was when first gathered.

"As for sweet peas, this is the market upon which the world draws for its seed. The culture of the sweet pea practically has been driven out of Europe because of disastrous seasons and has settled in California, where hundreds of acres of the greatest varieties are grown. Again, I say, the climate is responsible. Here the product may be cut, dried and threshed in the open field, while in Europe we are forced to cut, then stack and wait for favorable weather to thresh. All of these conditions have a bearing on the price of the seed. We can buy here and ship to Europe and sell the seed as cheaply there as we formerly did the home-grown variety.

"Germany, for many years, was the principal growing ground in Europe for asters. There again climatic conditions militated against the culture of the aster and of recent years it has been practically impossible to get satisfactory seed from Germany. The germinating quality was poor and the seed was deteriorated. Here the aster gets all the sunshine necessary and we find the finest seed now comes from California."

The sweet pea, no doubt, is Mr. Dicks' hobby. He is one of the founders of the National Sweet Pea Society of England, which has done more to foster the culture of the sweet pea than any other horticultural organization. Besides, Mr. Dicks wrote a history of the sweet pea which now is considered an authority.

The house of Cooper, Tabor & Co. has been in existence since the time of Queen Elizabeth. The head of the house was at that time a common councilman and Shakespeare was appearing in his Black Friars theater close to the spot where the London house of the firm now stands.

"I dare say we may have sold Shakespeare himself some seeds, although it is not recorded on our books," Mr. Dicks said this morning. "He probably paid cash, if he bought."—Los Angeles Express, September 7.

Market Gardeners

Greenhouse Vegetable Growers and Market Gardeners' Association.

C. W. Waid, New Carlisle, Pa., President; Franklin DeKleine, Grand Rapids, Mich., Vice-President; S. W. Severance, 508 Illinois Life Building, Louisville, Ky., Secretary; M. L. Rutenik, Cleveland, O., Treas. Annual meeting at Grand Rapids, Mich., Sept. 27-29.

Market Gardeners' Convention.

A SUCCESSFUL MEETING.

The third annual convention of the Greenhouse Vegetable Growers' and Market Gardeners' Association was held at Press hall, Grand Rapids, Mich., September 27-29, with an attendance of about 200. The meeting was called to order by President C. W. Waid at 9 a. m., September 27, when Mayor Geo. E. Ellis gave a cordial address of welcome, to which suitable response was made by Prof. Wm. R. Lazenby, of Columbus, O. The president then delivered his annual address and this was followed by the reports of the secretary, treasurer, state vice-presidents and standing committees. Floyd J. Zuck, of Erie, Pa., then read his paper on "Results of Local Organization." Then the meeting adjourned and reassembled at 1:30 p. m., when papers were read as follows: "The Use of the Greenhouse to Start Plants for Outdoor Crops," by W. J. Ritterskamp, Princeton, Ind.; "Outdoor Irrigation—When Practicable?" by H. F. Chester, Cleveland, O.; "The Relation of the Commercial to the Small Greenhouse Growers," by W. H. Weinschenk; "Pointers on Onion Growing," by Prof. A. McMeans, North Dakota Agricultural College; "Treatment of Greenhouse Soils for Continuous Cropping," by Prof. W. J. Green, Wooster, O., and "What Kinds of Vegetable Seeds Should the Market Gardener Grow for His Own Use?" by J. Vernon Sheap, Jackson, Mich. Assembling for the evening session at 7:30 p. m., the reading of papers was continued with the presentation of "Some Diseases of Forcing Tomatoes," by Prof. Thos. Gunson, Michigan Agricultural College; "Notable Truck Farms and Market Gardens," by Prof. R. L. Watts, State College, Pa., and "The Work of the Virginia Truck Experiment Station," by Prof. T. C. Johnson, Norfolk, Va.

The trade exhibits included the following: The Advance Co., Richmond, Ind., ventilating apparatus; Barday, Ayers & Bertsch Co., Grand Rapids, Mich., steam heating appliances; Foley Mfg. Co., Chicago, greenhouse building material; Grand Rapids Supply Co., Grand Rapids, Mich., pipe and heating material; Benj. Hammond, Fiskill-on-Hudson, N. Y., insecticides; G. H. Hunkel Co., Milwaukee, Wis., mushroom spawn; E. H. Hunt, Chicago, sprays, fertilizers, etc.; Ionia Pottery Co., Ionia, Mich., pots; S. M. Isbell & Co., Jackson, Mich., seeds and vegetables; Kroeschell Bros. Co., Chicago, boilers; John C. Moninger Co., Chicago, greenhouse building material; Perth Amboy Chemical Works, Perth Amboy, N. J., formaldehyde; Sunlight Double Glass Sash Co., Louisville, Ky., hot bed sash; J. P. Watts, Kermmoor, Pa., straw mats.

What Constitutes Good Seed Corn?

By far too many consider seed good simply because it will grow. To be first class, seed must be—

(1) Well adapted to the seasonal and soil conditions where it is to be planted.

(2) Grown on productive plants of a productive variety.

(3) Well matured, and preserved from ripening time till planting time in a manner that will retain its full vigor.

The importance of the three requirements just enumerated has been demonstrated experimentally by the Office of Corn Investigations of the Bureau of Plant Industry. The results given briefly, as enumerated, are as follows:

(1) For a series of five years 12 well-bred varieties were tested in 10 Northern States, equivalent lots of seed being used in each state. Varieties that produced most in some states were among the poorest in others.

(2) Seed ears taken from the highest yielding rows of ear-to-row breeding plats have repeatedly produced better than seed ears taken from poorer yielding rows. Seed ears from the best producing stalks found in a general field produced more than seed ears taken without considering the productiveness of the parent stalks.

(3) Four bushels of ears were divided into two equal parts, one part being well taken care of and the other placed in a barn as corn is ordinarily cribbed. The well-preserved seed gave a 12 per

cent increase in production on poor soil and a 27 per cent increase on fertile soil, notwithstanding the fact that both lots of seed germinated equally well.—Farmers' Bulletin 415.

MENLO PARK, CALIF.—The interests of the late M. Lynch have been incorporated under the title of the Lynch Nursery Co.

Birds are Beneficial.

In response to numerous complaints concerning depredations of birds in orchards and vineyards the Department of Agriculture has made a systematic investigation in California of the most important birds of that state from the farmers' and fruit growers' standpoint. A careful study showed that only four of the seventy species considered can be regarded as of doubtful utility. They are the linnet, California jay, stellar jay, and red-breasted sapsucker. Among the other species the swallows, swifts, wrens and chickadees, which are strictly insectivorous, are extremely beneficial. The bulletin suggests that farmers should look on birds as servants who have to be fed in return for the useful work they do.

Albany, N. Y.

Excellent progress is being made upon preparations for the second annual flower show of the Albany Florists' club to be held in the state armory under the auspices of the Tenth Regiment, N. G. N. Y., November 10, 11 and 12. At the last meeting of the show committee, copies of the premium list were distributed and encouraging reports on the compilation of the program were received from several members. Chairman Goldring announced that the first lot of tickets, 5,000, will be printed and distributed for sale immediately. This lot will comprise 1,000 single admission and 1,000 season. Efforts will be made to encourage exhibits from private estates in Albany and Lenox, Mass., and some of the premiums have been selected with that end in view. William C. Gloeckner reported upon a conference with Frank C. Herrick, president of the Albany chamber of commerce, in which Mr. Herrick was quoted as interested in the show and would at the next meeting of the chamber bring up the matter of offering a cup to be known as the Chamber of Commerce trophy, to be competed for under some one of the four classes in the premium list. President Herrick also offered the co-operation of William B. Jones, secretary of the chamber, in furthering the interests of the exhibition.

NOTES.

F. A. Danker, Maiden Lane, has employed Cornelius Hassell as chief clerk to succeed William C. Roche, who was drowned in Kinderhook lake during his vacation a few weeks ago. Mr. Hassell comes from Springfield, Mass., where he was in the employ of Mark Aitken. During the summer Mr. Danker has had considerable improvements under way in his place. A large McCray ice box has been installed in the rear of the store and with its plate glass front and white enameled trim adds materially to the appearance of all. Additional room has been obtained through the lease of the adjacent premises at No. 42 Maiden

A BLUE ROSE

The Greatest Rose Novelty of the Century

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

Lane and mechanics are at work fitting it up for use this fall and winter. The addition will double the room.

The Rosery, 76 Maiden Lane, reports a steady increase in volume of business. The proprietors, E. F. Meany and E. P. Tracey, have adhered consistently to the policy of buying only high class goods, with the result that they have attracted and are holding a most excellent trade. E. P. Tracey was one of the candidates initiated at the meeting of Albany Lodge, No. 49, B. P. O. Elks, on the evening of September 21.

Among the recent visitors were F. R. Pierson, Tarrytown, and Arthur Zirkman of M. Rice & Co., Philadelphia. R. D.

Dreer's Hardy Perennial Phloxes

We are the largest growers of Perennial Phlox in the world, having this season over a half million field-grown plants in stock.

The collection offered below embraces every known color in this gorgeous race of summer-flowering plants, and we are prepared to furnish many of the latter as well as the older standard varieties in large quantities at a low uniform price.

The plants we offer are all strong one-year-old field-grown, and will make a fine display of flowers next season.

Three Fine New Hardy Phlox

We would particularly call attention to the following **Three New Varieties** as not only the most distinct in color, but in every way superior to all varieties of recent introduction which have come to our notice:

Elizabeth Campbell. Very bright salmon-pink, with lighter shadings and dark crimson eye, an entirely new and much-wanted shade in Phlox.

Frau Anton Buchner. The finest white variety yet introduced, having the largest truss and individual flowers; of dwarf habit,

Rosenberg. Bright reddish-violet, with blood-red eye, large truss and individual flowers as large as a silver dollar.

PRICE: Any of the above three new varieties, \$1.50 per dozen; \$10.00 per 100; \$90.00 per 1000.

General Collection of Hardy Phlox

Albion (Medium). One of our own introductions; producing very large panicles of pure white flowers with a faint aniline-red eye.

Algae Adamson (Medium). Immense flowers, snow-white, with red eye.

Antonin Mercie (Medium). Light ground color, upper half of petal deeply suffused bluish lilac; large, white halo.

Bacchante (Tall). Tyrian rose, with crimson-carmine eye.

Beranger (Dwarf). Ground color white, delicately suffused with rosy pink, distinct aniline-red eye.

Bridemaids (Tall). White, with large crimson-carmine centre.

Belle Alliance (Medium). White, with large pure red eye.

Charles Sellier (Dwarf). Bright reddish violet, with large white star-shaped centre.

Clara Benz (Dwarf). Lovely carmine-rose, with darker eye.

Colibri (Tall). White, with crimson carmine centre; very late.

Consul H. Trost (Medium). Pure red, with bright French-purple eye.

Champs Elyses (Dwarf). A very bright rosy magenta of an effective shade.

Coquelicot (Dwarf). A fine pure scarlet, with crimson-red eye.

Caran d'Ache (Medium). Geranium-red, with old rose shadings and white eye; very effective.

De Miribel (Medium). White, suffused with bright rosy scarlet, red eye.

Diadem (Dwarf). A fine dwarf pure white.

Danton (Medium). Scarlet, with pure red eye.

Etna (Medium). Crimson red, suffused with fiery red; cherry-red eye.

Edmond Rostaad (Medium). Reddish violet shading brighter towards the centre, with an exceptionally large white centre.

Engene Danzanviller (Tall). Lilac, shading white towards the edges; large white centre.

Edmond Boissier (Dwarf). Bright reddish-violet, with large white halo.

Ecilar (Tall). Brilliant rosy magenta, with large lighter halo; an excellent variety.

Frau Dora Ungeler (Tall). Crimson red; a strong free-flowering late variety.

Gruppenkonigin (Tall). Delicate pale rose mauve with claret-red eye.

George A. Stroheim (Medium). Bright scarlet, with crimson red eye; does no bleach.

General Giovaninelli (Dwarf). Bright tyrian rose, with light shadings at the base of each petal; a pure red eye; very effective.

General von Heutz (Medium). Scarlet, with rose shadings and crimson-red eye.

Hermine (Dwarf). The dwarfest variety in our collection, never exceeding ten inches in height; pure white flowers of good size, early; unequalled for bordering; a perfect little gem.

PRICE: Any of the above General Collection, \$5.00 per 100; \$40.00 per 1000.

For a complete list of seasonable stock see our current wholesale list. If you have not received a copy it will be mailed to you on application.

HARDY PHLOX.

Helena Vacaresco (Dwarf). Very large-flowering dwarf; white.

H. O. Wijers (Tall). Glistening white, with bright crimson-carmine eye.

Henry Murger (Tall). Beautiful variety; white, crimson-carmine centre.

Henry Marcel (Medium). Pure red with very bright salmon shading.

Henry Royer (Medium). Tyrian rose, with lighter shadings; large flower.

Julia Cambon (Medium). Brilliant reddish-purple, with exceptionally large, pure white centre.

Jeanne d'Arc (Tall). A good standard late white.

Louis Blanc (Tall). Reddish violet, with purple shadings and darker eye.

La Vague (Medium). Pure mauve, with aniline-red eye.

Le Mahal (Tall). Deep reddish violet, with darker eye.

Le Fouira (Tall). Rich glowing French purple, shading crimson.

Louise Abbema (Dwarf). Very large dwarf, pure white, of fine form.

Le Prophete (Dwarf). Bright violet-rose, large light halo and bright rose eye; fine.

Mme. Paul Dutrie (Tall). A delicate lilac-rose, reminding one of some of the beautiful soft pink Orchids. The flowers are very large and borne in panicles of immense size.

Mozart (Tall). Ground color white, suffused salmon; aniline red-eye.

Mrs. Jenkins (Tall). The best tall early white for massing.

Obergartner Wittig (Medium). Bright magenta, with crimson-carmine eye; large flower and truss; one of the best.

Professor Virchow (Medium). Bright carmine, overlaid with orange-scarlet.

Pantheon (Tall). Bright carmine rose.

Pechaur d'Islande (Tall). Crimson-red suffused with cochineal-red and carmine red eye.

Prosper Henri (Dwarf). Pure white, with large decided eye of rosy magenta.

Pacha (Dwarf). Deep rose pink, suffused with solferino-red and carmine-purple eye.

R. P. Struthers (Tall). Rosy carmine, with claret-red eye; fine.

Sunshine (Dwarf). Large aniline-red, with crimson-red eye and light halo.

Selma (Tall). Large flower, pale rose mauve, with claret-red eye.

Siebold (Tall). Bright vermilion-red, overlaid with orange-scarlet; crimson red eye.

Sarabande (Medium). Reddish-violet, with lighter shadings.

Von Goethe (Tall). Tyrian rose, suffused with carmine-lake and carmine-red eye.

Von Hohberg (Tall). The ideal crimson Phlox, the richest of its color.

Vesuvius (Medium). One of our new seedlings; pure red, with bright purple eye; a dazzling color.

Von Lassburg (Medium). The purest white in cultivation; individual flowers larger than any other white.

Chrysanthemum Manual

40c, prepaid.

ELMER D. SMITH & CO., Adrian, Mich.

Cleveland.

Trade is beginning to pick up rapidly. Daily sales are showing a gradual increase. Roses are becoming a little more plentiful; Beauties are in good form, although mostly in medium sizes. Pink roses of all kinds are still short of the demand. Carnations are improving, a few growers sending in some very good flowers and long stems. New York state asters of rather a good quality are being shipped to this market. Orchids are expected to arrive almost daily now and will be a part of the regular stock. Good valley finds a ready sale and is quite plentiful. Swainsona is a good seller. The first shipment of boxwood is in, and the quality was never better, can be had regularly from now on. Adiantum and asparagus are good and clean up daily. Kaiserin roses are still coming in in good shape. In a few weeks the chrysanthemums will be in. Gladioli is becoming less plentiful, the demand far exceeding the supply.

The Ohio Floral Co. are going into a new store in the People's Bank Building, corner of W. Twenty-fifth and Franklin avenue, in the near future.

Southern smilax is much in demand at present, some very large orders the past week arriving on this market.

G. W. Mercer is now occupying his new store just completed, at 2991 W. Twenty-fifth street. C. F. B.

WE TAKE THE LEAD

In what? What a foolish question! Don't you know? Didn't you hear of GODFREY ASCHMANN, the great Araucaria Importer, Grower and Shipper? These so well favored, everlasting green decorative plants, the Araucaria Excelsa, Robusta Compacta and Excelsa Glauca, are in favor more than ever this year.

This is our 25th anniversary since we began importing Araucarias. Watch! See us grow! Beginning 25 years ago with 100, our this year's (1910) importation is 10,000, and more are coming this fall after I have made my selection of the choicest of the choice on my trip to Belgium; the growing district of the world in Araucarias and Azaleas. The trade is well informed that for many years past I go personally to Belgium to protect and elect for my customers the best of Araucarias, Azaleas, Palms, etc., that cash can buy there. Empty houses won't pay. Now is the time to fill your empty houses with something to grow into money while you are asleep.

Remember, it is the wideawake man that is not afraid to invest a dollar that makes the money. Please look at our special low prices for superior stock.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants, 5-5½-6-7 in. pots, 12-15 18-20-25-30 in. high. 3-4 5-6 tiers, 2-3-4-5 years old, 35c. 50c. 60c. 75c. \$1.00. \$1.25 to \$1.50 each. Robusta Compacta, Excelsa Glauca, 6 in. pots. \$1.00 to \$1.25 each.

Kentia Forsteriana, in fine shape 6-in. pots 30 35-40-45 in. high. 4-5-6 years old, 75c. \$1.00 \$1.25. \$1.50. \$2.00 to \$2.50 each; 4-in., 35c each 25 in. high.

AMPLE SUPPLY.

The past week has seen the finish of the asters and gladioli season and we must now fall back on roses, lilies and dahlias to supply the wants in the cut flower line. The supply of American Beauty roses is ample with a moderate demand. Taft and My Maryland have the call in pink while Ivory and Kaiserin are the best propositions in white. Carnations are arriving in increased quantities and the quality is improving daily. Lilies clean up nicely every day and about the only surplus is in the dahlia line of which the market is able to supply unlimited quantities. Cosmos is good property and there is enough green goods of all descriptions for all wants.

NOTES.

Tom Windram left Monday for Grand Rapids, Mich., to attend the vegetable growers' convention. From there he will go up to Snow Island and call on his friend, Wm. Murphy, who is still camping out up there in the wilderness.

Other visitors: Ben Thomas, Augusta, Ky., and a gentleman by the name of Green, representing H. Bayersdorfer & Co., Philadelphia, Pa.

Max Rudolph had quite a large opening the past week, using, among other flowers, 1,500 long-stemmed Beauties which E. G. Gillette supplied.

Gus Meier of the Hyde Park Rose Co. is visiting his brother in Knoxville, Tenn., and incidentally taking in the Appalachian Exposition.

Geo. F. Moon and wife of Rushville, Ind., were callers last week, having come down to take in the sights of the Ohio Valley Exposition.

Mrs. Wm. H. Sunderbruch has gone to Minnesota for an indefinite period on a visit to friends. S.

"The Florist's Trap"

MOREHEAD

The Remedy for Your Condensation Troubles. A Guaranteed Investment With Guaranteed Results.

STEAM TRAPS

RETURN. NON-RETURN. VACUUM.

YOU Mr. Florist, can save fuel—cut down labor—and grow better flowers by installing a Morehead Return Steam Trap.

In the first place, there is only a few degrees difference between the steam going into your heating system and the water of condensation coming from the returns.

It is very foolish, therefore, to cool this water down to a low temperature to pump back to the boilers when, by the use of the Morehead Steam Trap the same water of condensation can be returned directly to the boilers at a very much less expense than by any other method and without losing any of the heat contained in the condensation.

In the first place, to make steam from water, fuel is required to bring this water to the boiling point under the required steam pressure.

For every ten degrees added to the water by any other means, there is a saving of 1% on fuel.

You can readily see that the cooling of the condensation from 251 degrees down to 212 or less, to accommodate your pump means a considerable loss of heat fuel and money.

MOREHEAD Return Steam Trap will put this water back into your boiler at a still higher temperature than 250 degrees, and on 90% less steam required by a pump for returning the same quantity of water.

You then have a combined return trap and boiler feed outfit that will prove out to be one of the best investments you ever made.

Write for "Trap Book" and Trial Offer Proposition.

MOREHEAD MFG. COMPANY,
Dept. "N," DETROIT, MICH.

HEATING PLANTS

Standard Steam and Hot Water Heating Plants

WONDERFUL VALUES. We can positively save you from 30 to 75 per cent on Heating Equipment of all kinds. Our plants are of the most modern type, and only the highest grade material enters into their construction. We guarantee them to be exactly as represented, and highly satisfactory in every way. You run no risks. Send us a sketch or diagram of your building and let us make you an estimate.

Do Not Wait Until Cold Weather to Install Your Plant. Start Now

Send for our Special Heating Catalog, filled with valuable information; tells you every angle and phase of the "Heating Question," and how you can make one dollar do the work of two by installing the plant yourself. Ask for Booklet No. 47.

300,000 feet of Standard Pipe, all sizes, will be cut to any length.

ENGINES, BOILERS, VALVES AND FITTINGS.

BUILDING MATERIALS AND SUPPLIES

Send for our new 500-page Catalog No. 47. Free upon request.

CHICAGO HOUSE WRECKING CO.,

35th and Iron Sts., Chicago

Ready Reference Section.

10 CENTS PER LINE, NET.

ACHILLEA.

ACHILLEA "THE PEARL." Field-grown clumps, \$2.50 per 100; \$20 per 1,000. Wagner Park Conservatories, Sidney, O.

AMPELOPSIS.

AMPELOPSIS VEITCHI. 2½-in., fine stock, \$5 per 100. Wagner Park Conservatories, Sidney, O.

Ampelopsis Veitchii, 4-in., \$10 per 100. C. Eisele, 11th and Westmoreland Sts., Philadelphia.

ARAUCARIAS.

Araucaria excelsa glauca and A. robusta compacta. For prices see advertisement elsewhere in this issue. Vaughan's Seed Store, Chicago and New York.

Araucarias, excelsa, 4-in., 50c each; \$6 per doz. Glauca, 6-in., \$1.75 each. Compacta, 6-in., \$1.75 each. D. U. Augspurger & Sons Co., Box 394, Peoria, Ill.

Araucarias. For prices see advertisement elsewhere in this issue. Geo. Wittbold Co., 737 Buckingham Pl., Chicago.

Araucarias. For prices and varieties see advertisement elsewhere in this issue. G. Aschmann, 1012 W. Ontario St., Philadelphia.

Araucaria excelsa, 5-in., 50c each. C. Eisele, 11th and Westmoreland Sts., Philadelphia.

Araucarias, Anton Schultheis, College Point, L. I.

ASPARAGUS.

Asparagus plumosus, 2½-in., strong, \$3 per 100; \$27.50 per 1,000; 3-in., strong, \$5 per 100. Asparagus Sprengeri, 2½-in., strong, \$2.50 per 100; \$22.50 per 1,000; 3-in., strong, \$4 per 100. Skidelsky & Irwin Co., 1215 Betz Bldg., Philadelphia.

Asparagus plumosus, 2½-in., \$3 per 100; \$27.50 per 1,000; 3-in., \$6 per 100. Sprengeri, 2½-in., 2c; 3-in., 4c; fine 4-in. stock ready for benching, 8c each. Mosbak Greenhouse Co., Oxnard, Ill.

Asparagus. For varieties and prices see advertisement elsewhere in this issue. Geo. Wittbold Co., 737 Buckingham Pl., Chicago.

Asparagus Comorensis, 1-year clumps, \$5 per 100. A. elongatus, 1-year clumps, \$5. Geo. Reinberg, 35 Randolph St., Chicago.

Asparagus Sprengeri, 2-in., \$2.50 per 100; 3-in., \$3 per doz.; \$6 per 100. D. U. Augspurger & Sons Co., Box 394, Peoria, Ill.

Asparagus Sprengeri, 2-in., \$1.50 per 100; 2½-in., \$2.50 per 100; 3-in., extra strong, \$4 per 100. Wettlin Floral Co., Hornell, N. Y.

Asparagus plumosus, 2-in., \$3 per 100; \$25 per 1,000; 2½-in., \$4.50 per 100; \$40 per 1,000. Vaughan's Seed Store, Chicago and New York.

Asparagus plumosus, 2½-in., 3c; 3-in., 5c; 4-in., 10c. Asp. Sprengeri, 2½-in., 3c. Godfrey Aschmann, 1012 W. Ontario St., Philadelphia.

Asparagus Sprengeri, 2-in., \$2 per 100; 2½-in., \$3; 3-in., \$5. C. Eisele, 11th and Westmoreland Sts., Philadelphia.

Asparagus Sprengeri, 2-in., 2c. Byer Bros., Chambersburg, Pa.

Asparagus Sprengeri, 2-in., extra strong, 2c; \$17.50 per 1,000. J. L. Schiller, Toledo, O.

Asparagus Sprengeri, 2½-in., \$2 per 100. Jos. H. Cunningham, Delaware, O.

Asparagus Sprengeri, 2½-in., \$2 per 100. J. C. Schmidt, Bristol, Pa.

Araucarias, McHutchison & Co., 17 Murray St., New York.

ASPIDISTRAS.

Aspidistra lurida, variegated, 15c per leaf; plants, \$1 upwards. Geo. Wittbold Co., 737 Buckingham Pl., Chicago.

AUCUBAS.

Aucuba Japonica, 35c to \$3 each; also plants, \$4 to \$6 per doz. Anton Schultheis, College Point, L. I.

AZALEAS.

Azaleas, Deutsche Perle, Simon Mardner, Niobe, Van der Cruyssen, De Schryveriana, 75c to \$2 each. Godfrey Aschmann, 1012 W. Ontario St., Philadelphia.

Azaleas, Jacs Smits, Naarden, Holland.

BAY TREES.

Bay trees. For prices and sizes see advertisement elsewhere in this issue. Vaughan's Seed Store, Chicago and New York.

Bay trees. For sizes and prices see advertisement elsewhere in this issue. Geo. Wittbold Co., 737 Buckingham Pl., Chicago.

Bay trees. McHutchison & Co., 17 Murray St., New York.

Bay trees, Bobbink & Atkins, Rutherford, N. J.

BEGONIAS.

Begonia Gloire de Lorraine, 2½-in., \$2 per doz.; \$15 per 100; 3-in., \$3.50 per doz.; \$25 per 100; 4-in., \$5 per doz.; \$40 per 100. Vaughan's Seed Store, Chicago and New York.

Begonia Lorraine, 2½-in., twice transplanted, \$12 per 100; in 500 lots, \$50 the 500. Julius Roehrs Co., Rutherford, N. J.

Begonia Gloire de Lorraine, and Lonsdale, 4-in., 25c; 6-in., 50c. Godfrey Aschmann, 1012 W. Ontario St., Philadelphia.

Begonia Vernon, 4-in., \$1 per doz. C. Eisele, 11th and Westmoreland Sts., Philadelphia.

Begonia Glory of Cincinnati. J. A. Peterson, Westwood, Cincinnati, O.

BOXWOOD.

Box trees. For sizes and prices see advertisement elsewhere in this issue. Vaughan's Seed Store, Chicago and New York.

Box trees, all sizes. Ask for special list. Julius Roehrs Co., Rutherford, N. J.

Boxwood, McHutchison & Co., 17 Murray St., New York.

Boxwood, Bobbink & Atkins, Rutherford, N. J.

BULBS.

Bulbs, Paper White Grandi, \$8 per 1,000. Empress, Dil. von Sion or Princess, \$10. Empress, \$12. Stella, Figaro, Cynosure, \$2. Grand Monarque, \$5. The Leedham Bulb Co., Santa Cruz, Calif.

Bulbs. For varieties and prices see advertisement on 2nd cover page of this issue. Vaughan's Seed Store, Chicago and New York.

Bulbs, Callas, 1 to 1½-in., \$3 per 100; \$25 per 1,000. Berrydale Exp. Gardens, Holland, Mich.

Bulbs, Japanese lilies, Formosum, Gigantum, multiflorum, etc. McHutchison & Co., 17 Murray St., New York.

Bulbs. For prices see advertisement elsewhere in this issue. F. R. Pierson Co., Tarrytown-on-Hudson, N. Y.

Bulbs, Lilium longiflorum multi., 7-9, \$50 per 1,000. Gigantum, 7-9, \$65. Formosum, 7-9, \$65. Buds, 76 Barclay St., New York.

Chinese sacred lilies, \$3 per 100; \$25 per 1,000. Dingee & Conard Co., West Grove, Pa.

Bulbs, all kinds. J. M. Thorburn & Co., 33 Barclay St., New York.

Bulbs, all "Bofists" varieties. H. E. Fliske Seed Co., Faneuil Hall Square, Boston.

Bulbs, of all kinds. Henry F. Mitchell Co., Philadelphia.

Bulbs, of all kinds. Jas. Vick's Sons, Rochester, N. Y.

Bulbs. E. S. Miller, Wading River, N. Y.

CACTI.

Cacti. Over 100 varieties of cacti, from \$7 per 100 up. Write for 28-page catalogue and prices to the trade. Also Mexican Resurrection plants. The Francis E. Lester Company, Dept. 9, Mesilla Park, N. M.

CANNAS.

Cannas, fall or winter delivery. R. Vincent, Jr., & Sons Co., White Marsh, Md.

If You Do Not Find What You Need in Our Ready Reference Department, Write Us About It

Support Your Carnation Plants Properly and They Will Support You

No. 1.

With two rings \$16.00 per 1000; 5000 for \$75.00.
With three rings \$18.00 per 1000.

Now is the time to put in some of our Carnation supports to show you how much more practical, economical and serviceable they are above other makes. Note our reason:

No. 2.

1000 to 3000	per 1000	-	\$8.50
5000 to 10000	"	-	8.00
15000 to 25000	"	-	7.50
30000 to 50000	"	-	7.00

They are easily put up and just as easily taken down, no tangled mess of wire to store away. They pay for themselves quickly by the additional and superior blooms gained with the proper support your plants. Our No. 1 needs no overhead wires or strings except one thin wire which locks on the clamp in the support holding it upright and in place.

Our No. 2 support acts as a stool for your plants, allows no sagging. With this support you use overhead wires or strings to keep blooms growing erect. It opens on both sides so all side shoots can be put in easily at all times. Note the low prices.

C. C. POLLWORTH CO.,

Milwaukee, Wis.

SUCCESSFUL FLORISTS

all over the country are using McCray Refrigerators. The circulation of air is so strong and steady that there can be no stagnation or dampness, so that your stock will always be fresh and fragrant. Furthermore the saving in ice will more than pay for the cost.

McCray Refrigerators

will lend attractiveness to your shop. Beautifully made and finished, they are lined with white enamel, opal glass, tile, mirrors or marble, as you desire. Write today for our free catalog No. 72 which will give you ideas how to add to the attractiveness of your establishment.

MCCRAY REFRIGERATOR CO

269 LAKE ST., KENDALLVILLE, IND.

Birmingham, Ala.

The Amzi Godden Seed Co. gave a barbecue and outing to their employees and florists, and also the nurserymen and all connected with the florist business. Special cars took the party to West Lake, where they were met by G. B. McVay, vice-president of the Amzi Godden Seed Co. and A. J. Koenig, who had gone the day before to arrange the good things for the comfort and pleasure of their guests. They thoroughly demonstrated that they were experts at barbecuing and flinging soft drinks. We all know that A. J. Koenig is a good grower of judgment and ability. We all are of the

same opinion of any gentleman who was seen waiting on the ladies, they would have envied him I know.

After refreshments were served we went to the lake and enjoyed boating and swimming. Here we found W. A. Luther, the Ensley florist, demonstrating his ability as a swimmer and teaching a lot of young ladies how he performed in the water. We missed the presence of George Luffman as he is a good fisherman. I believe we had the oldest florist in the south with us Dan Ire—he celebrated his seventieth birthday that day. When asked how he felt, his reply was: "Why, boys, I am the youngest one here!" It certainly looked that way for he was having as much fun as a sixteen-year-

old boy. "Long may you live, Dan," was the boys' toast that day for there are but few of the old school left. A very enjoyable day was spent, every one having a good time. The firm of Amzi Godden does things right, both business and pleasure. Every one returned home happy, without a single accident, and wishing the firm a great success throughout the whole year.

ZANESVILLE, O.—J. T. Goodlive has moved from his Main St. store to North Fourth St. in the business section. The new store has been thoroughly renovated and equipped with refrigerators, and nicely stocked with the necessities of the trade.

Tacoma, Wash.

NORMAL BUSINESS.

We just wonder why there had to be but one report concerning business conditions in Tacoma that had to be emphasized as "rotten." Just one that is engaged in the business here gave a version of business conditions with such a gloomy expression. One or two spoke of having it rather easy to get out the orders, but taken as a whole reports show a good average business, better than in previous seasons, so the end of the dull season that approaches very soon will speak the season of 1910 as being good for the florists. Reports from those engaged in growing vegetables under glass tell of a good season and prices up to former seasons. The end of the tomato crop under glass with most growers was a month ago and some are already beginning the preparation for another season. The one variety claimed the best and most profitable is Comet. It's the best in this locality and every one has the same report about its good qualities. The planting in of new field grown plants of carnations is finished in and near Tacoma and in most every case was a success. Generally the plants were of good size and lifted well. A few tell of them starting slow and are already worrying about a late crop. The numbers planted are practically the same as last season and as to varieties they are Enchantress, in white and pink, some Craig, Beacon, Victory, a few Lawson and they all tell of the same new ones, "nothing new." The new public market at present contains three floral booths, but none were making anything during the warm dull season. Talk about fine asters! We believe this our best season in that line and wish some of our eastern friends could see some real asters. Crego is the leader here.

AN ENTERPRISING FIRM.

The Northwestern Floral Co. is now closed inside its new range that has been added on this summer and carnations, mums and a house of ferns are simply fine. The new addition puts them equal to any floral establishment in our city and the houses while they may be classed rather past style and of the old wooden type, will certainly be good producers. Steam heat is to be used and we should think a 50 horse power boiler well fired will be able to maintain the heat desired. This firm has a general retail trade at the greenhouses and in past seasons took many contracts for gardening work. At present they are arranging to grow plants and cut flowers more extensively and have rented a store room in good location with intention of opening up in the store line with cut flowers, plants, seeds and bulbs. More about the store later on. Some mums are showing color very nice and promise some good large blooms mostly of the yellow and white colors. We often wonder why old Glory of Pacific is never grown as an early pink out here. Some well grown plants in pots would sell and pay a good profit—but there is absolutely "nothing doing." We fail to see any neater office or salesroom anywhere in the West than this firm has and lately the street has new pavement, so they may soon begin to wonder as others have done about whether the property can be kept so it will pay any good per cent on what they are forced to have in the property investment. Sometimes it would pay best to get out of business or rather to move out.

S. L. H.

OMAHA, NEB.—The Annex Flower Shop adjoining the Brandeis theatre opened September 12. The appointments and interior decoration are quite unique.

Rope and Paper From Cacti.

That the cactus plant, which grows in abundance in the western part of Texas and throughout Mexico, is of real commercial value and will revolutionize the rope and paper making industry is the belief of P. S. Tilson, manager of the Houston Fabrications, and an experienced analytical and consulting chemist. For some time past Mr. Tilson has been conducting experiments with the leaves of the cactus plant in his Houston laboratory. "I am convinced," Mr. Tilson said recently, "that an excellent quality of rope and good wrapping paper may be made from the leaves, and that valuable alcohol may be extracted from the pulp."

When the leaf was procured and the experiments started the first thing done was the separating of the fiber from the leaf. The fiber is easily extracted and requires no chemical treatment afterwards—only a very thorough washing and drying. The fibers, which are from one to three feet in length, are stronger than manilla or cotton fiber, and, unlike them, can not be picked apart. A dozen strands twisted together can not be broken by the average man.—Commercial Fertilizer.

THE CAMP CONDUIT CO.
Garfield Bldg., Cleveland, O.

Morristown, N. J.

The Morris County Gardeners' and Florists' Club met September 14, after two months' vacation,—for some of them; others had to scratch. About thirty members were present and the big flower show we are going to have was the talk. The Whipping River Club, where we had made all arrangements to hold the show, was burned to the ground last July. That left us high and dry, not a drop of water to sail our boats on. Dr. D. H. McAlpin and Robt. D. Foote, always our steadfast friends, got in harness and we were able to get the club house of the Morris County Golf Club, lots of room, very near Convent Station and easily accessible in every way. The members of this exclusive club, as well as those of the Whipping Club, are with us in our effort to have a "banner show." Wm. Duckham, chairman of the flower show committee, has worked strenuously and used rare judgment in handling delicate questions that came up to him. We consider that so far as we are concerned we have a better place than even the Whipping River Club. Arthur Herrington has taken measurements and is ready now to answer intelligently all questions about space. Our schedule, which we were unavoidably delayed in getting out, will be ready in a few days and will then be mailed. E. R.

NEW HAVEN, CONN.—A beautiful display of dahlias, gladioli, and asters was shown at the meeting of the County Horticultural Society, September 14.

HENRY A. DREER,
714 Chestnut St., Phila., Pa.

Chester, Pa.

Mrs. E. M. Bartow, who succeeded to the business of her father, the family having been in the florist business for forty years, has a very nice store in the heart of the city and does a good business in decorative and funeral work.

Milton H. Bickley is preparing to force about 195,000 bulbs of narcissus, tulips and hyacinths. As he has a very small glass area, it is a wonder to many how he manages it so successfully.

M. E. Pierce is another of the old time florists with a considerable glass area. He can talk interestingly on the various features of the business.

J. F. Scullen now conducts the greenhouses at Fifteenth street and Edgemont avenue formerly run by Mr. Wilson.

Harry E. Bloom now conducts the business at 1805 West Third street formerly run by J. Croucher.

T. H. Sutcliffe, the bachelor florist, keeps busy and is showing quite a variety of stock.

Pay for themselves in a single season

Sunlight Double Glass Sash will more than pay for themselves in the better, earlier crops that will bring the big prices on the early market—and in time and labor saved in caring for the beds.

You never have to cover Sunlight Sash

You can throw away expensive boards and mats. You can save all the time you now take to cover and uncover the beds—because Sunlight Double Glass Sash have—

Two layers of glass instead of one

(See diagram above)

Between the two layers of glass is a $\frac{3}{4}$ inch layer of dry still air. This transparent blanket is a perfect non-conductor, keeping in the heat—keeping out the cold—permitting the plants to get all the light all the time, which means bigger earlier plants. Glass is held in place without putty. Cannot work loose—easily replaced.

Agents Wanted: A splendid opportunity. Write for details.

Send for these two books

1. Our Free Catalog—Contains the details of this new invention for hot-beds and cold-frames—our freight prepaid and guaranteed delivery proposition.

2. Send 4c in stamps for a valuable booklet on hot-bed and cold-frame gardening by Prof. W. F. Massey. There is no higher authority in the country. This book will interest the most expert gardeners.

Newport, R. I.

The exhibition of the Newport Horticultural Society opened at Masonic Hall, Newport, on September 24. It was one of the finest shows ever held by the society, both in display and number of exhibits. An interesting feature was an exhibit by the Rhode Island State College of insects which are harmful to plants and trees. The principal awards were to Miss Fannie Foster of Boston in the yellow dahlia classes: Mrs. William Leeds of Newport in red dahlias; Mrs. T. O. Richardson of Boston for pink dahlias; Col. John Jacob Astor of New York for foliage plants, and Mrs. Robert Goellet and Mrs. August Belmont ferns and decorative plants. There were twelve exhibits of table decorations. The prize for the best decoration of any kind of flowers and foliage was won by Oscar Schultz. For the best decoration of out-of-door flowers and foliage Mrs. William Storrs Wells, and the third class, which called for a more elaborate decoration, Mrs. R. L. Beekman. The committee of arrangements was James Robertson, John A. Forbes, A. S. Meikel, John B. Urquhart and W. F. Smith, and the reception committee were J. J. Sullivan, Alexander McLellan, Bruce Butterton, James McLeish, Andrew K. McMahon and Richard Gardner.

PERFECT PLANT FOODS.

THOMSON'S Vine, Plant and Vegetable MANURE

Unrivalled for vines, tomatoes, cucumbers, all flowering foliage and fruit bearing plants; vegetables, lawns, etc. Has stood the test of 30 years. The result of many years of practical experience.

Sold by leading American Seedsmen.

Also Thomson's Special Chrysanthemum and Toppresing Manure, An Excellent Stimulant.

Freight paid on quantities; liberal terms to retailers. Write for our special offer to the American trade. Agents' circulars, pamphlets, etc. to sole makers.

The Mastin Automatic Whitewash and Spraying Machine Is Reliable, Practical and Durable

The tank is made of galvanized sheet steel, and in brass. The pump is of brass throughout, simple and powerful. The mixing device keeps the contents of the tank well stirred up from start to finish.

When the machine is filled to within six inches of the top, a few strokes of the pump will compress enough air in the tank to produce a continuous mist-like spray for 15 minutes.

All parts are made to gauge and may be had for repairs.

Ask your dealer about our **Extension Hose, Extension Rods,** and the **Mastin Whitewash Nozzle** for Bordeaux mixture.

Sold through Seedsmen, Dealers in Florists' and Poultry Supplies.

J. G. MASTIN & CO., 3124 West Lake St., CHICAGO, ILL.

Garman's Antipest

INSECTICIDE AND FUNGICIDE
For the Garden, Orchard and Greenhouse
Non-poisonous and harmless to vegetation.

Kills Green Fly, Aphides, Bark Lice, Thrips, Mealy Bug, Red Spider, Scale, Wire Worms, Ants and Slugs.

This is the Grower's Friend. Handy to use, cheap and effective, mixes readily in water. Destroys all insect pests and keeps down filth. Circulars on application. **\$1.50 per gallon.** Also in quarts, half gallons and in bulk.

HALF HOUR CHAPTERS FOR PLANT GROWERS

Primula Obconica.

Primula obconica is now very ex-
tensively grown for the holiday and
winter sales and is a very handsome,
useful plant. The growth of this plant
has been very well covered in our notes
for three years past. This variety will
need a little warmer location than the
Chinese Primulas, but if good saleable
plants are wanted, space must be left
between them to insure growing room.
Watch for white fly, this little pest is
very difficult to destroy, and the hairy
growth under the foliage is a veritable
nest for it. Hydrocyanic acid gas is the
only sure method of destroying it, but
this must be used with care and con-
tinuously if these insects secure a firm
hold. Constant syringing under the
leaves during bright weather will keep
them down. This variety of Primula
is extensively used as a cut flower in
some localities. Remember always that
primula obconica is a very irritable
poison to some people, but quick relief
may be obtained by the use of tincture
of red puccoon or red root (*Sanquin-
aria Canadensis*), which is also very
efficacious in Rhus poisoning.

Azalea Indica.

There is no plant that has pushed
itself into public favor more rapidly
than the Azalea, especially those that
can be brought into bloom for Christ-
mas. While it is yet a little early for
the plants, that are to be imported,
to arrive, yet it is time to be getting
ready for their reception, for they have
been a long time in transit and should
be taken care of immediately upon
their arrival. See that you have Aza-
lea pots enough to plant them in, that
is, the half size pot, for they are much
more salable in this than in the stand-
ard sizes. Have your loam all ready, it
is not necessary that it be peat, for
any good fibrous loam with a little
sand mixed through it will answer your
purpose. As soon as the plants ar-
rive, get them moving as soon as pos-
sible, they have been out of the ground

for some weeks and early attention will
better guarantee good results. As soon
as the plants are taken from their ship-
ping case they should be examined to
ascertain if they are in a dry condi-
tion and before potting should be
plunged in a pail of water that the
ball may become saturated with mois-
ture. While many growers advocate
potting direct from the packing case
and then soaking the soil in the pot,
yet this will take a number of water-
ings, and if not thoroughly done will
result in the loss of much of the foli-
age. Firm the soil well in the pot and
place the plants in a cool, shady loca-
tion and syringe frequently until the
leaves take stiff upright position and
healthy color. They may then be
placed in the full rays of the sun and
in the house where they are to be
grown. Occasionally the query is asked
how long will it take to bring an Aza-
lea into bloom for Christmas. A great
deal depends upon the condition of the
stock and the care that it receives
upon arrival, but eight weeks in a
temperature of 60° at night and kept
warm and moist during the day will
produce good plants of the earliest va-
rieties, but if Hexe is desired for
Christmas, it will be necessary to give
a warmer location.

Cyclamen.

The approaching cool nights spurs
this plant into a rapid, luxuriant growth
if the summer treatment has been con-
genial. They should be given a light,
airy location not too far away from
the glass and a temperature of as near
55° as is possible should be maintained.
The handsome foliage with which this
plant is decorated and which so en-
hances its value should be very care-
fully watched, for red spider finds a
ready foothold on the thick fleshy
leaves and soon ruins the plant. Care-
ful syringing on the under side of the
foliage will eradicate this pest. As
soon as the buds begin to set keep an
eye out for thrips who work sad havoc
among cyclamen at times, a little to-

bacco dust sprinkled around the bulb will keep them in check.

Primula Sinensis.

While the Chinese primroses are not as popular or in as good demand as they formerly were, the newer plants having thrust them into the background, yet well grown specimens find a very good sale. They should now be making a good strong growth and, though a cool growing plant, should be placed in a position where they can

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Window Decoration at Washington, D. C.

A good window decoration is always a paying investment for a retail store, and it is pleasing to note that, each year, retail florists all over the country, pay more attention to this class of work. During the past summer aquatic and rustic scenes have been in vogue.

Making Florists' Places Attractive.

That florists in general do not pay more attention to home decoration, and in endeavoring to make their places attractive, and to use their surroundings for advertising purposes, has been remarked and written upon for years, but occasionally we see a residence of a florist, that immediately engages the attention of the passerby, and the thought of what many others might do is impressed upon our mind. The planting of shrubbery, and bedding out the blooming stock, which the florist endeavors to make his customers believe he knows how to do, would certainly receive an impetus and convince that same customer, if he endeavored to make his own grounds beautiful and keep them so.

We know that in many cases the florist's grounds are, like the shoes of the much quoted shoemaker's wife, the last that receives his attention, but outside of the artistic view, is this good business? In walking through the large cities, every one must notice that the large stores are spending money lavishly on their show windows, buying expensive goods for that purpose only, and the enterprising florists are placing their most attractive blooms in their windows in order to induce the customer to enter and buy, but, sad to relate, there are many florists throughout the land who, having the goods wherewith to adorn their homes and places of business, neglect this great opportunity to impress upon their buyers the capabilities, not only of themselves but also of the beautiful works of nature with which they labor. While the majority of these endeavor during the winter to make their greenhouses attractive to the eye, yet, they seem to forget that more people are passing their places in the summer than in the colder months and a place well adorned will make the passerby remember where to find the florist when wanted. But if the door is left littered with empty dirty flats, the frames in front of the homes left just as the last lot of pansies was lifted, or the bedding plants taken out, and numerous other neglectful things which it has been our privilege to notice, it certainly does not induce the strangers to remember the location

AN ATTRACTIVE FLORIST'S PLACE.

Mrs. A. S. Fraleigh's, Holyoke, Mass.

be easily protected, and if in a climate where cold nights are expected, where a little mild heat can be granted. They should not receive any check at this stage of their growth. Give each plant plenty of room; it is a great mistake to crowd the pots so closely together that the plants have no room to make proper growth and consequently stretch themselves all out of shape. Stand them up on the bench or bed so that the foliage does not touch the boards or dirt. The smaller plants or those that have grown one sided can very soon be used in making up pans, four to six, according to size, in an eight-inch bulb pan, these, if well grown, will find good sale at Christmas.

Asparagus Sprengeri.

If you have a few plants of this useful variety left over after planting out the beds, make up a few pans, placing four or five in a 6-inch pan eight or ten in an 8-inch pan and grow them on until Christmas. They will make a very saleable article during the early winter, but they are great root producers and by the early spring months the pans will be so full of roots it will be difficult to keep them watered. These small plants can also be used in the wire hanging baskets. Place sphagnum moss around the sides and in the bottom of the basket and fill with soil and then plant the basket full of the small plants, top, sides and bottom. This makes a very effective winter hanging basket.

The accompanying illustration is of a window in the store of the Washington Florists' Co., Washington, D. C., of which Otto Bauer is manager. As will be noted, there is an artificial pond filled with lilies and various aquatics. A rustic walk leads to the large summer house in the rear, in front of which the Japanese lanterns are suspended. To the left is a mass of clematis, with wild asters, gladiolus and various other flowers and foliage plants throughout. The other rustic features can be readily recognized. This window received much favorable comment.

AN ATTRACTIVE FLORIST'S PLACE.

Mrs. A. S. Fraleigh's, Holyoke, Mass.

SAN FRANCISCO, CAL.—The state floral society will hold a flower show at the Fairmont, October 20-22, 1910.

WINDOW DISPLAY OF WASHINGTON FLORISTS' CO., WASHINGTON, D. C.

with respect, or enter the grounds and receive attention, for if the proprietor is too busy to look after his own grounds he is too busy or too lazy to wait upon a new customer and attend to his wants.

But let us look at the other and the more prosperous side, and the writing of the above was induced by receiving the accompanying photographs which show what can be done in a short time and by the proper spirit. They picture the home and business location of Mrs. Amelia S. Fraleigh of Holyoke, Mass., and we insert the following quotation from "The Past and Present Progress of Holyoke." The scientific cultivation of flowering plants is successfully carried on in Holyoke by Mrs. E. S. Fraleigh, at 10 Clark street. The industry dates back only three years, but during that time it has steadily increased in output, requiring added facilities from time to time. One large conservatory 74x120 feet is devoted to violets, geraniums, bedding plants, etc., and cut flowers are furnished for private or public functions, and floral designs for weddings and funerals.

Mrs. Fraleigh takes a deep interest in her work, has a natural bend for floriculture and no doubt in the near future will be compelled to add to the size of her plant. She is a Pelham (Mass.) lady and highly esteemed in social circles for her many admirable

qualities, is a member of the Civic Improvement association, also of the M. E. Church Home Department and the Rebekahs.

Store Wisdom.

Now that the town residences are opening up there will be a hurryup call for the filling of the fernery. This little table ornament is generally the first order of the returning family and while not much in itself is often the key to a whole lot of business, in fact, this same small spot of green is frequently known to make or lose a customer and the careful handling of this commission is most important. When the fires are going complaint is frequent that ferns did not last a week, in fact, some of them died in a day or were dead when they arrived, must have been frozen, and so forth. In such cases as these it is best to repair or refill without question, sending the dish back by a competent person who will see the party who has the care of the ferns and explain the best manner of treating as to watering and position. A careful record should be kept of the kind of ferns and the quantity used, as certain varieties are favorites with some on account of their grace and supposed hardiness, while others prefer different sorts for the same or other reasons. It is best to have the filling of these dishes in the hands of one man, as he gets to know the wishes of the customer. It

is important to have a record of date of each filling, as so often it is reported it only lasted a week when on reference to the book the time is found to have been three weeks or perhaps longer. The number of ferns used is also important, as sizes of ferns vary with the season, the large bushy plants of the fall being as a rule much better than those delivered later in the winter, and when the price is first for seven to ten ferns and later for twelve to fifteen, it takes a lot of explaining to account for the difference, and often there are missing dates in the fern book, as they try to see if they cannot do better elsewhere.

It is the little things that count and every complaint, however small, should be investigated and in nearly every case even what looks like rank injustice against the firm should be overlooked and the customers satisfied. Charge up to profit and loss, but don't let a customer go out with a grievance, it is bad policy. When errors of omission or commission are made and they will occur at times, it is best to straighten them out at once, in fact, it is imperative that they be rectified at the earliest possible moment and the greatest willingness shown to rectify the mistake. When the wrathful customer comes in fairly boiling over, it is best to hear his complaint patiently; don't stop him with excuses, he is in no mood for them and they only add fuel to his fire. When he has

cooled down a bit ask him what he would like you to do in the matter, state that you will make every reparation in your power and in a short time he goes away in a satisfied and entirely different frame of mind. K.

CHRYSANTHEMUMS

Cultural Notes.

The time is at hand when frosts may be looked for any night and a little steam heat in the houses will be a necessity, but do not rush things along in this respect until conditions of temperature and dampness demands that the heat be turned on. Chrysanthemums love a cool, fresh temperature, particularly at this time, when the hardening of the wood is taking place and a close moist atmosphere must be avoided, plenty of ventilation should still be given on every favorable night. It is a serious mistake to close down the ventilators tight, during the night, with the idea of keeping up the temperature in this way, because this will cause dampness, resulting in the spotting of the foliage, rust and other diseases. When firing has to be resorted to the best system to adopt is to turn on a little steam, using a single line of pipe, to the house whenever the heating arrangements will permit, leaving the ventilation on a little at this same time. This will insure against any dampness and provide a free current of fresh air. A night temperature around 45 degrees is best suited to the plants until the flowers commence to show color, after which a raise of two or three degrees will be necessary for their proper development and to guard against the damping of the petals. Guard against a high, close temperature at any time, it having a tendency to cause soft petalage that will burn very quickly from the sun on bright days.

The buds on the very late varieties are showing up very fast and they should be taken as soon as large enough

to handle safely; these late varieties require more frequent waterings than the earlier and midseason varieties which have their buds well developed by this time, and consequently do not need as much moisture after this; but it is different with the late sorts, the aim being to keep them in active growth as long as possible so as to throw their blooming period to as late a date as you can. Plenty of light, fresh air and strict attention to the watering are essential to the well-being of late chrysanthemums, they being very subject to mildew and rust if treated to close, stuffy quarters.

The plants lifted from the frame or field for sale as pot plants must now be given every encouragement to get a good root hold of the soil. Do not crowd them at all but give plenty of space between each plant for it to get into shape. As soon as the roots show prominently through the soil in the pots applications of weak liquid manure should be given every few days; also, attend to the staking to allow for good shapely plants and get after aphids continually by frequent fumigations.

Now is the time before the heavy cutting commences to arrange for the shipping boxes and other material such as tissue, manilla paper or old newspapers necessary for carrying on this work. Also for small barrels so that the flowers can stand in water for several hours to give the stems a chance to draw up some water before being shipped. The early varieties in season the latter part of September or early October will soon be in full blast and cutting and shipping of the blooms will be an important work. Do not cut the blooms when very young but allow them to get well developed before cutting; a flower cut when only partially developed will not keep as long as one which has been allowed to get more fully matured, but they should not be allowed to remain on the plants until they begin to fade.

C. W. JOHNSON.

Pansies After Chrysanthemums.

ED. AMERICAN FLORIST:—

Will you please tell me if pansies do well in solid beds to follow chrysanthemums and oblige?

SUBSCRIBER.

We cannot recommend that pansies follow chrysanthemums if it is subscriber's intention to use the same soil as the chrysanthemums have been growing in, never having been able to get very good results from any plant when having had to follow this plant, our impression being that there is something about the particles of chrysanthemum roots (that it is next to impossible to remove from the soil,) that other plants do not like. But pansies can be made a successful crop to follow chrysanthemums if proper conditions are prepared for them. I would advise taking off about 4 inches of the top soil of the bed, then fill it in with a light soil comprised of two-thirds light loam and one-third well rotted stable manure. The soil should be made as fine as possible, pounding up any hard lumps to give the fibrous roots a chance to work quickly. Stock transplanted now will be just right by the time the chrysanthemums are out of the way. Grow cool, ventilate freely and pay strict attention to keeping them free of insects.

C. W. JOHNSON.

Summer Roses Under Glass.

ED. AMERICAN FLORIST:—

Will it pay to grow roses for summer blooming only under glass for the wholesale market? Is white Mamam Cochet as good for the purpose as Kaiserin? Would any other variety yield a better profit? W. E. M.

Decidedly, if there are any retail stores within shipping distance. The Cochet roses, both pink and white, are the very best varieties to grow for this purpose. They bloom freely, have good substance and last longer than any other variety. Kaiserin and W. R. Smith are both good varieties but lack the lasting qualities of the Cochets.

W. L.

H. B. McCULLOUGH'S CAR IN CINCINNATI AUTOMOBILE PARADE.

CAR DECORATED BY EDITH F. KYRK, AWARDED SECOND PRIZE IN CINCINNATI AUTOMOBILE PARADE.

THE CARNATION.

Carnations in the South.

The evenings are now getting much cooler and carnations planted early are beginning to show decided signs of growth. It is still too early to begin feeding, but the beds should be kept regularly worked and free from weeds. If not already done give the plants the first wire in the tying up process. It is so much easier to do this now than to wait until the plants have made a heavy growth before beginning. It is always better to push the work than let the work push you. Plenty of ventilation day and night is still the rule. I find it a benefit to let the houses run down to 45° or even 40° at night for a few times before starting the fires. When such is done, do not attempt the first night of firing to run the temperature up to the standard, but gradually raise it a few degrees each night until it is attained. There are sections in the South where a night temperature of 50° to 52° can be fairly well maintained all winter, but other extreme southern sections have so many warm spells that this is impossible. In such places it is well to run the night temperature a little higher, say 54° to 58°, and avoid the fluctuations as much as possible. The ventilators, of course, should be opened a little under such treatment.

Many growers who depend on the North for plants have not yet planted, but the present is a good time. A mixture of whitening and water applied to the inside of the glass either with a brush or a syringe is the best material for a shade. This breaks the force of the sun sufficiently, but allows plenty of light in the house and the danger of developing stem rot is much less than when a heavy dark shade of mud or clay is used. A fine spray from the

hose will quickly remove the shade when needed. The plants should be watered individually so as not to have the whole bed soaked. By using a spray nozzle and spraying half a dozen times each day for a week the plants will keep fresh and vigorous and take a quick hold in their new quarters. A little of the shade can be removed in a week and all of it in two weeks. When ordering plants from northern points be sure to insist on having them packed as dry as it is possible to get them. A little slightly damp moss is permissible in the bottom of the box, but no more. When packed wet the plants heat up in the box and when unpacked the roots are completely rotted and the whole shipment is fit only for the rubbish pile. A plant once heated in transit never "comes back." On the other hand plants packed dry come through in fine shape and give complete satisfaction at both ends.

WM. LEAR.

Rust on Carnations.

ED. AMERICAN FLORIST:—

Herewith are specimens of carnation plants infested with rust. They have been transplanted into the house four weeks and made no growth at all. What remedy would you advise for the trouble?

E. H. T.

We do not find any rust on the specimen carnation plant received, but it is badly affected with Leaf Spot and Bacteriosis. The plant has the appearance of having been subjected to very wet conditions or being grown where the weeds have been allowed to smother up the growths. The growth of the plant also indicates that the shoots have been allowed to get beyond control before topping back, the plant under notice plainly showing the effect of it by the hard ends of its shoots. The roots were in fine condition upon arrival and we set the plant out in the

garden, and after three days new roots commenced to push out. We would advise spraying the plants with Bordeaux mixture about once in ten days, then give clean culture by keeping the soil free from weeds, the surface cultivated regularly, water only when the soil is dry enough to water thoroughly and lastly ventilate freely. Remove any affected leaves from the plants and get the plants supported so that the shoots do not lay on the soil.

C. W. JOHNSON.

Heating Carnation Houses.

ED. AMERICAN FLORIST.

I have one house 17x70, which is piped with one 2½-inch flow and six 1¼-inch returns. Is this sufficient piping to heat a house in which carnations are to be grown in a climate where the out-door temperature falls to 20 degrees below zero? I have also one house 20x30. How should this be piped to ensure the heat necessary to grow carnations? Would a Hub hot water heater rated for 1650 feet of heating surface with a 28-inch round fire box be sufficient to heat both houses?

AMATEUR.

Especially under the severe conditions mentioned, it will be necessary to use twice as many 1¼-inch returns as proposed by "Amateur." While this might be handled by one 2½-inch flow, better results will be secured if two or three flow-pipes are used. Unless the returns are considerably above the boiler, it is not advisable to use as small as 1¼-inch pipes as returns. Provided two 2½-inch flows are used, nine 1¼-inch, or seven 2-inch returns will be required.

For the house 20x30 feet, a temperature for carnations can be obtained by using one 2½-inch flow and nine 2-inch returns; or, two flows and seven returns would answer if the house is well built and somewhat sheltered. If

the boiler is up to its rating, it should suffice to heat two houses if it had a 25-inch fire-box, although there would probably be very little loss in fuel and perhaps a slight saving in the care required if a somewhat larger size is used. L. R. T.

Holland.

Paper read by R. Vincent, Jr., White Marsh, Md., before the Florists' Club of Philadelphia, October 4, 1910.

To the students of history, Holland appears as the arena, in which was fought out one of the hardest fights of the world's history, for existence. Not only in fighting its enemies, of which it had many, a hard fought

others in carriages carrying huge bouquets, every one, rich or poor, seem to delight in carrying flowers, which are to be obtained from vendors for a mere trifle. All the way from The Hague to Haarlem, if one was without the small trifle wherewith to purchase, the courteous bulb grower would willingly make anyone a present of all the blooms he or they might want. It is the roots he wants, not the flowers. They have to employ men to pick the flowers off and cart them, or boat them off to the manure pile. The word cart is rather a misnomer in this case, as the boat is the Dutchman's cart. The admiration which one cannot but express as he views the brilliant patches

with to adorn their gardens, but speculators who bought and sold the bulbs simply because they were in demand. While greater demand occasioned fabulous prices, houses, land and property of all descriptions were bartered for bulbs. The inns and places of resort became places for bulb trading, and many homes were ruined by the wild speculation which for a time ran riot over the bulb growing section of Holland. In 1637 laws were passed that stopped illegitimate speculation, and with that came a drop in prices that had existed only on paper, some of them provisional. It was about the end of the seventeenth century that some Haarlemers exported bulbs to other countries for the first time, they therefore became known as Dutch bulbs.

The cultivation of the tulips commenced about the end of the sixteenth century, when the tulips, in preference to all other bulbs, became very popular. In the early part of the seventeenth century there were many passionate and fascinated lovers of the tulip in Holland who vied with one another in their collections, and efforts to obtain newer varieties. Enormous sums were paid in order to secure possession of special varieties, which to-day no one would think extra good. We are told of a very rich merchant who thought he owned all there was of a very fine sort, but to his consternation he learned that a Frenchman near Paris had the same variety. This was such a grievous matter to him that he seized the first opportunity to go to the Frenchman's place near Paris, which was no easy matter in those days, but when he got there he found that the report was correct. After a good deal of talk and barter he succeeded in buying the tulips from the Frenchman for a thousand ducats, after which he completely mashed them up under his feet. This was done, as transporting the bulbs home would have been troublesome and someone else might have got them while under way.

We visited a place near Haarlem where, in the commencement of tulip growing, the first new varieties of tulips were raised, or, more practically speaking, the original home of the tulip in Holland. These grounds have

CARNATION HOUSE AT WEILAND & RISCH'S, EVANSTON, ILL.

battle which proved the valor of not only its men, but also of its brave women who, when the men were unable longer to give battle, fought with arms to save their own honor, and their country. The bringing of the water-covered land into subjection for cultivation, which is still being done by hard work and honest labor, is a feat of which these people can boast. One is apt to forget when traveling the fertile smiling plains with their waterways everywhere, the ever-present menace of the sea being driven back. This danger is prevented by continual watchfulness and care, for when the tide is at its height the sea is sometimes ten to twelve feet above the waters of the Rhine which are held back by massive gates till the tide goes down.

The bulb growing provinces of north and south Holland on the inner side of the long stretch of dunes forms an almost unbroken line that protects the whole of the western coast from the ravages of the sea. In the midst of the bulb district is the ancient city of Haarlem, in the immediate neighborhood of Amsterdam, the capital of the kingdom, while in the southern end of the bulb district is the royal residence, The Hague, near which gentlemen's residences abound with their quaint gardens and peculiarly built houses. It is curious to watch the throng of men and women during the bulb flowering season, some on bicycles with enormous red, yellow and purple festoons of flowers on their bicycles, a sash of them hung around their necks and their hats trimmed, forming a curious picture as they glide along. Again,

of bright yellow, dark red, showy purple, pure white and bright blue with here and there the green hedges which are used as wind breakers with the everlasting canals, makes a panorama that can only be viewed in Holland. Indeed a visit to the bulb fields while in bloom will never fail to please, as it is always intensely impressive.

At first it was the love of the tulip, and the possession of more varieties than one's neighbors, but this with some soon wore off, and the love of gain predominated. The dealers were no longer growers who sought to secure new varieties, no longer amateurs securing complete collections where-

WEILAND & RISCH'S GREENHOUSES, EVANSTON, ILL.

KILLARNEY ROSES AT WEILAND & RISCH'S, EVANSTON, ILL.—JOHN P. RISCH IN AISLE.

now been crowded out by buildings for homes, but there is still much to interest one in the quaint portion still left in the heart of a built-up section. We saw here a bed of seeding narcissi that will show to the world what can be accomplished in a small area where intelligence and study as to what is possible in a flower, and what can be brought forth by much skill. Of the mansion house that was originally on this tract only a small portion remains, as it has been added to and rebuilt by the several generations that have gone before. But the story that is told about this estate and the tulip industry is rather entrancing. At the time of the craze when everyone was striving for new varieties, "The Lord of the Manor" heard that a poor peasant in one of his tiled, one-roof cottage gardens, had raised an entirely new variety of tulip, just one plant. Of course this raised a flower, and "The Lord of the Manor" came to see it. When viewed by him he realized what his laborer had, and it is said tried to purchase, but the price was heavy. He offered his palace, land, everything, for this flower. In fact, everything and all for that one tulip plant.

The principal part of this discussion has been in regard to tulips and hyacinths. These alone are not all of the bulbs that are raised or grown in Holland. In fact there are many others, spireas, tuberoses, dielytra spectabilis, iris, ranunculas and anemones and other flowering bulbs. Wonderful fields of narcissi, increasing favorites, can be seen in Holland in all their golden glory, and when in full bloom appear as a beautiful sunrise. That yellow

has been the predominating color in these flowers is not saying that it will continue so always, as the white has been brought out during the past few years, while the red, I think I can safely say, will be one of the standard colors. But they are beautiful, even without other colors, as seen singly or enmasse. Those singles, the orantus, and those grand emperors and others, hundreds of them. Four hundred varieties being exhibited in vases at the Haarlem show. These are flowers that every one should have a few varieties of in their gardens. They are flowers that will stand neglect better than a good many others. In fact, this could be called the lazy man's or lazy woman's flower. Let us make home grounds beautiful by planting a few, but not to be lazy in taking care of them simply because they will take care of themselves.

What else? Well, have I not said enough? I think so; so much that I think a desire will be yours at the coming of spring to set forth for the beautiful flower-decked fields that lie between Haarlem and Leyden. If not, it must be the fault of my poor lame words. In truth, how can I talk or describe the finest color picture the world has ever had. Finest because, though not of nature's planning, it is painted in those pure and true colors of nature. The living lines of the flowers, besides which the choicest paintings of an artist's brush are as mud. It is not possible, and far short of the reality, that my descriptions fail to show you. If you should see them you would realize the bigness of my task, and it will be within your comprehension that the theme is one no verbal description or lantern slides can do justice to.

WITH THE GROWERS

Weiland & Risch, Evanston, Ill.

John Risch, prospect for the coming season might be, we visited the large greenhouse plant of Weiland & Risch at Evanston. After a half hour's ride from the city we left the cars at Main street and a short walk through the beautiful homes and residences of the fashionable suburb we reached the plant of this enterprising firm. On either side of the street ranges of glass extended east and west, there being an area of 250,000 square feet devoted to the growing of cut flowers, principally roses and carnations. The plant, consisting of 44 houses, is divided into five ranges, two of which are filled with carnations and in the other three are grown the roses, a small area being used for the growing of lilies, chrysanthemums and lily of the valley, smilax and asparagus.

The carnation plants are in splendid condition, and at the time of our visit were just beginning to produce very fine blooms and the promise for a grand cut later in the season and during the holidays was encouraging. Enchantress, both the pink and white, were in grand shape. Victory and Bea-

con are both grown, but the latter is preferred, as it produces a better crop at Christmas, when red is so much desired. Some 70,000 plants are set in the houses of all the best commercial varieties. The rose houses are certainly a high compliment to the senior member of the concern, J. P. Welland, who superintends the greenhouses. Bench after bench or rose bushes so timed as to give a succession of high grade blooms, some from which the cut is now being made, some with their strong growth just breaking with that healthy reddish color to the foliage, and some that are just being started. Quality is what is sought, all weak and inferior blooms and growths are immediately cut out. Killarney is the favorite as of the 120,000 rose plants in these houses, 50,000 are of this variety, the others being 18,000 Richmond, 20,000 White Killarney, 10,000 My Maryland, 10,000 Bride, 8,000 Kaiserin and smaller quantities of Perle, Mrs. Jardine and Lady Ashtown. Some very promising chrysanthemums are grown in the houses that will be used later for the propagation of the large number of plants required at an establishment of this size. Instead of heating from one central point, each range has its own set of boilers with ample coal bins which open onto the drive at the north of the houses. Two boilers to each range but one and here three each of 80 h. p. amply supply the necessary temperature, in fact, one boiler is kept in reserve for heavy firing or any accident that might happen.

The product of these houses is daily marketed at the store of the concern, No. 59 Wabash Ave., where the energetic junior partner, J. P. Risch, so pleasantly cares for the wants of the trade.

Vincent's Dahlia Show, White Marsh, Md.

The fourth annual dahlia show of R. Vincent, Jr., & Sons Co. took place last week. This notable event was duly celebrated by many visiting florists. On September 27 a special train from Baltimore carried to the convention a large number of Baltimore florists and their families. Washington, Philadelphia and other cities were also well represented. At the railway station the Vincent company's teams were awaiting to carry the visitors to the farm. A bountiful dinner was served by the ladies of Ebenezer M. E. Church after which the visitors spent the remainder of the day admiring the cut stock, which was beautifully arranged on long tables with autumn foliage, cedar boughs and foliage plants. Many of the visitors also spent much time in looking over the broad acres of dahlias and cannas and in going through the extensive greenhouses where immense numbers of bedding plants are grown. The forty acres of blooming dahlias with ten acres of cannas, despite the dry season, were a sight worthy of a long journey.

In the preparation of the large exhibition room no pains had been spared. The ceiling was covered with autumn foliage and hung with bunting. Add to the striking features of the exhibition, the unbounded hospitality of Mr. Vincent, his family and the ladies of the church and the event was a notable one. From many miles around people came in automobiles and carriages

and every woman and child were given a big bunch of dahlias.

The magnitude of this place was a revelation to many who had never before visited it and we herewith submit figures to show how great it is:

FORTY ACRES OF DAHLIAS.

Three hundred and fifty thousand plants, embracing every color and type of dahlia in 200 varieties. Large lots to be seen in the field were:

Two acres Mrs. Roosevelt, mammoth lavender pink, quilled petals, decorative type.

One acre Grand Duke Alexis, large flowers, quilled petals, white just tinged with lilac.

Three acres Mad. Van den Dael, long pointed petals, deep seashell pink, one of the best commercial cut flower dahlias.

Three acres Souv. de Gustave Duzon, enormous well formed flowers of great substance, bright rich red, the largest dahlia grown.

One acre Countess of Lonsdale, cactus type, resembling a chrysanthemum, very free flowering, a rich salmon shade.

Two acres Kreimhilde, a beautiful shade of rose pink shading to a white center, a great favorite.

One acre Mrs. H. J. Jones, a variegated red and white cactus.

Three acres Juliet, bright rose pink cactus.

Three acres Henry Patrick, the standard decorative white, large handsome flowers on long stems.

Three acres Wm. Agnew, decorative, an attractive bright glowing scarlet.

One acre A. D. Livoni, that well-known rich seashell pink show, that is a favorite with everyone.

One acre C. W. Bruton, an excellent rich canary yellow, decorative.

Most conspicuous in the exhibition, century type, large single flowers:

Fringed 20th Century, rose crimson.

Rose Pink Century, rose pink.

Scarlet Century, bright scarlet.

Sensation, red and white.

Cactus type, large narrow curled and twisted petals, resembling the chrysanthemum type:

Master Carl, clear orange, salmon.

Countess of Lonsdale, rich salmon.

Else, buttercup yellow.

Innocence, white, lemon yellow center.

Kreimhilde, bright pink shading to white center.

Juliet, clear rosy pink.

Standard Bearer, rich fiery red.

Pompon, the small round flowers or bouquet dahlias:

Catherine, bright orange yellow.

Indian Chief, dark crimson.

Little May, lemon yellow.

Daybreak, daybreak pink.

Decorative type, large flower, long pointed petals:

F. L. Bassett, rosy purple.

C. W. Bruton, canary yellow.

Fire Rain, cardinal red.

Grand Duke Alexis, ivory white.

Henry Patrick, large pure white.

Jack Rose, rich velvety crimson.

Mad. Van den Dael, silver pink.

Mrs. Roosevelt, delicate silver rose.

Mrs. C. W. Bassett, deep rose pink.

Princess Victoria Louise, rose pink.

Souv. Gustave Duzon, orange red.

Wm. Agnew, glowing scarlet.

The large round flowered old fashion types:

A. D. Livoni, rich seashell pink.

Arabella, pale primrose.

Cuban Giant, dark glowing crimson.

Frank Smith, dark rich maroon.

Queen of Yellow, pure yellow.

Emily, rosy lavender to white.

Zebra, pearl white.

Collarette, the new French type, distinguished by the elongation of the inner petals, surrounding the center like a collar, deep red flowers with white collaret.

President Viger.

Prince Galitzen.

Gallia.

New varieties introduced by R. Vincent, Jr., & Sons Co.:

Mrs. C. W. Bassett, decorative type, beautiful deep rose pink, long stems, free flowering, named after Mrs. C. W. Bassett, wife of the general passenger agent B. & O. R. R.

Mrs. Chas. L. Seybold, a magnificent specimen of the peony type, deep rose pink, each petal edged white.

Wm. Pierce, large round flowers freely produced on long stems, splendid as a cut flower.

GERANIUMS.

Geraniums is the leading specialty here, to the extent that the name Vincent is almost synonymous with geraniums, among the florists of the country, where three large blocks of houses are devoted to the growing and propagation of these. There are 60,000 plants in the stock houses, and 300,000 in three in. pots which will either be used for fall shipment or stock plants. The leading bedding varieties, such as S. A. Nutt, Beaute Poitevine, Alphonse Ricard, M. A. Roseleur, Mrs. Lawrence and others, are grown in large lots, 20 to 30 thousand cuttings of a kind taken off at one cutting. The standard list now contains something like 100 varieties, which is the result of selecting from over a thousand of the best American and European introductions. Sets of imported novelties are for several years kept intact, nearly a hundred kinds in each set, so that there is without a doubt the largest stock and the most complete collection found any where in the country. As there are 200,000 or more square feet of glass on this place it can be readily understood that there are abundant facilities for the propagation and growth of bedding plants. Another large house will soon be completed, the work being done by the Lord & Burnham Co.

CANNAS.

The 10 acres of cannas present a wonderful sight with their vivid coloring of red and yellow predominating, toned here and there with the bronze foliage of the King Humbert and President Myers. There is no effort made to grow a large collection, only some of the very best, among the standard kinds. Among these were noticed huge blocks of Alphonse Bouvier, Egandale, Florence Vaughan, Jean Tissot, J. D. Eisele, Louisiana, Pennsylvania, Richard Wallace, and King Humbert, while smaller blocks of Gladiator, a striking yellow, spotted red with a brighter red lower petal; Wm. Saunders, a dwarf growing bronze foliage, large red flowers; Venus, pink with yellow edge; Hiawatha, salmon pink, bronze foliage; Rosea Gigantea, immense flowers of deep rose pink.

COLEUS.

One of the most attractive objects noticed in the greenhouses is a large block of that beautiful large leaf coleus, Brilliancy, or as called by some, Dr. Ross, magnificent, luxuriant red and yellow foliage. There was also quite a large lot of the standard bedding coleus.

DENVER, COLO.—The Curtis Park Floral Co. has rebuilt its whole establishment and now have five good houses.

An Interesting California Garden.

The name of E. D. Sturtevant has long been known in connection with aquatics, and especially the hybrid and other water lilies. Mr. Sturtevant was, in fact, the pioneer in this country of the great water lily industry and was growing them at Bordentown, N. J., and supplying the trade with them 30 years ago. It was with a view to seeing his aquatics that the writer called at his home at Hollywood, Calif., recently but found in addition to these a marvelously interesting lot of plants not usually seen and many things growing outside that one usually looks for in a store or greenhouse. Mr. Sturtevant's home is delightfully situated in a lovely spot in the foothills and in full view of the mountain peaks that rise from 1,500 to 2,000 feet and has a fine grass lawn.

One of the first things to catch the eye was the little known *Plumeria tricolor*, a beautiful plant quite hardy here and bearing large cymes of whitish flowers shading to yellow and with a red center. The fragrance of these immense clusters of flowers is very fine and it is from this genus that the well known perfume, frangipanni, is made. *Crinum Moorei* and its white variety flower freely here as well as several *pancratiums* and nearly allied plants. A glorious bit of color is made by *Erythrina splendens*, a variety far brighter and deeper than the well known *E. crista-galli*. A strain of *delphiniums* raised locally by crossing *D. Belladonna* and one of the larger flowered varieties is remarkable for its bright colors and for its almost constant flowering nature, the plants here having flowered three times since Mr. Sturtevant purchased them last November.

The vines and climbers around the house are to say the least, remarkable. One gets used to seeing bougainvilleas and other things like *Tecoma jasminoides* growing all over the houses in California but Mr. Sturtevant has gone one better and our old friends of the stove, *Dipladenia Bolivensis* and *D. amabilis* may be seen side by side with the hardy *Bignonia radicans*. Both the *dipladenias* were in flower and both stand out all winter with no protection. *Solandras* 30 feet high and *Beaumontia grandiflora* running to the eaves of the house are two other features of this remarkable garden; the latter Mr. Sturtevant says is never out of flower from March to August. *Bignonia venusta*, though common, is worthy of note, its lovely crimson, funnel-shaped flowers produced in large terminal corymbs, being very fine and close by are the pure white flowers of *Schubertia grandiflora*. *Hibiscus schizopetalus* is a most remarkable plant, the flowers of the brightest orange red, pendulous and with the petals deeply laciniate, a showy and pretty thing.

Perhaps the most lovely flower in the garden is the native *Romneya Coulteri*. Mr. Sturtevant calls it the finest plant in the west and we are inclined to agree with him. It grows to immense bushes here and the great white flowers with yellow centers have beautifully crimped and wavy petals. Flowers gathered three days ago are before the writer now as fresh as when picked and they are as showy as a Moutan peony and even more refined and beautiful. Though long

known to cultivation this plant is not nearly as much grown as it deserves to be. Another interesting plant is the native *Woodwardia radicans* which may be found in the woods here with fronds seven feet long. *Phylla excelsa* is also perfectly hardy here though it needs shade or the fronds burn. A locally raised dahlia deserves a notice. It is a cross between the tree dahlia, *D. arborea* and *D. imperialis*. At present the plants are some 16 feet high, and they begin to bloom in November. The flowers are bell-shaped seven inches in diameter and of a pretty mauve pink.

Last, but by no means the least interesting, come the water lilies. The varieties are almost endless and Mr. Sturtevant knows so well the history and pedigree of each that his conversation is deeply interesting. One of the most superb flowers we have ever

The Late Mrs. Henry Keitsch.

seen was a form of *Nymphaea Pennsylvanica*. We have seen this lovely flower elsewhere but nowhere had it the size and substance as at Hollywood. *N. dentata superba* is a magnificent white and all over the pond the most magnificent flowers were to be seen, nearly all the varieties standing well up out of the water. Most of the new forms here are hybrids between *N. Zanzibarensis* and the Mexican *N. gracilis* and there is a marvelous variety both in form and color. A very fine specimen of *Victoria Cruziana* (Trickeri) grows in the center of the pond and is practically in flower all the year. This needs less heat than *Victoria regia* which thrives only in heated water. The leaves of *V. Cruziana* in the cold water are four feet across and the flowers are magnificent. Around the edge of the pond are the Japanese lotus, the water poppy and several fine scarlet lobelias, while at a little distance we noted *Rosa gigantea*, which we have many times tried to flower but never succeeded in doing. Here it flowers annually, the blossoms being like a glorified edition of the Cherokee rose. These are only a few of the many interesting things noted and there are many others deserving mention in this charming garden.

H. R. R.

OBITUARY.

Mrs. Henry Keitsch.

The florist trade has lost another one of the older members who from early life has been actively engaged in the growing of flowers. Mrs. Keitsch, widow of the late Henry Keitsch and since his death president of the H. Keitsch & Sons Co. Mrs. Keitsch was born in Felesia, Germany, coming to Buffalo in 1856, marrying soon afterward and locating at the place which has been their home and on which the greenhouses were located in 1860. She leaves ten children, five of whom were associated with her in business at the greenhouses, 57 Earl place and at the store, 816 Main street. Chas. H. Keitsch, well known to the florist trade, has been the able assistant to the mother and on whom the active management will now be transferred.

John H. Sievers.

John H. Sievers, one of the pioneer florists of the Pacific Coast and senior member of the firm of J. H. Sievers & Co., passed away at his home on Buchanan street, San Francisco, September 8. He was born in Bremen, Germany, and in early life came to California and formed a partnership with F. A. Miller in the florist and nursery business. A few years later this firm was dissolved and he commenced the erection of one of the largest greenhouse plants on the coast at the present location on Van Ness avenue. A great lover of flowers and plant life, he became a hybridizer of note and was the originator and introducer of many rare novelties in pelargoniums, tuberoses, begonias and carnations. In 1895 he catalogued fifty different varieties of carnations of his own production, which attained great popularity in California, and many were grown in the east, Ethel Crocker and Hannah Hobart being probably the best known. He leaves a son, John R., who is well known in the trade, and four daughters.

Mrs. Richard Witterstaetter.

The sad news of the death of Mrs. Richard Witterstaetter came as a great shock of unusual severity. Mrs. Witterstaetter has been in failing health the past year, but her illness was not of a serious nature until three weeks ago a complication of diseases developed, since then she grew weaker from day to day and on September 30 she passed to the great beyond in her forty-fifth year. The funeral took place October 3 from the family residence and the remains were laid to rest in Spring Grove Cemetery, covered with that she dearly loved—flowers. The floral tributes were magnificent and many. The departed took a keen interest in her husband's work and a week before she died, she with her nurse, took the last stroll through the greenhouses. Although childless she was like a mother and efficient teacher to all the nephews and nieces around her home, her sense of humor, habitual cheerfulness, unflinching kindness and deep affection made her a true friend to all that came in contact with her. Her sympathetic tenderness was so genuine, one could never doubt her sincerity, and I can think of no qualifying word that expresses my thoughts concerning her so satisfactory as this: She was a noble woman. We extend our sympathy to Mr. Witterstaetter and his aged mother in their bereavement.

FROST still holds off to the advantage of growers of outdoor stock, gladioli and dahlias being plentiful and of good quality in most centers.

SHIPPERS of orchids may be interested to know that the state inspectors are taking note of the mischief caused by the cattleya fly and one, at least, Inspector W. Woods, of Los Angeles, Calif., says he will hold up and either destroy or return to the senders any affected plants that come within his jurisdiction.

Correction.

In the report of the exhibit at the New York Florists' Club meeting held September 12, in our issue of September 17, the award granted to Harry Turner, Castle Gould, for six plants *clerodendron fallax*, should have read 85 points in the Hitchings cup competition instead of five points, as printed.

Boston Gardeners' and Florists' Club.

The Gardeners' and Florists' Club held its first fall meeting September 20 at Horticultural Hall, Peter V. Miller, vice president, presiding; W. N. Craig, secretary. About 100 were present. The picnic committee made their report of expenditure for prizes, refreshments, etc., of \$134.50. The main matter of business was the question of entertaining the members of the S. A. F. who were expected at the big March show. It was thought that not less than a thousand tickets would be issued for the banquet. After discussion it was voted to add five more members to the committee, to report at next meeting. This committee on entertainment is, Peter Fisher, chairman; W. H. Elliott, Duncan Finlayson, Kenneth Finlayson, Wm. Sim, Thomas Pegler, Wm. Downs, J. P. A. Guerineau and Robert Cameron. Mr. Craig was given a hearty vote of thanks for his services in making the picnic such a success. Members then told of some of their vacation experiences. Peter Fisher spoke of the Rochester meeting, praising the trade exhibit and the beauties of Rochester. "Now that they had taken the ladies they could never again leave them at home." T. J. Grey lavished praise on the people of Rochester, on the exhibits of Dreer, Pierson of Tarrytown, and Stump and Walter Co. "Nothing to equal the *Gladiolus*." He spoke of the wonderful trolley service from Syracuse to Rochester—80 miles in three hours—and of the automobile ride given to 168 ladies. Wm. Elliott attended one of the ladies' meetings and decided to withdraw from the men's and join them. He praised the nice and quiet way in which the Rochester people carried through all their program of entertainment, and told of his visit to the Ellwanger and Barry Nurseries, and of the splendid view of Highland Park from the Pavilion. Mr. Craig spoke of his visit to Bar Harbor to judge the show there. He described the change at Mt. Desert from its original condition to the present, of its trees, temperature of an average of five degrees below Boston, of its blueberries, its peculiar adaptation to growing the finest garden flowers, of the sweet peas that astonished Harry Turner. The Skinner system of irrigation is being adopted there. They have an excellent horticultural society and millionaire patrons, one of whom entertained Mr. Craig. After recess and refreshments the question, "What have we learned from the great orchid show, and what can we improve upon," was discussed. The discussion turned on the matter of giving a single big prize rather than breaking it up into smaller amounts. Robert Cameron and Mr. Craig favored the big prize idea. Without it no such show of exceptional merit could be given. It does not hurt the commercial grower and it insures the success of the show. Big prizes for special things was Mr. Craig's idea. The man who got the \$1,000 prize had been to an expense of \$10,000. There were nine new members received at this meeting.

W. T. H.

Chrysanthemum Society of America.

EXAMINING COMMITTEES.

President Elmer D. Smith announces the committees to examine new chrysanthemums for the ensuing year which are as follows:

Boston, Mass. — Wm. Nicholson (chairman), James Wheeler, Alex Montgomery. Ship flowers to Boston Flower Market, C. Park street, care of chairman.

New York. — Eugene Dailedouze (chairman), Wm. Duckham. Ship flowers to New York Cut Flower Co.,

55 Twenty-second street, care Eugene Dailedouze.

Philadelphia, Pa. — A. B. Cartledge (chairman), John Westcott, S. S. Pen-nock. Ship flowers to A. B. Cartledge, 1514 Chestnut street.

Cincinnati, O. — R. Witterstaetter (chairman), James Allen, Henry Schwarz. Ship flowers to chairman, Jabez Elliott Flower Market, care janitor.

Chicago. — J. B. Deamud (chairman), Geo. Asmus, W. H. Kidwell. Ship flowers to J. B. Deamud, 51 Wabash avenue.

Shipments should be made to arrive by 2 p. m. on examination days to receive attention from the committee, must be prepaid to destination and an entry fee of \$2 should be forwarded to the secretary not later than Tuesday of the week they are to be examined or it may accompany the blooms.

Seedlings and sports are both eligible to be shown before these committees provided the raiser has given them two years' trial to determine their true character. Special attention is called to the rule that sports to receive a certificate must pass at least three of the five committees.

The committees will be in session to examine such exhibits as may be submitted on each Saturday during October and November, the dates of which will be October 8, 15, 22 and 29 and November 5, 12, 19 and 26.

The third member of the New York committee will be announced later.

We make these a specialty.
Can supply them all the year.
Once tried you will have no other.

Chicago.

The unusual warm weather for this season, while increasing the supply of all kinds of stock, does not materially increase the amount of the retail business, but the fall openings of the department and other stores has created quite a demand during the week. Roses are of excellent quality and are coming into the market in large quantities, but are finding good sale. American Beauties are grand. Killarneys, both pink and white, are fine and in good demand, especially the former, and Mrs. Marshall Field, My Maryland and other varieties are excellent. Carnations are much improved and some very fine stock is to be seen every morning. Chrysanthemums are quite plentiful and some small blooms are selling rather cheap, but the good grades are selling well. Lilies are a little short in supply and are realizing good prices. Orchids are daily arrivals and are in good demand at good prices, and valley is quite plentiful. The present week has practically seen the end of the asters and few dealers are quoting them. Some very handsome dahlias are coming into the market, and the retailers are taking advantage of them in making up their window displays. Tritomas and autumn foliage are also used for the same purpose. Some very handsome Lady Lennox cosmos, cut with long stems, was to be seen this week. Florists' greens are in plenty and the stock is of exceptional good quality.

NOTES.

The Geo. Wittbold Co., 737 Buckingham Place, have just received a large consignment of Kentia Belmoreana and Fosteriana from Belgium, and are showing a fine line of Dracant Fragrans. The past month has kept all hands busy shipping out orders and foreman Fred Meyer says that this is no doubt due to the fact that the dealers are purchasing their stock for fall and winter trade. The decorations at the large department stores last week kept Henry Neve and his help on the jump delivering the stock that was used at those places, it being after 10 o'clock Saturday night when the last load was delivered. A new automobile has been added to facilitate this branch of the business.

Tim Matchen, manager of the Peter Reinberg establishment, and Miss Ida Bolgram, of Portage, Wis., were mar-

ried October 1 and after a few days' visit at Portage returned to Chicago, the large amount of business at the store demanding the presence of Mr. Matchen in this city. The wedding was a very quiet affair, only relatives being present at the ceremony. Our most happy congratulations and good wishes are extended to the genial groom and his bride on the voyage on the sea of matrimony.

The Killarney roses received by J. A. Budlong are worthy of especial notice, being of beautiful color on long stem and of splendid foliage and are the equal of the best in the market. Others noticed were some extra fine Maryland, Jardine and White Kaiserin, and the American Beauties are of their usual good quality. Large quantities of chrysanthemums are on hand and Monrovia now has preference over Golden Glow.

Vaughan & Sperry are receiving a fancy stock of dahlias of assorted colors and those of the lavender shade are very beautiful and are among the finest to be seen in the market. These dahlias are received and sold in boxes containing four to six dozen each and the demand the past week has been large. They are now receiving a fancy shipment of Cattleya orchids and are filling a large number of orders for white roses.

Peter Reinberg is cutting heavily in Richmond, Perle, Marshall Field and American Beauty roses. The demand for the latter has been exceptionally large, due to the excellent quality of the flower and good long stems. This house is receiving large quantities of carnations for which the demand is excellent. Business has been very brisk, the shipping trade holding up remarkably well.

At Kyle & Foerster's large quantities of roses are to be seen, with American Beauties and Richmonds showing up remarkably well. Carnations are arriving in better condition, stems being longer and color better, and the demand for these has been exceedingly heavy.

H. M. Burt, formerly of Burt & Coggan, Battle Creek, Mich., was in the city the past week visiting the trade. Burt & Coggan have dissolved partnership. Mr. Coggan will conduct the business at Battle Creek and Mr. Burt will open a store at Jackson, Mich.

Wietor Bros. are cutting heavily in all varieties of roses, their American

Beauties and Jardine are exceptionally good and the demand for the latter has been exceedingly heavy. This firm is also receiving large quantities of chrysanthemums.

Kennicott Bros. are handling large quantities of everything, with gladioli and carnations showing up remarkably well. We also noticed a fancy stock of Monrovia chrysanthemums which have just made their appearance on the market.

Weiland & Risch are getting a fine lot of Killarney roses just now. The color is grand and the stem and foliage all that can be desired. Their carnations are rapidly approaching mid-season form, both in stem and flower.

A baby girl arrived at the home of Mr. and Mrs. Cunningham on September 27. It will be remembered that Mrs. Cunningham is a daughter of John Zech.

Zeck & Mann are this week handling an excellent grade of Maryland, Killarney, White Killarney and Richmond roses. We also noticed a large quantity of lilies, carnations and gladioli.

Everything is going along as usual at the Lubliner & Trinz store, 44 E. Randolph street, and a look around the store showed all hands to be very busy.

E. R. Farley, formerly with Chas. W. McKellar but now of Bertermann Bros. Co., Indianapolis, Ind., is visiting his friends in the city.

John Kruchten is handling large quantities of gladioli, chrysanthemums and carnations, the latter being of exceptionally good quality.

The Woodlawn Floral Shop, 863 E. Sixty-third street, are enjoying a very busy season, the call for funeral work demanding their attention.

The Chicago Rose Co. is this week offering a very good grade of chrysanthemums, the supply department is exceedingly busy.

At Geo. Reinberg's we noticed an exceptionally good quality of American Beauty, Bride and Killarney roses. Geo. Piser, formerly of Hoerber Bros., has accepted a position with Paul Blome & Co., North Clark street.

Mr. Hodgkins and wife, of Boston, Mass., are visiting with Mr. and Mrs. Chas. W. McKellar the present week.

J. M. Cole and wife, of Peoria, and a niece, Miss Bassett, of Ocean Grove, Calif., spent September 3 in the city.

BASSETT & WASHBURN,

Office and Store:
76 Wabash Ave., Chicago

Greenhouses:
Hinsdale, Illinois

Poehlmann Bros. are receiving heavy shipments daily of the highest grade stock in all lines. Their roses are excellent, beautiful color, and with fine luxuriant foliage. American Beauties of all grade of exceptional fine color. Killarney of both white and pink with fine long stems. Cardinal and Richmond of first quality. Carnations of a fancy grade are now among the daily arrivals. Lilies and valley are among their specialties and are of the highest quality. Orchids are now beginning to arrive and a fine lot of these exotics can be seen. Golden Glow and October Frost chrysanthemums of the highest grade are among their numerous products.

Busy was the word at the J. B. Deamud & Co. store and it certainly had that appearance this week. The stock was exceptionally good and being sold as fast as received. The dahlias were beautiful of both cactus and decorative varieties of the different shades of red and pink and were eagerly picked up in the early morning. Roses, especially a high grade of Brides, and carnations of A1 quality were receiving a good demand. A fancy stock of Cattleyas were noticeable.

The chrysanthemums at Bassett & Washburn's are of exhibition grade and are of the highest quality in the market. The roses are in fine shape and the daily receipts are very heavy. Beauties are exceptionally good and Killarneys, Richmond and My Maryland are of the best. Their carnations are coming in fine shape, some White Perfection were deserving special notice, and O. P. Bassett are of extra stem and bright color.

The Chicago Carnation Co. are now doing business in room 203, Atlas building, and are prepared to handle all orders for anything in the cut flower line. Manager A. T. Pyfer has secured the services of Wm. A. Starret,

formerly with J. P. Opetz, 6643 Cottage Grove avenue, who will have charge of the sales department.

The E. F. Winterson Co. have made a number of changes in the arrangement of their store which gives them more floor space and the goods can also be displayed to a better advantage. This firm is now receiving shipments of fancy Cattleyas orchids and double violets for which the demand is heavy.

On October 1 the firm formerly conducting business as E. C. Amling adopted the name of E. C. Amling Co. Business has been exceptionally good and the receipts on that day were the largest of the season. Roses of all varieties were seen here with Killarney showing up remarkably well.

Geo. Propps, who has an interest in the George Perdikas store, corner of Dearborn street and Jackson boulevard, has been entertaining his friend, Theo. Sakell, the present week. Mr. Sakell has charge of the floral department of the Emporium department store at St. Paul, Minn.

The Florists' Club meeting will be held Thursday, October 6, at the Union Restaurant at 8 o'clock. The coming flower show at the Coliseum will be up for consideration, with other important business. The new by-laws have been distributed to members. Have you received your copy?

E. H. Hunt is receiving large quantities of roses, chrysanthemums, gladioli and sprenger. Business has been exceptionally good and Wm. Lynch, who has charge of floral department, says that from the present outlook the fall season will be a very busy one.

Due to increasing business H. Van Gelder of Percy Jones found it necessary to increase his office help and the services of an expert stenographer

have been secured. This firm is handling large quantities of chrysanthemums of an unusually good quality.

Chas. W. McKellar is now receiving daily shipments of fancy Cattleyas, Vanda Coerulea, Dendrobium Phalaenopsis, Oncidium and other choice orchids. A stock of fancy Lily of the Valley of exceptionally good quality was seen here.

Clifford Pruner, of E. H. Hunt's, and N. J. Rupp, of John C. Moninger Co., returned September 30 from Grand Rapids, Mich., where they attended the Market Gardeners' convention.

At Hoerber Bros. the stock is arriving in good condition and some fine Killarneys, Maryland, Jardine and Richmond roses were seen here.

Sinner Bros., of the Flower Growers' market, are cutting a good crop of roses, their Killarneys are of exceptionally good quality.

O. Johnson, salesman for the Batavia Greenhouse Co. at the Flower Growers' Market, is having a new icebox installed.

Visitors:—Alfred Forder, Cincinnati, O.; J. A. Evans, of the Quaker City Machine Works, Richmond, Ind.; J. M. Cole and wife, Peoria, Ill.; H. M. Burt, Battle Creek, Mich.; D. Hill, Dundee, Ill.; C. H. Hudson, representing Hammond's Paint Works, Fishkill-On-Hudson, N. Y.; Theo. Sakell, St. Paul, Minn.; Carl Hirsch, Hillsdale, Mich.; E. R. Farley, Indianapolis, Ind.; J. G. Crozer, Cedar Rapids, Ia.

WAPPINGERS FALLS, N. Y.—The Dahlia Society held its annual exhibition September 23, 1910.

TAYLORVILLE, ILL.—M. B. Leach has sold his greenhouse property to Theodore Steffas of Springfield, who will be assisted by Miss Tena Steffas of Chicago in conducting the business.

St. Louis.

The past week we have experienced some real nice fall weather, cool nights and cool days. Violets have made their debut and are small but of good color; carnations are improving in size and length of stem. Some fancy dahlias in assorted colors are in. Early yellow and white chrysanthemums are in but not enough to cause any influence on the market. American Beauty roses are more plentiful and of good color.

NOTES.

Ostertag Bros. had one of the largest store openings, that of Greenfield & Sons, gents' furnishers. The interior was beautifully decorated with wild smilax and foliage plants. The feature was the distribution of cut flowers to the public, over 10,000 carnations, roses and other flowers were given away.

The retailers hold their meeting next Monday evening at the Knights of Columbus hall. Now that everything has been settled satisfactorily with the wholesalers in regard to selling at retail the association will endeavor to remedy other evils.

The crepe-pullers are increasing, advertisements being inserted in the daily papers for solicitors. All methods to obtain orders are used. Let the Retail Association work to keep the florist business to its legitimate channels.

ORCHIDS

A SPECIALTY.

I am now receiving daily shipments of **Fancy Cattleyas, Vanda Coerulea, Dendrobium Phalaenopsis, Oncidiums** and other choice **Orchids, Fancy Valley, Roses, Carnations,** and all Seasonable Flowers and Decorative Stock.

Supplies of All Kinds.

CHAS. W. McKELLAR

51 Wabash Avenue.

CHICAGO.

Chas. Wors, son of C. W. Wors, on his way home from the theatre was held up by two masked men with revolvers, demanding all he had.

M. F. Widmer, of Highland, Ill., was a visitor. He has made an addition to his houses of 20x50 for smilax.

Hugo Gross, Fred Ude and Billie Winter were among the early ones with sweet violets.

C. Young & Sons Co. have the decorations at the Coliseum for the Veiled Prophet's Ball.

The W. C. Smith Wholesale Floral Co. has added a splendid new icebox 8x12.

Milwaukee.

Stock rather scarce toward the end of the week and impossible to fill all orders complete. Asters are practically out of the market, there are still a number of gladiolus and dahlias coming in which are of a fine grade. American Beauties are improving wonderfully selling readily and for good prices. Roses turned out to be very scarce especially pink. Carnations are improving each week and there are several growers bringing some excep-

tionally good flowers to the market, which are being disposed of readily and at good prices. Lilies are still scarce, there are a few mums coming in which are of a very good grade. Enough green goods of all kinds to supply the demands and a very fine grade.

NOTES.

Fred Schmeling has several fine benches of Lawson Enchantress which he says are a very satisfactory producer. He also has some other varieties that look very promising. He and his family returned last week from an extended automobile tour through the southern part of Illinois, visiting the different greenhouses and claims that he has seen some very fine places.

Mrs. Freytag reports business exceptionally fine. Their greenhouses are looking first rate, everything looking strong and healthy. They have a fine lot of mums and poinsettias that are going to help them out considerably when they commence cutting same with their extensive cut flower trade.

There are several Milwaukee parties that went to the Market Growers' con-

Send Trial Order Now.

CUT FLOWERS

ROSES, CARNATIONS, CHRYSANTHEMUMS and all other Seasonable Stock.

Our Roses are of exceptionally good quality. Our Carnations, although a little short of stem are as Good a Grade as can be found in the Market.

WIETOR BROS., 51 Wabash Ave., Chicago.

L. D. Phone Randolph 2081

Detroit.

Trade conditions last week were much enlivened by many stores opening decorations and some of the florists were kept hustling in this work alone. B. Schroeter had the Crowley Milner store and the Newcomb Endicott store, the latter being very extensive and called for the use of two thousand long stemmed Beauties, three hundred palms and ferns and about a hundred made up baskets of foliage plants tastefully and in some cases elaborately trimmed with ribbons and considerable quantities of artificial high colored foliage. Hugo Schroeter of the firm personally selected most of the roses in the Chicago market for the occasion. J. Breitmeyers' Sons had the decoration of the Hudson Thompson store at Toledo and the J. L. Hudson store here. In the former large cornucopias were used filled with corn, cat tails, hydrangeas, while the local store used purple flowers and brown autumn foliage in great quantities. W. B. Brown had the Elliott, Taylor-Wolfenden store where great quantities of palms, ferns and gladioli were used. J. F. Sullivan had the Henry Blackwell store decoration which consisted chiefly of palms and ferns. In other branches of the trade there was but little doing while the market was glutted with great quantities of roses and good late asters and gladioli. The weather continues warm and indications point to quiet conditions for the present week unless colder weather comes to relieve the situation.

NOTES.

The new flower shop at 20 John R street had an auspicious opening Oct. 1. The proprietors, Miss Hattie Holzhauser and Mr. Bleil, were kept busy receiving the congratulations of the many friends that called, including many florists, some of whom sent vases of flowers and plants expressive of their best wishes to the new firm.

Breitmeyer's Woodward avenue branch store is rapidly approaching completion and will be occupied about October 15 and will be in charge of Miss Kaufmann, who has had many years' experience with the firm.

J. F. Sullivan is putting in a new refrigerator twelve feet long, four feet wide and nine feet high. It was manufactured by the McCray Refrigerator Co., Kendallville, Indiana.

Chas. Hufford is now nicely equipped in his new store, 51 Gratiot, and receiving much encouragement in his new venture.

Fred York, son of C. L. York of Hancock, has entered the service of J. Breitmeyers' Sons in their Broadway store.

FLORISTS' CLUB MEETING.

The club meeting October 3 was well attended. The meeting was the first held in the club's new quarters at 112 Farmer street. The chief feature of the program was a paper by Frank Danzer on "Side Lights on the Work of the Twentieth Century Club's School

ANNOUNCEMENT

THE CHICAGO CARNATION CO. desire to announce to the trade that they have secured space on the Chicago market for the handling and selling of the product of their large range at Joliet, Ill., and are now prepared to fill all orders for everything in the Cut Flower line.

We Want Your Trade and Will Guarantee Satisfaction.

CHICAGO CARNATION CO.

A. T. Pyfer, Manager.

35-37 Randolph St., CHICAGO.

Garden Work." As the essayist has been most actively engaged in the work the past season he was well qualified to treat the subject interestingly. He aroused much enthusiasm in this altruistic work which has been our club's support for several years and more energy will hereafter be exercised in its behalf. To that end President Geo. Brown appointed a permanent committee which will at all times be available to work in harmony with a like committee of the Twentieth Century Club. The club's committee consists of Frank Danzer, Geo. A. Rockham, E. A. Scriber, Robt. Unger and J. Sullivan. Robt. Rahaley of the entertainment committee made a belated report of the club outing to Bois Blanz last July. A spirited discussion was engaged in by many members on the old question of the effect of cheap fern sales on the development of trade, some maintaining that such sales are a detriment, while others as strongly favored them as encouraging the public in the use of plants.

J. F. S.

Pittsburg.

STOCK PLENTY.

With the coming of the chrysanthemum, business is improving and the demand takes all the good stock that is offered. Of course, only Golden Glow, October Frost, Pacific, and Polly Rose are offered in chrysanthemums, but they are here in quantity. American Beauties are also arriving in quantity and are very active. Violets have improved in quality and the demand for them is growing. Lily of the valley is the one scarce flower, being hard to obtain. Asters are a thing of the past and carnations are not coming in very fast which leaves a gap that dahlias fill very satisfactorily. Lilies are more plentiful but keep their prices. All greens are more than plentiful.

NOTES.

It came as quite a surprise to a great many to hear the announcement that the Breitenstein Co. will discontinue its business. Heavy rent and

business not coming up to expectations have resulted in such a heavy loss during the last year that they found it impossible to continue the business. At a meeting of the creditors they took over the book accounts without any legal proceedings. Mr. Breitenstein has the sympathy of everyone as we all know he did his level best and duty, but conditions were against him.

Earl Tipton and family are back from the A. W. Smith Co. farm at Canfield, O., where he has been camping out for the last three months. He is much improved in health and is again on the job as buyer for the A. W. Smith Co.

Sam Frampton reports that the Ziegler Co.'s store in the Rittenhouse is doing finely. Miss Friel, formerly with the A. M. Murdock Co., is also associated with this place.

Henry Klunders is back again at his post after an absence of two weeks.

Phillips & Seedan, Washington, Pa., are cutting some nice roses.

George Warrick of the Washington Floral Co. was married September 29.

Max Schueller has just returned from his trip to Germany.

C. A. Dunn and Phillip & Seedan of Washington, Pa., are very busy on account of the centennial being celebrated in that town.

The negro who robbed the residence of John Bader recently was given the salty sentence of six months to the workhouse.

Visitors: Jos. Thomas, Greensburg, Pa.; W. Thomas, Kalamazoo, Mich.; A. T. Moreland, Toronto, O.

J. L. Gilsey, Wilkinsburg, Pa., is going to open a new store near Wood street, Wilkinsburg, Pa.

A. W. Smith Co. are using tritomas, or red hot pokers, effectively in their large window displays.

The McCallum Co. are handling large quantities of Beauties. Nice violets are also seen here.

The Pittsburg Cut Flower Co. is now settled in their new quarters on Seventh street.

Randolph & McClements have the decoration for the Jos. Horne Co.'s anniversary.

We Are Strong on Roses

NONE BETTER TO BE HAD.

Our Killarneys are of that bright rose pink color on long stems, with splendid foliage. Bound to give satisfaction.

My Maryland, Beauties, White Killarney,
Jardine, Richmond, Field,
Kaiserin, Bride, Bridesmaid.

Carnations in All Varieties which for quality excel any other stock seen on this market to date.

We are now cutting fancy White and Yellow (Monrovia) **Chrysanthemums**. Will be able to furnish Pink in the course of another week.

Carnations
A Specialty.....

J. L. Giesey, Wilksburg, Pa., is going to open a new store near Wood St., Wilksburg.

Miss Freil, formerly with A. M. Murdock, is now located with Zeiger Co., East End.

W. D. Faulk, Homestead, Pa., has sold his store to E. N. Moon of that place.

W. D. Faulk, Homestead, Pa., has sold his store to E. N. Noon, of that place.

Zeiger Co., East End, opened their store in the Rittenhouse, September 24.

Henry Klunders is back again at his post after an absence of two weeks.

Phillips & Seedam, Washington, Pa., are cutting some nice roses.

J. B. Murdock Co. are receiving a nice line of Maryland roses.

First violets of the season were seen at the McCallum Co.

C. A. Dunn, Washington, Pa., reports business fair.

Cincinnati.

STOCK IMPROVING.

Trade conditions remain about the same as last report. Jewish New Year created quite a demand for stock of all kinds and the retailers were busy accordingly. Roses of all kinds are just about equal to the demand, in fact, at times there is a surplus of the short stemmed teas. Carnations are improving in quality and there are not nearly enough for orders. Gladioli and asters are a thing of the past and the same may be said of tube rose spikes. There is a good call for Lilium Longiflorum and valley is not equal to the demand. A good call for green goods and an ample supply.

NOTES.

Richard Witterstaetter has the sympathy of the craft in the death of his better half which occurred September 30. The funeral took place on Monday afternoon and was largely attended and an immense amount of beautiful flowers showed the esteem in which the deceased was held.

J. C. Comout, representing James Carter & Co. of London, Eng., called on the J. M. McCullough's Sons Co. the past week. This is Mr. Comout's twenty-eighth annual visit to this

country and is proud of the fact that he has spent 51 years with the Carters.

Peter Weiland, formerly of Weiland & Olinger, was married to Miss Julia Garvey at Indianapolis, Ind., September 28. Mr. and Mrs. Peter Olinger of this city were in attendance at the wedding and carried congratulations from a host of friends in this city.

The bowling committee has been hard at work and will have a good proposition to submit to the members of The Cincinnati Florists' Society at the monthly meeting October 10, 1910.

William Murphy is the last one of the vacationists to return and he certainly is the picture of good health.

Julius Dilloff of Schloss Bros., New York, called on the trade the past week.

Washington.

DISAGREEABLE WEATHER.

The hot and dry weather is having a detrimental effect on business. Although the season has arrived when householders should be expected home, many of them are remaining away on account of the disagreeable weather conditions. However, there are always enough people here to keep something doing. There is marrying and giving in marriage and as elsewhere there are many floral tributes for those who have crossed the dark river. Outdoor stock is poor on account of the drought while there are plenty of dahlias, they are as a rule, small and parched. While this district is not considered a particularly favorable locality for growing flowers under glass, very fine stock for the season is now seen. This is particularly true in regard to American Beauty and Killarney roses and carnations.

NOTES.

Christian Shellhorn, for many years a well known florist of this city and Good Hope, D. C., who some time ago sold his business, has just returned from a three months' tour of Europe, being accompanied by his wife. He visited Germany, Switzerland and Italy. While he considers the landscape work in these countries very fine, he thinks that our American

growers of indoor stock are more progressive than the growers of the countries which he visited. He speaks highly of the attention paid in these foreign countries to decorative plant work about both hotels and private residences.

On October 1 George H. Cooke executed an elaborate wedding decoration. It was a home wedding, the occasion being the marriage of Miss Katharine Leech to Lieut. Thurston Hughes, U. S. A. The house decorations were of palms and Easter lilies, for the wedding breakfast American Beauty roses were the principal table decorations. The bridal bouquet was of lily of the valley, the bridesmaids carrying Killarney roses. He also executed a fine decoration for a dinner given at St. Patrick's rectory on the night of September 30, in honor of the papal delegate, Cardinal Vannutelli.

Alexander B. Garden, who, as previously reported in these notes, recently met with a serious accident, is rapidly recovering and is now able to walk about his range with the assistance of a cane. His brother-in-law, Alexander Davidson, who recently returned from an extended visit in Scotland, has taken charge of the construction of Mr. Garden's new house and the work is being rapidly pushed toward completion.

Joseph M. Hardy, who has been connected with the florist business since he was fourteen years old, has now a fine store at the corner of Vernon avenue and L street, N. W. Mr. Hardy is a practical landscape gardener as well as a florist and is doing much work in that line. He is also well equipped in the matter of supplying shrubbery and decorative plants.

F. H. Kramer has embarked in a theatre venture. He is president of the Imperial Theatre Co. recently incorporated with a capital stock of \$200,000. The new theatre is being pushed rapidly toward completion. It is located on Ninth street, N. W., between D and E streets.

George Shaffer has just finished decorating his store and it is very handsome. During the summer he was too busy to have it done, but took advantage of this hot and dry spell.

J. H. Small is back from Europe and says that he was much pleased with the horticultural features he saw there, particularly those of Holland.

On the occasion of the appointment of Norman A. Merritt as postmaster of this city, October 1, he received many beautiful floral tributes.

Last week W. F. Gude received the members of the Prison Congress, which does not mean, however, that he is in any danger of being locked up.

W. E. McKissick of Philadelphia will, about October 15, take charge of the wholesale store of the Pennock-Meehan Co. in this city.

At his new store on P street, N. W., John Robertson is having a great sale of palms, ferns and other foliage plants.

W. W. Kimmel has got his new store in fine shape and is now well equipped for the season's business.

A. Gude & Bro. are showing very fine stock in American Beauty and other roses.

Baltimore.

BUSINESS IS GOOD.

Notwithstanding the fact that a great drought and hot weather prevails, trade is fairly good. There is plenty of dahlias but the outdoor roses, which at this season are usually a factor in the market for funeral work, are rather scarce on account of the dry weather. The greenhouse stock is light in supply of roses and carnations, but better things are expected in a short time. A few very good chrysanthemums, mostly Golden Glow, are on the market. The extent of the drought is far reaching and is seriously affecting not only florists, but farmers and nurserymen located in the territory adjacent to this city. While there has not as yet been a curtailment of city water, it is feared that if the drought continues the supply may run low.

FLORISTS' CLUB MEETING.

The Gardeners' and Florists' Club met in regular session September 26 with a good attendance. President Morrison in the chair. Considerable routine business was transacted. Prof. Symons, of the Maryland Agricultural College, was present and spoke interestingly on various phases of horticulture. He made an appeal for more care and uniformity in the planting of shade trees in cities. P. B. Welsh, of Glen Morris, Md., exhibited exceptionally fine blooms of the chrysanthemum Golden Glow.

NOTES.

Robert Caryll, assistant to John J. Perry in the Florists' Exchange, recently underwent an operation on one of his arms, the cause for which almost parallels the stories we read of the people who swallowed needles in childhood and had them taken out of their arms or legs years after. Seven years ago, while working in a greenhouse, he fell and his arm struck in a box containing glass and glazing points. That arm has given him more or less trouble ever since. One year ago an operation was performed and a piece of glass removed, but results were not satisfactory. The late operation revealed a glazing point and Rob now hopes that there is no metal, except good iron, in his system.

Edward Kress, of 2506 East North avenue, has a red seedling rose, now in its fourth year. It is a cross from Etoile de France and Gruss au Teplitz. It is very double, and fragrant, and when exhibited at the last club meeting, received many favorable comments. Incidentally it may be stated that Mr. Kress will celebrate the golden jubilee of his business next March. It was founded by his father whom he succeeded, and he expects to celebrate the event in an appropriate manner.

J. Dan Blackistone, formerly at Eutaw Place, has now a finely equipped store at the corner of Madison avenue and McMechin street, and is doing a thriving business. Mrs. Blackistone is his able assistant in the business. Mr. Blackistone is a brother and business associate of Z. D. Blackistone, of Washington, D. C.

On September 27 many members of the club, with other florists, visited the dahlia show of R. Vincent, Jr., & Sons Co., White Marsh, Md., and all were gratified with the splendid display as well as the large-hearted hospitality of the proprietors.

John Schuncke has sold his greenhouses and store, at 2505-2509 East North avenue, to his brother-in-law, A. J. Hilscher, formerly in his employ. Mr. Schuncke will hereafter give his attention to his store, at 1302 East Baltimore street.

James Glass, of Erdman avenue, has recently acquired the greenhouse of his neighbor, James Simpson, who, it is understood, will hereafter devote his attention to private gardening.

Henry Fischer, of Sinclair avenue, has a well kept and up-to-date range. He has just put in a new 150-horse power boiler, made by James Leffel & Co., Springfield, Ohio.

John A. Nutte, of Gardenville, one of the younger members of the craft, is showing fine carnations for the season. He also grows a good quality of mixed stock.

August C. Twele, of 1875 North Gay street, is one of the progressive young florists of this city. He was reared in the business and keeps up with the times.

August R. Tischinger, of Govans-town, is bringing in fine ferns, palms and other foliage plants, which sell well.

MARSHALLTOWN, IA.—W. H. Ford will build a greenhouse, 20x100 feet, with an office and store on the property he recently purchased.

STOCK PLENTIFUL.

There is very little change in the business from a week ago. Funeral work and counter trade continue steady and cut flowers of most all kinds plentiful and of a good quality. Prices are about normal for this season of the year. Cooler weather prevails and a killing frost may be expected any night about this time. Several florists grow dahlias on a large scale, and a great influx of this rich, showy flower is coming in. The quality is very fine, but the buyers don't seem to take hold of them. The special feature is the waning of the aster season. It has not been a good season, owing to weather conditions, and the shortening in supply has naturally made prices better of late. There is still good stock being received. Carnations are more plentiful, but not near enough to supply the demand. There are plenty of roses of the leading varieties of a good quality, which are selling for small prices. Cosmos is plentiful and moves slowly. Chrysanthemums are selling no better. Lilies are not over-abundant and the demand cleans up the supply. Gardenias are improving, and the demand is more steady. There is enough of lily of the valley to supply all demands at regular prices. Gladioli are scarce and tritomas do not sell. Tuberose are coming in in great quantities. Orchids are scarce with little demand, and greens of all kinds are very plentiful.

Thomas Hope spoke on tree planting in neglected streets. Prof. Stene of the State College said that the greatest need of the society at the present time was a home, a place where the meetings could be held regularly. Richard M. Bowen voiced the approval of the suggestions of Prof. Stene, and urged the adoption of methods whereby the attendance as well as interest in the meeting and work of the organization would be increased. A committee of three was appointed to look into the matter of a hall for the society and report not later than December. Francis Gallagher spoke on the importance of the support and co-operation of the society in relation to a public market place, and Thomas Hope and L. G. K. Clanner were appointed a committee to appear at the hearing in support of the measure. Fred A. Hayward of Pawtucket, Frank L. Gay and John S. Williams of Providence were elected members of the society. Rev. G. W. Kinney of East Providence has excellent success with one of Luther Burbank's creations, the wonderberry, and

The stock we offer is of an unusual good quality. Try a case.

1209 Arch St., Philadelphia. Pa.**Philadelphia.****BUSINESS SLOW.**

While there is an improvement in business, it comes slowly. The weather is now much cooler, which is a favorable omen for the trade. While there is enough stock to supply all demands it cannot be said to be over plentiful. There are good roses on the market, but no more than enough to go around. Carnations are good for this time of year. While there are some good chrysanthemums in, the great volume is yet in the future. Dahlias and cosmos and a sprinkling of other outdoor stock is abundant and cheap.

FLORISTS' CLUB MEETING.

The regular monthly meeting of the club was held October 4, President Heacock in the chair. The feature of the meeting was the address by Richard Vincent, Jr., of White Marsh, Md., on the bulb growing industry of Holland, which was beautifully illustrated with stereopticon views and at the close was loudly applauded and awarded a vote of thanks. Robert Scott & Son, of Sharon Hill, exhibited their sport of the Killarney rose. It is more double than the parent and was reported by the judges to be an admirable flower. The meeting was a very enjoyable occasion. The attendance was large and abundant refreshments were served during the evening. W. F. and Adolphus Gude of Washington, D. C., were notable visitors at the meeting.

NOTES.

John McIntyre, who has just returned from a southern trip, went as far as Richmond, Va. He speaks in glowing terms of the enterprise of Ratcliffe & Tanner, of Richmond. On October 1st they will move into their new building, 25-27 West Broad street. It is 150 feet from front to rear and four stories in height, and will be used exclusively for their business, with everything thoroughly up-to-date. Mr. Ratcliffe looks after the retail store, while Mr. Tanner is in charge of their twenty-five greenhouses.

Mrs. John Cella, wife of the well known retailer of 21st street and Columbia avenue, recently underwent a serious operation at a local hospital but is now rapidly recovering. Mr. Cella reports fall business as rapidly improving, and between the anxiety for his wife and looking after the store he has been very busy.

The West Philadelphia Flower Shop, 32 South Fortieth street, conducted by Paul and Arthur E. Schroeder, is a very interesting place to visit. Paul Schroeder has had large experience as head gardener on fine private estates, and thoroughly understands all the branches of the business.

Peter Wagner of Brooklyn, N. Y., accompanied by his estimable wife, was a visitor last week. In company with his friend, Roman J. Irwin, he visited the Joseph Heacock range at Wyncote and took in other leading features of this city.

Charles Imbrie Kent, Jr., who recently succeeded his father in the retail business at 204 South Fortieth street, has a very fine store, with a conservatory attached, and is doing a nice business.

Rupert Kienle of 39 South Seventeenth street, says that his retail busi-

ness has greatly improved during the past two weeks. He is an up-to-date retailer and always has what the people want.

The first pink chrysanthemums we have noticed on the market came in to the Pennock-Meehan Co. on September 22. They were of the variety Montmort and were in fine condition.

Edward Reid has gone on a trip through the South. During his absence Stewart Miller will look after the store, assisted by Ralph Shrigley, formerly with the Pennock-Meehan Co.

The stock that the Leo. Niessen Co. is now handling is very noteworthy. They have a line of the best rose growers in this vicinity, and the pick of the dahlia crop.

J. F. Hunter, formerly with the Robert Craig Co., has assumed the management of Miss Baker's range at Media, Pa., and it is believed that he will be successful.

John Jensen, 3840 Lancaster avenue, has a very handsome store and is doing a good business. Do not confound him with Yens Yensen; they are no relation.

Paul Berkowitz of H. Bayersdorfer & Co., has returned from his vacation which he spent at Atlantic City and other seaside resorts.

Pennock Bros., retailers, of 1514 Chestnut street, are making remarkably fine window displays of the most seasonal flowers.

W. J. Baker visited the unveiling of the Pennsylvania monument at Gettysburg battlefield and thoroughly enjoyed himself.

Charles Gray, formerly with W. E. McKissick & Bros., is now the buyer for Habermehl's Bellevue-Stratford store.

Alfred M. Campbell, wholesale, of 1510 Sansom street, is carrying a good stock and reports business improving.

Samuel B. Bell, 61 North Eighth street, has recently been doing fine funeral and decorative work.

Mary A. Fox, formerly at 4652 Lancaster avenue, has closed her store and retired from business.

Mark Mills of the W. K. Harris range reports good business and expects it to improve.

M. Rice & Co. report the best autumn business they have ever had.

S. S. Pennock has returned from his vacation.

HILLSBORO, ILL.—George L. Zeall will soon commence work on a greenhouse in which to grow flowers for the local trade.

MUNCIE, IND.—The Warfel Floral Co. are erecting six new greenhouses, intending to grow carnations for the wholesale market.

YOUNGSTOWN, O.—The boiler room and part of the greenhouse of Rudolph Haney was destroyed by fire September 17, causing a loss of about \$600.

PORTLAND, ME.—A new greenhouse is being erected by the city authorities for the purpose of growing the plants for the decoration of the parks and public grounds.

GOOD BUSINESS.

October made its advent with frost still holding off. Everywhere the tone of the florist trade was cheery. There has been a good supply of everything and the markets were quickly cleaned up. At the Co-operative Market more stalls have been sold. In both markets the new rental year went into effect October 1. Some kept their old stalls, but there were many changes of location. Two hundred and fifty stalls make a busy scene. At the old market there are several who sell for others, and their stuff is coming in all day. At the Co-operative the stall owners bring their stuff early and get away as soon as possible. It is sometimes noticeable that the men who want to go home early accept lower offers of cash than the all-day salesmen.

NOTES.

Among the retail florists, Galvin, Tremont street, had a big wedding at Plymouth, to which they shipped two car loads of bays and palms, besides smilax and yellow chrysanthemums. They are nearly ready at the Back Bay store with a greatly improved show front. They report a busy October in prospect. Wax Bros. had orders for set pieces for the funeral of Solicitor General Bowers, from the U. S. attorney general, two other cabinet officers and John Hays Hammond. Silverman, Winter street, is to have a swell rig, horse and van, delivering orders. Zinn, Park street, has installed a large electric sign on top of his building. MacMulkin, Boylston street, has introduced a line of fall bulbs. His window, arranged in yellow, drew attention, as did Houghton's, with a beautiful arrangement of ferns.

At the wholesale florists roses are in the lead, carnations next, mums are getting third place. Robinson's report, "Not enough good stuff to go round," "Headquarters for valleys and Beauty roses." Welch's report plenty of stock and business holding its own. Jansky was filling an order of new pattern of clover leaf wire frames.

Supt. Sullivan will begin next week to clear out the beds at the Public Garden, preparatory to putting in 100,000 bulbs for spring bloom. He makes some classes of bulbs do service several years.

Zinn reported a busy week with large out-of-town funerals. "Business very good" at Doyle's, Beacon street. Galvin also sang the same cheery note.

E. J. Crowley, former salesman for the Newtonville Avenue Greenhouses,

Rutherford, N. J.

New York.

DEPRESSING WEATHER.

The continued hot weather of last week has had a rather depressing effect on the market again. Although toward the end of the week there was a little more activity owing probably to the close proximity of the Jewish holidays and a tendency of the retailer to speculate on that account. Quite a number of fair gardenias and violets are seen on the streets just now, some fine mums are arriving and numerous cattleyas have suddenly made their appearance causing a considerable drop in their price.

NOTES.

Ed. Habermehl of Habermehl & Sons with 25 men from Philadelphia decorated the new department store of Gimbel Bros. for their opening September 29. 125 cases of southern smilax, more than 300 palms and an enormous quantity of beech sprays, pine bows, roping and hydrangeas were used. A distinctly novel feature was the decorating of the elevated railroad structure for over a block in front of the store with southern smilax, beech sprays and roping. Julius Wolff of 1617 N. Nineteenth street, Philadelphia, will have charge of the florists' department of this store.

It is pleasing to note that Greenhut & Co., one of the large department stores here, have gone in for horticultural display as a means of advertising. Window boxes range along the entire second floor of this establishment, artistically filled with box trees, English ivy and plants of celosia, etc., the effect being very beautiful. It is to be hoped that other large stores will soon follow their example and New Yorkers will be able to point with pride to her beautiful aerial gardens before long.

Chas. Thorley secured the contract for decorating St. Patrick's Cathedral, the consecration of which took place October 5. Five carloads of autumn foliage and over 25,000 yards of roping were used in decorating the interior, the altar was banked with palms and Easter lilies of which over 9,000 blooms were used, while on the lawns surrounding the edifice and at the entrance were placed rows of large bay trees. Manager Humphries was personally in charge of the work.

The New York Florist Club Bowling Association held their first official games of the season September 30, at which there was a good attendance. Prizes were won by J. Fenrich and J. A. Manda. The following are the scores:

Fenrich	156	173	121	Shaw	165	103	110
Berry	108	104	115	Manda	162	149	140
Burns	92	105		Scott	137	167	114
W. Kessler	95	96		Smith	102	121	156
McArdle	129	114	95	Nugent	55	62	84
Vanderbilt	74	86	52	Fleaser	91	67	79
Moltz	128	118	108	Meiklejohn	74	60	84

The aged mother of John Geib, a well known florist of 131 Jackson avenue, Long Island City, was recently found dead in her home. Mrs. Geib lived alone and it is thought by physicians who examined her body when found, that she had been dead a week. They attributed her death to natural causes but her son thinks that she was murdered, as he says that she was supposed to have a considerable sum of money which cannot be found.

W. S. Lee, the Hippodrome florist, has a window display in the form of a picture, the frame of which is formed with plants of Scottii ferns, while the picture itself is a sloping landscape of small ferns, crotons, wild aster and spray orchids, with a background of cybotium ferns and golden rod, and is attracting a good deal of attention.

Kessler Bros. will add to their wholesale plant business a wholesale cut flower department, which will be under the management of R. Gretsche. The firm has secured the lease of three adjoining stores and will commence alterations just as soon as they are vacated by the present tenants.

Roy & Bassi have opened a fine store at 104 Main street, New Rochelle, both young men were until recently employed in Mt. Vernon, the Foster & Mansfield Co. of West Twenty-eighth street furnishing the store fittings, which are quite elaborate.

P. Devir, decorator for Wm. P. Sears, has a large dinner decoration on for the Union League club, the piece d' resistance being a large call bell made of white and pink asters.

The Onaway Florist will open for the season October 6 under the management of Miss Beardsley, who has been with this firm for a number of years.

The Badgely, Riedel & Meyer Co. are now receiving some fine roses and have added Frank Sheehan to their staff of salesmen.

The home of J. Fenrich received a visit from the stork September 28, and mother and daughter are both doing nicely.

A meeting of the board of directors of the New York Cut Flower Exchange will be held October 1.

Buffalo.

Ideal weather the past week has made the demand for flowers quite brisk. All flowers are showing improvement in quality. Roses, carnations and mums being almost equal to demands. Funeral work has been very good as have been weddings of fair proportions. The AMERICAN FLORIST speaks of floral pictures of other cities being accepted by the Ladies' Home Journal. Palmer has had his bouquets and dinner table arrangements in the Journal several times which is a good advertisement for Buffalo.

falo and casually informs the public that Buffalo is well off for artists in floriculture. The floral picture in S. A. Anderson's window last week was the greatest attraction in a florist's window in some time, the flowers in the picture were Oncidium Orchids, Mrs. Taft Roses and Adiantum Farleyense. Beginning October 1 down town flower stores will be open until 10 P. M. Saturdays until 11 P. M. Dahlias are coming into the Buffalo market and are of very good quality. Some fine orchids are also coming in and finding ready sale. With three wholesale houses in Buffalo the local florists should be well supplied with stock.

NOTES.

The activity displayed by all of the members of the Buffalo Florists' Club precludes any of the interesting papers that were anticipated for the early fall meeting, they will be postponed until after the show.

Chas. Sandiford has returned from his trip abroad thoroughly rested and ready for his fall planting. He gained in weight but the salt water did not help his hair. They say he is more bald than ever.

Palmer & Son are making alterations in their Genesee branch, which, when completed, will give them more room of which they are very much in need at present.

J. Benson Stafford as usual has had some very exclusive window displays. Oddity and originality are Ben's strong points.

Chairman Kasting has made good selections in his committees and all promise him their support.

The press of Buffalo have taken up the flower show and are doing all they can to make it a success. BISON.

Louisville.

Mr. Anders Rasmussen acted as judge at the recent state fair and gave general satisfaction, only one disgruntled florist thinking he ought to have had a premium he failed to get. The competition was so close that Mr. Rasmussen called in Mr. F. C. Haupt to help him decide and after the decision one florist insisted on another judge being called, but this was ruled out.

F. C. Haupt last week sold the Hast apartment building on Fourth avenue for something over \$60,000.

KOKOMO, IND.—W. W. Coles has returned from Oden, Mich., where he spent a brief vacation.

WATERBURY, CONN.—Geo. T. Ryan, for several years with J. Newman & Sons, of Boston, Mass., as designer, decorator and traveling man, has opened a store at 24 East Main street.

The Seed Trade.

American Seed Trade Association.

E. L. Page, Greene, N. Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

VISITED CHICAGO: J. Chas. McCullough, Cincinnati, O., and Fred H. Bateman, Grenloch, N. J.

NEW YORK.—Alex. Mathers, for some years with the Currie Bros. Co., Milwaukee, Wis., and other western concerns, is now Thorburn's manager.

CHICAGO.—Prices on the board of trade October 5 for grass seed were noted as follows: Timothy, \$7.50 to \$8.50 per 100 pounds. White clover, from \$20 to \$25.

EDWIN NORTHRUP, of Northrup, King & Co., who visited Chicago October 5, returning from the Wisconsin pea district, reports great shortage in named garden varieties and that many of the Alaskas are of doubtful parentage.

PHILADELPHIA, PA.—Fred J. Michell and Roman J. Irwin visited the Vincent Dahlia Show at White Marsh, Md., September 27.—Maurice Fuld was one of the judges at the Nassau County, N. Y., exhibition held at Glen Cove, September 29.

THE recent ruling of the Board of Appraisers to the effect that hyacinth bulbs are dutiable at \$2.50 per thousand is not satisfactory to the importers and as the amount involved is large an appeal is being made to the Commerce Court, the final resort in custom house cases.

AN Erfurt correspondent writes, with regard to seed crops, as follows: "All items are looking miserable so far and promise poor crops, pansies perhaps excepted. The continued wet and cold weather destroys a good many crops, and we can not say anything definite before the middle or end of October."

BOSTON.—Among the seedsmen the universal remark is that a frost is needed to start the sale of bulbs. "Too much like summer," they say. And the seed houses have another common misery in the fact that they can't get seed to fill their orders. On some things the shortage is very serious—peas and beets especially.—W. T. H.

BARENBRUG, BURGERS & Co., grass seed specialists of Arnheim, Holland, for whom Geo. C. Watson, Philadelphia, is American representative, report that the bright prospects anticipated early in the season have not been realized. Broken weather from the middle of June to harvest time was so disastrous as to result in only an average crop generally, in some cases below the average, and in quality the seed is not so bright or so heavy as could be desired.

WASHINGTON, D. C.—G. E. Shultz says that the fall outlook for market gardeners looks gloomy, as much of the sowing for fall vegetables has not come up on account of the drought, and it is now too late for another sowing. Mr. Schultz is now finely located in his new store, which fronts on 304 Tenth street, N. W., and runs through the block to 1005 C street. He is doing a nice business in bulbs—C. M. Woolf & Co. report that on account of the drought sales of grass, wheat and rye seeds have been greatly curtailed.

G. KRUYFF, of Van Wavern & Kruyff, Sassenheim, Holland, was a visitor this week. Mr. Kruyff was well-known to the American trade a few years ago but has not been here for some years and is now on a short trip merely for recreation, visiting New York, Chicago, Philadelphia and Washington. Mr. Kruyff, who is president of the Association of Dutch Bulb Exporters and generally well informed as to the bulb situation, says the bulb supply is pretty well sold out for this season in Holland. The flowering quality of the smaller bulbs available this season, he claims, will be found quite satisfactory. The white spireas are not so good as in former years but Queen Alexandria (pink) will be found very good on account of the cold summer experienced in the growing localities.

BALTIMORE, Md.—The drought has seriously affected the sale of grass seed. Some fields that have been sown have been failures and at this writing and under present conditions the farmers will not sow. At the store of J. Bolgiano & Son it was recently stated that the drought only had prevented them from doubling their sales of last year.—A new seed store is about to open at 32 Light street. The firm will be known as the Myer, Stisser Co. John F. Myer has for some time been in charge of the seed department at the store of the S. L. Lamberd Co., 111-15 Light street, and is an experienced and

active man. While Mr. Stisser is not so well known in the seed trade it is understood that he is a good business man.

Canadian Peas and Beans.

The Canadian Crop Bulletin for August, just received, says of peas: "The pea crop has been rather disappointing, although in some cases remarkably good yields have been reported. The crop did not get a good start in the spring, owing to too much rain, and the dry, hot weather at blossoming prevented a satisfactory podding. While the weevil was but little complained of, the presence of a green aphid was reported in most parts of the Province, which appears to have checked the vigor of the growing vines, more especially those later sown, and as a result the straw is not so long or leafy as usual. Harvesting began early in August, but when correspondents wrote about the middle of the month considerable of the pea crop remained to be pulled."

The report on beans is as follows: "Beans were only in blossom, or just podding, when most of our correspondents wrote, and at that time prospects were considered fair; but later reports were to the effect that while the plants were making a large spread they were not podding very well. Rainy weather at a critical time was given as the chief cause of injury to the crop. Prospective harvesting was variously placed at September 1 to 15.

Seed Testing Bureau.

Washington, D. C.—It should be interesting news to the trade that as outlined above a bureau has been established here for the purpose of thoroughly testing all kinds of seed. F. W. Bolgiano, the well known seedsman, is president and an active promoter of the enterprise. Miss Mary Stott, late of the Bureau of Plant Industry, Department of Agriculture, will be in charge of the work. She comes to this new field highly recommended by Edward Brown, in whose department she has been long employed. It is generally acknowledged that the creation of this bureau is a movement that meets the demands of these times. Much trouble and inconvenience has recently been caused by the laws enacted in several states relating to seeds. Seed bought in Europe is frequently misrepresented as being free from dodder. The purity and quality of such seed can be quickly verified if it is pure by submitting samples to this bureau which will also be prepared to give expert testimony in case of lawsuits over the disputed quality of seeds. The bureau will be incorporated. The minimum fee for testing is 15 cents; maximum, 50 cents, which includes analysis. For the present the offices of the bureau are at 1009 B street, N. W., Washington, D. C.

Market Gardeners' Convention.

CONTINUED FROM OUR ISSUE OF OCT. 1.

The convention reassembled Septem-
ber 29 with the attendance increased
to 300, and papers were read as fol-
lows: "Which is to be Preferred, the
Large or Small Package?" by J. W.
Draper, Springfield, Mo.; "Are Present
Transportation Rates Just?" by J. H.
Rice, Ashtabula, O.; "Selling to the
Retailer," by L. B. Pierce, Tallmadge,
O.; "Selling Through the Commission
Man," by R. F. Dilger, Chicago, Ill.
The afternoon was spent in visiting
the greenhouse plants of Grand
Rapids. Automobiles were provided
by the growers and citizens and a
most enjoyable afternoon was spent in
inspecting the several greenhouses of
market gardeners and florists. Notable
was the visit to the houses of Eugene
Davis, which is the home of the Grand
Rapids lettuce, this standard loose leaf
variety was originated by the proprie-
tor some 30 years ago when this
enormous business of growing lettuce
under glass was first begun. In the
evening a banquet was tendered the
members by the several growers of the
city and 350 sat down to an elegant
menu in Press Hall. The tables were
beautifully decorated and at each plate
was a Killarney rose with a card at-
tached, which read "Compliments of
the Grand Rapids Florists." The in-
ner man being satisfied Prof. Wm. R.
Lazenby of Columbus, O., was intro-
duced as toastmaster, and he very
pleasantly introduced the following:
George E. Rowe and Hon. Charles W.
Garfield, of Grand Rapids, Prof. T. C.
Johnson, Norfolk Va., S. W. Severance,
Louisville, Ky., Mrs. F. N. Rowe,
Grand Rapids, Prof. R. L. Watts, State
College, Pa., and Mrs. A. H. Kohler,
Grand Rapids, who interested the
guests with instructive and witty
speeches.

The convention reassembled on the
morning of September 29 and the dis-
cussion of R. F. Dilger's paper con-
cluded. Other papers read were, "Dif-
ferent Methods of Firing Greenhouse
Boilers," by C. D. Le Van, Sanborn,
N. Y.; "Mushroom Culture," by J. S.
Brigham, Bowling Green, O.; "How
Can Early Outdoor Tomatoes Be Made
Profitable" by Prof. W. F. Massey,
Salisbury, Md., and "Marketing Gar-
dening in Colorado," by Prof. Wendell
Paddock, Columbus, O. At the after-
noon session the first business was
the nomination and election of offi-
cers, the committee on nomination re-
ported the following who were duly
elected: Prof. B. L. Watts, State Col-
lege, Pa., president; H. F. Hall, Grand
Rapids, Mich., vice-president; S. W.
Severance, Louisville, Ky., secretary,
and L. Ruetenik, Cleveland, O., treas-
urer. Papers were then read as fol-
lows: "Some Pointers on Greenhouse

Construction," by E. A. Dunbar, Ash-
tabula, O.; "Celery Culture," by R. H.
Garrahan, Kingston, Pa.; "Some Re-
cent Investigations in the Polleniza-
tion of Tomatoes," by Prof. O. I. Gregg,
Michigan Agricultural College; "Detail
Methods of Operating a Massachu-
setts Market Garden," by Prof. H. F.
Thompson, Attleboro, Mass. Boston,
Mass., having been selected as the city
in which to hold the next convention
in 1911. The committee on resolutions
read their report thanking the city
of Grand Rapids and the growers of
the vicinity for the many favors and
courtesies extended the association
during the convention.

The automobile ride was a revelation
to many who enjoyed it, for the ex-
tent of the farming under glass at
Grand Rapids is beyond comprehen-
sion unless seen. More than \$1,000,-
000 is invested in greenhouse property
covering more than 50 acres of ground
and 300 acres more with a valuation
of \$450,000 are cultivated by the own-
ers in the growing of flowers and gar-
den products. There are 60 green-
house plants in and close to the city,
37 of which are devoted exclusively to
growing vegetables. The growers have
organized an association which trans-
ports and disposes of their products
and the members attending the con-
vention were much interested in visit-
ing their office and warehouse and in-
specting their system of packing and
shipping the large consignments of let-
tuce, cucumbers and other vegetables.

FUMIGATION METHODS

By PROF. W. G. JOHNSON

Formerly State Entomologist of Maryland

A Practical Treatise and timely work on cheap
and effective means of destroying insect pests and
other vermin in various places. This work is the
outcome of practical tests made by the author, to-
gether with the experiences of others, and is one of
the most important books published this season and
is much needed at this time. It will be of particular
interest to

FRUIT GROWERS AND NURSERYMEN
owing to the widespread prevalence of the notorious
San Jose scale. Hydrocyanic acid gas is the only
practical remedy for the destruction of this pest and
is being used more extensively than ever before by
nurserymen and fruit growers. The perfection of
the apparatus for fumigating young orchard trees is
outlined in this work. The methods can be easily
applied in orchards and nurseries for many danger-
ous pests at very small cost. The writer is consid-
ered the best authority on this subject in this country
and has left nothing undone to make this the most
complete work of the kind ever published.

GARDENERS AND FLORISTS
have found that vegetables and flowers cannot be
grown under glass without frequent fumigation for
the destruction of insect pests. Hydrocyanic acid
gas has solved this problem. The methods of pro-
cedure are fully described and every detail is given
for generating and applying the gas.

MILLERS AND GRAIN DEALERS
have been looking forward to the publication of this
work, as hydrocyanic acid gas has been found one of
the most important materials for clearing mills and
warehouses of insects. The subject of carbon bi-
sulphide for fumigating mills and elevators con-
taining grain in storage is also thoroughly consid-
ered. To this trade the work is indispensable and
transportation companies have found it of great
value for the fumigation of cars, ships and other
inclosures infested with vermin.

FARMERS OF THE COUNTRY
have here fully described a simple, easy remedy for
gophers, prairie dogs, squirrels and other animals
in the ground, and rats and mice in any inclosure.

COLLEGE AND STATION WORKERS
will find it an up-to-date reference work on this sub-
ject. It is complete in every respect and is the only
work of the kind ever published. It is written in a
popular non-technical style, profusely illustrated,
handsomely bound, covering 250 pages, price, post
paid, \$1.00.

Stocks for Roses.

Few points in the culture of roses have led to more discussion among rosarians than the question of suitable stocks. Unfortunately, a few growers are very dogmatic upon the subject, and almost refuse to mention some stocks, except in terms of abuse. My own experience, says a correspondent of the Gardeners' Magazine, is that all the rose stocks are useful in some way, although I am quite willing to admit that during the last two decades the manetti has gone out of favor. Now, had it not been for this stock, its vigor and the facility of increasing it, we should not have had roses propagated so freely and so cheaply some years back.

Then we have three distinct forms of the briar used as a stock, viz., seedlings, cuttings and standards. The strong-growing polyantha stock is much used upon the Continent still, and this also suits some roses better than other stocks. The De la Greferaie completes the list of those in general use, and the previous remarks apply to this as well.

But it is not so much upon the merits of various stocks that I intend to dwell, having had quite enough of that subject many years back. What we will try to look at will be the better preparation of stocks than was the case until quite recently. Here I do not think we shall be upon such dangerous ground. The subject is seasonable. To take the hedge or standard briars first. It is advisable to procure these before frosts, otherwise they become injured by laying out as procured from the hedges. I have known them lie out for more than a week, being collected as the grubber returned. I do not think any point in the rooting of these is more important than avoidance of frost and drying winds. To plant such stocks in the condition they are received is folly. By all means trim off coarse roots, and cut away any small suckers, as there will never be a better opportunity for this than the present. Do not leave any coarse knobby branches, but cut down until you have a clean stem, whatever the length may be. To commence clean in stem and root is a great feature here. Plant as soon as possible; I have begun in September, and would certainly like them finished by the end of October. Put them six inches deep, and tread firmly. When prepared and planted early most of them begin to callus, and root at once, and this is a great help to them during the trying days of winter and in early spring winds.

Continuing with the briar stock, we next consider the cuttings. The cutting briar is a most useful stock, and suits any rose that needs or can be helped by foster roots. Choose growths a little more than half-ripened, and cut them into lengths of about nine inches. The most important part of preparation follows, and, I may say at once, it applies equally to the manetti and De la Greferaie, so I can dismiss these two now. Cut out the bottom eye or eyes, only leaving two, or three if closely set, at the top of the cutting. Unless this is done there is great trouble with the stock later on. Nor do I find the cutting root usefully without it, because if the bottom eyes are left on the cutting they throw a

A BLUE ROSE

The Greatest Rose Novelty of the Century

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

sucker at once, the barrel of the cutting often dies, and we have an almost useless stock. When planting stocks made from cuttings, the roots which will probably have sprung from the stem must be removed. The stocks are fit to plant out the winter after the cuttings were set in, but that is a subject for another note in due season. The cuttings may be set in sandy loam, sufficiently deep so that only an inch or so remains above the newly-moved soil, which will sink a little as it settles under rain and atmospheric pressure. Two and a half inches is far enough apart for the cuttings in the row, and fifteen inches from row to row. This allows the hoe to be brought into frequent use during the early part of the year.

Price List Free on Demand.

Seedling briars are best purchased the same autumn one proposes to plant them, and may be the size of a wheat straw at their base. Much larger stocks are apt to swell too much as they grow during the budding season. They will soon be as large as an ordinary cedar wood pencil, and be quite ready by the time buds can be procured.

Dreer's Hardy Perennial Phloxes

We are the largest growers of Perennial Phlox in the world, having this season over a half million field-grown plants in stock.

The collection offered below embraces every known color in this gorgeous race of summer-flowering plants, and we are prepared to furnish many of the latter as well as the older standard varieties in large quantities at a low uniform price.

The plants we offer are all strong one-year-old field-grown, and will make a fine display of flowers next season.

Three Fine New Hardy Phlox

We would particularly call attention to the following *Three New Varieties* as not only the most distinct in color, but in every way superior to all varieties of recent introduction which have come to our notice:

Elizabeth Campbell. Very bright salmon-pink, with lighter shadings and dark crimson eye, an entirely new and much-wanted shade in Phlox.

Frau Anton Buchner. The finest white variety yet introduced, having the largest truss and individual flowers; of dwarf habit,

Rosenberg. Bright reddish-violet, with blood-red eye, large truss and individual flowers as large as a silver dollar.

PRICE: Any of the above three new varieties, \$1.50 per dozen; \$10.00 per 100; \$90.00 per 1000.

HARDY PHLOX.

General Collection of Hardy Phlox

Albion (Medium). One of our own introductions; producing very large panicles of pure white flowers with a faint aniline-red eye.

Algae Adamson (Medium). Immense flowers, snow-white, with red eye.

Antonin Mercie (Medium). Light ground color, upper half of petal deeply suffused bluish lilac; large, white halo.

Bacchante (Tall). Tyrian rose, with crimson-carmine eye.

Beranger (Dwarf). Ground color white, delicately suffused with rosy pink, distinct amaranth red eye.

Brid-smald (Tall). White, with large crimson-carmine centre.

Belle Alliance (Medium). White, with large pure red eye.

Charles Seiller (Dwarf). Bright reddish violet, with large white star-shaped centre.

Clara Benz (Dwarf). Lovely carmine-rose, with darker eye.

Colibri (Tall). White, with crimson carmine centre; very late.

Consul H. Trost (Medium). Pure red with bright French-purple eye.

Champs Elyses (Dwarf). A very bright rosy magenta of an effective shade.

Coquelicot (Dwarf). A fine pale scarlet, with crimson-red eye.

Caran d' Ache (Medium). Geranium red with old rose shadings and white eye; very effective.

De Miribel (Medium). White suffused with bright rosy scarlet, red eye.

Diadem (Dwarf). A fine dwarf pure white.

Danton (Medium). Scarlet, with pure red eye.

Etna (Medium). Crimson red, suffused with fiery red; cherry-red eye.

Edmond Rostand (Medium). Reddish violet shading brighter towards the centre, with an exceptionally large white centre.

Eugene Danzavillier (Tall). Lilac, shading white towards the edges; large white centre.

Edmond Boissier (Dwarf). Bright reddish violet, with large white halo.

Eclairer (Tall). Brilliant rosy magenta, with large lighter halo; an excellent variety.

Frau Dora Umgeller (Tall). Crimson red; a strong free-flowering late variety.

Gruppenkontin (Tall). Delicate pale rose mauve with claret-red eye.

George A. Stronielin (Medium). Bright scarlet, with crimson red eye; does no blea h

General Giovaninelli (Dwarf). Bright tyrian rose, with light shadings at the base of each petal; a pure red eye; very effective.

General Van Bentz (Medium). Scarlet, with rose shadings and crimson red eye.

Bermine (Dwarf). The dwarfest variety in our collection, never exceeding ten inches in height; pure white flowers of good size, early; unequalled for bordering; a perfect little gem.

PRICE: Any of the above General Collection, \$5.00 per 100; \$45.00 per 1000.

For a complete list of seasonable stock see our current wholesale list. If you have not received a copy it will be mailed to you on application.

The Leading Wholesale Florists
 Of Michigan.

200,000 square feet of glass devoted to Cut Flowers. Shipments everywhere. Prompt and Satisfactory. Write us for particulars.

Grand Rapids Greenhouse Co., Grand Rapids, Mich.

Toronto.

Business continues to improve daily and is decidedly better than last year, the ideal weather conditions have greatly benefited stock and roses are grading fine, though Beauties are scarce the quality of Richmonds is so good that most of the orders are filled with the latter, Killarneys both pink and white, Maids, Brides, Queen, Kaiserin and a few Jardine are showing an improvement in the cut daily. Carnations are coming in plentiful enough to meet the demand and the stock is fine for the early season, Chrysanthemums are both plentiful and good, all colors including pink, white, red and yellow are coming in and the stores again resemble flower shops with their gay assortment of bloom, valley continues fine and plentiful and orchids, dendrobium phalaenopsis and formosum giganteum, oncidiums and cattleya labiata are all plentiful, violets can again be had in thousand lots.

The business in the new flower section at the market has not come up to expectations, but after we have had a good frost to cut off the outdoor flowers the conditions there will improve.

W. McKenna of Montreal was a visitor stopping off on his return from Chicago. The windy city appealed to him and was an eyeopener to him in regards to the size of the plants and to general good quality of the stock.

The seed stores are busy with bulbs, they have been arriving by the car load and are going out quickly. The Steele Briggs Co. and J. A. Simmers both report heavy sales.

The Horticultural Association held their fall exhibition in Allen Gardens and as no admission fees were charged the public were generous in their attendance and praise.

WE TAKE THE LEAD

In what? What a foolish question! Don't you know? Didn't you hear of **GODFREY ASCHMANN**, the great **Araucaria** Importer, **Grower** and **Shipper**? These so well favored, everlasting green decorative plants, the **Araucaria Excelsa**, **Robusta Compacta** and **Excelsa Glauca**, are in favor more than ever this year.

This is our 25th anniversary since we began importing Araucarias. Watch! See us grow! Beginning 25 years ago with 100, our this year's (1910) importation is 10,000, and more are coming this fall after I have made my selection of the choicest of the choice on my trip to Belgium; the growing district of the world in Araucarias and Azaleas. The trade is well informed that for many years past I go personally to Belgium to protect and elect for my customers the best of **Araucarias**, **Azaleas**, **Palms**, etc., that cash can buy there. Empty houses won't pay. Now is the time to fill your empty houses with something to grow into money while you are asleep.

Remember, it is the wideawake man that is not afraid to invest a dollar that makes the money.

Please look at our special low prices for superior stock.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants, 5-5½-6-7 in. pots, 12-15 18-20-25-30 in. high, 3-4-5-6 tiers, 2-3-4-5 years old, 35c, 50c, 60c, 75c, \$1.00, \$1.25 to \$1.50 each.

Robusta Compacta, **Excelsa Glauca**, 6 in. pots, \$1.00 to \$1.25 each.

Kentia Forsteriana, in fine shape 6-in. pots 30 35 40-45 in. high, 4-5-6 years old, 75c, \$1.00 \$1.25, \$1.50, \$2.00 to \$2.50 each; 4-in., 35c each 25 in. high.

GODFREY ASCHMANN

San Francisco.
BUSINESS IMPROVING.
The condition of the flower business this week, both wholesale and retail, shows a marked improvement over that of the same period last month. The stock, while scarce, is fairly good and the growers find little or no trouble in disposing of their output at their own prices. Chrysanthemums and violets are now beginning to show themselves in the market in great abundance; the former flowers bringing good prices to the growers. Roses are still a scarce commodity, and the season for the rubber lilies is rapidly approaching the end.

NOTES.
S. R. Lundy, western representative of W. A. Manda Co., South Orange, N. J., recently returned from a long trip through the east and Canada, and reports business in that territory good. John H. Sievers, one of the oldest, most respected and widely known florists and growers in San Francisco, died at his home in this city, September 8, 1910. The illness of Mr. Sievers was quite brief, and his death was a great shock to his relatives and many friends.
J. A. Carbone, a well known nurseryman in Berkeley, left last Wednesday for an extended business trip through the east. While away he will visit all the principal growers in the eastern cities.
T. Wright, one of the prominent florists of Los Angeles, was a visitor in our city last week. He is taking a much needed vacation.

ORDER NOW

TELEGRAPH AT OUR EXPENSE

This Boiler has found great favor with the greenhouse trade throughout the entire country. The Kroeschell will develop more heat units per pound of coal consumed than any other form of construction.

More Kroeschell Boilers and Generators used for greenhouse heating than any other make.

PAY AFTER BOILER REACHES YOU

Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

Morehead Steam Traps

The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist.

It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" Detroit, Mich.

NOW READY Trade Directory

FLORISTS, NURSERYMEN, SEEDSMEN

THE 1910 EDITION

—PRICE, \$3.00 POSTPAID.—

AMERICAN FLORIST CO.,

324 Dearborn St.,

CHICAGO

Ready Reference Section.

10 CENTS PER LINE, NET.

THIS IS A TWO COMPARTMENT FRUIT HOUSE
75 ft. long. Erected by us at Greenwich, Conn. One is filled with grapes, the other, peaches and nectarines.
Hitchings and Company, New York, 1170 Broadway.

THE STANDARD VENTILATING MACHINERY

The original machine with self-oiling cups. The most powerful, least complicated, very compact, with ease of operation.

The New Duplex Gutter

Over six miles in use and highly recommended by all. The only Drip Proof gutter on the market.

The Standard Return Steam Trap

It has no equals for simplicity or its working. Catalogue free.

E. HIPPARD, Youngstown, Ohio.

Wichita, Kans.

The usual autumn conditions seem to prevail in the trade here. Business for September was up to the mark for that month. Funeral work continues to furnish the best half of the demand, although weddings and other social affairs are more in evidence, but so far the call along these lines has been very moderate indeed. Quality of stock available to the retailer has shown considerable improvement. Carnations are again on the market and the good judgment of those who planted at the break in the "dry spell" is confirmed by the cutting of some very fair stock with reasonable length of stem considering the time of year. Although at time of planting some of the stock was slightly undersize it was at a complete standstill and when it was rushed into the houses at the beginning of a week of cloudy, damp weather preceded by a rain, it took a good hold and kept right on growing without the necessity of a further check. Chrysanthemums are also in evidence, although the locally grown stock is not yet in supply in any quantity.

NOTES.

C. S. Ford, representing A. Herrmann of New York, was a caller recently, as was also Mr. Reyburn, representing Vaughan's Seed Store. Both gentlemen report good business and were well stocked with optimism along with their other necessities in the florist's line.

The Hersey greenhouses have been discontinued. The hail storm of last spring cleaned out the glass and the owners have since sold the rest of the material to a local market gardener, who has removed it to a new location.

Hemphill-Stehlin Co., Indianapolis, Ind.

ALL Nurserymen, Seedsmen and Florists wishing to do business with Europe should send for the

"Horticultural Advertiser"

This is the British Trade Paper, being read weekly by all the horticultural traders; it is also taken by over 1000 of the best continental houses.

Annual subscription, to cover cost of postage, 75c. As the H. A. is a purely trade medium, applicants should, with the subscription, send a copy of their catalog or other evidence that they belong to the nursery or seed trade.

Money orders payable at Lowdham, Notts.

Address **Editors of "H. A."**

Chilwell Nurseries, LOWDHAM, Notts, England

Terre Haute, Ind.

Business has been very good for the past two weeks and most everyone who was away during the summer has returned to the city. This has been very favorably noticed in the revival of social and other functions. There has been a great deal of funeral work. This, in addition to the weddings and parties, makes the volume of business very satisfactory. The weather here has been delightful for the past few weeks. The days are warm and the nights cool, so that it has been necessary to have a little fire nights.

NOTES.

L. H. Mahan takes his glass off during the summer to let the sun and air get to the soil, which is not a bad idea. He grows lettuce in the winter and asters and melons in the summer after the glass has been taken off.

The Terre Haute Rose and Carnation Co. are building a new house 30x150 feet for carnations and pot stuff. No finer roses can be seen anywhere, especially their Killarney.

Otto Heint, of West Terre Haute, has rebuilt part of his houses and put in concrete beds in others. He has a coal mine just across the street; coal less than \$1.00 per ton.

John G. Heint and son have re-decorated their store and made some minor changes. They now have one of the finest stores in the state.

Fred Wonker, at Highland Lawn, is about ready for winter. His cemetery business has been very good and his Boston ferns are very fine.

Cowan Bros. are putting in cement benches in part of their houses. Their carnations are doing very nice and promise a good crop.

Miss Mayme Creeden of N. B. & C. E. Stover's, has just returned from a two week's pleasure trip to Detroit, Mich.

Henry Graham, on South Seventeenth street, has one of the finest looking and up-to-date places in the city.

Visitors: Mr. Dysinger, of the Ionia Pottery Co., Ionia, Mich. B. S.

ZANESVILLE, O.—The florists of this city, accompanied by their friends, enjoyed a picnic at Moxahala Park, September 22. A special car to and from the park and a supper in the evening were particular features.

Your Kind of Gutter

Your kind, because you are the sort of man who wants a gutter that will stay a gutter for generations to come. One that is cast straight and made of tough iron that stands the strain with-

out cracking. No more thin, brittle gutters for you! Neither do you want one that the outlets are down inside the posts, rusting them out so they will give away some day

One hand points to the outlet which does not empty down the post to rust it out; the other points to the flange against which the partitions, when wanted can be screwed.

when you are least expecting it. Neither do you want a wrought iron channel gutter with its narrow side, which gutter everybody knows rusts out quickly.

Our 1908 New Model Cast Iron Gutter with drip gutters and sash bar clasps attached, is the gutter. Made right. Priced right. Get the price.

The annual fall exhibition of the Horticultural Society was held September 15-17, 1910, in Odd Fellows' hall, and the exhibits surpassed in excellence any previous show held by this society. The entries were so large and numerous that the committee had difficulty in granting the exhibitors the necessary room. Dahlias were the prominent feature and very fine blooms were shown by Richard Parkinson, W. D. Hathaway, J. P. Bodge and A. J. Fish. Displays of decorative plants were made by W. F. Turner and Peter Murray. The judges were Arthur H. Fewkes of Newton Highlands and Elliot H. Wefer of this city.

THE CAMP CONDUIT CO.,
Garfield Bldg., Cleveland, O.

Albany, N. Y.

Preparations for the second annual flower show to be held under the direction of the Albany Florists' club and the co-operation of the military authorities in the state armory, November 10, 11 and 12, are going forward enthusiastically. At the last meeting of the committee in charge it was reported that Governor White would formally declare the show open. The committee decided to make some changes in the rules governing entries and those concerned will be notified. It was decided to compile a supplemental prize list to provide for first and second prizes for best vases of 50 each, Enchantress, Winsor, Pink Delight, White Perfection, and White Enchantress carnations, also to award the cup donated by John Luther of this city to the collection of 100 carnations, any color, any variety, best arranged for effect. A lengthy discussion on vases suitable for the show was held and Chairman Goldring placed the matter in the hands of a special committee composed of E. P. Tracey, Fred A. Danker, and Robert Davidson, to investigate and report at the next meeting. A wedding bower will be a feature of the show this year and it will be built by the joint labor of the retailers who will also provide the material. Plants for the exhibition are expected from the greenhouses attached to the executive mansion and from the conservatories of the city park system. These will be loaned by the proper authorities. Regular meetings of the committee are being held to further the work of the show.

Value of the Experiment Stations to Ornamental Horticulture

A Paper by W. N. RUDD, Morgan Park, Ill., Read Before The Society of American Florists, Rochester, N. Y., August, 1910.

Florists Inappreciative.

We would nearly all of us receive with scornful disbelief a statement that the farmers were our superiors in enterprise and in "business horse sense"; and yet such is the fact in certain directions. The farmer early realized the enormous possibilities for good to him in the experiment stations and he also realized that here was a chance to get back in direct benefits some of the money he was paying out in taxes. He realized this, acted on it, and developed a gold mine. The experiment stations have revolutionized all agricultural and horticultural operations in the past few years, save and except the ornamental branches, whose workers have shown almost no interest, and have largely refused to receive help where offered. It is human to work along the lines of least resistance. The farmer received gladly what was offered and clamored for more. When funds were scanty he besieged the legislatures and compelled it to continually increase the appropriations for his work.

Can't Fool the Farmer.

You can't sell the farmer gold bricks any more. If you try to sell him oat hulls flavored with molasses to feed his cows, he will talk understandingly about fats and proteids (which you and I know nothing about) he will ask for a guaranteed analysis, and will know what it means when he gets it. You can't fool him any more. He has been educated by the experiment stations and whenever in doubt, consults them—his best friends and counsellors. He knows about nitrogen and potash and phosphorus; which he needs, and how much he should get for his dollar. By his support, the stations have accomplished the seemingly impossible, and compelled the meat trust to be fairly honest in selling its fertilizers. The stations through the printed matter they are

sending free to all who will receive it, through the farmers' institutes which meet in all the sections of the state, and by experimental farms favorably located, are telling the farmer what crops to grow and how to grow them; what fertilizers and feeding stuffs to use and how to use them; how to take care of his pigs, his chickens, and his family; how to build his barns and his fences; how to breed his live stock; in fact everything relating to his business. He sends his sons to the agricultural college and even goes himself, for the short course everywhere given now.

How—As to the Florist.

What do we get out of this proposition? Nothing. We help pay the bills and the farmers get the benefits. Just as long as we don't squeal and get our feet in the trough they will continue to do so. Not that they are to be blamed or that anything should be taken from them—just have the trough lengthened, more feed put in, and one end partitioned off for us. We are just as much in need of help as the farmer ever was—very likely more so. Take the coal pile. We buy more gold bricks along with our coal every year than the farmer ever did.

What member of this society can truly say that he knows anything accurately about coal? Who of us knows what a "British thermal unit" is? The farmer knows all about proteids and fats in his feeding stuffs and we do not know even the name of a unit of measure of heating value. We know only in a vague way that one coal is supposed to be better than another. We do not buy on an actual heating value basis; we do not burn our coal economically and we do not know whether we get what we buy or not. Verily the smoke from our chimneys represents a world of wasted dollars.

Practically every state makes the seller guarantee to the farmer just what he is getting and how much of each, in his fertilizer and feeding stuffs. No state makes the seller guarantee to the florist what he is getting or how much, when he buys coal. No seller is compelled to tell you that his coal is high in sulphur and though of good heating value, not suited to your conditions for that reason. Why should not the coal man guarantee his coal in the same way the feed man does his feed or the fertilizer man his phosphate? One coal is good under certain conditions and very poor under others. Coal is our heaviest expense after labor. In every market there are cheap coals which are very dear to use, and high priced coals which may be the cheapest in the end; but we do not know about it, we only guess. It takes money, and time, and scientific knowledge to work these matters out and put the knowledge obtained in shape to be usable by the busy commercial man.

When the farmer buys a car of phosphate rock, he buys it under a guarantee as to the amount of phosphorus it contains. He pays as his share, \$1.50 for an analysis of that car by a public official. If the percentage of phosphorus varies from the guarantee the bill is changed so as to cover the exact amount of the phosphorus in that particular car. He buys what he wants, and knows to a certainty that he gets what he buys. Is there any reason why we could not be put in position to buy a car of coal with a guarantee as to its heating value and an analysis showing the percentage of sulphur and other deleterious substances?

The whole science of fertilizing has been studied and well worked out for the farmer. This does not help us greatly. Our conditions are different. Our culture is intensive. The farmer's needs are reasonably good results cheap. The difference between nitrate of soda and sulphate of ammonia, between sulphate of potash and muriate are settled for him. All those subtle distinctions between stem and leaf growth, color, size of flower, substance, and date of maturity of the flowers, are nothing to the farmer, and everything to us. A difference of \$10 per ton in fertilizers of the same elements would be vital to the farmer, while a difference of three times that amount would be nothing to us, if balanced by some small difference in effect on leaves, stems or flowers.

We are so ignorant that we say, let chemicals alone, even if you have to start a dairy to obtain the natural manure. This is right and proper so long as we remain in our present state of ignorance regarding the use of chemical manures, but it is so, merely because we lack the "know how" and because it is too expensive for the ordinary man to teach himself. There is every reason to believe that equally good results could be obtained by the exclusive use of chemicals in connection with the proper amount of humus, as by the use of animal manures. It is even quite probable that were this subject worked out to its ultimate end, means would be at hand to attain results which our present wildest dreams would not measure. The Illinois station is working upon this line, but the subject is

so extensive that half the stations in the country could investigate it to good advantage for years to come.

The cross breeding of varieties is a most fascinating work. Breeding for the purpose of obtaining new commercial varieties is to be left to the commercial grower, but there is a vast field for the experiment station worker in studying the many unknown things about the subject which makes failure the rule and success the exception. Insects and fungous diseases, like the poor, we have always with us and new forms are constantly appearing. The demand for work here is never ending.

The testing of the commercial values of varieties has no place in the station work, except so far as making notes of such facts as incidentally become evident in growing and studying plants for more legitimate purposes. This is not to be understood as applying to the importation and testing of new or unknown species, which is valuable and legitimate work. The commercial grower can do his own testing better and quicker than the man who has no commercial knowledge, and can not work under commercial conditions.

The above are only a few of the many ways in which the stations can help us. Almost without exception the station managements are not only willing, but would be glad to take up this work for us. But the funds are rarely available. Our part of the work is to get in touch with them, tell them what our needs are, find out what facilities they must have and then go to the

the farmer appears to have more enterprise and more business sense than we have, and he certainly has more exact knowledge and better technical training for his work.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

A Casket Cross.

The accompanying illustration is of a casket cross six feet in length by 24 inches in width. The flowers used were lily of the valley with a center of heliotrope. The combination, the choice of the customer; while making an attractive design does not show a very good photograph. Violets in place of heliotrope would be an improvement while a few cattleyas in the center would give it a touch of elegance. Although to occupy a limited space, there can be quite a variety in the shape of the cross. Each point or end of the frame may be divided into three parts and the arms and foot and top taper towards the center, or the ends may be square and taper towards the center like a Maltese cross. For an aged person a large cross of this kind made entirely of purple asters presents a very rich appearance. K.

October Flowers in Philadelphia Stores.

Though weather conditions have not been favorable, the retailers of this city are now making splendid exhibits of cut flowers. The different varieties of orchids due at this season are seen in

GEORGE D. NICHOLAS' FLOWER SHOP, NEW YORK.

legislature and get the money. In closing, the writer wishes to urge each member to look at the last year's report of this society (page 171), and see what his state is doing for floriculture, which in most cases he will find to be nothing at all. Illinois has a good start, Maryland is doing well, while Pennsylvania, the second (certainly not worse than the third) state in the union in floriculture is doing nothing. Indiana, with its old and well organized state florists' association, has allowed the floricultural department which was doing such brilliant work a few years ago, to die of starvation, and so it goes on from bad to worse. It is a shame to us, and might so easily be different. Truly,

abundance. In addition to cut stock, there are many fine flowering plants to be seen.

We cannot recall a time when there was such a wealth of good roses. American Beauty, the Killarneys, My Maryland, Kaiserin Augusta Victoria and various new productions are all seen in fine form. The new yellow rose, Melody, grown by Robert Scott & Son, Sharon Hill, Pa., is seen in a number of stores and is attracting much attention on account of its fine qualities. Their double sport of Killarney is also much sought for.

Though the chrysanthemums are beginning to overshadow the carnations, the latter are showing fine points for this season. This is particularly true

of Dorothy Gordon and the different types of Enchantress. While there is a considerable quantity of chrysanthemum stock to be seen, it is needless to add that it is but the forerunner of the great volume that we will see next month. Golden Glow, October Frost, Polly Rose and Glory of the Pacific are now the most noticeable varieties. On account of the great volume of dahlias and cosmos now on the market, chrysanthemums are rather slow. My lady, while sometimes very discriminating, always likes to get a big bunch for a little money. In the case of dahlias and cosmos, she can now be well pleased.

Several of the leading retail stores are now featuring the dahlias in window decorations and in special box sales, and their efforts seem to attract public attention. The pink dahlia, Delice, is a very attractive proposition and many of them are sold. The single Twentieth Centuries also go well. Every retailer tells us that there is little profit in dahlias, but while they are here they must handle them in response to the popular demand. It is the same with cosmos. There cannot be much in it for the retailers in handling it at ten cents for a big bunch, but the size of the bunch meets popular approval.

There are now to be seen in the stores very good blooms of gardenias, which are fast coming to the front as a popular favorite. Originally its usefulness was restricted, but now it enters into every feature of designing and decorating. It is, when well grown, a remarkable flower, and the men who have been instrumental in pushing it forward deserve the hearty approbation of the trade. Lilies and lily of the valley are features in all the leading stores. There is a constant demand for these flowers, and it is hard to see how we could now do without them.

In addition to what has been already outlined, it may be mentioned that many of the retail stores show remarkably fine combinations and attractions.

H. H. Battles has recently been making a great display of dahlias, cosmos and ornamental grasses, much of which is grown on his own place at Newtown Square.

Pennock Brothers have recently featured dahlias of many varieties in their show windows.

J. J. Habermehl's Sons have always attractive windows and a great variety of good stock.

Chas. Henry Fox makes a specialty of attractive boxes of flowers, finely decorated.

George Craig has all the best flowers to supply the demands of the best buyers.

Robert Kift has been offering very attractive boxes of cut flowers.

There are many other good stores in this city where good stock is always found, and we expect eventually to reach all of them and learn what they have that is interesting and up-to-date.

WATERTOWN MASS.—John F. Howell, proprietor of the Summer street conservatory, has built a modern greenhouse.

PITTSBURG, PA.—E. C. Ludwig, the north side florist, has bought a farm in Adams, Butler County, of 80 acres on which he intends to erect a number of greenhouses but will not build extensively for some time.

CASKET CROSS OF LILY OF THE VALLEY.

Fumigating With Hydrocyanic Acid Gas.

The materials necessary for fumigation with hydrocyanic acid gas are potassium cyanide (98 to 99 per cent pure), commercial sulphuric acid, and water; and the utensils required are half-gallon or gallon stone, earthen or granite jars and a supply of ordinary small paper bags. It is impossible to give a set formula prescribing the exact quantity of potassium cyanide to be used, says John J. Davis, assistant to the Illinois state entomologist, in

only for convenience in handling the cyanide when placing it in the jars, but also because they slightly delay the action of the acid upon it, thus giving the fumigator ample time to leave the house before the reaction occurs.

The jars being placed and the cyanide properly weighed and bagged the next step is to close the ventilators in order to prevent all avoidable escape of the gas. The water—four fluid ounces to each avoirdupois ounce of cyanide—is then placed in each jar, the sul-

phuric acid, and kept where it will be inaccessible to persons not acquainted with its poisonous properties. Only a grade which is 98 to 99 per cent pure should be used. Sulphuric acid should not come in contact either with hands or clothes, as it will severely burn the flesh and ruin the clothes. It must not be placed in metal receptacles, as it will soon eat them to pieces.

Always put the water into the jars first, adding the acid later. Never pour water into the undiluted acid. After placing it in the jars the bags of cyanide should be added as soon as possible, for any delay will interfere with the proper reaction of the chemicals, owing to the fact that the acid acts most powerfully when it first unites with the water. The manner of putting the cyanide into the acid is also important. The bags should not be held a foot or more above the jars and dropped in, as the concussion might cause them to be thrown out by the reaction. Each bag must be carefully laid in the jar; but the fumigator must not lean over the jar as he does it, nor remain near it to watch the reaction.

The best shaped jar, when using two ounces of cyanide to a jar, is one four or five inches in diameter and about nine inches high. If more cyanide is to be used in each receptacle a larger jar must be used. The foliage of plants to be fumigated should be perfectly dry; otherwise it will absorb the gas and be burned. Fumigate in the cooler part of the day, and avoid, if possible, a temperature above 60° to 65°, since at a higher one plants are more liable to be injured. After a few fumigations the operator often becomes less attentive to the prescribed directions and precautions. This tendency should be promptly checked, the utmost care and caution being uniformly exercised.

KANSAS CITY, MO.—D. Freudenthal, who has a store in the Bryant building, on October 7, while reaching for a fern basket for a customer, slipped from the ladder upon which he was standing and fell to the floor. His left arm was sprained and he suffered a cut several inches long over his left eye.

PLAN TO COMPUTE CUBIC FEET IN A GREENHOUSE.

charge of greenhouse investigations, in a recent circular, owing to differences in the tightness of greenhouses. In those of average tightness I have used it on roses and cucumbers, without injury to them, at the rate of one ounce to 3,500 cubic feet of space.

The number of cubic feet in the house should first be accurately calculated. The methods of doing this may be illustrated by a simple computation on the dimensions given in the accompanying figure, the understanding being that the length of the house is 100 feet.

The cubic contents of the rectangular part of the house, *a c d e*, equals $24 \times 6 \times 100 = 14,400$ cubic feet; that of the triangular part, *a b x*, equals $8 \times 8 \times 100 \div 2 = 3,200$ cubic feet; and that of the other triangular part, *b c x*, equals $8 \times 16 \times 100 \div 2 = 6,400$ cubic feet. The cubic contents of this house are, therefore, $14,400 + 3,200 + 6,400 = 24,000$ cubic feet. Assuming the house to be of no more than the average tightness, we may safely use the potassium cyanide at the rate of one ounce to every 3,500 cubic feet of space, and 24,000 divided by 3,500 equals 6.8+, which is the number of ounces required in this illustrative case.

The next procedure is to get the materials in readiness for use, and to place the jars in the house. For every ounce of the potassium cyanide used, two ounces of sulphuric acid and four ounces of water are required. Two ounces of the cyanide is about the right quantity for each half-gallon jar, therefore for a house of the above dimensions four jars should be placed at equal intervals along the aisles, and the 6.8+ ounces of it divided into four equal parts, and each part put into one of the paper bags. These are used not

phuric acid—half as much as of the water—is added, and as soon after as possible the bags of cyanide should be put into the jars and the house vacated immediately. Doors should be locked and labels posted designating the danger. No one should enter the house until it has been thoroughly aired by opening the side doors, and the ventilators if convenient. It is advisable to fumigate in the evening, keeping the house closed until morning. I have never found a greenhouse so tight that the fumes would remain in it in dangerous quantity all night, nevertheless, it is safest to air the house well before entering.

As cyanide of potassium is a powerful poison it should be handled as little as possible, and if touched with the bare hands they should be thoroughly washed at once. It should be stored

THE SWEET PEA.

The Modern Sweet Pea.

My first sweet pea trip here at Boston was to the trial grounds at Marblehead, known as the "Rawson Dahlia Farm," in company with Mr. Fiske, of the new Fottler, Fiske, Rawson Co. There were 100 trials, many of them imported English novelties. I ought to say that what I had already seen and heard in the flower markets had largely reassured my mind. The general feeling among seedsmen and growers about the real merit of the Spencer sweet peas is really quite up to what we could wish. One gentleman today repeated what he heard a recent visitor to one of the English sweet pea shows say. He was stupefied with astonishment at the size and quality of the flowers he saw. Another member of the trade said to me that there was more reason to have a Boston sweet pea society than a gladiolus society.

My first interest in the Marblehead visit was the soil conditions,—a black peaty basin, and near the ocean. The vines had been blooming a month, and were green and healthy. I was specially interested to see how the distinctive character of novelties of a delicate type of beauty came out. I saw the finest pink picotee edge that I have ever seen. The label was simply numbered. It may have been Elsie Herbert, Eckford's Picotee, Martha Washington, E. J. Deal or Dainty Spencer. They all have a white ground and nar-

row pink edge. Whichever gives us the best uniform type ought to displace the others. I also noticed that Evelyn Hemus (Mrs. C. W. Breadmore) showed its warm cream ground and pink edging well. If the conditions bring out the character of such sorts as these then a hundred Spencers can be relied on to reproduce their type.

Such a soil and ocean air intensify color. The orange in Miss Wilmott almost borders on St. George, and the crimson overlay on the rose Millie Maslin seems intensified. I noticed good scarlets and cerise-scarlets. Evidently Boston is going to go on growing sweet peas. A practical point is this,—seed-houses go off miles into the country to find a suitable place to grow their trials, while the ordinary florist, after locating his greenhouses, tries to make his soil answer all purposes. He plants his sweet peas in some part of that soil and they are a source of doubt and foreboding from the day he puts them in. Why wouldn't it be practical to keep his eye out for bits of ground anywhere in a radius of a mile, where the conditions tend to heavier and moister soil? Wm. Patterson, one of our old exhibitors back in the nineties, told me his sweet peas were a total failure this year. At the Rawson farm I had to stroll a little among the dahlias, 22,000 of them, and 15,000 labeled,—getting ready for a grand September show, and a similar work is done in gladioli. The seed establishment of J. J. H. Gregory was pointed out. Did I

go in? I certainly did, and also saw the little original house where the late Mr. Gregory began with his Hubbard squash seed. W. T. HUTCHINS.

New Sweet Peas For 1911.

W. Atlee Burpee & Co. are offering six decided novelties in sweet peas for the year 1911 that promise to be very valuable additions to the list of varieties now grown, five are of the Spencer type and one of the grandiflora. While they have a large number of beautiful novelties it is their policy to thoroughly try out and test all new varieties before introducing them.

Ethel Roosevelt is a true waved variety of the largest and most perfect Spencer type, and has been chosen as the most distinct and one of the most beautiful of its class, and which for two successive seasons has come perfectly true to type and color. It is undoubtedly the daintiest and most beautiful of all striped or flaked sweet peas, and, when well known, will be found in all first class collections. Like the first of this new race, the now famous Countess Spencer, Ethel Roosevelt is of strong, robust growth, extremely free flowering, the individual blooms being of the truest Spencer type and usually produced in fours on very long stems. The flowers are of the largest size and the color combination is unique, though difficult to describe, the ground color being a lovely shade of cream, beautifully flaked and mottled with light or pinkish rose. The standard and wings are waved and frilled

in truest form, the wings being well placed, and not too open, as in so many varieties of the type, and is a variety of enhancing beauty.

Florence Nightingale is by far the largest and best lavender Spencer yet introduced. The flowers are truly magnificent and of immense size, the standard is unusually large and bold, pronouncedly wavy, yet standing erect and broad, frequently measuring two inches across. The color is a most charmingly soft and yet rich lavender, which is enlivened by a very faint sheen of rose pink. The large well spread wings are of the same coloring frilled and well waved. It is practically a self color and bunches beautifully, attracting universal admiration. The plant is extremely robust, flowering most profusely, the stout stems attain a length of twelve to sixteen inches and a large proportion bear four well placed flowers. It comes entirely true from seed both as to color and type.

Rose du Barri, the new grandiflora, affords an entirely new shade in sweet peas. The name itself suggests the color which is a lovely combination of deep, rich carmine rose and orange. While the flower is not of Spencer form and size yet it is slightly waved and for boutonnières or table decoration it is really a gem, and its brilliant beauty appeals to every lover of esthetic shades. The plants are of strong vigorous growth and are wonderfully profuse in bloom, and every flower is alike.

American Spencer, in brilliancy of color is almost an exact duplicate of the popular grandiflora, America, but ennobled to the true giant waved Spencer type. The ground color is ivory white distinctly striped with crimson-red. It is quite similar to the new English Spencer, Mrs. Wilcox, but is more free flowering and more heavily marked with crimson and scarlet. The flowers are borne three and four on long stiff stems, and hold their color well till near the end of the season.

Dainty Spencer, like the original Dainty, bears very long stems and usually carries four fine flowers each. It is a most beautiful pink edged variety; the ground color being pure white with a distinct margin of rose pink and the edging on the standard is considerably heavier than on the wings.

Emily Eckford Spencer has flowers of good form, waved and of the true Spencer type, of rosy self purple color at opening, but turn bluish-purple as they reach full expansion, while similar to Tennant Spencer, but without any suggestion of magenta, whatever variation there is being toward blue.

Of the first three varieties seed is being offered in packets only, but the last three seed may be obtained both in packages or by the pound.

NEW YORK, N. Y.—A petition in bankruptcy has been filed against Schustermann, Eisenberg & Schine, manufacturers of misses' cloaks. M. Schustermann has conducted a florist business alone on Second avenue for the last ten years.

MORRISTOWN, N. J.—Articles of incorporation were granted Badgley, Reidel & Meyer of Watchung avenue and Lafayette street, Chatham. The company is capitalized at \$20,000 and will conduct a wholesale cut flower commission business. The incorporators are William C. Badgley, Chatham; Henry C. Riedel, New York; Meyer Othils, New York, and William V. Mulford, Newark.

ORCHID NOTES.

The Cattleyas in October.

RE-POTTING.

Where a large collection of commercial cattleyas is grown there is always considerable re-potting to be done. At present we are working on *C. gigas* and although some of the plants are more forward in root action than we like them at potting time, it is better to attend to them now than to wait until spring. It is never a pleasant job for the orchid grower to re-pot plants that have made many new roots, for no matter how carefully the work is done some of the roots are sure to be injured in the process. There is no part of the grower's work that needs more care than this. Anyone may be trusted to pot a newly imported plant for there are no live roots, or but few, and it is only necessary to properly arrange the leads and give proper attention to drainage and compost.

With a plant that has been growing in the orchid house and has its roots entwined about the pot or basket it is quite different. It is usually necessary to burrow into the old compost with the hands and remove the decayed peat and dead roots, but great care should be given to the new and healthy tiers of roots and a little soft peat fiber should be placed around them before filling in with crocks, and new peat. Always endeavor to so place the leads that they have ample room without growing over the edges of the pot. Get

has a perfectly safe hold upon the compost in which it is grown.

ATMOSPHERIC TREATMENT.

It has been often and truly said that "orchids are usually over-watered at the roots and underwatered in the atmosphere." It is more necessary now than at any time of the year to guard against a dry atmosphere for many of the plants will be taking less root moisture than of late and the air must be fully charged with it or shrivelling will occur. For instance, *Cattleya Trianae* has now practically finished its growth—that is, on established plants—and the only work this and *C. Percivaliana* have to do is to perfect their flowers in the sheaths. This they will do with far less root moisture than they have been getting provided the atmosphere is kept moist. This moist air is also good for newly potted stock of *C. gigas*, *C. Gaskelliana* and the earlier plants of *C. labiata*. It is hardly possible, in fact, to have too much moisture in the atmosphere during bright weather in the fall, provided the compost in the pots is not wetted in the dampening process. It helps to develop good, strong pseudo bulbs and is in every way advantageous.

As winter approaches it becomes more necessary to admit all the light possible to cattleyas. Where shades are provided the grower has things far easier than where dependence is had upon some more or less permanent shading on the glass. He will now manipulate the blinds so they are rais-

ONCIDIUM ALTISSIMUM.

the roots started into the new compost whenever possible, then let them overflow into the atmosphere if they are inclined to do so. And, whatever else is neglected, make the new compost firm and see that the bulbs are so firmly fixed, by staking and tying if needed, that they cannot rock about when the plant is handled for examination or otherwise. No orchid can be considered properly potted unless it

ed a little earlier in the afternoon and lowered later in the morning, thus admitting all the light needed with no risk of injury to the plants. Inside much may be done by tying the plants and elevating them where needed to bring them up to the light. Many houses have the benches so arranged that plants stood on them are too far from the roof glass to do well, which, in the shallow pots used

for orchids, it is difficult to damp between them without wetting the compost. Room will be saved and the plants will be more satisfactory by tying them up singly and standing them on one or more inverted pots, as may be necessary. This is especially necessary for plants like *C. Mossiae* that are growing late in the season and need all the light and air available to perfect their growths. When the staging is properly arranged, so that damping beneath can be properly carried out, all this elevating of pots with its risk of knocking them over and troubles of this kind is eliminated but growers have usually to make the most of the houses as they find them and to do the best they can under the circumstances.

H. R. R.

Lycastes.

Lycastes need much the same treatment as anguloas, and they are usually cultivated in conjunction with members of that genus. The majority of the species are natives of central America, where they are found at considerable altitudes, so that they ought not to be subjected to a high temperature, but be provided with similar conditions to those found in the intermediate house, where the temperature fluctuates between 50° and 65°. They usually produce their flowers in winter and early spring, although occasionally a few are seen at other seasons; but it is during the winter months that they are most appreciated on account of their lasting qualities. One of the most popular is *L. Skinneri*, a variable plant, but having, as a rule, white sepals and petals suffused with rose, the lip heavily spotted with crimson. A pure white form is known as *Alba*; and a chaste and beautiful variety named *Armeniaca* gained the R.H.S. F.C.C. on January 11, 1910, when shown by Mr. Ogilvie, of Oxford. Other good species embrace *aromatica*, *macrophylla*, *cruenta*, and *Deppel*. Lycastes are easily grown if given a little fibrous loam in the soil, and well watered while making their pseudo-bulbs, but after these are fully developed a rest must be allowed, and only sufficient water to prevent the bulbs from shrivelling.

The plant figured was cultivated some years ago by M. Martin, when gardener to Lord Leigh, of Stoneleigh Abbey, Kenilworth. It was growing in a 24-sized (8-in.) pot when the photograph was taken, and carried 25 fully expanded flowers. Mr. Martin supplied the following particulars of his system of culture:—"Our plants are grown in a span-roofed house, which is kept at a temperature of about 60°, with a rise of 10 degrees by sun heat. The plant has three pseudo-bulbs, and leaves two feet in length. Although the species is very free flowering, and lasts for several weeks in perfection, it is detrimental to the plant to leave the blooms on for a lengthy period, as by so doing it materially affects its flowering so well the following season. The compost we find suitable consists of a mixture of fibrous peat and sphagnum, with a good sprinkling of silver sand, broken charcoal, and potsherds. The pots should be clean and well drained, copious supplies of water being necessary during the growing season, with

an occasional application of weak liquid cow manure. The amount of water must be reduced in winter, although at no time should the plants be allowed to get dry at the roots. The flowers are very variable in color, from a bluish white to a deep rose, those born on the plant in question being of a bright rose color, lip white, spotted with crimson. The most suitable time to pot the plants is soon

well established more care in watering is needed. It has to have a distinct resting and growing season in order to flower freely. Plants keep all the time in a hot moist house and constantly wet at the roots will grow at a great rate, making big bulbs and leaves, but they fail to flower unless this growth is well consolidated by exposure to light and air and rested in winter.

LYCASTE SKINNERI WITH TWENTY-FIVE FLOWERS.

(After the Journal of Horticulture.)

after flowering, when they commence to make new growths."—Journal of Horticulture.

Oncidium Altissimum.

The increasing demand for light sprays of orchids for wedding bouquets and other decorations may possibly have the effect of again bringing into prominence the oncidiums with light elegant sprays of flower, of which *O. altissimum*, *O. spatulatum* and other old and half-forgotten species are examples. They are easily grown, flower freely every year and the flowers last a long time, either on the plants or cut and anyone who has work of the above kind to do might do worse than include a few plants of these in their collections. *O. altissimum* has been known to orchid growers of Europe for over 100 years, having been sent to Kew as far back as 1793, yet there are scores of orchid growers who have never seen it or would know it if they did see it.

It thrives well in an ordinary plant house if there is no orchid collection, or, if there is, it will do well with the cattleyas in a light but not too sunny position. The roots are vigorous and grow closely together, wrapping their compost into an almost solid mass. When in this condition a large amount of moisture is needed to keep the growth going but with plants not so

Earth Worms in Soil.

ED. AMERICAN FLORIST:—

I am troubled with the common earth worms among my potted plants. I have often seen lime water recommended for driving them out, but do not remember ever seeing a formula for using same. As I should be afraid of injuring the roots by applying a too strong dose would you kindly tell me about how many pounds of good stone lime should be used for, say 20 gallons of water.

W. A.

No exact formula for making lime water is used by gardeners, the custom being to place enough lime in the water to make a saturated solution allowing it to slack and get cold and then pour off, or better filter, the water and discard the residue. One pound of lime will saturate four or five gallons of water. There is very little danger of injuring the roots, if the water is allowed to get thoroughly cold, and no undissolved lime is used in the watering.

W.

POTTSTOWN, PA.—Extensive greenhouse improvements are being made at the Keim nurseries.

COLORADO SPRINGS, COLO.—The Colorado Springs Floral Co. has made an assignment in favor of its creditors, F. B. Sauerwald assignee. The stock and fixtures are valued at \$8,679 and the accounts receivable amount to \$1,436.

CHRYSANTHEMUMS

Early Varieties.

We notice some misgivings or rather severe criticisms are expressed upon the influence Golden Glow is likely to have upon later values, as to future mum values they will be controlled as formerly by supply and demand, no one can expect to dispose of a large quantity when there is little demand. The same applies to any other flower under like conditions. If Easter lilies were produced even in one-fourth the quantity in September as are grown for Easter, the sales would be unsatisfactory, and the same depreciated market prevails with either carnations or roses when the supply exceeds the demand. It seems to be a case of pampering unto death, the goose that laid the golden egg. Like sheep the great majority of us follow the same line of march without considering the result should large quantities mature when the demand is far below normal. If this is true it is not the fault of the variety, but the misjudgment of the grower either singly or collectively. Producing more than the demand requires, is apparent in several lines of florists' wares besides this one variety of chrysanthemum.

We know from many letters received that the small grower who devotes a limited space to Golden Glow, and so times the planting to secure the crop after September 15, is as a rule pleased with the result and many of them appreciate the efforts of the introducer in producing such an early variety. Here are a few comments received the fall following its dissemination: "The finest variety ever introduced to the trade." "Has proved everything you claimed it to be." "The best money maker sent out in the chrysanthemum line." "The best early yellow we ever saw." Being the raisers and introducers of Golden Glow, we are very well pleased with the results and particularly so in securing this, the earliest commercial yellow. We are also pleased to state we have secured an early white, known as Smith's Advance, which is even better in habit than Golden Glow, and being white will be of greater utility. This our latest achievement will be approved by many, while slack demand and the loss of a few dozen blooms, will be sufficient to condemn it in the eyes of a few. Sometimes our apprehensions are unwarranted and again those in-

terested are often influenced in their remarks by other sorts which they desire to make popular. A few years ago it was stated that Comoleta would have to hustle if it kept pace with Mary Godfrey as an early yellow. It is now evident that Comoleta possessed better commercial qualities for it is still grown in considerable quantity, while Mary Godfrey has been resting peacefully upon the dump heap for some time. This is only one instance where red paint has been spread with a wide brush to popularize varieties of foreign origin under the bane of commercial novelties.

October is the month when many of the early varieties will be on the market, establishing a record from the financial standpoint, and this record may be good or bad. Among last spring's novelties which were included among the earliest, Yellow October Frost is the earliest, and is equally as good as the white form. It is much darker yellow than most of the sport

David G. Grillbortzer.

varieties. Fine blooms are finished by September 20 from buds taken August 8. Donatello, an intense yellow, will be the next ready, and should mature by October 15. Oroba, a white on the style of Beatrice May, is due October 20. This will soon be followed by Mrs. Jane Cockburn, a

darker pink form of Glory Pacific class, and Yellow Ivory will finish near the end of the month. Glow, Tousey, Gloria, Pacific and sports, Ivory, Shaw, Monrovia, White and Yellow Frost, Halliday, Poehlmann and many others will be placed upon the market in more or less quantity within the next thirty days. The three important factors governing the prices of early blooms will be supply, demand and quality. While supply or quality can be controlled as far as the individual grower is concerned, yet he is unaware of just how many of these sorts are being grown contributory to a large market. Strong demand is of vital importance and is unfortunately entirely beyond our control. In recent years there is an increasing desire for outdoor life, and as long as pleasure can be derived by such recreation little thought is given to inside decorations. Financial depression necessitates entertainment along such lines, and national and state elections so enters into our lives that social enjoyments are deferred until such affairs are settled. In fact, any condition that sways or diverts the public from its natural course has great influence upon the demand. Quality, as every one knows, has decided effect upon the ultimate returns. In times of glutted markets the best blooms are first disposed of thus forcing the grower of inferior grades to suffer. There is much to be considered by those interested in the October sales, especially those who consign or sell direct to the retailers to whom the foregoing remarks are directed. Allow us to suggest that one day at least of each of the next four weeks, be spent in inspecting the stock of others interested in such crops. By so doing it is easy to determine the relative merits of our products. It shows the plants as they are growing and affords the best possible means of comparison. Comparison is the only way we have to determine the quality of our products, and the few hours thus consumed may be more profitable in directing a course for the future, than otherwise employed.

In drawing conclusions for another year's use, remember that incurved blooms as a rule are most serviceable, showing less of the wear and tear in handling. It may be possible some changes in color can be made to advantage; Pacific Supreme is of a more pleasing shade and holds its color better than Glory of Pacific. Bright or

VIEW OF DAVID GRILLBORTZER'S HOUSES AT ALEXANDRIA, VA.

intense yellows are in greater demand than those of lighter tints. Stem should be given some consideration both as to its tenacity and length, and bright green foliage is most desirable. It is not so important to those who dispose their products over their own counter, to tie themselves down to such hard fast lines. There are always places where looser and more

from any cause. The greater the severity of such conditions the more these troubles are aggravated. We do not think the kind of water used would have any influence one way or another. Maintain as far as possible normal condition and avoid extremes in all cultural details. This will be a step in the right direction. Bordeaux, Sulphur and lime, or Potassium Sulphide are

boyhood of a practical gardener. He is a large grower of roses and carnations, which find a ready sale in Washington, D. C.

David G. Grillbortzer was born in Alexandria, Va., thirty years ago. His father, J. H. Grillbortzer, who is yet an active man, was a successful market gardener and his sons received a thorough training in the cultivation of the soil. David, at an early age, took a great interest in the growing of flowers. About seven years ago he erected 12,000 square feet of glass and since that time has year by year been adding to his glass area till he has now about 90,000 square feet. He makes a specialty of roses and carnations and his stock finds ready sale in Washington, D. C. Three years ago he married Miss C. Dreifuss. He is a young man of fine business qualities and genial personality. He is a thirty-second degree Mason and a member of the Nobles of the Mystic Shrine; a life member of the S. A. F. and a member of the Washington Florists'

State Flowers.

The following are state flowers as adopted in most instances by the vote of the public school scholars of the respective states. This list has been compiled at the request of several readers:

Alabama	Goldenrod
Arizona	Cereus Giganteus
Arkansas	Apple Blossom
California	California poppy (Romneya)
Colorado	Columbine
Connecticut	Mountain Laurel (Kalmia)
Delaware	Peach Blossom
Florida	Camellia Japonica
Georgia	Cherokee Rose
Idaho	Syringa
Illinois	Rose
Indiana	Corn
Iowa	Wild Rose
Kansas	Sunflower
Louisiana	Magnolia
Maine	Pine Cone
Michigan	Apple Blossom
Minnesota	Moccasin Flower (Cypripedium)
Mississippi	Magnolia
Missouri	Goldenrod
Montana	Bitterroot
Nebraska	Goldenrod
New Jersey	State Tree, Sugar Maple
Nevada	Artemisia tridentata
New York	Rose
New Mexico	Rose, Crimson Rambler
North Carolina	Chrysanthemum
North Dakota	Goldenrod
Ohio	Buckeye
Oklahoma	Mistletoe
Oregon	Oregon Grape
Rhode Island	Violet
South Carolina	Carolina palmetto
South Dakota	Anemone patens
Texas	Blue Bonnet
Utah	Sage Lily
Vermont	Red Clover
Washington	Rhododendron
Wisconsin	Violet

HOUSE OF KILLARNEY ROSES AT DAVID GRILLBORTZER'S, ALEXANDRIA, VA.

artistic formed flowers can be used, and those having such at hand have an advantage over those supplied from commission stores, when it comes to artistic arrangement. A spray of singles here, a few anemones there, a large loose one in another position is far more effective than where the formal incurved are used entirely.

It seems rather foolish to repeat what we have so often said regarding early planting. It is of great importance to those who require October flowers, especially if desired early in the month. The plants must assume a certain amount of energy or growth to insure early buds. Those who can not devote space for planting in May can not expect to be first in the market. A good memorandum to make with other mum notations is, that early planting has a tendency to hasten and late planting to retard floral development.

ELMER D. SMITH.

Chrysanthemums Leaves Dying.

ED. AMERICAN FLORIST.

The leaves on my chrysanthemum grow brown and die off. I have grown pot chrysanthemums for 15 years but never had any trouble until the last few years. I formerly watered from a well that was dug, but lately had a well driven which is 150 feet deep. Can you inform me what is the cause? What can be done to cure or prevent it? Can it be the water? A. G.

The leaves submitted by A. G. are affected by one of the forms of leaf spot, which is more or less prevalent among most chrysanthemum growers. This, like all other fungus diseases, is developed by conditions, which tend to weaken the plant's vitality such as sudden changes of heat or cold, being too dry or wet, or impaired root action

best remedies for all fungus diseases but should be applied early in the season as a preventative rather than a remedy after it becomes prevalent. The Potassium Sulphide would disfigure the foliage the least of the three remedies. Use at the rate of 1 ounce to 2 gallons of water.

ELMER D. SMITH

David Grillbortzer, Alexandria, Va.

Though it is only a few years since David Grillbortzer began to erect glass he has been steadily successful and has increased his area year by year. He had the advantage of a training from

AZALEAS received last week are of better quality than last year's stock, but the crop is short.

Max Leichlin.

European papers record the death, September 3, of Max Leichlin, the well known botanist of Baden Baden. Herr Leichlin was born at Carlsruhe, Baden, October 20, 1831, and in early life traveled extensively in Europe and South America.

Personal.

The announcement is made of the engagement of Miss Carrie Forkner, daughter of Judge and Mrs. M. E. Forkner, New Castle, Ind., and P. J. Lynch of the Dingee & Conrad Co., West Grove, Pa.

Godfrey Aschmann, Philadelphia, Pa., reports an enjoyable visit to Europe and sailed from Rotterdam for home October 8.

P. Welch, the well known wholesaler of Boston, Mass., started in business 33 years ago, October 10.

Society of American Florists.

REGISTRATION OF COLEUS.

Public notice is hereby given that the J. W. Ross Company, of Centralia, Illinois, offer for registration the Coleus described below. Any person objecting to the registration or to the use of the proposed name, is requested to communicate with the Secretary at once. Failing to receive objection to the registration, the same will be made three weeks from this date.

RAISER'S DESCRIPTION.

Coleus Fanny Ross. Leaves large to very large; color rich velvety crimson shading outwardly to pink, often having gold blotches in the point; beautifully edged with green and gold.

H. B. DORNER, Sec'y.

October 6, 1910.

Chrysanthemum Society of America.

EXAMINING COMMITTEES.

President Elmer D. Smith announces the committees to examine new chrysanthemums for the ensuing year which are as follows:

Boston, Mass. — Wm. Nicholson (chairman), James Wheeler, Alex Montgomery. Ship flowers to Boston Flower Market, C. Park street, care of chairman.

New York. — Eugene Dailedouze (chairman), Wm. Duckham. Ship flowers to New York Cut Flower Co., 55 Twenty-second street, care Eugene Dailedouze.

Philadelphia, Pa. — A. B. Cartledge (chairman), John Westcott, S. S. Pennock. Ship flowers to A. B. Cartledge, 1514 Chestnut street.

Cincinnati, O. — R. Witterstaetter (chairman), James Allen, Henry Schwarz. Ship flowers to chairman, Jabez Elliott Flower Market, care janitor.

Chicago. — J. B. Deamud (chairman), Geo. Asmus, W. H. Kidwell. Ship flowers to J. B. Deamud, 51 Wabash avenue.

Shipments should be made to arrive by 2 p. m. on examination days to receive attention from the committee. must be prepaid to destination and an entry fee of \$2 should be forwarded to the secretary not later than Tuesday of the week they are to be examined or it may accompany the blooms.

Seedlings and sports are both eligible to be shown before these committees provided the raiser has given them two years' trial to determine their true character. Special attention is called to the rule that sports to receive a certificate must pass at least three of the five committees.

The committees will be in session to examine such exhibits as may be submitted on each Saturday during October and November, the dates of which will be October 8, 15, 22 and 29 and November 5, 12, 19 and 26.

The third member of the New York committee will be announced later.

Sealing Cut Flower Boxes.

A very novel and ingenious idea has come to our notice in the packing and shipping of cut flowers. After the flowers are packed the box is tied with a ribbon, the ends of which are fastened to the box with sealing wax and the florist's private seal stamped thereon. This is not to add style to the box but serves the purpose of having the box reach its destination undisturbed.

It is not an uncommon occurrence for flowers to leak in transportation. Two dozen American Beauties will shrink to one and where the flowers are sent as a gift the chance of detection is slight and in large orders few persons will take the trouble to count the quantity received and a half dozen might be easily abstracted and never missed. The foregoing plan removes all temptation from the path of those entrusted with their delivery.

Coming Exhibitions.

(Secretaries are requested to supply any omissions from this list and to correct any dates that may have been altered since the last advices.)

Albany, N. Y., November 10-12, 1910.—Second annual flower show, Albany Florists' Club, State Armory. Frederick Goldring, chairman show committee.

Baltimore, Md., December 1-2, 1910.—Fall exhibition, Maryland Horticultural Society, Fifth Regiment Armory. C. P. Close, secretary, College Park, Md.

Boston, Mass., March 27-April 1, 1911.—Second National Flower Show, Society of American Florists, Mechanics' building. Chester I. Campbell, general manager, 5 Park square, Boston, Mass.

Chicago, November 8-12, 1910.—Annual fall exhibition, Horticultural Society of Chicago, Coliseum, Wabash avenue near Fifteenth street. J. H. Burdett, secretary, 1620 W. 104th Place, Chicago.

Hartford, Conn., November 3-4, 1910.—Chrysanthemum exhibition, Connecticut Horticultural Society, Putnam Phalanx Hall. Geo. W. Smith, secretary, Melrose, Conn.

Indianapolis, Ind., November 8-12, 1910.—Fall show, State Florists' Association of Indiana, Tomlinson Hall. A. F. J. Baur, secretary, Thirty-eighth street and Senate avenue, Indianapolis, Ind.

Lenox, Mass., October 26-27, 1910.—Tenth annual fall exhibition, Lenox Horticultural Society, Town Hall. Geo. H. Instone, secretary, Lenox, Mass.

Long Branch, N. J., November 9-10, 1910.—Second annual chrysanthemum exhibition, Elberon Horticultural Society. R. Carey, secretary, Long Branch, N. J.

Milwaukee, Wis., November 7-14, 1910.—Flower show, Milwaukee Florists' Club, in the Auditorium.

Minneapolis, Minn., November 16-20, 1910.—Flower show, Minnesota State Florists' Association, National Guard Armory, Kenwood Parkway. Jerry P. Jorgenson, secretary, 3501 Portland avenue south, Minneapolis, Minn.

Morristown, N. J., November 2-4, 1910.—Fifteenth annual flower show, Morris County Gardeners' and Florists' Society, Edward Reagan, secretary, Box 334, Morristown, N. J.

Morristown, N. J., November 2-4, 1910.—Annual exhibition, Chrysanthemum Society of America, in conjunction with the Morris County Gardeners' and Florists' Society.

New Haven, Conn., November 1-3, 1910.—Annual exhibition of the New Haven County Horticultural Society, Music Hall, 115 Court street. Frederick H. Wirtz, secretary, 86 Nicoll street, New Haven, Conn.

New York, November 9-11, 1910.—Annual exhibition of chrysanthemums, American Institute, 19 and 21 West Forty-fourth street.

New York, November 9-13, 1910.—Fall exhibition, Horticultural Society of New York, American Museum of Natural History. Geo. V. Nash, secretary, New York Botanical Garden, Bronx Park, New York.

Pasadena, Calif., November 3-5, 1910.—Fall flower show, Pasadena Gardeners' Association, Maryland Hotel. Angus McLeod, secretary, 168 South Allen avenue, Pasadena, Calif.

Poughkeepsie, N. Y., October 27-28, 1910.—Annual flower show, Dutchess County Horticultural Society.

St. Louis, Mo., November 8-12, 1910.—Fourth fall floral exhibition, St. Louis Horticultural Society, Coliseum, Jefferson and Washington avenues. Otto G. Koenig, 6473 Florissant avenue, St. Louis, Mo.

Worcester, Mass., November 10, 1910.—Chrysanthemum exhibition, Worcester County Horticultural Society, Horticultural Hall, 18 Front street. Adin A. Hixon, secretary, Horticultural Hall, Worcester, Mass.

Meetings Next Week.

Boston, Mass., October 18.—Gardeners' and Florists' Club of Boston, Horticultural hall.
Chicago, October 20, 8 p. m.—Special—Chicago Florists' Club, Union Restaurant, 11 Randolph street.

Detroit, Mich., October 17, 8 p. m.—Detroit Florists' Club, Cowie building, 42-44 Gratiot avenue.

Grand Rapids, Mich., October 17.—Grand Rapids Florists' and Gardeners' Club, office of member.

Montreal, Que., October 17, 7:45 p. m.—Montreal Gardeners' and Florists' Club, Royal Guards building, 211 Sherbrook street, west.

New Orleans, La., October 20, 8 p. m.—New Orleans Horticultural Society, Kolbs' Hall, 127 St. Charles avenue.

Newport, R. I., October 19.—Newport Horticultural Society.

Pasadena, Calif., October 21, 8 p. m.—Pasadena Gardeners' Association, Board of Trade rooms, West Colorado street.

Providence, R. I., October 17, 8 p. m.—Florists' and Gardeners' Club of Rhode Island, 96 Westminster street.

Salt Lake City, Utah, October 18.—Salt Lake Florists' Club, Huddart Floral Co., 114 East Second South street.

Scranton, Pa., October 21, 7:30 p. m.—Scranton Florists' Club, Guernsey building.

Seattle, Wash., October 18.—Seattle Florists' Association Chamber of Commerce Second avenue and Columbia street.

St. Paul, Minn., October 18, 8 p. m.—Minnesota State Florists' Association, 510 Snelling avenue, north.

Toronto, Ont., October 18, 8 p. m.—Toronto Gardeners' and Florists' Association, St. George's hall, Elm street.

Situation Wanted—Head gardener, Scotch, wishes position; references. Address "L", care R. & J. Farquhar, Boston, Mass.

Situation Wanted—In the city of Chicago by an all around florist with five years' experience. M. D., 1514 W. Chicago Ave., Chicago.

Situation Wanted—As decorator and retail salesman; have good position but wish to change location by Nov. 1.

Key 219, care American Florist.

Situation Wanted—By first-class designer, decorator and salesman, in Chicago; 14 years' experience; good references to show.

Key 218, care American Florist.

Situation Wanted—As gardener on private place; single German age 48; experienced in all branches; high references; wages liberal. GARDENER, 110 W. Indiana St., Chicago.

Situation Wanted—A salesman and maker-up wishes position in first-class store; can furnish good reference, and has had long experience. Address Key 220, care American Florist.

Help Wanted—At once, a man who can dig and pack nursery stock, mostly evergreens and fancy ornamentals handled. J. J. BONNELI, 26 Avenue and East Galer, Seattle, Wash.

Help Wanted—Rose grower, young married man capable of taking care of section; sober and industrious; no other need apply; house on place. ROBERT KLAGGE, 154 Floral Ave., Mt. Clemens, Mich.

Help Wanted—Designer and decorator by the Smith & Fettes Co., 735 Euclid Av., Cleveland, O. When writing give experience and salary expected. Address Key 221, care American Florist.

Help Wanted—A good sober all-around man to grow roses, carnations, 'mums and a general line of bedding and blooming plants; a man not afraid to work; state wages and experience in first letter. GUS JOHNSON, 306 E Springfield Av., Champaign, Ill.

Help wanted—A capable all around florist to take charge of 12,000 feet of glass; a hustler; married or single, gets good wages; answer with qualifications and wages expected. THE ANDERSON FLORAL CO., St. Cloud, Minn.

Help Wanted—Florist for general work in a small range of houses; must be competent to grow any small stock, also roses; a good job for the right party; with your reply state wages wanted and references; act quick.

OTTO SCHWILL & CO., Seedsmen, 18-20 S. Front St., Memphis, Tenn.

For Sale—Model boiler, No. 5-30; good condition; cheap. Address Key 201, care American Florist.

For Sale—\$8,000.00 seed and hardware stock, doing good business; good reason for selling. E. J. HOEBERGEN, Des Moines, Ia.

For Sale—Florist place in New England half way between New York and Boston; All shipping facilities; good retail trade, designing, etc.; near two large cemeteries with own water supply and pipe line; two greenhouses, 100x22 ft., 60x14 ft.; four years old; another house needed to supply local demand; new boiler already set up in cellar for another house; lot of new piping, pipe, tools, etc.; greenhouses fully stocked and in full running order; store down town sells plants and flowers all the time; will sell whole place with dwellings, barns, etc., or will sell just greenhouses and land they occupy; whole place is 8½ acres. Owner has other business to attend to. Write for particulars. Key 216, care American Florist.

FOR SALE

3 TUBULAR BOILERS

66-in. by 18-ft., perfect condition and cheap. Address

ARMSTRONG MFG. CO., Springfield, Ohio.

Head Gardener.

Thoroughly qualified in all departments, with highest reference, is now open to take charge of private estate any where in the middle west.

Key 217, care American Florist.

WANTED

Young man with thorough ornamental nursery stock training. Splendid opening for right party. Must furnish the best of recommendation. Address

Elm City Nursery Co., New Haven, Conn.

WANTED

A working foreman to take charge of 50,000 feet of glass; mostly roses, carnations, violets and 'mums; send reference with first letter; wages to start at \$70.00 per month.

W. W. COLES, Kokomo, Ind.

For Sale—At a bargain, a splendid greenhouse business in Indiana; only a small amount of capital needed by the right person. For particulars and terms address Key 210, care American Florist.

Your Chance.

A well established florist business with two greenhouses, 24x100 and 22x75; fine dwelling house with basement 24x36; a fine well; one acre of ground; house; wagon; and store fixtures; all in good shape. \$6500 half down balance on time. Address

FRED J. FISCHER, Reno, Nev.

WANTED.

A seedsman who is thoroughly versed in grass and field seeds—one who has had considerable experience in the house working on orders, assisting in shipping; also must be capable of buying grass and field seeds in the country from the producer. Want a man capable of earning \$1000 per year or better.

Key 166, care American Florist.

\$125 BUYS A LOT

25x247 feet long; \$5 down; \$5 monthly; no interest; good soil; splendid transportation; beautiful spot for florist or nursery; close to six cemeteries. Take Morgan park car at 79th and Halsted sts. to end of line, walk block west; sales man on ground daily after 1 p. m.

J. S. HOWLAND, 138 Washington St., Chicago. Phone Main 455.

SUBJECT TO CHANGE WITHOUT NOTICE.

POEHLMANN'S FANCY VALLEY EXTRA FINE HARRISII LILIES

We make these a specialty.
Can supply them all the year.
Once tried you will have no other.

Chicago.

The very warm weather during October has not tended toward hurrying the people from their summer homes to their city residences and consequently has had its effect upon the demand for floral work for society functions have not attained full sway. While the cut in almost all kinds of stock is not large yet the demand keeps about equal to the supply, there being no great shortage in anything and also no perceptible surplus except in one or two lines. Roses are of same high grade that have been noticeable for the last few weeks and while the cut has shortened up, yet with the exception of shorter stemmed Beauties, of which the supply is hardly enough to fill the demand, there appears to be enough to fill all the orders received. Elegant long stemmed Beauties are very noticeable and finding good sale at the current prices. In the other roses the prices for the higher grades has advanced a little and some very fine stock is being received. Killarney has the call and is closely followed by My Maryland, Mrs. Marshall Field, Richmond, White Killarney, Bride and other colors. Carnations are now of good stem and color and the blooms are of good size, fancy grades are selling well. Large consignments of cattleyas and other orchids are being received, in fact, a little more than the trade at present warrants. Chrysanthemums are beginning to come more bountifully. Monrovia, Yellow Touset and Halliday are pushing Golden Glow and Pacific Supreme and Glory of the Pacific are the pink varieties on the market. White is represented by Polly Rose and October Frost. The quality is very fine and some beautiful blooms are seen. Lilies and valley are a little short and the good grades sell quickly. There is no call for violets and what are coming into the market find very slow sale. Dahlias and cosmos are the only outdoor flowers now on the market to speak of, and some very handsome varieties of the former are to be found daily. Quantities of autumn foliage, principally the high colored oaks, are being used, which decreases the demand for green stock. Everything considered, business is good and the outlook very optimistic.

NOTES.

The Geo. Wittbold Co. are extremely busy these days, packing and shipping the many orders for the excellent stock they are sending out. They are

offering some very tempting bargains to the trade and their stock is fully up to all it is represented to be. Their Boston ferns are in elegant condition, all sizes, and when seen, readily find a purchaser. To properly conduct this vast business they now have in use some 60 wagons beside two autos. The management of this large establishment is thoroughly systematized. Louis, the secretary and treasurer, has charge of all the clerical and office staff. Fred and Henry manage the outside work and supervise all the many decorations they are called upon to arrange, and Otto superintends the nursery at Edgebrook, where the large assortment of splendid stock for outside planting is grown.

The high quality of the stock at the Poehlmann Bros. Co. is fully maintained at each day's receipt. American Beauties of elegant quality are in good cut and the receipt of all grades, both long and short, is equal to the demand. Beautiful Cattleyas are now being received and their Lily of the Valley is as fine as can be found on the market. Killarneys of beautiful color and of all grades as well as all the other desirable varieties of roses are always on hand. Carnations are now coming in fine shape, good size stem and color. Chrysanthemums and Harrisii of fine quality are daily received.

On October 10, E. C. Amling, the well known wholesale and commission merchant, celebrated his forty-second birthday at his home with a family gathering and was the recipient of the good wishes of all with many happy returns of the day. Mr. Amling made his first start in the flower business with his brother, Albert F. Amling, at Maywood in the greenhouses located at that place. Here he remained for seven years and fourteen years ago he came to Chicago and established the wholesale house which under his successful management has attained the well-earned reputation it enjoys. This year the name was changed to the E. C. Amling Co. and Mr. Amling was chosen president that he might still direct the affairs of the concern successfully.

E. H. Hunt received a shipment of ten large cases of florists' baskets on October 8, and happening to stroll in while Clifford Pruner and his force of assistants were busy unpacking, our attention was called to a new novelty, an aluminum fern dish, a number of which were included in the shipment. The supply department is well stocked

and everything is in readiness for the coming season, which from the present outlook promises to be a very busy one.

Hoerber Bros. are now receiving an especially excellent grade of Bride, Richmond and White and Pink Killarney roses, and some fancy carnations are among the daily receipts, which are eagerly sought by their trade. The stock they are now handling is especially gratifying to their customers, one of whom was so well pleased when the shipment reached him at New Orleans, La., that he immediately forwarded a good standing order for similar goods.

J. B. Deamud Co. is certainly earning the reputation of being the "busiest house" which they claim, for the stock finds a customer as soon as it reaches the store. A high grade of stock and good packing are sure to make customers, and the care with which the fine stock is shipped at this store will surely redound to its credit. An excellent grade of orchids, roses, carnations and all other kinds of stock is sure to be found here.

The Chicago Carnation Co. are handling a fine grade of all the leading varieties of carnations, all of which are their own growing at present, and the quality is of the best. Miss Nettie Parker, who has been with this firm for years, is performing the office work. The Chicago office transacts all the business of this concern, and Manager Pyfer is very enthusiastic over the amount of business done.

Bassett & Washburn are receiving fine chrysanthemums in all the leading varieties and excellent roses for which they are receiving a heavy demand. The O. P. Bassett carnations are now coming in with stems 18 inches long and the retail stores in town are taking all they can get. Out of town trade is very active and business in all lines of stock is very good.

Poehlmann Bros. Co. made a clean sweep at the state fair held at Springfield September 30 to October 8, making entries of their roses in 25 different classes and winning 25 first premiums.

J. A. Budlong is cutting large quantities of white, pink and yellow chrysanthemums of the leading commercial varieties which are of exceptionally good quality. Yellow Touset, a sport of Clemantine Touset, is now in the market and is giving splendid satisfaction. The demand for these flowers is exceedingly large and the force is kept

BASSETT & WASHBURN,

Office and Store:
76 Wabash Ave., Chicago

Greenhouses:
Hinsdale, Illinois

busy filling the many orders which are received every day.

A. L. Randall, after spending three months at his farm at Benton Harbor, Mich., has returned to the store. W. W. Randall is also back from his vacation, part of which was spent visiting in St. Joe, Mich. Business is reported as very good, and the fall trade is very promising. T. E. Waters has just returned from a very successful trip.

John Kruchten is handling large quantities of mums, gladioli and carnations. Mr. Kruchten received three boxes of mums from Harper City, Ind., that were so badly affected by the heat in the express car that they were almost a total loss. This is one of the instances where the express companies should be required to make good the loss.

The trade at Vaughan & Sperry's is extremely satisfactory, and large shipments are in order, and the business done on October 7 and 8 was very large. "Two big days." They are receiving some very handsome cattleyas and large quantities of other desirable stock. Extra large shipments of boxwood were received during the week.

Weiland & Risch are cutting an elegant lot of roses and carnations, which are very much appreciated by their trade. The Killarneys are of very high color and grade, and the other roses are equally as fine. The carnations are as nice stock as the market affords, of good size and stem, Enchantress being particularly noticeable.

Wieter Bros. are cutting an excellent grade of Kaiserin, White and Pink Killarney, Jardine and American Beauty roses. Chrysanthemums are arriving more freely and Rosiere made its appearance in the market the past week. This firm is receiving a fancy grade of carnations for which the demand is heavy.

J. Friedl, 3538 West Twenty-sixth street, reaped the benefit of the carnival held last week by the West Twenty-sixth street Business Men's Association. Mr. Friedl's float, a loving cup, stood nine feet high, was made of solid asters and American Beauty roses, was one of the features of the parade.

Charles W. McKellar is receiving large consignments of a large variety of orchids, which are having a fine sale. A large shipment of Oncidium Varicosum Rogersii was among the arrivals this week. Dendrobium Formosum is meeting with a fine demand, being used with Lily of the Valley for bridal work.

H. A. Fisher, of H. A. Fisher Co., Kalamazoo, Mich., spent a few days of the present week in the city, buying stock for the fall business. George Fisher is constantly on the local market buying the stock that is needed for their stores at Kalamazoo and Battle Creek, Mich.

We erred last week when we stated that others besides George Perdikas were interested in the store on Dearborn street and Jackson boulevard. We wish to inform the trade that Mr. Perdikas is sole proprietor, and that we were misinformed, hence the error.

Raichart & Krejci, 3250 West Twenty-sixth street, are enjoying an exceptionally good business, the carnival held last week calling for a large quantity of flowers. A feature of the automobile parade on October 5, was an auto decorated by this firm.

J. B. Opitz, 3626 Cottage Grove avenue, is enjoying an exceptionally good business. On October 6 several designs were delivered to the Ledermann residence on Indiana avenue, where the funeral of Sol. Ledermann of the Maryland Distillery Co. was held.

Peter Reinberg is cutting an excellent grade of carnations of all the leading varieties, White Enchantress especially being of extra fine quality with long stems for this early in the season, and the other varieties are of nearly the same general excellence.

E. F. Winterson Co. is handling large quantities of chrysanthemums. Polly Rose made its first appearance this week and was disposed of as fast as brought in. Some gladioli of exceptionally good quality were also noticed.

The A. L. Randall Co. have received their fall shipments of fancy decorative stock and waterproof chiffon. Miss Tonner reports an unusually good season, the bulk of the business transacted exceeding that of former years.

Frank Oechslin, 4911 Quincy street, is building a propagating house, 9x110 feet. Mr. Oechslin deals largely in market plants and an inspection of the greenhouses showed the stock to be in splendid condition.

E. C. Amling Co. is filling a large number of orders for Lily of Valley for which the demand is heavy. Violets are arriving in larger quantity and those received on October 10 were of A 1 quality.

The Killarneys that are being cut at the houses of George Reinberg are as fine as can be found on the market, and the daily cut exceeds any that has ever been made at this well known place.

H. Van Gelder, of Percy Jones', is receiving large consignments of white, pink and yellow chrysanthemums, which are as fine as can be seen in the market.

Zech & Mann are receiving large quantities of roses and carnations; the latter are in great demand and are quickly disposed of at an early hour.

Theo. Vogel, better known as "Teddy," formerly with W. J. Smyth, Mich-

35 Randolph St., CHICAGO.

igan avenue, took his departure October 7 for Los Angeles, Calif.

The Chicago Rose Co. is handling a large quantity of chrysanthemums and roses. Brides and Maids being of exceptionally good quality.

The Chicago Carnation Co. was a large exhibitor at the state fair held at Springfield October 3-6, and was awarded eight premiums.

Kyle & Foerster are offering large quantities of gladioli, carnations, dahlias and chrysanthemums of very fine grade.

E. R. Farley, formerly of Chas. W. McKellar, has accepted a position as salesman with H. Van Gelder of Percy Jones.

E. E. Pieser, of Kennicott Bros., is reported as on the sick list this week, being indisposed with a severe cold.

Visitors: J. G. Heintz, Terre Haute, Ind.; H. A. Fisher, of H. A. Fisher Co., Kalamazoo, Mich.; Theodore Wirth, Minneapolis, Minn.; B. Juerjens, Peoria, Ill.

Chicago Florists' Club.

The coming flower show, to be held at the Coliseum, November 7-12, was the principal subject of discussion at the large and enthusiastic meeting of the Chicago Florists' Club October 6, President Asmus in the chair. Twelve new members were enrolled as follows: Emil Middendorf, Wm. Kellsner, A. Christiansen, H. Nicholson, and H. Dumke, all of the Chicago Carnation Co., Joliet, Ill.; Fred Smith, 2509 W. Langley avenue; Jas. Einsweck, 3356 Potomac avenue; A. C. Rott, Joliet, Ill.; J. W. Kyle, 5435 Lake avenue; J. W. Fink, 2642 Herndon street; Jos. Foerster, 2242 N. Halsted street and Jack Byers, 48 Wabash avenue.

August Poehlmann and W. N. Rudd spoke of the flower show, emphasizing the great value of such events to the trade and the importance of united effort in making them a success. Mr. Poehlmann announced that the Horticultural Society had appropriated upwards of \$1,000 for exhibits of the retail trade, making an approximate total of \$6,000 in premiums for this exhibition.

Chairman Yarnall of the bowling committee reported that a number of

ORCHIDS

A SPECIALTY.

51 Wabash Avenue. CHICAGO.

valuable prizes had been offered for the team contests, the donors being President Asmus, Poehlmann Bros. Co., Vaughan & Sperry and the John C. Moninger Co.

Resolutions endorsing the candidacy of J. C. Vaughan for congressman in the second district were unanimously adopted as follows:

Resolved, by the Chicago Florists' Club, in regular meeting assembled

That whereas, one of our charter members, Mr. John Charles Vaughan, has received the Democratic nomination for congress in the second district of Illinois,

And whereas, we have been for years associated in a business way with Mr. Vaughan and by that association have been impressed with his high integrity and unusual business ability;

Therefore, be it resolved, that we most heartily endorse him as a candidate for the position of member

congress and that we express formally, our conviction that he is eminently qualified to fill the position to his own credit and to the advantage of his constituents.

H. N. Bruns reported that he had recently called on J. F. Klimmer, who has been ill for some time, and found him progressing favorably.

Manager Pyfer of the Chicago Carnation Co., exhibited a vase of his firm's new carnation, Washington, a fine dark pink sport of Enchantress which originated with Henry Eichholz, Waynesboro, Pa., some four years ago.

Vaughan's Nurseries, Western Springs, made a good display of dahlias.

The next meeting will be held at the Union restaurant, Thursday evening, October 20, at 8 p. m., when various flower show committees will report progress.

well-known eccentric character of St. Louis. This will prove quite an advertisement for this enterprising firm.

Frank Weber & Sons will issue their new catalogue this week. Their rose houses are looking fine and they are cutting some very choice roses. They have just started to cut chrysanthemums.

The Paris Floral Co., on Broadway and Olive street, are now making a very pretty window display. Some very fancy white and yellow chrysanthemums were shown.

C. Young & Sons Co. have their show windows decorated with a fine assortment of fall foliage leaves, bulbs and all cut flowers in season, which is very beautiful.

We regret to report that Charles Kuehn has been confined to his bed since last Thursday suffering with a very severe cold on his lungs.

The Florists' Club will hold its meeting Thursday. President Cannon presides for the first time and desires a good attendance.

The Riessen Floral Co. had several large orders the past week which took several large bunches of American Beauty roses.

Wm. Smith, of the W. C. Smith Wholesale Floral Co., made a flying visit to Springfield, Ill., to attend the State Fair.

Andrew Meyer, Sr., has returned from Springfield, Ill., where he served as one of the judges of horticultural exhibits.

C. E. DeWever is rejoicing in the arrival of a daughter October 7, mother and baby both doing well.

Chas. Cannon assisted during the past week at the store of the Kelley Floral Co.

Geo. Angermueller is receiving some extra fancy dahlias.

Grimm & Gorly have a fern sale on this week.

W. F.

Milwaukee.

Last week found stock very favorable to begin with and selling readily and at very good prices but towards the end of the week things just reversed. The favorable weather being responsible for the conditions. Roses enough but mostly of a longer grade—

everybody seemed to want nothing but shorter stemmed roses which made it doubly hard to fill orders and get good returns for same. Carnations are coming in more freely and of a better grade but are being picked up quite readily. Chrysanthemums have not made their appearance up to the writing at least not enough to make it worth while for the wholesalers to push same. The first violets, that is of home-grown stock, made their appearance and sold readily, bringing a nice price. Valley enough to fill all orders. Easter lilies are still scarce. Dahlias that are coming in are exceptionally fine and are selling quite readily. In fact all out-door stock is very good. The best we have had this season. The wholesalers are now wishing for a good killing frost, which would help considerably in easing up the market on carnations and roses, and help the chrysanthemums, which are just about due. American Beauties are of a very good quality and are selling at very good prices.

NOTES.

The Florists' Club meeting was held October 6 and a large number in attendance. The flower show, which will be held November 9-13, was the main topic. The executive committee reported having sent out the preliminary premium list and all those not receiving one will kindly write for same to H. V. Hunkel, chairman of the executive committee. The decoration committee for the show are contemplating some elaborate decorations. Something entirely different from former years. The growers who intend showing stock would help the executive committee considerably by sending in their entry list as soon as possible, not waiting until the last minute.

The Bowling Club was organized on Friday, October 7, and officers elected as follows: Gus Rusch, captain; Roy Currie, secretary; W. C. Zimmermann, treasurer, and members as follows: F. H. Holton, Walter Halliday, Julius Neubeck, Arthur Leidiger, Peter Nohos, Louis Manos, N. W. Perstein, Gunther Hunkel, Henry Marquardt and Robt. Zepnick. Some of these members have never bowled before but, according to the scores made at the last meeting, we expect to have some

record breakers before the end of the season.

Currie Bros. Co. have re-organized, having bought out the stocks of Adam Currie, who has been connected with this concern for many years. New officers were chosen as follows: Jas. Currie, president; Wm. Currie, vice-president; W. B. Currie, secretary, and Roy J. Currie, treasurer. They contemplate running the business the same as before at the old stand.

Holton & Hunkel Co. reports business very good. They are receiving a number of foreign shipments consisting of roses and azaleas, also quite a shipment of bulbs, which keeps the greenhouse force busy taking care of same. This concern is cutting some fine Perles which are selling readily and expect to cut mums in a few days.

C. C. Pollworth Co. reports business fine. They received a large carload of azaleas and are potting the same. This firm is cutting some exceptionally fine carnations of the Mrs. Ward variety and some fine mums.

Adam Currie and sons, Allister and Herbert, contemplate opening up a new store at 130 Wisconsin street. They expect to handle cut flowers and seeds and intend to be ready for business in a short time.

East Side Floral Co. are busy with their fall trade. They do quite an extensive business in the nursery line, trimming trees and shrubbery on some of the best places in the city.

Chas. Menger reports business satisfactory, having bought an additional piece of property adjoining his greenhouses and has put up a new house.

Edlefsen & Leidiger Co. report business very satisfactory. They are receiving quite a few carnations which are being cut at their own greenhouses, which are of a fair grade.

Theo. K. Sakell of the Emporium Floral Co., of St. Paul, Minn., was a visitor this week.

Mrs. H. V. Hunkel is visiting her mother at St. Louis.

G. R.

HOULTON, ME.—H. L. Chadwick has made quite an outlay on his buildings and stock preparing for his trade which has greatly increased, and he now commands a large share of Aroostook patronage.

Pittsburg.

We have had several weeks of good business, but a sudden break took place according to a majority of the retailers during the past week—some report that it has been the slowest week of the season. Naturally, stock has piled up at a great rate—short roses are most in evidence, a great many going to the barrel. Beauties are a close second. Dahlias also have glutted the market, and even carnations have not cleaned up. The demand for violets and valley is fair. Only the early 'mums are in so far. The supply of lilies is now equal to the demand. All green stock is over plentiful, excepting Southern smilax and quite a few were caught with decorations which called for this material, but could not be obtained.

Jos. Jones has opened a nursery store on Liberty street. Joe says he will be an important factor in summer flowers next summer.

J. W. Dudley of Parkersburg, W. Va., was in town getting supplies for his new store which he expects to open at Huntington, W. Va. Mr. Dudley supplies Pittsburg with a great many Easter and Christmas blooming

"THE BUSIEST HOUSE IN CHICAGO."

GREAT many of our customers, who have been on our books for years, have standing orders with us. They know through experience that we can take care of them. A trial will give you the same experience.

Orchids, Valley, Violets, 'Mums, Beauties, Roses, Carnations, Smilax, Leucothoe Sprays, Sprengerl; Boxwood \$15.00 per 100 lbs. We guarantee satisfaction.

J. B. DEAMUD CO.,

L. D. Phone Central 3155

51 Wabash Ave., CHICAGO.

plants and states that this year he expects to be better off than ever.

C. A. Dunn, without doubt, had the most attractive float in the recent Washington Centennial Industrial parade. It was composed of long American Beauties, white and pink Killarney roses, lilies and sprengerl.

The Weaklin Co. had their opening at 130 S. Highland avenue on October 8. A magnificent display of beauties, orchids, etc., made an attractive invitation to the East End trade.

The McRae Jenkinson Co., who recently purchased the Eissner place says business is fully up to expectations. They will run a big crop of mums through this store.

Sam McClements recently met with an auto accident, being thrown through the wind shield.

The McKeesport Floral Co. is cutting quantities of Polly Rose and Pacific 'Mums.

Phillips & Seedan also had a very artistic float composed of palms and ferns.

The landlord is closing out the stock and fixtures of the Breitenstein Co.

Visitors: J. S. Crall, Monongahela, Pa.; B. Eschner, Philadelphia, Pa.; J. W. Dudley, Parkersburg, W. Va.; Misses Forbes and Donahy, Wheeling, W. Va.; Thomas Malbranc, Johnstown, Pa.; Edw. Bell, Franklin, Pa. J.

Providence.

The business continues to improve steadily as weddings and other social functions are quite numerous. Violets of the single varieties are coming in of good quality and enough to supply all demands. The cool, cloudy, changeable weather makes it extremely hard on roses, but there is not an overabundance of first class quality coming in at present. Richmonds sell readily; Killarney is a favorite, and fine blossoms of these are to be had, as well as My Maryland and Kaiserin. Carnations are getting more plentiful and the quality improving, as are chrysanthemums, and the demand is sluggish. Asters of a first class quality are scarce, but there is enough of orchids, gardenias, lily of the valley to supply all demand. Dahlias are very abundant, and green goods are in better demand, as asparagus and smilax are used at fall openings. The weather is delightful, clear and warm, with cool nights.

Mr. and Mrs. Frank E. Saunders recently celebrated their silver wedding at their home, 25 Burnett street, where they entertained their many friends. Five thousand asters were used in the decoration of the rooms.

E. Bornerey, manager for Mrs. William Butcher, has returned from a trip through England, Sweden, Germany and Holland.

TRADE IMPROVING.

There has been a decided change in the weather, and the sporty youths are now wearing long overcoats, partly for style, but in the main because they are comfortable. The drop in the temperature is sure to help the trade. It will bring the people who can afford to live where they please back to their city homes, where conditions are more agreeable than elsewhere during cold weather. Trade is steadily improving, but it is not yet what it should be. It may as well be now said that the insane infatuation of the people for the automobile races, with death's grinning specter in the foreground, has worked great injury to our business. But we do not think it is as bad here as in some other cities. We are not alarmists or pessimists, but it does seem that we are fast reaching an epoch coeval with that in which mothers and maidens were thrown to the lions and other wild beasts and the populace howled their applause. To thinking men and women the favor which brutal and barbarous sports are now given are shocking. We pride ourselves as being a Christian nation. Can we continue to calmly view the destruction of human life and the maiming and crippling of useful men and women merely as a pastime for the idle and profligate millionaires and their worthless scions?

NOTES

J. Walsh of J. Walsh & Sons, growers and retailers of Boston, Mass., was in this city on October 8. He visited the store of the H. F. Mitchell Co. to see his old friend Maurice Fuld. Incidentally, he encountered another old friend, the AMERICAN FLORIST.

The Leo Niessen Co. is handling an exceptionally fine quality of American Beauty and tea roses. They are also strong on early chrysanthemums and single violets.

John McIntyre left for New York on the afternoon of October 8. John's movements are mysterious, and it is suspected that he has something up his sleeve.

Edward Reid, who has been on an extended tour of the southern states, has returned home. He speaks in glowing terms of the hospitality of Dixie land.

Samuel Lilly is much pleased with his new location, No. 5 Mole street. Being now near to the Broad street station, he catches 'em coming and going.

Berger Bros. are now handling some of the best chrysanthemums seen in the market, as well as a good variety of other stocks.

William P. Ford, a leading wholesaler of New York City, spent a few hours here on October 8. Mr. Ford has

Baltimore.

STOCKS NOT PLENTIFUL

Notwithstanding the rosy predictions of the high salaried weather sharks, this city has long suffered and is still suffering from drought. On October 6 there was a violent wind storm, and, as street watering had previously been prohibited by the water commissioners, the whole city was enveloped in a whirlwind of dust, almost equal to what is experienced in crossing the great deserts of Arizona. There was a slight rainfall on the morning of October 7, which temporarily laid the dust, but had no effect on the watershed which supplies Baltimore with water. It is satisfactory, however, to state that the weather is much cooler, which is favorable to business, and, if the people cannot get water to drink, there are various other concoctions that can be had at reasonable rates. Good flowers are not plentiful. Dahlias, which at this time loom large in the retail stores, are being largely received from the Vincent Farm at White Marsh. Though Baltimore and its suburbs have been practically burned up, Vincent's dahlia farm has been visited with copious rains, which illustrates and illuminates that old saying that "the Lord is good to His own." Notwithstanding the rosy predictions of weather sharp Alexandria and the dust-laying drizzle of October 7, the water department reported a decrease of 6,000,000 gallons. Mr. Quick, engineer in the water department, states:

"As it is, the rain did but little good as far as the water supply is concerned and conditions are still very grave."

NOTES.

Boyd G. Merritt of B. G. Merritt & Co., Grange, Ind., was in the "Exchange" October 7. This firm heretofore carnation growers, have recently taken up the culture of American Beauty roses with gratifying success. They may be said to be the pioneers in this line in the immediate vicinity of Baltimore, and their good work deserves more than passing mention.

On October 6 a jolly company of florists visited the estate of Wilbur Robinson and greatly enjoyed the hospitality dispensed. Among those present were John J. Perry, Isaac N. Moss, Chas. L. Seybold, F. C. Bauer, Harry Lehr, Geo. Eberle, Matthew Richmond and Charles Klutch. The resort is down on the shore and they were free from the dust and heat of the city.

At the greenhouses of Halliday Bros., North avenue and Pulaski street, where Matt. Richmond is foreman, we recently noted a very fine stock of carnations. There is also a good display of other mixed stock.

Boston.

While the business at both markets has been very good the past week, the return of summer weather has had a very deleterious effect on all grades of stock, and on some flowers, such as violets, the effect has been disastrous. Roses are very plentiful, and, with some of the growers, the best grades are selling slowly, but before the close of the day all grades are generally sold even if not bringing a remunerative price. Carnations of very fine grades are coming in plentifully. Chrysanthemums Monrovia has taken place of Golden Glow. Polly Rose is the best white, and as yet the pink varieties are not of the best. There is not much demand for them as yet and they are selling at low prices. Sweet peas, both pink and white, from the new greenhouse crop have made their appearance, and other flowers noted were lilies, violets, cosmos, tube roses, dahlias, bachelor's buttons and marguerites. A few asters are still offered, but they are the last of the season.

NOTES.

Penn's new store front is nearing completion and when finished promises to be one of the handsomest in town. Trade here has been quite brisk, with good call for orchids, lily of the valley and American Beauty roses. This concern had the work for the Gannon-Armstrong wedding at Meredith, N. H., with a staff of men on the ground two days installing the decorations.

Secretary W. P. Rich will represent the Massachusetts Horticultural Society at the exhibition and dinner of the Worcester Horticultural Society October 13, and will also visit the meeting and show of the New Hampshire Horticultural Society October 20-22.

The Massachusetts Horticultural Society has received from the Essex Institute of Salem a gift of a large lot of bound and unbound volumes of all American agricultural and horticultural papers, some of which date back more than fifty years.

The annual meeting of the Boston Flower Exchange will be held November 4, and, as has been the custom with the older market, will be opened with a banquet. It is expected that at least 80 will be present.

T. J. Clark is showing a new rose that is very popular with the best trade. It is not yet named, of a brighter shade than Killarney, much larger and more double and with a stem like American Beauty.

Hoffman's enlarged store is a beauty, and a notable feature was some large plants of *Celosia Thompsonii* Magnifica. The trade at the Back Bay is very

Price, \$2.50 and \$3.00 each.

Julius Roehrs Company

Rutherford, N. J.

New York.

UNSEASONABLE WEATHER.

At the beginning of last week market conditions were very encouraging, all stocks arriving in good condition and sold readily at good prices, but on Wednesday the bottom seemed to have suddenly dropped out of business and is likely to remain so until the advent of more seasonable weather. The warm spell having a particularly bad effect on roses which are arriving in a very soft condition and have dropped in prices. Fine mums are now arriving but are not moving as fast as they might. Plenty of violets, gardenias and orchids are now seen and good blooms of the latter sell cheap. Great quantities of good dahlias are still arriving but more slowly.

NOTES.

The officers and directors of the greater New York Cut Flower Association of Brooklyn paid a visit to their different growers in Long Island October 11 in an auto. The party consisted of D. Y. Mellis, president; Hugo Jahn, vice-president; R. G. Wilson, treasurer; W. A. Philips, secretary; T. G. Van Miter, Chas. Weber.

There was a larger attendance of florists from Brooklyn at the auction rooms October 14 than from New York. The prices for which the different stock were sold could hardly be called good, particularly evergreens, which went at very low figures.

Chas. Dards had the decoration for the J. O. Havemeyer wedding at Yonkers October 8. The bridal bunch was made of white orchids and lily of the valley while the eight bridesmaids carried bunches of red roses.

John Raynor is in town for a few days and will celebrate his twenty-second wedding anniversary while here. He will then start on an auto tour through California.

Satow & Suzuki of Woodside, L. I., have just received a consignment of over 50,000 lily bulbs. They have three houses of poinsettias under way for the holiday season.

Jas. Mallon's Sons have completed alterations on their Smith street store and greenhouse in Brooklyn and are putting in a fine line of decorative stock.

The Yonkers Horticultural Society will hold their annual exhibit November 10. This society meets at Getty square every second Thursday in the month.

F. Zahn, Seventh avenue and One Hundred Twenty-fourth street, has been unusually busy with funeral work of late.

The latest acquisition of D. J. Papas is a new auto delivery car with glass sides which is quite an attraction.

Percy Richter, manager for Asmus at the Coogan building, won a \$2,000 auto on a 50c ticket last week.

Hales', of East Orange, report a very brisk wedding business for the past month.

A. L. Young has added to his staff H. R. Scommoda, formerly with J. Sharkey.

M. C. Ford is receiving some very fine mums from R. Leach, Jersey City.

New York Florists' Club.

The Florists' Club held their regular monthly meeting October 10, President Miller in the chair, and it was one of which the president and members might well be proud, there being an exceptionally large attendance of both ladies and gentlemen. Eleven new members were elected and ten proposed. Horace McFarland, of Harrisburg, Va., delivered a very interesting lecture with illustrations on the crusade against ugliness. John B. Nugent sprung a little surprise after the lecture in the form of a seven-piece orchestra and soloists, both instrumental and vocal, which were very much enjoyed. After refreshments were served, Miss Dorsal rendered some very beautiful solos, one being Annie Laurie, by request, which was greatly applauded. The meeting was dismissed after all present joined in singing America. A vase of Melody Roses, grown by Robt. Scott & Sons, Sharon Hill, Pa., were exhibited by the S. S. Pennock & Meehan Co., also a vase of Celosia Pride of Castle Gould by Harry Turner. The following members were elected: Geo. Wagner, E. T. Bloomfield, W. F. Shay, H. E. Philpott, Philip Einseman, R. W. MacNiff, Geo. W. Crawbuck, John Baumann, Fred Marquardt, John Collins, Emil Luely, and the following proposals for membership were received: Chas. Shuster, M. Kleimman, O. Bloomburg, Jas. Fenn, W. J. Moore, P. S. Rigby, M. C. Ford, W. A. Philips, John Graff, Wm. Taat.

The Morris County Florists' and Gardeners' Society, in conjunction with the Chrysanthemum Society of America, will give their annual chrysanthemum show at the Morris Co. Golf Club House, Convent Station, Morris-town, N. J., on November 2-4. Over \$3,000 in prizes will be offered.

The New York Florists' Club Bowling Association meeting on October 7, was largely attended, President J. Manda offering a pearl and diamond pin, valued at \$20.00, for the highest score during the season of seven months, only members who have paid their \$6.00 in advance being eligible

FOR "MUMS"

Aphine has no equal among the insecticides on the market today. It has no injurious effect when applied to either foliage or flower. It will not burn or stain, but will destroy insect pests to which chrysanthemums are susceptible.

Read what Mr. Fritz Bahr reports in the "Week's Work" on his experiments with Aphine from spring up to date, in the Florists' Exchange of October 8th.

\$2.50 per gallon; \$1.00 per quart.

You Ought to Know

THAT the steady growth of any company is the surest indication of the value of that company's stock and service. It takes the **Right Stock**, the **Right Price** and the **Right Service** to make the **Right Growth**.

With these facts in mind, a short history of the steady and healthy growth of the Geo. Wittbold Co. should be of the utmost interest to every buyer of plants and nursery stock. During the year 1857 George Wittbold, then only 25 years of age, came to Chicago from Hanover, Germany, where he was born, and entered into partnership with a Mr. Williams, the firm name being Williams & Wittbold. Mr. Wittbold had obtained a thorough knowledge of plant growing at the Royal Botanic Garden in Germany, and was well qualified for the responsibilities which he assumed here.

Williams & Wittbold had two places, Mr. Williams conducting one on what is now Fullerton avenue, while Mr. Wittbold's first glass was about where North avenue intersects Clark street, which was then some distance outside the city. At the close of the Civil War the partnership of Williams & Wittbold was dissolved, and in 1869 Mr. Wittbold acquired the land on which he lived and conducted his business for forty-one years, till death finally intervened. At the time of his purchase this was marsh ground, far outside the settled city limits. His contemporaries told him it was not worth the \$2,000 he agreed to pay for four acres, but by the time Mr. Wittbold had his marsh filled in he had many opportunities to turn his investment profitably.

All the time that Chicago was growing the Wittbold business grew with it. Where in the beginning only a little local trade was handled, in the course of time a big range of glass backed up two retail stores, and a large wholesale business was done, both in the

city and throughout the west. Mr. Wittbold brought up a family of five sons, each of whom possessed the father's aptitude for the business and all of whom at length became associated with it, assisting in its extension and eventually taking over the entire responsibility. Twelve years ago the George Wittbold Co. was incorporated, the founder occupying the presidency (whose place is now filled by former Vice-President Fred Wittbold on account of the recent death of Mr. Geo. Wittbold), but each of the other sons holding an interest, with Louis Wittbold as secretary and treasurer. Since that date the progress has been more rapid than at any time in the history of the business. A large nursery and greenhouse plant has been established at Edgebrook, Ill., where there is 70,000 square feet of glass, and 50 acres devoted to growing of all kinds of nursery stock. This is in addition to 70,000 square feet of glass in the main establishment on Buckingham place.

Such is the history of this corporation. Now, just a few words about the policy that has made this history of growth possible. You know, and we know, that there can be a great variation in the quality of plants and yet have them strictly up to specifications. Knowing this, we felt that each customer should be given extra good value, in addition to having every shipment exactly fulfill the specifications. That being the case, our constant aim and policy in the fifty-two years of our business has been "**good value given on every purchase.**"

Here is another fact that you should not lose sight of: Chicago, being centrally located, has the best railroad facilities in the United States. You will find that you will make a saving in express and freight rates and have the advantage of quick service if you place your order with us.

Edgebrook Nursery and Greenhouse Establishment of the Geo. Wittbold Co., Chicago.

Many of Your Customers Will Be Glad to Have Heacock's Well - Established Palms This Winter

Well-established; that's one of the big things in favor of Heacock's Palms, and explains why they succeed where ever grown—from one side of the country to the other, even as far south as Mexico. Our Palms are a first-rate, all-the-year-round line for you to handle, and right now, when the demand is strong for good indoor stuff, Palms like this Kentia Belmoreana are bound to prove especially popular with your trade. At the price we are quoting, you can make a good profit handling them. The clean, healthy condition of this Palm is duplicated in every plant we send out—every one is vigorous, well-established, because grown here in our houses from the seed. We have a splendid stock and can ship on short notice. Order now—freight shipments cannot be safely made after cold weather, when all stock must go by express at a higher rate.

The Seed Trade.

American Seed Trade Association

E. L. Page, Greene, N.Y., President; L. H. Vaughan, Chicago, First Vice-President; M. H. Duryea, New York, Second Vice-President; C. E. Kendel, Cleveland, O., Secretary and Treasurer.

MILWAUKEE, Wis.—Adam Currie, who for 31 years has been secretary and manager of the seed business of Currie Bros. Co., has severed his connection with the old firm to establish a new one, under the name of A. Currie & Co. The new company consists of Adam Currie and his sons, Allister and Herbert. They will conduct a general seed and flower business, together with all lines in connection therewith. The new place of business will be at 130 Wisconsin street.

The Virginia Seed Law.

Important changes in the rules regulating the sale of agricultural seeds under the new law were made yesterday by the state board of agriculture. Since the law went into effect on September 17, the department of agriculture has been working under the rules adopted by a committee of the state board.

Under the terms of the new law requiring the inspection of seeds offered for sale in this state, it was required that a certain standard be conformed to. Those seeds which had not more than the minimum of adulteration are entitled to be labeled "standard." It is found, however, that some dealers have been working off other seeds without putting the percentage of adulteration on them. They have adopted the practice of printing at the bottom of the label the statement that the seeds are not guaranteed, and that the purchaser must take his chances as to the contents.

The state board of agriculture would not stand for this condition. It was therefore decreed yesterday that nothing shall be printed on the labels save such matter as is authorized and required by the regulations of the board. This means that the nature of the adulteration and its percentage must be plainly printed on all labels, except as to "standard" seeds.

With this exception, the rules were left in the main as adopted by the committee.—Richmond Times-Dispatch, October 6.

Braslan Seed Growers Co.

Lettuce, Onion, Sweet Peas,

Growers for the Wholesale
Trade Only.

SAN JOSE, CALIF.

CHICAGO—Prices on the board of trade October 12 for grass seed were noted as follows: Timothy, \$7.50 to \$8.50 per 100 pounds. White clover, from \$22 to \$27.

W. ATLEE BURPEE & Co., Philadelphia, Pa., are offering six new sweet peas for the season of 1911. A full description of these novelties will be found elsewhere in this issue.

WILKESBARRE, PA.—H. F. Michell & Co. of Philadelphia have been awarded the contract for furnishing 7,000 tulip bulbs to be used in the flower beds about the new court house.

Nebraska Crops.

Fremont, October 7.—Most of our sweet and field corn indicate fair crops, and we believe the quality will be good, although some varieties will be short, more especially the late kinds.

Cucumber, with a very few exceptions of the shy seeding varieties, indicate good yields and full deliveries.

Muskmelon, generally short with the exception of Rocky Ford, Netted Gem, Burrells Gem, Ferrys Defender, Osage Gem, Netted Rock, and a very few of the larger varieties, the other varieties ranging from very small deliveries to total failures.

Watermelon, fair crops and yields ranging from 50 to 100 per cent, with a few exceptions which will be total failures.

Pumpkin, Large Cheese, Small Sugar, Connecticut Field and Kentucky Field, probably full deliveries, and other ordinary varieties 25 to 50 per cent deliveries. Mammoth Potiron, King of the Mammoth and a few other varieties nearly failures.

Summer squash, nearly full deliveries with the exception of Early Summer Crookneck, Mammoth Summer Crookneck and Bush Fordhook, which will be very short.

Winter squash, very late and prospects poor. Marrows and Golden Hubbard about 50 per cent delivery. Improved Hubbard, Chicago Warty Hubbard, American Turban, Lows and Warrens Essex Hybrid, Burpee's Early Fordhook, Henderson's Delicata, Perfect Gem, Delicious, Mammoth Chili and Mammoth Whale very short.

Gourds, with the exception of the Nest Egg, very short or nearly total failures.

We find the crops we have grown under irrigation this past season will give us the best results.

Notes on Mushrooms.

Just as soon as the summer's heat breaks down a little, we commence operations for mushroom growing; while mushrooms spring up fast enough once a bed is in bearing, the road to a bearing bed is not so short and operations begun now will bring a crop along with cold weather. Most growers avoid cropping in warm weather owing to attacks by various insects, and some on account of a slower market.

The most important part of the work now is to get the right manure and prepare it. This has been explained so often it seems tiresome to repeat it; yet it is the foundation of the whole thing and pains should not be spared. We always look to fresh manure from well-fed horses. There is a vast difference between manure, and that from well-grained horses is best. We never have used manure from sawdust or shaving bedded barns and would avoid it. We can get the right material in any quantity, and we haul enough at a time to build the desired amount of beds; pile it rather flat, and compact it thoroughly to prevent firing. It should be thoroughly damp but not so wet as to wring out any moisture. After heating sets in it must be carefully turned every few days, to prevent burning and to get it uniform.

While a good job may be done outdoors, an open shed is preferable as heavy rains cannot leach out our pile nor winds penetrate so deep. By shaking the manure thoroughly and always placing the inside part outside on the new pile, and the outside part to the inside, we will in a few weeks have a uniform body of dark color and rather mellow and sweet odor, quite the opposite from the original material. This is the aim—to reduce the heat and bulk without fire, fanging and to retain enough life for a low, long continued heat to feed our mushrooms. The whole process is very similar to making a good hot-bed.

While this is going on, the beds can be made up and whitewashed. Hot lime should be used freely around mushroom houses, whitewashing walls, beds and walks to destroy fungi and vermin. We do not find many mushroom beds under greenhouse benches, no doubt owing to difficulty of getting material in, to excessive heat on account of pipes, to excessive evaporation on account of air currents. Much the best results are obtained in separate sheds or buildings, which can be heated to the required temperature and closed against air. Yet some growers succeed admirably under benches. It is in this as with everything else—the man element is as important as the location or the material.

MARKETMAN.

Temperature for Lettuce.

This is a subject that has been debated a great deal and yet never settled, simply because no two places are alike and what one does is not applicable to another. We might answer off-hand that such a degree is most suitable which answer would really mean nothing as existing conditions must be met.

There are really two classes of lettuce growing. One has for its aim the production of the heaviest possible lettuce, thereby saving the cost of producing so many plants and replanting; the other is the quick kind, producing a small soft lettuce in a short time. These two classes require different temperatures. In order to get those heavy lettuces, weighing a pound each, a low temperature is needed to get ample root action and stocky growth. The other kind cares little for roots—it is top they want in the shortest time, hence they advocate more heat.

Then there is the aspect and kind of houses used. Heat and light should go in harmony; thus in a modern house, temperatures could be run a little higher without softening the crop, than could be done in an old fashioned dark house. The same is true in regard to weather. If we enter a dark spell of weather we always carry temperature low, to hold growth back, and make up for it in bright weather. A great deal can also be done by manipulating the night and day temperatures. Thus were we growing a heat-loving crop we would aim to have the night temperature go into effect as late as possible and the day temperature as early in the morning as possible—in other words—to lengthen the warm period. With a cool crop like lettuce, the opposite is the case. We always try to reduce the warm spell to a few hours at noon. This we accomplish by early ventilation, by withholding heat as soon as possible, and by late airing and late heating. Lettuce will stand a good deal of heat for a short period—say from eleven to two o'clock, if followed by a long cool spell to correct it.

This matter of temperature embraces the whole science of lettuce growing. The operator must harmonize between the soil used, the light at hand, the market catered to, the weather encountered, and no set rule can be given. The man must study out his conditions and find his own balance. The best growers carry low temperatures, which means about 45° at night and 60 to 65° in bright daylight. On the other hand there are men who consider every degree below 50° a damage to the crop. Some run as high as 55°. All the above remarks apply to Grand Rapids lettuce, which is now used almost exclusively. Head lettuce requires less heat and more air and 40° at night with 55 to 60° in day would be ample.

The Nursery Trade

American Association of Nurserymen.

W. P. Stark, Louisiana, Mo., President;
E. S. Welch, Shenandoah, Ia., Vice-President;
John Hall, Rochester, N. Y., Sec'y.
Thirty-sixth annual convention to be held
at St. Louis, Mo., June, 1911.

VISITED CHICAGO: Wm. Warner Harper, of the Andora Nurseries, Philadelphia, Pa.

DR. ROBERT T. MORRIS writes to the Nut-Growers' Association upon the necessity of having the work of the committee on nomenclature and classification well tabulated and put in form for ready reference.

AUBURN, ALA.—The annual inspection of the Alabama nurseries has just been completed, and the figures compiled by state horticulturist, P. F. Williams, reveal the fact that last year the nurserymen of the state had an aggregate stock offered for sale of 10,447,965 trees, shrubs and other plants. The extent of the business done by Alabama nurserymen is shown by the compiled figures; two nurserymen effect sales in every state in the United States, one in Canada and one other in every state but two.

The Purchase of Fertilizers.

The use of commercial fertilizers in Michigan is increasing very rapidly. In 1906 the manufacturers reported sales approximating 20,000 tons, while the sales for the present season will not be far from 40,000 tons. In 1908 there were 149 licensed brands on sale. This year there are 191 brands, an increase in only one year of 42 brands. The quality of the fertilizers has remained about the same for a number of years although there is a tendency upon the part of some of the manufacturers to put out more of the high grade goods.

In the fertilizer bulletin, No. 252, of last year, we pointed out that the high-grade fertilizers furnish the plant-food at a less cost per pound than the medium or low-grade goods. While the price per ton is somewhat higher the actual cost of the plant-food in the average high-grade fertilizer is for nitrogen eight cents per pound cheaper than in the low-grade goods and for available phosphoric acid and potash two cents per pound cheaper than in the low-grade goods. The highest cost for nitrogen, available phosphoric acid and potash in the high-grade goods was not greater than the lowest cost for the same in the low-grade goods.

In purchasing commercial fertilizers the point to be considered above all others is the cost of the plant-food per pound. The name of the manufacturer, brand name, or other advertising matter should receive attention only after it has been determined which brand furnishes the required plant-food for the least amount of money. The following rule will easily enable one to compute the cost per pound of the nitrogen, available phosphoric acid and potash in any fertilizer.

Nitrogen: Multiply the selling price per ton by 18 and divide result by the commercial valuation.

Available phosphoric acid: Multiply the selling price per ton by 5½ and divide the result by the commercial valuation.

Potash: Multiply the selling price per ton by 5 and divide the result by the commercial valuation.—Michigan Report.

A BLUE ROSE

The Greatest Rose Novelty of the Century

It flowered with us this season and was greatly admired.

The New Rambler (Violet Blue), hailed by the German rose growers as the forerunner of a genuinely cornflower blue rose, is a seedling of Crimson Rambler, very vigorous and hardy, and free blooming.

HENRY EICHHOLZ, Waynesboro, Pa

Dreer's Hardy Perennial Phloxes

We are the largest growers of Perennial Phlox in the world, having this season over a half million field-grown plants in stock.

The collection offered below embraces every known color in this gorgeous race of summer-flowering plants, and we are prepared to furnish many of the latter as well as the older standard varieties in large quantities at a low uniform price.

The plants we offer are all strong one-year-old field-grown, and will make a fine display of flowers next season.

Three Fine New Hardy Phlox

We would particularly call attention to the following **Three New Varieties** as not only the most distinct in color, but in every way superior to all varieties of recent introduction which have come to our notice:

Elizabeth Campbell. Very bright salmon-pink, with lighter shadings and dark crimson eye, an entirely new and much-wanted shade in Phlox.

Frau Anton Buchner. The finest white variety yet introduced, having the largest truss and individual flowers; of dwarf habit,

Rosenberg. Bright reddish-violet, with blood-red eye, large truss and individual flowers as large as a silver dollar.

PRICE: Any of the above three new varieties,
\$1.50 per dozen; \$10.00 per 100; \$90.00 per 1000.

General Collection of Hardy Phlox

Alblon (Medium). One of our own introductions; producing very large panicles of pure white flowers with a faint aniline-red eye.

Algae Adamson (Medium). Immense flowers, snow-white, with red eye.

Antonin Mercie (Medium). Light ground color, upper half of petal deeply suffused bluish lilac; large, white halo.

Bacchante (Tall). Tyrian rose, with crimson-carmine eye.

Beranger (Dwarf). Ground color white, delicately suffused with rosy pink, distinct amaranth-red eye.

Bridesmaid (Tall). White, with large crimson-carmine centre.

Belle Alliance (Medium). White, with large pure red eye.

Charles Sellier (Dwarf). Bright reddish-violet, with large white star-shaped centre.

Clara Benz (Dwarf). Lovely carmine-rose, with darker eye.

Colibri (Tall). White, with crimson carmine centre; very late.

Consul H. Trost (Medium). Pure red, with bright French-purple eye.

Champs Elyses (Dwarf). A very bright rosy magenta of an effective shade.

Coquelicot (Dwarf). A fine pure scarlet, with crimson-red eye.

Caran d' Ache (Medium). Geranium-red, with old rose shadings and white eye; very effective.

De Miribel (Medium). White, suffused with bright rosy scarlet, red eye.

Diadem (Dwarf). A fine dwarf, pure white.

Danton (Medium). Scarlet, with pure red eye.

Etna (Medium). Crimson red, suffused with fiery red; cherry-red eye.

Edmond Rostand (Medium). Reddish violet, shading brighter towards the centre, with an exceptionally large white centre.

Eugene Danzanvillier (Tall). Lilac, shading white towards the edges; large white centre.

Edmond Boissier (Dwarf). Bright reddish-violet, with large white halo.

Eclairer (Tall). Brilliant rosy magenta, with large lighter halo; an excellent variety.

Frau Dora Umgeller (Tall). Crimson red; a strong free-flowering late variety.

Gruppenkonigin (Tall). Delicate pale rose mauve, with claret-red eye.

George A. Stroheim (Medium). Bright scarlet, with crimson-red eye; does not bleach.

General Giovannelli (Dwarf). Bright tyrian rose, with light shadings at the base of each petal; a pure red eye; very effective.

General Van Bentsz (Medium). Scarlet, with rose shadings and crimson-red eye.

Hermine (Dwarf). The dwarfest variety in our collection, never exceeding ten inches in height; pure white flowers of good size, early; unequalled for bordering; a perfect little gem.

PRICE: Any of the above General Collection, \$5.00 per 100; \$40.00 per 1000.

For a complete list of seasonable stock see our current wholesale list. If you have not received a copy it will be mailed to you on application.

Nashville.

The advent of the cooler weather is hailed with delight by all the growers in this section, who see in it a forerunner of a good season and a plentiful supply of flowers. Trade has been very good in all channels and now that the social season is about to open will be better every day.

NOTES.

The Joy Floral Company are ever busy and have an abundant supply of flowers. While there is an abundance no one seems to have a surplus of either cut flowers or plants. The Joys have lovely orchids just now, which caters to their high class trade and will be in demand for the many fall wedding orders they have already booked, which will take place in the near future. The opening of the new million dollar Hermitage Hotel called for a lot of plants and flowers, and a big farewell banquet given there in honor of Joseph T. Howell, late president of the Fourth National Bank, who goes to New York to accept a responsible position with the Carnegie interests, gave to this firm a splendid order. The banquet table was a string of beauty, with Maryland roses, ferns and asparagus. They have plenty of fine roses, American Beauty, with handsome long stems, Maryland, Richmond, Bride, Kaiserin and Killarney. Their carnations, especially white and pink Enchantress and Perfection are large and fine.

Geny Bros. are still in their Tulane Hotel store, but are making preparations for their removal to the Fifth avenue store. They are cutting some fine flowers now. All during the week of our state fair they had yellow chrysanthemums the very first in the market and unusually early for this lo-

WE TAKE THE LEAD

In what? What a foolish question! Don't you know? Didn't you hear of **GODFREY ASCHMANN**, the great **Araucaria** Importer, Grower and Shipper? These so well favored, everlasting green decorative plants, the **Araucaria Excelsa**, **Robusta Compacta** and **Excelsa Glauca**, are in favor more than ever this year.

Belgium to protect and elect for my customers the best of **Araucarias**, **Azaleas**, **Palms**, etc., that cash can buy there. Empty houses won't pay. Now is the time to fill your empty houses with something to grow into money while you are asleep.

Remember, it is the wideawake man that is not afraid to invest a dollar that makes the money. Please look at our special low prices for superior stock.

Araucaria Excelsa, raised from top cuttings, no seedlings. Plants, 5½-6-7 in. pots, 12-15 18-20-25-30 in. high, 3-4 5-6 tiers, 2-3-4-5 years old, 35c, 50c, 60c, 75c \$1.00, \$1.25 to \$1.50 each.

Robusta Compacta, **Excelsa Glauca**, 6 in. pots, \$1.00 to \$1.25 each.

Kentia Forsteriana, in fine shape 6-in. pots 30 35 40-45 in. high, 4-5-6 years old, 75c, \$1.00 \$1.25, \$1.50, \$2.00 to \$2.50 each; 4-in., 35c each 25 in. high.

This is our 25th anniversary since we began importing **Araucarias**. Watch! See us grow! Beginning 25 years ago with 100, our this year's (1910) importation is 10,000, and more are coming this fall after I have made my selection of the choicest of the choice on my trip to Belgium; the growing district of the world in **Araucarias** and **Azaleas**. The trade is well informed that for many years past I go personally to

Kentia Belmoreana, 25 30-35-40 in. high, 5-5½-6-7 in. pots, 5-6-7 years old, 50c, 75c, \$1.00, \$1.25, \$1.50 to \$2.00 each; 4-in., 25c each.
Kentia Belmoreana, 2½ to 3 in., 10c each.
Cyclamen Grandiflora, best strain, 4-in., 15c.
Begonia Gloire de Lorraine, deep pink, and **Begonia Lonsdale**, pale pink, 4-in., 25c; 6-in., 50c.
Our Ferns this year are exceptionally very fine.
Boston, **Scottii**, **Whitmani** and **Scholzeli**, 5½ and 6-in., 35c, 40 and 50c; 7-in., large bushy plants, 75c to \$1.00.

Pteris Wilsonii, in 6-in. pans, nice plants, 25c.
Neph. Todeoides, New London Fern, 2½-in., 5c; 3 in., 7c.

Special to Close Out: 4-in. **Whitmani** and **Scottii** Ferns, fine to grow on, 15c.

Ferns for Dishes, big assortment, 2½-in. pots, at \$3.00 per 100.

Rubber Plants, 6-in. pots, 35c and 40c.
Asparagus Plumosus, 2½-in. 3c; 3-in., 5c; 4-in., 10c.

Asparagus Sprengerii, 2½-in., 3c.
Sago Palms, 6-7 8 in. pots, from 5 to 20 leaves, 10c per leaf.

Cocos Weddelliana, 3-in. pots, 15c, 18c and 20c.
Adiantum Hyb., 2½-in. pots, 5c; 3-in., 8c; and 4-in., 12c.

Frimula Obconica, best strain, 4-in., 10c; 5-in., in bloom, 15c.

Frimula Chinensis, 4-in. pots, \$10.00 per 100.
We have an unsurpassed strain of **Solanum Multiflorum** (Jerusalem Cherries). Can offer only a limited quantity, 3½-in. pots, strong, \$5.00 per 100.

Hydrangea Otakisa, pot-grown, 6 in., 25c.
Azaleas, good, well-shaped plants, **Deutsche Perle**, **Simon Mardner**, **Niobe**, **Van der Cruyssen**, **De Schryveriana**, 75c, \$1.00, \$1.25, \$1.50 and \$2.00.

Cash with order, please.
All plants must travel at purchaser's risk.

cality. This early crop of yellows sold rapidly, brought good prices and are all gone, but they have plenty more to follow of the very best known varieties. They have a good crop of **Harrisii** lilies now on, and their American Beauties are fine, also Killarney and other roses are coming in very satisfactory. The White Perfection and Enchantress and other carnations are most excellent.

Among their novelties are white snap-dragon, which meets with ready favor for filling in complimentary

1910 EDITION

Trade Directory.

Cleveland.

Dahlias are coming in in considerable numbers, all colors and of excellent quality, while gladioli are nearly done, very few arriving on the market. Asters are done, the last of the eastern stock arriving last week. Carnations are becoming more plentiful but not near enough to fill orders being obtainable. Roses are becoming more plentiful; Killarney is improving wonderfully, the demand for American Beauties has been very good, the supply being short. Chrysanthemums are in good demand right along, but not over-plentiful. The auto parade Tuesday during the Cuyahoga County centennial celebration was the occasion for an unusually heavy demand for chrysanthemums and asparagus and southern smilax, which was used quite extensively in the decorations of the automobiles. Good valley is having an excellent call and orchids of exceptionally good size and quality are on the market with fair demand. Cosmos finds a good sale and swainsona is in good demand. Boxwood sells readily, most of the retailers buying case lots with southern smilax on hand in cold storage to meet emergencies. Asparagus Plumosus and Sprengeri is plentiful now. Good fancy and dagger fern, and adiantum find a ready market.

On October 5 a party of about twenty-five retail florists of Cleveland and surrounding territory, as guests of Geo. W. Smith, of the Cleveland Florists' Exchange, visited the establishment of the Lamborn Floral Co. at Alliance, Ohio, for the purpose of inspecting the growing stock for the ensuing year, especially the American Beauties, Killarney and Richmond roses, of which this firm grows the best in this section. The trip well repaid those who went along, giving them an idea of the magnitude of this establishment and also of the quality which they produce. L. L. Lamborn and associates proved themselves able entertainers and the day was thoroughly enjoyed and all returned well pleased and satisfied with the time spent for both business and pleasure. The Lamborn Floral Co. is one of the best, if not the largest and most modern establishment of its kind between Chicago and New York. It has been common comment since this visit that the Cleveland Florists' Exchange will be headquarters for American Beauties and other roses for the coming season in this city, as they handle the entire output of the Lamborn Floral Co. The stock was in excellent shape which insures good cuts throughout the season. The same party will in the near future visit several other growers of the Cleveland Florists' Exchange among which will be some of the largest growers of carnations consigning to the Cleveland market.

Miss Nettie Heideman, formerly bookkeeper and cashier for the Cleveland Florists' Exchange, is back again after an absence of nearly two years, about one year of which she spent in the south at Chattanooga, Tenn. She will take up her old duties at the Exchange and be pleased to meet her many friends and acquaintances in the trade.

J. A. Smith, 8025 Wade Park avenue, has taken a partner and the firm is now known as the Smith & Hopkins Co., D. B. Hopkins having had a number of years' experience in the retail business. This ought to make a very strong business proposition as both are well known and full of push and energy.

A visit to the establishments of F. C. Bartels, A. M. Coe and The Gasser Co. was greatly enjoyed by C. F. Bastian, C. A. Woodman and Henry Renard. The stock of these places all show promise of a good crop, both in carnations and roses. A fine cut of chrysanthemums is also promised.

 BROOKLYN, N. Y.

Huntington, N. Y.

The eighth annual exhibition of the Horticultural society was held October 3. The prize-winners in the plant classes were: H. T. & A. H. Funnell, J. R. McCullough, W. J. Matheson and Robert Kelley. In cut flowers, designs and bouquets the winners were Leander D. Hurd, August Heckschir, R. L. Conklin, Robert Kelley, H. C. Smith and Martin B. Smith. The judges were A. L. Miller of Brooklyn, Charles Leuker of Freeport and Henry Weston of Hempstead.

FOND DU LAC, WIS.—E. Haentze and Miss Louise Kleinknecht were married at Philadelphia, October 10.

GREEN BAY, WIS.—A Van Gemert, the west side florist, has just completed a new and up-to-date greenhouse 40x140 feet, which increasing business demanded.

KROESCHELL HOT WATER BOILERS

This Boiler has found great favor with the greenhouse trade throughout the entire country. "The Kroeschell" will develop more heat units per pound of coal consumed than any other form of construction.

More Kroeschell Boilers and Generators used for greenhouse heating than any other make

Send for catalogue

KROESCHELL BROS. CO. 452 West Erie St. CHICAGO, ILL.

WILL SHIP WHEN WANTED **PAY AFTER BOILER REACHES YOU**

Greenhouse Heating

Is a Perplexing Question to all Florists

Except Those Using

Morehead Steam Traps

¶ The installation of a Morehead Return Steam Trap in a greenhouse is absolute evidence of progressiveness on the part of the florist.

¶ It is further evidence of good management, for the 'Morehead' is an investment in both satisfaction and economy.

¶ The majority of florists are using Morehead Traps. If you are one of the exception it will be to your interest to write us—we will make you a liberal trial offer proposition.

¶ By way of getting acquainted, just send your name and address and ask for 'Trap Book.'

MOREHEAD MFG. CO. Department "N" **Detroit, Mich.**

MCCRAY REFRIGERATOR CO.,

269 LAKE ST., KENDALLVILLE, IND.

Indianapolis.

Two years ago, William Watson Woollen, then owner of Woollen's garden of birds and botany, comprising forty-four acres, commenced the growing of small fruits and flowers for commercial purposes. Last December he gave and conveyed the garden to the city of Indianapolis for the use of its schools as a place for nature study. Having found that his venture in growing small fruits and flowers was profitable, he now is transferring his business to Somerleaze, his summer home, near Broad Ripple, and is making a large planting. He expects to cater to the Indianapolis trade, both retail and wholesale.

Winnipeg Flower Show.

The Winnipeg flower show which was held in Winnipeg, Man., September 1-3 under the auspices of the Winnipeg Horticultural Society, was a decided success. The show was held in the horse show amphitheatre, which is well adapted to such an exhibition, being well lighted and ventilated. The show this year far surpassed any previous one, as there was at least 25 per cent more entries, some of which were very large. The vegetable exhibits were a surprise to many, as owing to the very dry season, many thought that it would be a poor show, no less than seven agricultural societies competing, the first prize being carried off by the Kildonan Society this year. The plants and flowers also came in for their share of attention, there being a great variety of exhibits. The fruit this year was not as good as might be expected, there being very little in the country.

The flower section was very strong. Robt. Aitken, superintendent of Elmwood Cemetery, who is also president of the society, had a fine exhibit of plants, flowers and hardy shrubs, this exhibit in itself covering about 500 square feet. A. H. Stolper exhibited a beautiful wreath, an imitation of the one sent by Winnipeg to the funeral of the late King Edward VII, The Parks Board, R. B. Ormiston and James Bird also made large exhibits worthy of mentioning. This year a new class was added, for children's exhibits, for which \$150 was appropriated, and it was a great pleasure to see the interest which the children took in growing plants, flowers and vegetables. Five premiums were awarded as follows: children's cup, presented by W. H. Dangerfield, for school scoring most points, the John M. King School; florists' cup for amateurs, W. W. Dangerfield; vegetables cup for amateurs, F. Crowe, Dauphin; florists' cup presented by Porte and Markle, R. R. Gray; vegetable cup, W.

KING GREENHOUSES

Stand the test of wind and storm as well as of time. They are designed to do it taking into account all the conditions.

When a man knows his greenhouse will stand, he is at liberty to put all his time and thought into growing things and that is what he wants to do.

H. Fielding. A gold medal for the best front garden, presented by Robt. Aitken, Thos. Eilbeck, 387 Maryland Street. A number of special prizes were offered by members and friends.

The directors have already commenced preparation for next year's show, which they hope will be even

larger and better than any previously held. The officers this year were: Robt. Aitken, president; W. J. Brattston, secretary and treasurer; W. D. Bayley, manager; A. J. Smith, H. Robert, A. R. King, J. C. Moline, W. H. Dangerfield, Thos. Eilbeck, Jas. Stacey, T. Brown, E. J. Reynolds, directors.

A Mountain House

It is perched right up on the side of one of the Ramapo Mountains in Tuxedo Park, N. Y. Don't think you have no place for a greenhouse. Send for us we will crack that nut for you. You want our house anyway. Let's get together.

HITCHINGS AND COMPANY,
1170 Broadway, New York.

Helena, Mont.

The florists and nurserymen of Montana assembled at the State Nursery September 29 and organized the Florists' and Nurserymen's Association of Montana for the promotion of the general welfare of the craft. Articles of constitution were passed and the following officers elected: T. E. Mills, Helena, president; D. J. Tighe, Billings, vice-president, and W. J. Hugo, Helena, secretary and treasurer. The meeting was addressed by D. J. Tighe of the Montana Nursery Co. of Billings. After the meeting the company were entertained at luncheon by the president-elect who also provided automobiles to take the party to the state fair.

Orange, N. J.

The fifth annual dahlia show of the New Jersey Floricultural Society was held in Lindsley Hall, 240 Main street, Orange, October 1, afternoon and evening. There was a large attendance. The quality of the exhibits was first class and altogether the show was the best of its kind the society ever held. Among the outside visitors were Chas. M. Taggart, representing Marshall & Co., New York; George W. Strange, formerly with Lager & Hurrell, now with W. A. Manda, South Orange; William Tricker, the water lily specialist from Arlington; Mayor Arthur B. Seymour of Orange opened the show at 4 o'clock.

Walter Gray of Maplewood was awarded the Hitchings & Co. silver cup for the best 60 flowers of show, decorative and cactus, dahlias, S. M. & A. Colgate (Wm. Reid, gardener), the second prize cup, donated by James Laing, Orange; A. B. Jenkins (Albert F. Larson, gardener) the third prize cup presented by the society. Other awards were: 25 show dahlias, five varieties—Walter Gray, first; 25 decorative dahlias, five varieties, Walter Gray, first; 25 cactus dahlias, one or more varieties, Albert F. Larson first, Walter Gray second, Max Schneider third; 12 show dahlias, three varieties, white, pink and yellow, Max Schneider, first; 12 show dahlias, three varieties, red, crimson and bronze, Max Schneider, first; best dahlia not yet disseminated, Walter Gray, first. William Tricker of Arlington had a fine display of outdoor roses on exhibition, for which he received a cultural certificate. First class certificates were awarded to Walter Gray for vase of Souvenir de Gustan Duzon, D. Kindsgam for two vases of dahlias, Edward Merrit for vase of show dahlias, and

Your Kind of Gutter

Your kind, because you are the sort of man who wants a gutter that will **stay a gutter** for generations to come. One that is cast straight and made of tough iron that stands the strain without cracking. No more thin, brittle gutters for you! Neither do you want one that the outlets are down inside the posts, rusting them out so they will give away some day

when you are least expecting it. Neither do you want a wrought iron channel gutter with its narrow side, which gutter everybody knows rusts out quickly.

One hand points to the outlet which does not empty down the post to rust it out; the other points to the flange against which the partitions, when wanted can be screwed.

Our 1908 New Model Cast Iron Gutter with drip gutters and sash bar clasps attached, is the gutter. Made right. Priced right. Get the price.

FULL SIZE
Nº 2

Fredericton, N. B.

The weather during the month of September was very fine, and all that could be desired, and dahlias, zinnias and all tender flowers were furnishing a glorious array of bloom. But in the first week of October we were visited by a very hard thunder storm, followed by a cold wave and then by heavy frost, and all the fine flowers were ruined. The demand for flowers has been good and some beautiful funeral designs have been arranged, especially at the funeral of the late Judge Skinner, one of Fredericton's most prominent and beloved citizens, to which the city council sent a large standing wreath some four feet high.

The Dominion Exhibition which was held at St. John was very successful. The floral display was small, but Pederson Bros. made a very tasty exhibit of plants and cut flowers. The directors of the exhibition show a lack of interest in this line and offer nothing worthy of the time and expense necessary to make a creditable exhibit.

Ask the man who has tried them. For further particulars, write to

GEO. M. GARLAND CO.,
DES PLAINES, ILL.

Tacoma, Wash.

It seems rather strange to hear all around that the floral business in Tacoma is good, when other lines of business and trade have so many reports of poor business, and we can hear so many crying hard times in most all other lines, and finding florists most all saying very good business, and it gets us wondering if the products of the florist are being ranked as one of the necessary supplies of the people. We wonder if it is because the Tacoma flower market has such fine flowers? Well, at any rate, we are glad to say we have them fully equal to any that were seen in a trip of over eight thousand miles that has just ended through the northwest, back east to Ohio, then through the south to New Orleans, to California and thence home again. The products of the Tacoma florists are equal to any place we visited as regards quality.

NOTES.

W. H. Manike has everything in best of condition to begin another season. His mums, mostly of standard older sorts, were in excellent condition with promise of a good late crop. He has about 7,000 benched and potted. His carnations, about 10,000, are planted with indications of a good cut. Nothing new at his place—just the same old standard sorts. Plants were generally good as taken from the field and they made a good start, though somewhat backward in taking hold. A rick of cord wood, representing about \$5.00 per cord, containing near 100 cords, made quite a fence around two sides of his place, but of course he intends to take that away before spring. No Harrissii for him—none to be handled. We heard him tell one who inquired that bulbs would likely be in by the middle of next month.

At John Hamilton's place on South Prospect street, we found the proprietor away, so the best we could do was to look in. Carnations are in with a good start and one house of mums attracted our attention. John put in a new Kroeschell boiler last fall and he thinks so much of it that he sometimes gets up in the night to go out and see it—but he says it's a pleasure and he don't have to swear by it, but could if he would. His outside dahlias are all right.

Practically no Paper whites in Tacoma yet, and we hear a few talk of giving the California-grown stock a trial. Our best advice, from trial and observation, is, do not try very extensively.

S. L. H.

Montreal.

Business, after the busy weeks during the Eucharistic congress, is back again to more quiet conditions, but perhaps just as profitable. There is a big demand for house plants, like palms and ferns, the Boston fern family is the favorite plant yet, and local production falls a long way short of meeting the demand. Cut flowers are arriving in better quality, roses are plentiful and very good, but carnations are scarce and short stemmed. Chrysanthemums are the seasonable flowers just now and demand good prices, the early ones have been very profitable this year on account of the asters having been a failure, the variety, Golden Glow, although not thoroughly understood by all, is certainly a good one, color, stem and size is all that can be desired. Outdoor flowers are over completely, although we have had no frost yet to hurt anything. Dahlias did not flower at all this year, sweet peas were over by the end of August, gladioli were fairly good, and asters the worst ever experienced. All around it has

The "Meyer Green Silkaline"

is the only Green Thread that should be used by florists and growers. It is guaranteed full weight and full measure.

Also Violet Thread for tying up Violets. Price of both, \$1.25 per lb.

For sale by all first-class supply houses. If your dealer does not carry it in stock, write us direct, giving us his name.

THE CAMP CONDUIT CO.
Garfield Bldg., Cleveland, O.

Wilmington, Del.

The past week was notable in the history of Wilmington on account of the convention of volunteer firemen. The city was gaily decorated in their honor and the florists were not behind their neighbors. Louis Sines displayed very appropriate designs in his show window. They were greatly appreciated by the veteran firemen, many of whom have grown gray in their voluntary service. This is a bustling city and it may be news to many of our readers to learn that they are erecting sky-scraping buildings here, but such are the facts. If the florists are alive to their opportunities they will share in the general prosperity.

NOTES.

George Carson Boyd's store, at 214 Walnut street, shows evidence of great activity. He is always ready to execute a decoration or a funeral order on very short notice, which he is enabled to do by having a very efficient staff of assistants.

Mary R. Wingert, who has a retail store at 714 King street, has been very ill for the past five weeks with typhoid fever. It is gratifying to state that she is now believed to be out of danger and rapidly recovering.

Sines & Welch have a nice retail store and are doing a good business. Most of their stock is bought in Philadelphia.

BURLINGTON, VT.—W. E. Peters, the florist and seedsman, will move his flower and seed store on November 1 from Main street, where he has been located for the past ten years, to the Walker block, No. 137 St. Paul street.

This city is very fortunate in having such a splendidly equipped greenhouse as is conducted by the Anderson Floral Co. P. H. Anderson, who so capably manages the business, is one of the best florists in the state. When he bought the present business, a number of years ago, the greenhouse was not a large one, but by careful management he has built up one of the largest florists' businesses outside of the twin cities. Mr. Anderson has just returned from a visit to his and Mrs. Anderson's old home in Sweden, sailing on June 29 on the steamer Adriatic of the White Star Line and returning September 16. He is now making a number of improvements to his greenhouse plant.

HALF HOUR CHAPTERS FOR PLANT GROWERS

Marguerites.

There has been an increased demand for the nice blooms of the marguerite the last few years, for during the winter months when the florist has but little variety to offer, the buyers are very quick to observe something different from the staple stock and some of the recent introductions have created an interest in this plant, especially Queen Alexandra, with the dark brown spot in the center of the flower. To have a good supply of flowers all winter long the plants should have plenty of pot room, for they are great root growers and if grown in too small pots will produce small, inferior flowers. Give them a nice light location, they flourish in good strong sunlight, and if grown in a dark or shady place, soon go out of bloom and then will produce no flowers until spring. After the pots get full of roots, if the blooms begin to be short-stemmed, a feeding of weak liquid manure once a week will be very beneficial and increase the size of the flower. Marguerites can be used in many forms of work through the winter, and the pot plants, if well taken care of, will find a good sale for churches or large decorations at Easter, if they are well covered with bloom. They must not be grown in a warm temperature, a house that stands at 45 to 50° at night seems to obtain the best results.

Chrysanthemums.

The early varieties of chrysanthemums are now being cut and this is the time to look forward to another year. Keep a careful watch over your sales and note the varieties that your trade demands and if there are any that do not sell well; cut down the number grown of this variety or discard it altogether. Visit the shows if you can and see what the other fellow is doing and get a glimpse of the novelties. Always remember that your trade, if you are retailing, likes to see the new things and appreciates the one

who has enterprise enough to procure the newer varieties and then calls his customer's attention to them. Before your blooms are cut go over your benches carefully and mark the plants that you want to save for stock. Work along the line of selection is just as important, if not more so, than the raising of seedlings. Select the plants that have strength and vigor and produce blooms of the type wanted and discard all that show weakness and produce poor flowers. How often a grower will say that such and such variety is getting run out, yet another grower will be producing blooms that are as good as when that variety was first introduced. Ivory is a notable example of this, introduced to the trade by the late W. K. Harris in the 80's and still producing beautiful blooms in the hands of some, but a small, weak grower, with a miserable flower, in the houses of others. This is a point worth looking at and attending to, for it does not pay to pick up your stock plants at random and expect them to have first class blooms next season.

Cannas,

Just as soon as the first heavy freeze cuts down the canna tops the roots should be lifted and stored until wanted in the spring. Leave about eight or ten inches of the old stem when cutting the tops and dig the roots carefully, and under no circumstances shake all the soil off of them, for they are not like the heavy tubers and bulbs that can be dried out, but need a moist covering during the winter to keep the eyes alive. Under a bench in a carnation or similar house is an ideal place to store them, provided there are no heating pipes too close to them. If the soil is very wet, place them on boards, and if the soil is so dry that it falls off the roots when lifting, throw some damp soil over them, when they are placed under the benches. Look them over once in a while during their dormant season and see that they are neither rotting from

**Turn Your Surplus
Stocks Into Cash
By Advertising in the
Ready Reference
Department.**

too much moisture or shriveling from being too dry. Any of the novelties that it is desired to propagate all the stock possible can be now divided and planted out in a bench and kept growing all the winter and later more divisions can be obtained.

Soil.

Now is the time to get the compost pile started. Do not wait until spring and then have the help break their backs beating it to pieces, and the number of loads that a team can haul when the ground is in the present condition is much greater than can be done later in the fall after the heavy rains have set in or when the ground is all water soaked in early spring. The procuring and preparation of good soil is a very important matter to all growers, but one which many neglect until they are driven to it. Stack up a pile of broken sods now at the earliest opportunity and mix the ground bone in this fall, if it is intended to use any. Many wait until the spring and put the bone in at the same time as they do the manure, but bone is very slow to dissolve and if any lime is mixed through the soil at the same time that bone is used the ammonia in the bone is quickly freed and passes into the air and is lost.

Stevia Serrata.

This almost indispensable plant to the retail florist hardly needs a word about its cultivation, for it is so well known it almost seems superfluous, but possibly a suggestion, that will be appreciated by some, may be made in regard to bringing it into flower and extending the season. The plants by this time should be in a position where they are safe from frost, and if you have a light pit or one end of a cool house where air can be left on all night so as to keep the thermometer just above the freezing point, from 35 to 38° (the cool end of a violet house makes an ideal place), you can keep the plants back and bringing them along a few at a time have a succession of these beautiful sprays way into February. It is well worth trying, for a few sprays of this sweet little flower are greatly appreciated in the mid-winter when added to a box of carnations or cut flowers.

SAN FRANCISCO, CAL.—On October 1 the MacRorie-McLaren Company was incorporated under the laws of the state of California with a capitalization of \$75,000.00, the incorporators being Daniel MacRorie, Donald McLaren and Henry Maier. The officers of the company are Daniel MacRorie, president; Henry Maier, vice-president; and Donald McLaren, secretary and treasurer. Messrs. MacRorie and McLaren were members of the well-known firm of MacRorie-McLaren Co. of San Francisco, and Mr. Maier has been for years superintendent of the Stockdale Nurseries at Burlingame and has laid out a number of large estates surrounding Burlingame, San Mateo and along the peninsula. This firm has taken over the nursery and greenhouse stock of the Stockdale Nurseries and has opened an office at Burlingame. They announce that they have changed their main offices from the Crocker building and have taken a suite of rooms in the Westbank building, corner of Ellis and Market streets.

AN ARTISTIC WREATH OF FLOWERS AND FOLIAGE.

THE RETAIL TRADE

Conducted by Robt. Kift, Philadelphia, Pa.

Effective Floral Designs.

The opportunity often arises for the florist, especially the greenhouse man, or the one who has a garden, to break away from the conventional flowers of the market, and by the use of a little originality combined with artistic temperament design an arrangement of flowers that is both very pleasing and beautiful. There are a large number of perennials that are never found upon the market but that can be easily grown, that can be used in a very artistic manner, and with the different shades of foliage make most beautiful work. The accompanying illustrations are of two very attractive designs composed of such material. In the first wreath on the right side are the long slender blooms of that beautiful herbaceous perennial *Ophiopogon* (snake's beard) both in white and lavender through which are arranged its long and narrow variegated foliage. On the

opposite side are the lavender and white varieties of *torenia* and at the base long-stemmed sprays and blooms of white *lilium lancifolium* tied with a handsome bow of lavender ribbon, handsome greens of different hues such as *adiantum* and other ferns were intermingled, giving a white and lavender effect. The other wreath was of similar character, yet the effect was entirely different, for in addition to the flowers used in the first *jasmynes* were used and at the base handsome *begonia* foliage was arranged and *auratum* lilies took the place of the *lancifoliums*.

Notes of Chicago Retailers.

J. MANGEL.

On the corner of Wabash avenue and Monroe street, one of the busy corners in the shopping district, is the store bearing the sign "Mangels," and seldom has it been our pleasure to see a store more admirably arranged to display the beautiful assortment of flowers and florists' wares which it supplies. The store is just below the sidewalk, which allows for the arrange-

WREATH OF LILIES AND PERENNIALS.

ment of flowers which can readily be seen and admired, and the proprietor takes full advantage of his many windows for making artistic decorations that attract the attention of the thousands of shoppers as they pass, and seldom does one fail to stop and admire the floral beauties displayed. Upon stepping into the store, one is pleasantly greeted by the genial proprietor or manager and courteously shown the best that the market affords in the large refrigerator filled to repletion with roses of the highest grade and other choice flowers. American Beauties, Killarneys and other roses of the best quality; Cattleya and other orchids; lily of the valley and other seasonable flowers are always on hand. Beautiful nymphaeas have been a feature of this store this season. A characteristic of this store is the having on show some beautiful arrangement to show the customer, a very handsome standing wreath of white Killarneys and nymphaeas, with a backing of rich autumn foliage was to be seen on our visit. Summer business was re-

ported as good and trade at present is all that can be expected.

C. A. SAMUELSON.

On Michigan avenue near Twenty-second street in a beautiful residential part of the city is the nicely arranged store of C. A. Samuelson. A beautiful window display of cosmos backed by foliage and handsome palms and decorative plants greeted our eye as we approached the door. Entering we find an up-to-date store in every particular filled with all the requirements that may be demanded by the most fastidious customer. A very pretty conservatory leading from the back of the store filled with a choice selection of palms, dracenas and other decorative plants was a particularly attractive adjunct and a table of fern dishes in the new white chinaware was a noticeable feature.

BOHANNON FLORAL CO.

Just around the corner from Michigan avenue on E. Monroe street, in the shopping district, the neat and attractive store of the Bohannon Floral

Co. is found. At each side of the door are stately bays and the windows tastefully arranged with beautiful specimens of plants and flowers, large vases of chrysanthemums and roses catch the eye of those passing by. Beside the door as we enter we particularly notice a very handsome new case in which are beautiful cattleyas and other orchids, valley and the choice exotics of the season. The handsome refrigerator just in front of the door contains a fine assortment of the best that the market affords. The high grade of roses and other flowers plainly shows that the store enjoys the clintage of the best patrons of the city, a very prosperous business and an exceptionally promising outlook.

KLEISCHMAN FLORAL CO.

A store so elegantly fitted with furnishings and with mirrors on all sides that one thinks that he has stepped into a large fairyland filled with beautiful plants and flowers is the feeling upon entering the beautifully arranged store of the Fleischman Co. at 35 Jackson boulevard. Handsome palms and beautiful vases of flowers bedeck the large and elegant windows and on each side are large refrigerators, mirrored as well, full of elegant Beauties, Killarney and other roses, orchids, valley and the best of all stock that can be obtained upon the market. Large corsages of orchids and valley are being artistically arranged. Situated upon one of the best business avenues this store enjoys the custom of the elite of the city and the grade of stock is of the best and a complete line is always on hand to supply the requirements of their trade. A good business is reported and everything in readiness to meet the coming season.

A. LANGE.

A beautiful supply of everything that the flower buyer could desire is the thought as one steps into the store of A. Lange at 44 E. Madison street. On every side are the beautiful products of the florist and in the rear a handsome refrigerator full of the highest grade of Beauties and other stock and at the time of our visit the extensive variety had proved a wonderful drawing card for everybody was as busy as could be, and the customers were being well served with everything that could be desired. A well arranged box of flowers, all ready for delivery, at popular prices is a feature here and they were meeting with good demand. Roses of the highest grade, orchids, valley and all the choicest flowers of the market, in fact one could hardly enumerate the varied stock so beautifully shown.

Symmetry in Flower Arrangement.

Symmetry in flower arrangement should be avoided, and under no circumstances should both sides of an arrangement correspond or match. It would be in very bad taste, for instance, to allow two vines to hang symmetrically from either side of a suspended vase, or even for a flower of one color to be placed between two of another color.

All floral arrangements should fit into a triangle either vertical or horizontal and that tends more or less against symmetrical composition. Great attention should also be given to the manner in which stems rise

out of the water, as they should present a strong, vigorous appearance, and hold, in fact, the same relation to the flower that the trunk of a tree bears to the branches and foliage overhead. Plants that grow erect should be given an upright direction in floral arrangements, while those that grow overhanging should be arranged in a hanging position.

A. E. KLUNDER.

them. The heavy woody cuttings from field grown stock plants need to be trimmed closely, removing all the foliage excepting the very top young leaves and these should be cut back a little so that there is not any surplus leaves left on the cutting to decay and cause black rot. The propagating bed should be situated where it can get full light with plenty of air, using a sharp clean sand, watering the cuttings well

Alternantheras are another of the cemetery leaders. These are propagated during July and August either outside in frames or in the greenhouse propagating bed and are being potted or planted into shallow benches or flats with the idea of getting as much growth as can be got on them before they become partially dormant, which they will do as soon as winter conditions set in. They require a very light sandy soil, moderately rich, with plenty of crushed stone or sharp sand added to it to keep it open. Alternantheras need all the light possible and a warm temperature to carry them over winter successfully, but the success or failure to carry them over safely depends greatly upon the conditions at the roots to which they are subjected. Keep them on the dry side and there is no better place than on side shelves over the steampipes in the carnation houses provided there is not any drip from leaky glass or condensation. If not enough rooted cuttings are provided to meet the requirements, the stock plants can be taken up, the growths trimmed back, then either potted or flatted up and held dry and dormant until early spring, when they will answer to be started up by division.

Echeveria, which is used so largely with alternanthera in work for effect should be collected at the approach of the first frost, they can be pulled up and laid thinly in flats and set in a cool light place for a few days until the rush of collecting the stock before the first frost is over, but do not pile them thick in the flats or they will rot, also do not set them under benches in the shade or the same result will take place. The best way to carry these plants through the winter is to plant them in shallow flats, using a light soil about the same as advised for alternanthera, but not in any way rich enough to cause an abnormal growth. This plant is of more value for the purpose generally desired when of medium size than of over large so that any richness of soil with a tendency to promote extra growth must be avoided. Sometimes it is necessary to use a bench to carry echeveria over

DELIVERY OUTFIT OF M. D. REIMERS, LOUISVILLE, KY.

M. D. Reimers' Delivery Wagon.

The handsome delivery outfit of M. D. Reimers, Louisville, Ky., which we illustrate, was awarded the blue ribbon at the Louisville Horse Show, October 11, for the best delivery team or wagon, there being four entries for the premium.

Cemetery Greenhouse Work.

This is one of the busiest periods connected with the greenhouse and plant department of the modern cemetery for large quantities of the different kinds of plants have now to be propagated and the stock taken care of to be in shape for working up for next spring's sales. Killing frost can be expected at any time and this means that a lot of stock has to be handled and taken care of in a very short time.

Geraniums are one of the leaders and the varieties of the S. A. Nutt color, salmon pink like Beaute Poitevine, scarlet and the rose pink shades, are most in demand. Quite a number of double white should be arranged for but not in the same proportion as the other colors. The white varieties will not sell while good stock of the others are on hand and the single varieties are not used to any great extent for cemetery work. Every cutting that can be should be put in the propagating bed. When obtainable do not limit the propagating to any fixed number, it is better to have too many than not enough. There are several methods of rooting geranium cuttings, among them are potting the cutting direct in 2 1/4-inch pots, using a light soil with a liberal proportion of sand, also setting the cuttings in flats with soil at the bottom and surfaced with sand, placing the pots and flats in light, airy position in a cool house. Then there is the method of putting the cuttings into the propagating beds of sand which if the proper conditions are observed is the surest way of rooting

when set, which generally at this time, before steady firing has begun is enough to hold the cuttings until rooted. To sum up briefly the most essential points to consider for successful propagating of geraniums is not to cut the cutting too far up into the soft wood, cut close to the joint, remove all surplus foliage, use a clean sharp sand, water well when setting into sand and only then until roots have started (unless absolutely necessary) give plenty of fresh air and ample light. Geraniums put into the sand at this time generally have to remain in there until bench room is obtainable (following the clearing off a batch of chrysanthemums) and to carry the cuttings along safely after rooted they should be kept dry and cool.

VIEW OF LEAPLEY & MEYER'S STORE, WASHINGTON, D. C.

winter, but when shelves near the light in a cool house are available they are better in flats and the bench room used for something else. To prepare the plants for flattening the outside row or two of leaves should be rubbed off and the root stem or trunk cut back about half its length, or more if very long, we like to leave a few spreading roots to the main stem, but this is not at all

and put into the propagating bed without delay. Old stock plants of these can be carried over, but it is not as good a plan as getting in a good supply of cuttings at this time and propagating again from them later in the season, any stock plants of these lifted to be carried over should be well cut back, potted or planted out on a bench in a light position. Be ready for hous-

WITH THE GROWERS

H. W. Koerner, Milwaukee, Wis.

Being desirous of viewing the nursery of H. W. Koerner, the specialist on gladiolus, dahlias and peonies, we recently made him a visit, and upon our arrival we were surprised to see the large crowd of visitors who were looking over his establishment and admiring the blooms of dahlias, gladiolus and herbaceous perennials. Going into the dahlia fields it certainly was a glorious sight to see the varieties in endless number and of all shapes and colors. Over 400 varieties are planted, and about 100 seedlings, among which were some striking novelties, which it is intended to place upon the market from time to time. An assortment which were called new Giant Peony and new Single Giants particularly attracted our attention. Some of the latter measure seven inches across and are of the most odd colors ever seen. One new show dahlia, called Autumn Glory, was of a pinkish tan color, and a good match for autumn foliage decorations, and another very noticeable one was a cactus dahlia of a deep peacock blue shade.

At the time of our visit the gladiolus were about through and nearly all cut, but the extent may be imagined when it is learned that the daily cut this summer was 1,500. Mr. Koerner has been hybridizing these for years, and he now has about 200 beautiful new seedlings in all shades and varieties.

G. R.

T. G. Owen, Columbus, Miss.

There are no large and few even medium sized establishments in the South, but at the present rate of increase in her population she will soon take her rightful place in horticultural circles. Mr. Owen, a partial view of whose establishment is here shown, began his career as a cotton buyer in Columbus. From his parents he inherited a love of

BUNCHING GLADIOLUS AT H. W. KOERNER'S, MILWAUKEE, WIS.

necessary, as any part of the root stem will root out. When setting them in the flats or bench, just enough room between each plant so that they do not touch is all that is necessary, for as soon as they begin to touch, drawing up commences, a condition if allowed to continue long will quickly spoil them, and they must be spaced out. The soil should be pressed firm around the stem, but do not let any get down into the plants between the leaves if it can be avoided. Echeveria are commonly called "Hens and Chickens" on account of the little plantlets that shoot out from the main plant. These can be taken off and planted to increase the stock, the old pieces of the root stem that have been cut off can be boxed in sandy soil and be kept on the dry side. After a short while the young plants will commence to shoot up when they can be removed and flattened up to make a fresh supply of plants.

Mme. Salleri geranium is another plant used in large quantities as a border for flowering geraniums. These can be pulled up at the first frost and packed upright in cold frames for a few days, when they can be potted. Our method is to trim back the straggling leaves, then bunch three plants together, pot into three or three and one-half-inch pots in ordinary potting soil and set along the edge of the walks in the carnation houses and water only to keep them from shriveling; they remain here until early in December when they are cut up for propagating.

The soft, tender plants, such as coleus, petunias, ageratum, heliotrope, pilea, cuphea, salvia or any other of this class of which stock is needed should have the cuttings taken

ing the vase plants before they get badly frozen, also pot up the planted out stock of hydrangea hortensis and the vincas they can be set out in frames and have the glass removed during the day. There is plenty of time to pay attention to the English Ivy in two or three weeks from now for they will stand freezing, but do not let the cannas get badly frozen before digging, as they will keep much better if taken up before frost penetrates down the stems.

C. W. JOHNSON.

VIEW OF DAHLIAS AT H. W. KOERNER'S, MILWAUKEE, WIS.

plants and flowers. A very small greenhouse attached to his dwelling was a source of great pleasure to him in his spare moments. The call finally became so strong that he built a modest establishment of six houses and grew principally, carnations, chrysanthemums and asparagus. The business was a success from the start and he soon had orders from Birmingham, Mobile, Memphis and other smaller towns, besides his retail trade. Roses were soon added to the list and his Perles were as fine as grown anywhere. Getting cramped for room and wishing to avoid the heavy town taxes he bought his present farm of 60 acres outside the corporation limits. Here he put up a range of twenty houses 25x100 feet, and in two years added twenty-three more 14x100. This latter range was devoted entirely to roses on ground beds. Kaiserin, Ivory and Perle were of excellent grade in every particular, but finding some on benches produced better during the winter months he this year put his whole place to benches. Over 160,000 feet of lumber were required to complete the job.

Roses, carnations, chrysanthemums, callas, Easter lilies, asparagus, sweet peas and bulbous stock are the varieties of stock grown. Over 40,000 roses are planted out. Ivory, Perle, Kaiserin, Richmond, Killarney, My Maryland and American Beauty being grown. The first four varieties, with the Beauties, are the standbys and show remarkable vigor. Killarney does not do so well and it is likely will be discarded next year in favor of My Maryland if the latter continues to show its present form during the winter season. Only about 10,000 carnations are being grown this year, just enough to supply the retail trade in the small surrounding towns. Four houses are devoted to asparagus and are about the most profitable ones on the place. Callas are also grown to the extent of 2,000 and no blooms ever go to waste.

Chrysanthemums, mostly mid-season and late white varieties, fill two or three houses and these are filled later with lilies, sweet peas, candytuft, etc. The cut finds a ready market all the way from Memphis and New Orleans in the west to Pensacola in the east and often it is a hard task to fill all the orders.

Only the lack of cold storage facilities in the town prevents the forcing of Valley the whole season. Cold storage Giganteums have been tried but the bulbs so often arrive in an unsatisfactory condition that the forcing of this class of bulb has regretfully to be stopped. Some day Mr. Owen may erect a cold storage plant of his own and get over the difficulty in that way. One customer stands ready to take one hundred or more cut lilies every day in the year. Mr. Owen is willing to enlarge as soon as the trade shows signs of wanting more.

The water works arrangements are very complete. Two fine flowing artesian wells, 800 feet and 500 feet deep, respectively, supply the water to an artificial pond. A large Worthington steam pump furnishes all the pressure needed for syringing and a tank kept constantly full by two rams supplies the needful for ordinary watering. Another steam pump is used entirely for manure water, which goes through a separate line of pipes, so that both syringing and using liquid manure can go on at the same time if necessary. The water is slightly iron tasted but has no injurious effect on the boilers and the plants seem to revel in it. Two extra large Kroeschel boilers do the heating work in an entirely satisfactory manner.

The difficulty in getting anything like an adequate supply of cow manure finally became so great that Mr. Owen added a dairy of sixty fine cows to the establishment and every pound of the manure from this herd is used in the

greenhouses. The cows are fed one gallon of cotton seed meal every day of the year and the government tests show that 60% of the fertilizing value of the meal is contained in the manure. The dairy is more than self-supporting and the value of the manure so obtained can not be overestimated in an establishment like this.

J. L. Dillon, Bloomsburg, Pa.

In one of the most beautiful towns of Pennsylvania is located the greenhouse plant of J. L. Dillon. This establishment is and has been noted all over the country for many years; in fact, ever since first started by the late John L. Dillon, who was so favorably known by the trade and those attending the S. A. F. conventions a few years ago, for the excellence of the stock which it produces. The area of the glass is about 127,000 square feet and while a small amount of retail business is carried on the bulk of the output is disposed of at wholesale, the cut flowers being shipped to the adjoining cities and the young stock which is so extensively grown, and for which this establishment has become so favorably known, is forwarded to all parts of the country. In cut flowers, while roses and carnations are the main crop, yet a general line of all florists' flowers are grown and callas, lilies, violets, stevia, smilax, and asparagus are produced and sold.

Nine houses, covering 63,000 square feet, are planted to roses containing 20,000 plants, which are in fine condition, showing excellent culture and producing A 1 stock. The following varieties and the quantities of each planted are, Brides, 4,500; Bridesmaid, 5,500; white Killarney, 1,800; Killarney, 1,600; Richmond, 1,800; My Maryland, 1,800; Perles, 1,000; American Beauty, 700, and other varieties noted were Mrs. Jardine, Chatenay, Sunrise, Enchanter, Kaiserin, and Golden Gate. Nine houses

T. G. OWEN'S GREENHOUSE PLANT AT COLUMBUS, MISS.

MARKET GARDENERS' BANQUET, GIVEN SEPTEMBER 28, AT GRAND RAPIDS, MICH.

with an area of 40,000 square feet are planted to fine healthy plants of carnations, some 40,000 in all, and are beginning to produce a high grade product. All the standard varieties are grown, including Enchantress, White Enchantress, Rose Pink Enchantress, Winsor White Perfection, Beacon, Lady Bountiful, Queen Louise, Robert Craig, Mrs. Lawson, White Lawson, Admiration, Canary Bird, Apple Blossom, Jessica, Buttercup, Eldorado, Golden Beauty, Mrs. M. A. Patten, Flamingo, O. P. Bassett, Victory, Pres. Roosevelt, and Harlowarden.

In the propagation of young stock of all kinds, this is one of the leading houses of the trade, and large shipments are made all over the country in the season. They are the largest growers of verbenas in the world, 175,000 rooted cuttings are sold direct from the sand and 50,000 are disposed of from 2½ in pots. The propagation of other lines of stock are 100,000 roses, 100,000 carnations, 4,000 geraniums and large quantities of coleus, alternantheras, salvias, pansies, cannas, ageratum and alyssum. Special attention is paid to the growing of carnations in the field which are sold to the florists of the different states in the fall.

Since the death of Mr. Dillon the business has been ably conducted by Mrs. J. L. Dillon and her son, who is a graduate of Penn State College, has taken charge of the roses and carnations, and the condition of the stock is certainly a great compliment to his ability.

POUGHKEEPSIE, N. Y.—An illustrated lecture on orchids will be given at the Opera House by Dr. Shattuck October 21. Competent judges say the pictures used in this lecture are of unusual merit.

THE CARNATION.

Cultural Notes.

Cooler weather may be expected now, and as the night temperatures fall to 50 or lower, both growth and flowers in the carnation houses will improve, and there is less liability to loss from stem rot, for warmth and humidity are contributors to the spread of this much dreaded disease. A dry season, such as this has been, has its disadvantages for the carnation grower, but the disadvantages are probably less than those encountered in a season of heavy rainfall, for the latter encourages a soft and sappy growth in the plants, and plants of such a character are much more likely to suffer from fungoid diseases. In addition to this, the sappy plant does not recover as readily after planting in, so taking all things into consideration the hard plant lifted from a dry field stands a better chance of making progress than does the heavier plant from wet ground. But after the red spiders and thrips that have been brought in from the field have been overcome by means of syringing, spraying and fumigating with the various insecticides, the plants will begin to do something towards paying their board and lodging.

Soon there will be cause for a little fireheat in the pipes, it being very doubtful economy to postpone starting the fires until the houses reach a dangerously low temperature. When it becomes necessary to shut down the ventilators in order to maintain the houses at 50 degrees at night, it is much better to have a slow fire, for shutting down will cause too much condensation on the plants and flowers.

Syringing frequently on bright days will still be needed to prevent red spiders from gaining ground, but this

operation should be completed before noon, else it will be impossible to get the foliage dry before night, for the days are shortening rapidly. Aphis is quite likely to appear at this season, and soon ruins either buds or foliage when permitted to remain, and this brings to mind the necessity for regular spraying or fumigating with nicotine. A mild dose of nicotine given weekly will usually keep down these pests, though it may sometimes be needful to repeat the treatment on two successive evenings if the insects have been allowed to get headway.

It is scarcely necessary to say that the weeds should always be kept down, and the surface of the soil kept open by frequent shallow cultivations, in order that the roots may get the air they need. Tucking in and disbudding occupy much time from this time forward, but these are parts of the regular routine that must be observed if one wishes to have straight stems and good flowers, and quality counts for much in the market returns, there being seldom a scarcity of medium to poor grades, but not often too many of first quality flowers to supply the discriminating buyers.

Of course the stems are still comparatively short, the early growths being generally defective in this particular, but there is naturally much difference in varieties in this particular characteristic, those of the Lawson type being usually short, while those of the Enchantress group are longer, and Pink Delight throws a good stem at almost any season. The Enchantress family are still bread-winners for many growers, while Beacon occupies a prominent place among the scarlets. Mrs. Ward promises well to many of those who invested in this handsome variety, but Victory does not justify its name in many places, showing a decided loss of

constitution. The various novelties will make more noise later in the season, or rather their promoters will, and we shall all possibly know more about them when the great show takes place in Boston next spring, but at this time it is far too soon to criticize new carnations, even though we were given to public criticism. W. H. TAPLIN.

Carnations Diseased.

ED. AMERICAN FLORIST:

Please tell me what is the matter with my carnations. The leaves are turning dry from the bottom upward. The disease starts at the tips of the leaves. A good many of the young shoots turn white and die when three inches high. They have been planted about a month and were very fine plants in the field. They do not seem to have grown any since planted. The Enchantress plants seem to be worse than White Enchantress. White Perfection does not seem to be affected.

Missouri. W. J. N.

The shoots upon arrival were very much withered up but so far as I could tell from the specimens sent it looked very much as though the plants are affected by dry plant rot though the variety Enchantress is one that is very rarely affected by this disease. It would have been easier to determine the trouble if a plant, including the roots, had been submitted. It does not seem clear to me why the young shoots should turn white and die when three inches long. This would indicate that there is something wrong with the roots. They are either being burned with too much manure or through being allowed to get over dry. The fact of the tips of the leaves being affected first would also indicate an over supply of manure in the soil.

C. W. JOHNSON

Carnation Propagation.

ED. AMERICAN FLORIST:

I have a 30-foot house planted to carnations and wish to use a part of one bed for rooting carnation cuttings. It is a 3-foot bed, on south side, has two 1½-inch steam pipes underneath. Please let me know through the columns of your valued paper whether this will give satisfactory results.

A. GREEN HORN.

If the bed is eighteen inches or more away from the glass it will answer the purpose for propagating. When the cuttings are too close to the glass they are likely to get chilled and do not get enough air. Two ¾-inch steam pipes underneath the bed is not any too much and may not be enough but an increased bottom heat can be attained by tacking some sacks to the bottom of the bench and letting them hang to the ground. It will be necessary to provide for a bottom heat of 56 degrees.

C. W. JOHNSON.

Carnation Yield.

ED. AMERICAN FLORIST.—

How many carnations can I cut from about 300 plants daily? C. S.

The number of blooms obtainable from a certain number of plants is very difficult to answer as so much is dependent upon the plant to start with and the culture throughout the year and different varieties are more or less productive. Growers who have kept

actual account of the cut report from 15 to 50 blooms per plant for the entire year. W.

THE ROSE.

Cultural Notes.

At this writing, early October, we are having a cold rainy spell, with the thermometer registering 48° to 50° at night; this gives the rose grower a fair chance to even up the mildew proposition, providing steam heat is being used in the rose houses. We find running one coil well painted with sulphur and carrying two or three inches of air through the night, keeping the temperature in all of the houses at about 60° has improved the plants wonderfully in a short time. The extremely hot weather of the last week in September with rather cool nights (hardly cool enough to start the fires) had a tendency to weaken the plants somewhat owing to a little too extreme changes in the temperature. However, when the temperature (owing to cooler weather) can be kept very near normal, what we consider the danger point is about over, and within a week or ten days shipments should show marked improvement.

It will be advisable in order to have a fair cut for the Christmas holidays to use a certain amount of judgment in pinching back some of the growth so as to come in somewhere around December 18 or 20 with some good stock. The Killarneys when pinched about October 20 usually give good cutting for Christmas. There isn't a great deal of difference in the timing of any of the present commercial varieties, although we find that Beauties sometime when cut about October 15 to 18, with good canes, usually produce another crop at about the right time for the holidays.

Now I don't mean to give the impression that a full crop should be the aim of the grower at the time mentioned, for this in our estimation doesn't do the plants any good at any time but during the chrysanthemum season which is beginning to be well under way by November 1; we usually can snip off quite a number of the shorter-stemmed growth letting only the better grades bloom through November, and not too many of any kind. Killarney and White Killarney can be handled almost as the grower decides as to timing for a crop, with Richmond a close second. My Maryland being a little more sensitive, we think might easily be set back several days if the temperature should drop a little low. We prefer a temperature of 62° to 64° at night for the latter and about 78° to 80° day temperature with air on clear days. Cloudy days, about 72°. We usually keep a crack of air on all the houses until extreme cold weather is at hand, with the result that we have better foliage, stronger growth and good full buds, with nothing to be desired as to color. Richmond and Killarney usually do well at about the same temperature, a normal temperature for these varieties being 56° to 58° at night, clear days, with air 75°, cloudy 68° to 70°. With Beauties two degrees warmer all around. Of course at this time of the year a higher temperature, say of two or three degrees, would be advisable, gradually working

them to normal by the time steady firing begins.

If one would be successful with roses there are two things that must be right, the temperature and the amount of air, and the way the air is given, of course. There are many details (all important) that must be attended to. But an even night temperature must be maintained, and the houses should be ventilated by gradually increasing the air during the forenoon and closing the ventilators down in the afternoon. Very often when the rose houses get a little too warm the grower lacking experience gets a little alarmed and to cool the houses turns on a lot of air. This is about the worst thing we know of for the plants. In this instance stick to a little lift of the sash at intervals of fifteen minutes or so until the temperature recedes to normal. It may be well to explain while referring to temperature that when we state that a certain variety requires a temperature of 75° on clear days with air in the houses we mean this for a maximum temperature, preferring to increase the temperature gradually and regulating it with the handling of the ventilators if a gradual rise of the temperature brings the house up to 75° around 10 or 11 o'clock in the morning this will be about right, reducing gradually until at night we have the thermometer just a little above normal at sundown. Another suggestion is in order, and that is never to syringe until the temperature reaches 70° in any rose house.

The solid beds may not require quite as much water now as they did several weeks ago, whereas the raised benches may require more, according to the root action. Richmond being a very strong feeder, will usually (if planted on raised benches) require a light mulch, half soil and half manure, just enough to protect the roots, which with this rose usually come to the surface and must necessarily be given a little more feeding on top. American Beauties are free rooters and they also require extra feeding. We prefer placing the manure in ridges between the rows in the early fall, using cow manure rather fresh. It can be washed with the hose when watering and rubbed down gradually from time to time until it is evenly distributed over the beds, care being taken not to put the manure on too heavy as a rule. The other varieties, Killarney, My Maryland, etc., can get along with a light top dressing of well-rotted cow manure, or a little finely pulverized sheep manure. Especially is this true if the soil is of the best. However, the soil may be light and in this case it may require extra feeding. Plants that require extra feeding will show a ripened appearance, the foliage will get rather harsh and the growth in a tender stage will be of a deeper color and shorter, and will loose that go-ahead, vigorous appearance so much to be desired.

Keep the plants clean, well tied and the spiders down by careful syringing, and fumigate from now on regularly, the fumigating papers being preferred, as it does the work without injury to flowers or plants. Six pieces to every 2,000 square feet of glass used about every ten days as a preventive will make the green fly hunt the high places. A little sulphur applied on the pipes regularly will keep the mildew down easily. E.

Chrysanthemum Unaka.

The long sought early October pink chrysanthemum. Buds selected August 1 to 15 give fully developed blooms October 1 to 15 and are superior to earlier or later buds when color and fullness are considered. A broad petalled Japanese incurved of great depth and size for so early a variety. In color is intermediate between Rosiere and Wm. Duckham. Exceptionally strong stem and dark green foliage. Height four feet from early May planting. Being an October Frost seedling has a strong constitution, ensuring ease of culture and is a very free propagator. Awarded 90 points, commercial scale by the Cincinnati committee, October 9, 1910. Elmer D. Smith & Co., Adrian, Mich., sponsors.

Albany, N. Y.

Vases formed an important part of the discussion of the flower show committee at its last meeting held preparatory to the show scheduled for November 10-12, in the state armory. Letters were read by the secretary from two firms relative to prices on glass vases suitable for carnations and instructions were given by Chairman Frederick Goldring to write for quotations on 125 vases of larger size suitable for roses and chrysanthemums. Samuel Goldring, chairman of the committee on decorations, reported that it would cost about \$20 more to decorate the hall this year than last, because more space will be taken for the exhibition. The decoration committee was instructed to go ahead with the work. It was decided to have the secretary obtain lists of private gardeners on estates in Lenox, Mass., and other nearby places, as well as similar lists of growers of American Beauties near New York and Philadelphia, with the object of inviting them to make exhibits in classes of interest to them. Several matters relating to accessories for the show, names and qualifications of judges, although discussed at some length, were left open until the next meeting.

NOTES.

George C. Harley, president of the Dobler Brewing Company, has let to the Lord & Burnham Co., New York, the contract for a conservatory to be built at his home, 994 Madison avenue. The building will run east and west and will be 18 x 75 feet. A palm house with roof 18 feet high to face toward Madison avenue will be a feature. In the rear of the building will be a potting shed and storage for vegetables will be provided beneath the palm house. The whole is to be completed by December 1.

Weddings with elaborate decorative features have kept a number of local florists very busy the past two weeks. Especially notable was the wedding of F. Bailey Vanderhoef of New York, and Miss Cornelia Young on October 15, in the Cathedral of All Saints. The church decorations were by Eyres and that of the house of the bride's parents by Danker.

The Rosery, 76 Maiden Lane, was closed two or three days last week on account of the death of Mrs. Catherine, mother of Edward F. Meany, one of the proprietors. Mr. Meany has the sympathy of the trade in his loss.

Washington.

During the latter part of last week the florists were literally overshadowed by the bird-men—excuse the hyphen—but Mr. Graham-White, who was the star aviator, also runs a hyphen in his name. Even such a steady going florist as W. F. Gude took part in the general excitement. On October 14

Mr. Graham-White, who by the way is an Englishman, soared around the Washington monument and various other points of interest and landed "as gracefully as a bird," so the truthful reporters say, near the steps of the White House. Unfortunately, President Taft was absent, but Admiral Dewey and other notables were present to bid him welcome to our city. Mr. Graham-White shook their hands, lighted a cigarette—all aviators seem to smoke cigarettes, and proceeded to hunt up a satisfying lunch. In the meantime, the retail florists were cooling their heels on their doorsteps and trying to figure out the connection between aviation and floriculture. But, it was a great event. Business, as a rule, has been rather slow, the weather has been warm and there is an abundance of flowers and many of them are good for this season. With chrysanthemums beginning to arrive freely and white dahlias and cosmos in superabundance, there is danger of a glut unless a timely frost shortens the supply. Roses and carnations are

of the committee in charge of the arrangements for the show, the other members being George H. Cooke, John Robertson, W. W. Kimmel, Elmer Mayberry, O. A. C. Oemhler and J. L. Carberry. The personnel of the committee is a sufficient guarantee that it will be a fine show.

There are many good words for Frederick W. Kramer on account of the reception he gave the Florists' Club at his store on the night of October 4. All who know Mr. Kramer agree that he never does anything by halves, and on that occasion he made no exception to his invariable rule. The store and conservatory were beautifully decorated and abundant refreshments were served. There was also a fine musical programme, all being furnished by Mr. Kramer.

J. R. Freeman, who in addition to his retail store, conducts extensive greenhouses, is showing excellent stock. Mr. Freeman has recently been seriously ill, but it is gratifying to note that he is again on his feet and attending to business. He is another of

**CHRYSANTHEMUM UNAKA.**

plentiful and good for the season, but nobody can tell what Christmas may bring forth.

NOTES.

J. H. Small & Sons are showing very fine stock in cut flowers and plants at their store, and as usual at this season of the year, their business is on the boom. Having another store in New York, this firm is finely equipped for filling orders on short notice in any part of the country. This firm, it may be here stated, has a notable record, reaching back for nearly sixty years and it has always kept a little ahead of the times. It has always catered to the best class of customers and has done much to elevate the business.

Active preparations are being made for the flower show, to be held at Convention Hall, October 24-November 6. It is stated that a number of very striking and novel features will be seen. William F. Gude is chairman

of the older generation of florists who has always stood for the best things in the business.

The Florists' Exchange, the pioneer wholesale mart of this city, has in a short time built up a good shipping business. At present they are paying particular attention to orchids, chrysanthemums and carnations. Albert Schnell, the efficient manager, is always on the job.

S. F. Holland, well and favorably known in the retail trade of this city, has recently opened a nice store at 3209 Fourteenth street, N. W. But a few years ago, this location was considered to be out in the suburbs, but it is now a fashionable residential section.

George H. Cooke recently received a large shipment of the noted celosias "Pride of Castle Gould," and is much pleased with the favor shown them by his customers.

THE fronds of *Polypodium aureum* Mandaianum are peculiarly appropriate and most effective for use in large vases of chrysanthemum blooms.

Personal.

August • Poehlmann will celebrate his forty-first birthday October 21.

Prizes for Home Gardens.

The offering of prizes for home gardens, is now receiving considerable attention in many cities for the committees on awards are now completing their work. These premiums are offered by civic organizations, business firms and individuals for general improvement, best gardens and window boxes, and the high praise that is given the results in the public press and by those interested in the movement is proof that nothing beautifies our homes and cities more than horticulture and is more easily and readily appreciated. The florist should certainly give this movement his hearty approval and do all in his power to make the world more beautiful.

THE railway gardeners at the recent Boston meeting protested against the practice of owners of huge sign boards, who, when they secure a location for an "artistic" advertisement of somebody's pills or salve, erect their boards as near as possible to the beauty spots made by the landscape men. They intend to place their protest before the advertising companies and the various national and municipal civic organizations.

Chrysanthemum Society of America.

WORK OF COMMITTEES.

Cincinnati, October 8.—Unaka, satiny pink Japanese incurred; scored 90 points, commercial scale, October 15.—Chrysolora yellow Japanese incurred; scored 94 points, commercial scale. Both exhibited by Elmer D. Smith & Co., Adrian, Mich.

Philadelphia, October 13.—Sport of Glory of Pacific, white Japanese reflexed; scored 86 points, commercial scale; exhibited by H. Weber & Sons Co., Oakland, Md.

New York, October 15.—Chrysolora, yellow Japanese incurred; scored 93 points, commercial scale and 87 points, exhibition scale; exhibited by Elmer D. Smith & Co., Adrian, Mich.

Massachusetts Agricultural College.

The short course in floriculture at this college this year promises to be one of the most successful ever given. The course is of twelve weeks during January, February and March, and is intended to reach not only the students but practical florists as well. Tuition is free and the only expenses are for board, text-books and traveling expenses incidental to observation. The value of the course lies in the fact that all branches of floriculture are taught by specialists and a large number of florists should avail themselves of this opportunity at a small expense. Some of the topics to be considered are greenhouse construction, furnishings and equipment, florists' crops and florists' trade. Saturdays will be devoted to visiting practical greenhouses for observation. In addition to the lectures by the college professors, talks will be given by the following practical men: R. O. King of the King Construction Co. and representatives of Lord and Burnham and Hitchings & Co.; W. H. Elliott, Eber Holmes, M. A. Patten, C. W. Ward, C. H. Totty, W. N. Craig, E. J. Canning, Edward McMullen and J. Otto Thilow. Men and women from any state are eligible for this course, and additional information can be procured by addressing Prof. E. A. White, Massachusetts Agricultural College, Amherst, Mass.

Advance in Floriculture.

A writer in the Philadelphia Public Ledger, in commenting upon the development and expansion of the various trades and industries in the last 75 years states that this has very naturally reflected in the business of the florists and says: "In 1836, when the first number of this paper was published, the florists were a comparatively small figure in the community, and their shops, while delightfully pretty in that old-fashioned, modest way, when the favorite plants and flowers were different from those now in vogue, and when everybody had his own garden, where the moss roses and the daffodils

and the hyacinths grew, and in whose windows in the winter scarlet geraniums and other varieties were cheerfully attended to, did not compare favorably with the modern establishments.

But now the modest trade has expanded to an important business, and has reached a stage where it may be said to be an industry. The people as a whole are in better circumstances than they were 75 years ago. They are living a newer kind of life, in which things formerly deemed a luxury are now taken as a matter of course. There are frequent large entertainments, almost any one of which would have given food for tea-table conversation for a whole year three generations ago. But now they are so very common that, outside of a passing paragraph in the social columns of the daily newspapers, they attract little attention.

In consequence of this development and the change in the manners, the demand for the best flowers and for novelties in floral decoration for dinners or for other social entertainments, has increased until the business of providing for it has become one of great and serious importance. The florists of Philadelphia are known throughout a large radius around the city for the excellence of the taste they display in selecting their flowers and for the enterprise they show in providing novelties and producing out of season those delightful blooms that sometimes make the success of a social entertainment.

Where thousands of dollars a year were spent on flowers in 1836, the annual expenditure for flowers in Philadelphia now is well up above the million mark.

Coming Exhibitions.

(Secretaries are requested to supply any omissions from this list and to correct any dates that may have been altered since the last advice.)

Albany, N. Y., November 10-12, 1910.—Second annual flower show, Albany Florists' Club, State Armory. Frederick Goldring, chairman show committee.

Baltimore, Md., December 1-2, 1910.—Fall exhibition, Maryland Horticultural Society, Fifth Regiment Armory. C. P. Close, secretary, College Park, Md.

Chicago.

While reports of frost and cool weather are being received from different sections of the country, this city still basks in ideal summer weather. Sunday the thermometer registered 86°, and the parks took on a real summer aspect, being thronged with people, vast numbers of whom were sitting and lying on the grass. This long continued warm spell is making itself felt upon the market but the high grade which the flowers maintain under the existing conditions is really wonderful. While chrysanthemums have been on the market now for more than a month, this week practically marked the advent of the Queen of Autumn, for they are being received in large quantities in all forms, from the lowly pompon to the large majestic blooms, and in all the various shades and colors, and for displays have pushed the other flowers aside and reign supreme. In yellows, Robert Halliday is the best now on the market, and are better than in years past, while Crocus will soon be in, to be followed by Col. D. Appleton; in whites, Virginia Poehlmann is very fine and Mrs. Robinson and October Frost are to be seen; in pinks, Clementine Touset, Rosiere, Glory of the Pacific and Pacific Supreme are the varieties offered. The warm weather has caused a drop in the demand for chrysanthemums, as well as all other flowers. The rose cut has shortened up a little but the quality is as good as ever and there appears to be enough to fill all demands. American Beauty is magnificent and elegant stock is the rule, but short stemmed flowers are not over plentiful. Killarneys both pink and white are of exceedingly high grade and find an appreciative market, and other varieties are of equally good quality. Carnations are very good and excellent blooms can be obtained. Orchids are quite plentiful, both in number and variety, and are greatly admired by the buyers, and are a fine attraction at the stores. Lilies and Lily of the Valley are not overabundant but the quality is of the best. Sweet peas have made their appearance, and find a fair demand, but violets are extremely slow. Beautiful gardenias are now to be obtained and are selected over the other flowers for personal adornment. Cosmos and dahlias are the only remaining outdoor stock to be seen, and the former is in beautiful shape, but the dahlias

seem to have passed their glorious stage. The greens are fine but the use of autumn foliage has shortened the demand considerably. The outlook now is, that as soon as the weather turns cold there will be a tremendous shortage of all stock. While the wholesale houses all made a gain in September, it is being rapidly lost by the long continued spell of warm weather.

FLORISTS' CLUB COMMITTEES.

President Asmus has appointed the following flower committees: Flower booth, H. E. Philpott, chairman; H. D. Schiller, H. N. Bruns, F. W. Pasternick, W. H. Kidwell, A. I. Simons and James Curran; E. F. Winterston treasurer. Refreshments, Walter M. Scott, chairman; T. E. Waters and T. C. Yarnall; E. F. Winterston, treasurer. Banquet, A. C. Kohlbrand, chairman; W. N. Rudd, Alex. Henderson, Fred Lautenschlager and D. A. Robertson.

NOTES.

The Wholesale Florists' Employees' Association will give their fifth annual reception and ball October 25 at Columbus Hall, 1527 North Clark street. J. E. Enders is the manager and has nearly completed all the arrangements. The music will be furnished by Fitzgerald's orchestra, whose reputation as musicians is so well known. Tickets can be procured from the manager at Poehlmann Bros. Co., or from any of the employees at the leading wholesale houses. A royal good time is promised to all who attend.

The chrysanthemums are coming in to Poehlmann's Bros. Co. in fine shape, elegant Robert Hallidays, Mrs. Robinsons, Rosieres, Clementine Toussets and Virginia Poehlmanns, some of which are of a quality fit to decorate an exhibition table. The roses are in extra fine quality, with American Beauties in the lead, closely followed by elegant Killarneys and other varieties. Cattleya and lily of the valley of exceptionally good grade, and large, beautiful lilies of fine substance, and plenty of all kinds of stock to fill any order.

A very unfortunate accident happened at the Peter Reinberg establishment on Robey street, October 14, when Peter Knapp, one of the oldest employees, while unloading a stone car was instantly killed. He was a trusted employee of the concern, having worked for them for seventeen years. At the time of the accident Mr. Reinberg was at the houses and was the first to reach the unfortunate

man. The funeral was held from his home October 16, and a widow and four children mourn his loss.

Many of the florists are taking advantage of the extraordinary offers of Boston ferns and other decorative stock which the George Wittbold Co. are making. The stock is all in splendid condition, and is being sold rapidly. The shipping and delivery office has been moved to the southeast corner of the establishment in order to facilitate the work and a Howe platform scale has been installed. F. W. Nelson, manager of the retail store, reports business as exceptionally good, with a great deal of funeral work and many weddings.

Bassett & Washburn are cutting a large quantity of chrysanthemums and the Robert Hallidays that are being received by this firm are as fine a grade as were ever seen in this market, and the Virginia Poehlmanns are of enormous size and with a finish equal to any we have ever seen. We also noticed an excellent quality of fine long stemmed sweet peas, two houses are devoted to these, one of which is now in bloom and the other will follow in about two weeks.

At Peter Reinberg's we noticed that among the large shipments of all the leading varieties of roses that their Richmonds and American Beauties were of exceptionally good quality, the latter being of splendid color on long stems with luxuriant foliage, and as good a grade as were being offered in the market. Tim Matchen reports that notwithstanding the warm weather business has been very good and shipping trade has been holding up remarkably well.

A. H. Budlong, wife and son, and Mrs. J. A. Budlong constituted a party of four which participated in a two-week tour of the east in an automobile, returning October 10. They visited Cleveland, Buffalo and Niagara Falls, and thoroughly enjoyed the beautiful scenery of the country through which they passed. The weather was ideal, the roads excellent, and the whole trip was made without a mishap of any kind or any unpleasant feature.

The Raedlein Basket Co., 713 Milwaukee avenue, received a shipment of 11 large cases of florists' baskets on October 14. Miss Edna Kindler, who recently returned from Germany, attends to the office work, while Mrs. A. Kindler and G. Raedlein give their personal attention to the many orders

which are being constantly received. This firm has recently purchased a Buick automobile and Curtis Kindler is filling the position of chauffeur.

The Chicago Carnation Co. is now receiving large shipments of chrysanthemums. The carnation houses at Joliet are in fine shape and the quality of stock is of the best. We noticed hanging on the wall the ribbons won at the state fair, six firsts, one second and one third. They have 41,000 plants in the houses, which cover an area of 150,000 square feet. Consignments of roses are now being received daily.

H. Van Gelder of Percy Jones' is receiving large quantities of white, pink and yellow chrysanthemums of an exceptionally good quality. Mr. Van Gelder has acquired several new consignors and is now receiving the output of 30 growers, 17 of whom have extra large places. October 15 was a banner day and the amount of business transacted was greater than that of last Christmas.

Buchbinder Bros., 518 Milwaukee avenue, manufacturers and dealers in store and office fixtures, recently received a shipment of 25 ice boxes and are making some very tempting offers to the trade. Several florists have already taken advantage of the opportunity to exchange their old fixtures for new, and are well pleased with the treatment extended by this concern.

C. W. McKellar is headquarters for exotics; orchids in great variety are received from both at home and abroad; Lily of the Valley of extra good quality, and beautiful gardenias, and to set them off well the handsome Adiantum Farleyense is always on hand. Mr. McKellar returned October 16 from a business trip to the southern part of the state.

Hoerber Bros. are receiving a large quantity of Bride, Richmond, Jardine, American Beauty and White and Pink

Killarney roses, the latter being of exceptionally good quality. Chrysanthemums are arriving in large quantities and move readily. This firm is filling a large number of orders for florists' greens, a shipment having arrived this week.

The chrysanthemums and carnations at the Mount Greenwood cemetery greenhouses are in splendid condition and Foreman Johnson should have

some prize-winning blooms and plants for the exhibition. The seedling carnations are extremely interesting and it looked as if there were some that later may make quite a noise.

Kyle & Foerster this week are offering large quantities of white, yellow and pink chrysanthemums of exceptionally good quality. We noticed a very good grade of roses and carnations, the demand for the latter being exceed-

Store, 51 Wabash Avenue, **Chicago**

was filed in probate October 13, the personal property and real estate amounting to \$57,000.

The roses, carnations and sweet peas at the J. B. Deamud Co. are of fine grade and some very handsome fancy chrysanthemums are noted at this store. Wild smilax is arriving in a much finer condition than for a number of years past.

F. A. Benthley of Kyle & Foerster's, received word October 16 that a nine-pound baby boy had gladdened the household of his son Frank at Grand Rapids, Mich. Frank is foreman at the Crabb & Hunter establishment of that city.

Zech & Mann are this week offering an excellent grade of chrysanthemums, roses and carnations, the latter being of exceptionally good quality. Sweet peas have made their appearance and sell readily at good market prices.

L. Leveson, 678 North Clark street, has been very busy the past week with wedding and funeral work. Mr. Leveson is carrying on the business of Palace Floral Co., formerly conducted by E. R. Armstrong.

J. A. Budlong is receiving a large quantity of white, pink and yellow chrysanthemums and an excellent grade of My Maryland, Richmond, White and Pink Killarney and American Beauty roses.

J. W. Starrett, who has charge of the floral decorations at the Hotel La Salle, had a very elaborate wedding decoration last week, and another large decoration for October 19.

The Chicago Rose Co. is this week offering a very good grade of Bride and Bridesmaid roses. Sweet peas have made their appearance and find a customer at a very early hour.

Charles Maier recently opened a store at 3223 Armitage avenue and is now prepared to fill all orders for anything in the cut flower line.

Subject to Market Changes.

Kennicott Bros. Co. is handling large quantities of all the different flowers of the season, sweet peas of an exceptionally good quality being among the daily arrivals.

Frank Johnson, salesman for the A. L. Randall Co., returned from a business trip to Kentucky October 16. He reports business as good and a most enjoyable trip.

Vaughan's Seed Store was a large exhibitor at the state fair held at

Springfield September 30-October 8, and was the winner of a great many premiums.

Henry Seitz, 6101 Evanston avenue, is enjoying an exceptionally good business, funeral and wedding work occupying his attention.

Carl Thomas is back with the A. L. Randall Co. for the fall and winter season.

Visitors: Paul Beyer, South Bend, Ind.; A. L. Glaser, Dubuque, Ia.

VICTORY SCHMELZ & SON,**R. 2, Sanford, Florida**

Fred Nicholas, for some time with Frank E. Rue, has resigned his position and returned to Chicago.

D. U. Augspurger & Sons have a splendid lot of cyclamens in 5-inch pots.

Henry Baer's carnations are unusually fine this season.

Detroit.

Never before within the memory of the present generation of florists, have the destructive frosts been delayed so long as this year. In many parts of this vicinity, even light frosts have not yet appeared, and as a consequence the season of out-door flowers has been prolonged to a point of great value to the trade. Usually, the period following the disappearance of the late asters until the carnations are well advanced, is most embarrassing to the retailers, who find it impossible to satisfactorily conduct trade until the advent of a sufficient stock of carnations, which is later reinforced by the influx of the Queen of Autumn. This year, happily, the situation was quite favorable, for even yet out-door flowers are freely used, to care for the increasing fall trade which is now fairly opened, and with it come the earlier chrysanthemums and enormous crops of roses, together with a daily increasing crop of carnations, which completes the supply, ample in all respects to meet the demand. The continued warm weather, however, is now deplored by all, and is regarded as being responsible for retarding, in a large measure, the volume of trade expected at this time.

The club meeting, October 17, was well attended, but only a brief business session was held, before the entertainment committee took charge and supplied all with refreshments, and after which cards and billiards

were enjoyed till a late hour. The facilities for billiard playing are regarded as an attractive feature of the club's new quarters, and many of the former absentees are expected to be regular attendants hereafter. The attractiveness of Palmer Park, and its extensive nursery attached, was deemed by many members sufficient to justify a visit by the club in a body, and Sunday, October 23, was the day designated, when as many as possible will meet at 3 o'clock p. m., at the entrance to the park, where Harry Hunter, who has charge of the nursery, will meet the boys and escort them through the place. An invitation was extended the club by the Mt. Clemens florists to visit their establishments on November 3. The invitation was gladly accepted, and the fourteenth annual outing will take place. A special car will leave Detroit, corner of Fort and Congress streets, at 9 o'clock November 3. The Toledo florists are invited to participate in the annual event that never fails to enlist the interest of nearly every member of our club.

William Dilger, for many years park superintendent of Belle Isle, will leave that position November 1. R. A. Hollister, for several years manager of Palmer Park, will succeed Mr. Dilger and Albert F. Breitmeyer, brother of Mayor Breitmeyer, will take charge of Palmer Park.

John C. Bongula, who conducted a small florist's establishment for many years on Military avenue, died October 14. The funeral was held October 17.

B. Schroeter is building a handsome residence on Helen avenue, and will occupy it before Christmas next.

Herman Klagge has the sympathy of the trade because of the loss of his wife, who died October 17.

Frank Holznagle is enjoying an outing in the hunting regions near Alpena, Mich.

Roses and Carnations
A Specialty....
WHOLESALE
GROWER OF CUT FLOWERS

Milwaukee.

The market in general is fair and this week will no doubt see the arrival of a quantity of chrysanthemums. Roses are of very good grade and quality, especially Perles, Killarneys and Richmonds. American Beauties are of a very fine grade, mostly long stems, there being a scarcity of shorter grades. Carnations are as fine as they ever have been at this season of the year and plentiful enough to fill all demands. Violets are coming in more regularly, of fine grade, and selling readily. Gladiolus and dahlias are still coming in, the latter selling well, but the former are not cleaning up as well as they have. Lilies are more plentiful and there is Lily of the Valley enough to go around. The green goods market is well supplied.

The Flower Show committee is hard at work making preparations for the show and it is now up to all who wish to compete to get busy and send in their entries early and not wait until the last minute but give the committee a show.

Nic Zweifel is cutting a nice lot of Bright Spot carnations. He has a large number planted from which to make cuttings for orders he has been taking the last year and which are quite large.

Holton & Hunkel are cutting some nice chrysanthemums of fancy varieties. They expect to cut large quantities in the next few weeks. Their roses are exceptionally fine.

J. M. Fox & Son report business good, with a large amount of funeral work. Among the designs was a casket cover of Killarney roses and Lily of the Valley.

The Bowling Club bowls regularly every Tuesday at Steinkes' alleys at the corner of Eleventh street and Prairie. All florists are invited to attend.

Edlefsen & Liediger Co. report business satisfactory. They are cutting a large quantity of chrysanthemums at their own houses.

C. C. Pollworth Co. are getting some very fancy chrysanthemums, pansies and sweet peas, which are being taken up at sight.

Currie Bros. Co. report business picking up, with a number of wedding orders in and out of the city.

Robt. Zepnick is cutting nice pansies and violets, which are handled by the C. C. Pollworth Co.

M. A. McKenney & Co. were also busy with funeral work and report business satisfactory.

Max Reitz has opened up a new store at Twentieth street and Fond du Lac avenue.

Visitors: Mr. Eschener, M. Rice & Co., Philadelphia; Miss A. Meyer, Capital City Greenhouses, Madison; E. S. Austin, Delavan. G. R.

Baltimore.

Among the best, if not the very best, managed range in the vicinity of Baltimore is that of Isaac N. Moss, Govanstown. We said range, but he has two ranges and a nursery. He grows a general stock, his roses and poinsettias being especially worthy of mention. In addition to being a good florist, Mr. Moss is a good man. We mention this because he is too modest to talk about himself and we think it is better to tell of a man's good qualities while he is alive and it can give him some satisfaction to learn that he is appreciated. As a rule, our good words and flowers are showered on our friends after they are dead.

At John Cooke's store, North Charles street, which is conducted by his amiable and capable daughters, very fine blooms of his latest rose production, Radiance, are now seen. "My Mary-

land" is also seen at its best, as it should be, in this store. Though in a locality where competition is very keen, these clever young women continue to increase their sales of cut flowers and do a large business in funeral work.

Fred C. Bauer, of Govanstown, who has built two modern houses this summer, has about the finest carnations he has ever had, the plants having been put out early and made a fine growth before they began to feel the effects of the long continued drought. This seems to be the general experience, while plants set out late made very poor growth.

Albert G. Fiedler, 902 South Charles street, has a fine store and at present is having a very successful sale of ferns and other seasonable foliage plants. In addition to this, he has constant orders for funeral work, which, it may be stated, he executes in the most tasteful and intelligent manner.

Harry J. Quick, who grows for the wholesale trade, is making a fine showing in pot plants. Incidentally, he is improving his houses.

Buffalo.

Trade conditions are fair, with weather all that can be expected for October. Cosmos, the flower that is so good for a decoration to help out the chrysanthemums, is coming in good shape. A good pink, white and yellow chrysanthemum is coming in now, Monrovia, Glory of the Pacific and a good white, which are a great help for this particular time. Roses show improvement and orchids are good. Several weddings of medium proportion gave the florists some work.

NOTES.

S. A. Anderson had a very attractive window last week, with a canary bird

and gold fish, in one bowl. It was unique and very much admired.

A well attended meeting on Tuesday last with grave Chairman Kasting in the chair. The different florists picked out their space and after all was explained by Chairman McClure a good arrangement was perfected. The enthusiasm of the florists is beyond all expectations and from the present outlook the flower show will be a great success. All seem to be imbued with the fact that a successful flower show will help all, and do more than ever to encourage the sale of flowers.

BISON.

Cleveland.

Business has been fairly good the past week, considering the centennial celebration. Dahlias are arriving in vast quantities, all colors and sizes, and sell exceptionally well; chrysanthemums also in larger numbers but are as yet hardly equal to the demand. Fine October Frost and Golden Glow, besides many smaller varieties, selling on sight. Carnations are in better supply and the demand good, and smilax is having a good call. White and pink roses are exceptionally good, and the call for these and American Beauties is all that could be desired, and the quality is improving daily. Cosmos, both pink and white, make good window displays. Lily of the Valley is plentiful with fair demand, and some very fine orchids (Cattleya Labiata) arrive daily. Swainsona is in good demand and all kinds of green are plentiful. Some very artistic windows were seen the past week in honor of the Cuyahoga County Centennial.

NOTES.

At the automobile parade at the centennial there were nearly 1,000 automobiles in line, of which a large number were decorated with flowers and greens. One automobile trimmed in lavender silk had nearly 100 orchids besides many artificial ones. It was the most artistic in the parade and was awarded second prize. The car belonged to the Rambler Automobile

Co. and was decorated by Mrs. E. G. Wilson. C. M. Wagner entered his car in the parade, which, although it did not take a prize, was a fine work of art. Bramley & Son entered their car and American Beauties were used profusely in its decoration.

A number of florists from around Cleveland visited here during centennial week and called on the various wholesale houses.

M. Boyd, formerly of Cleveland and now located in Detroit, visited friends in and around the city the past week.

John Blechschmitt is sending in the first of his sweet peas, and the quality is exceptionally fine.

C. F. B.

Illinois State Fair.

The following awards were made for plants at the Illinois state fair, Springfield, September 30 to October 8. The awards for cut flowers and floral designs appeared in last week's issue, that of October 15, page 585:

Philadelphia.**STOCK ABUNDANT**

Again last week the temperature took an upward turn and the general comment among the florists was that it was too warm for good business. Chrysanthemums are now arriving quite freely and white dahlias and cosmos yet in abundance, there is a wealth of beautiful flowers, but the practical dealers would be satisfied if they could see fewer flowers and more money. In addition to the foregoing orchids, roses and carnations of excellent quality are seen. It would appear that the long spell of clear weather has given roses and carnations a great start, so there is good grounds for the hope that there will be good crops when the busy, if belated, season of activity does arrive. A veteran in the business once stated that "the florists are a hopeful lot," and the florists of this city are no exception to the rule.

October 17.—There is more stock arriving than can be conveniently handled. The warm weather continues and is having a bad effect on chrysanthemums and violets, neither of which last long under present weather conditions.

NOTES.

One of the finest show windows seen here of late was recently noted at the store of the Pennock Bros. Notable, was a great display of orchids, the new double Killarney rose was also prominent. There were many fine chrysanthemums, gardenias and minor flowers, the whole being most artistically arranged in connection with pot ferns and other foliage plants and suitable cut green.

The Leo Niessen Co. is showing an exceptionally fine quality of orchids, American Beauty roses, chrysanthemums and Lily of the Valley. The business of this firm is constantly increasing, and if they keep up the present gait, their store will soon be the busiest wholesale mart of Philadelphia.

Our esteemed cousin, George Faulkner, after having his store finely painted and decorated, is now showing the best of everything in flowers.

H. Bayersdorfer & Co. have just received a large consignment of imperial china flower baskets and fern dishes and the display is very striking and beautiful. Among the many visiting customers at their store last week were Miss Lena Held, of Baltimore, and Mrs. J. Hague, of Reading.

Miss Jessie Drew Bear, who manages the London Flower Shop, Ltd., at 1609 Chestnut street, says that she is much encouraged with the outlook for business. A feature of this store is a window display of genuine Scotch heather.

Miss Carrie Burton, formerly with Robert Kift, but for the greater part of the past year engaged in special work at the U. S. Botanical Gardens, Washington, D. C., has finished her work there and returned to Mr. Kift's store.

On October 16, the Philadelphia North American, in a full page illustrated article, featured the flower trade of this country, under the heading: "18,500,000 a Year for Sentiment."

Dreer's new greenhouse plant at Riverton is progressing rapidly and in another month will be ready for occupancy.

Pittsburg.

The continued summer weather is effecting business to a considerable extent. There are thousands of dahlias and gladioli still coming in, which tend to cheapen the indoor article. Chrysanthemums as a rule move very briskly at this time of the year, but this season the people do not seem to care whether they get them or not. Only the early varieties are in evidence, but they are very much so. Lilies continue fairly active. Roses are still rather slow, while the demand for carnation, Lily of the Valley and violets is good.

NOTES.

At Schenley Park, Foreman Jones expects to have at least one house of chrysanthemums on exhibition next Sunday. On the following Sunday the main exhibit will take place.

Walter Breitenstein is now in the landscape business, his office being in the Oliver Building.

Gilbert Weaklin states that he is very well pleased with the amount of business transacted during his opening week.
